A Note from Your State Executive Director

The Agriculture Improvement Act of 2018 (the 2018 Farm Bill), signed by President Trump on Dec. 20, 2018, reauthorizes all programs administered by the Farm Service Agency and makes modifications to most of them. Most of the programs are authorized through 2023. A select few are authorized and funded indefinitely.

In these subsequent months since the signing, the rules and regulations of the programs are being finalized to achieve the directives of the Farm Bill. Additionally, software to achieve implementation of the programs is being developed and formatted. Those involved in this process have reported the complexity and detail required is substantial. Leadership must balance the demand for speed of implementation from Congress and the public, with the need to develop an adequate program which will facilitate sign up and timely delivery for our producers and our staff.

The priority to implement the dairy program is being scheduled with sign up to begin on June 17. The Missouri FSA State Office dairy and livestock specialists will be in training next week to learn 2018 Farm Bill program and software changes. Training will then continue for our county office staff in preparation for sign up. Other program sign-up dates will be announced throughout the coming months.

I have a sincere appreciation for the work ethic of our Missouri FSA employees. Several of our State Office staff have assisted national leadership with the rules and regulations process. Two staff members were chosen to assist through Leadership Fellowships.
with deployment in Washington, D.C., for 60 days. And now our entire Missouri FSA staff will prepare for 2018 Farm Bill implementation.

New Farm Bill implementation is only a portion of the workload many FSA county offices are managing, as flooding continues in counties along the Missouri and Mississippi Rivers. The Flood Recovery Assistance producer meetings held in northwest Missouri earlier this month were very well attended. Presentations were made by USDA Farm Service Agency, Natural Resources Conservation Service, Risk Management Agency, and Rural Development, as well as the Missouri Department of Agriculture, Missouri Department of Natural Resources, and the University of Missouri Extension. I am proud of the spirit of cooperation in Missouri to assist producers in need.

Best Regards,

Brent Hampy
FSA State Executive Director

**Important Dates to Remember**

Producers who plant spring oats and potatoes are reminded to report these crops to their local FSA office by **May 15, 2019**.

The deadline to certify production under the Market Facilitation Program (MFP) is **May 17, 2019**.

**May 24, 2019** is the deadline to obtain buy-up coverage for 2019 or 2020 eligible crops for which the Noninsured Crop Disaster Assistance Program (NAP) application closing date has passed.

**May 31, 2019** is the final availability date for 2018 Marketing Assistance Loans & LDPs for feed grains, upland cotton, soybeans and minor oilseeds.

**USDA Reopens Continuous CRP Signup**

USDA’s Farm Service Agency (FSA) will accept applications beginning June 3, 2019, for certain practices under the continuous Conservation Reserve Program (CRP) signup and will offer extensions for expiring CRP contracts. The 2018 Farm Bill reauthorized CRP, one of the country's largest conservation programs.

FSA stopped accepting applications last fall for the continuous CRP signup when 2014 Farm Bill authority expired. Since passage of the 2018 Farm Bill last December, Fordyce said FSA has carefully analyzed the language and determined that a limited signup prioritizing water-quality practices furthers conservation goals and makes sense for producers as FSA works to fully implement the program.

**Continuous CRP Signup**

This year’s signup will include such practices as grassed waterways, filter strips, riparian buffers, wetland restoration and others. [View a full list of practices](#) approved for this program.
Continuous signup enrollment contracts are 10 to 15 years in duration. Soil rental rates will be set at 90 percent of the existing rates. Incentive payments will not be offered for these contracts.

**Conservation Reserve Enhancement Program Signup**

FSA will also reopen signup for existing Conservation Reserve Enhancement Program (CREP) agreements. Fact sheets on current CREP agreements are available on this webpage.

**Other CRP Signup Options**

FSA will open a CRP general signup in December 2019 and a CRP Grasslands signup later.

**CRP Contract Extensions**

A one-year extension will be offered to existing CRP participants who have expiring CRP contracts of 14 years or less. Producers eligible for an extension will receive a letter describing their options.

Alternatively, producers with expiring contracts may have the option to enroll in the Transition Incentives Program, which provides two additional annual rental payments on the condition the land is sold or rented to a beginning farmer or rancher or a member of a socially disadvantaged group.

**More Information**

Producers interested in applying for continuous CRP practices, including those under existing CREP agreements, or who need an extension, should contact their USDA service center beginning June 3. To locate your local FSA office, visit www.farmers.gov. More information on CRP can be found at www.fsa.usda.gov/crp.

---

**USDA Announces March Income over Feed Cost Margin Triggers Third 2019 Dairy Safety Net Payment**

*Dairy Margin Coverage Program Sign-Up Begins June 17*

USDA’s Farm Service Agency (FSA) announced this week that the March 2019 income over feed cost margin was $8.85 per hundredweight (cwt.), triggering the third payment for dairy producers who purchase the appropriate level of coverage under the new Dairy Margin Coverage (DMC) program.

DMC, which replaces the Margin Protection Program for Dairy (MPP-Dairy), offers protection to dairy producers when the difference between the all milk price and the average feed cost (the margin) falls below a certain dollar amount selected by the producer.

The signup period for DMC opens June 17, 2019. Dairy producers who elect a DMC coverage level between $9 and $9.50 would be eligible for a payment for January, February and March 2019.

For example, a dairy operation that chooses to enroll an established production history of 3 million pounds (30,000 cwt.) and elects the $9.50 coverage level on 95 percent of production would receive $1,543.75 for March.
DMC premiums are paid annually. The calculated annual premium for coverage at $9.50 on 95 percent of a 3-million-pound production history for this example would be $4,275.

Sample calculation:
3,000,000 x 95 percent = 2,850,000/100 = 28,500 cwt. x 0.150 premium fee = $4,275

The dairy operation in the example calculation will pay $4,275 in total premium payments for all of 2019 and receive $8,170 in DMC payments for January, February and March combined. Additional payments will be made if calculated margins remain below the $9.50/cwt level.

All participants are also required to pay an annual $100 administrative fee in addition to any premium, and payments will be subject to a 6.2 percent reduction to account for federal sequestration.

Operations making a one-time election to participate in DMC through 2023 are eligible to receive a 25 percent discount on their premium for the existing margin coverage rates. For the example above, this would reduce the annual premium by $1,068.75.

About DMC

On December 20, 2018, President Trump signed into law the 2018 Farm Bill, which provides support, certainty and stability to our nation’s farmers, ranchers and land stewards by enhancing farm support programs, improving crop insurance, maintaining disaster programs and promoting and supporting voluntary conservation. FSA is committed to implementing these changes as quickly and effectively as possible, and today’s updates are part of meeting that goal.

Recently, FSA announced the availability of the DMC decision support tool as well as repayment options for producers who were enrolled in MPP-Dairy.

For DMC signup, eligibility and related dairy program information, visit the DMC webpage or contact your local USDA service center. To locate your local FSA office, visit farmers.gov/service-locator.

USDA Accepting Applications to Help Cover Producers’ Costs for Organic Certification

USDA’s Farm Service Agency (FSA) announced that organic producers and handlers can apply for federal funds to assist with the cost of receiving and maintaining organic certification through the Organic Certification Cost Share Program (OCCSP). Applications for fiscal 2019 funding are due Oct. 31, 2019.

OCCSP received continued support through the 2018 Farm Bill. It provides cost-share assistance to producers and handlers of agricultural products for the costs of obtaining or maintaining organic certification under the USDA’s National Organic Program. Eligible producers include any certified producers or handlers who have paid organic certification fees to a USDA-accredited certifying agent. Eligible expenses for cost-share reimbursement include application fees, inspection costs,
fees related to equivalency agreement and arrangement requirements, travel expenses for inspectors, user fees, sales assessments and postage.

Certified producers and handlers are eligible to receive reimbursement for up to 75 percent of certification costs each year, up to a maximum of $750 per certification scope, including crops, livestock, wild crops, handling and state organic program fees.

Opportunities for State Agencies

Today’s announcement also includes the opportunity for state agencies to apply for grant agreements to administer the OCCSP program in fiscal 2019. State agencies that establish agreements for fiscal year 2019 may be able to extend their agreements and receive additional funds to administer the program in future years.

FSA will accept applications from state agencies for fiscal year 2019 funding for cost-share assistance through May 29, 2019.

More Information

To learn more about organic certification cost share, please visit the OCCSP webpage, view the notice of funds availability on the Federal Register, or contact your FSA county office. To learn more about USDA support for organic agriculture, visit usda.gov/organic.

USDA Fruit, Vegetable and Wild Rice Planting Rules
Unchanged from Previous Farm Bill

Farm Service Agency (FSA) has announced fruit, vegetable and wild rice provisions that affect producers who intend to participate in certain programs authorized by the Agricultural Act of 2014 as amended by the Agricultural Improvement Act of 2018.

Producers who intend to participate in the Agriculture Risk Coverage (ARC) or Price Loss Coverage (PLC) programs are subject to an acre-for-acre payment reduction when fruits and nuts, vegetables or wild rice are planted on the payment acres of a farm. Payment reductions do not apply to mung beans, dry peas, lentils or chickpeas. Planting fruits, vegetables or wild rice on acres that are not considered payment acres will not result in a payment reduction. Farms that are eligible to participate in ARC/PLC but are not enrolled for a particular year may plant unlimited fruits, vegetables and wild rice for that year but will not receive ARC/PLC payments for that year. Eligibility for succeeding years is not affected.

Planting and harvesting fruits, vegetables and wild rice on ARC/PLC acreage is subject to the acre-for-acre payment reduction when those crops are planted on more than 15 percent of the base acres of a farm enrolled in ARC using the county coverage or PLC, or more than 35 percent of the base acres of a farm enrolled in ARC using the individual coverage.

Fruits, vegetables and wild rice that are planted in a double-cropping practice will not cause a payment reduction if the farm is in a double-cropping region as designated by the USDA’s Commodity Credit Corporation.
CRP Participants Must Maintain Approved Cover on Acreages Enrolled in CRP and Farm Programs

Conservation Reserve Program (CRP) participants are responsible for ensuring adequate, approved vegetative and practice cover is maintained to control erosion throughout the life of the contract after the practice has been established. Participants must also control undesirable vegetation, weeds (including noxious weeds), insects and rodents that may pose a threat to existing cover or adversely impact other landowners in the area.

All CRP maintenance activities, such as mowing, burning, disk ing and spraying, must be conducted outside the primary nesting or brood rearing season for wildlife, which for Missouri is May 1 through July 15. However, spot treatment of the acreage may be allowed during the primary nesting or brood rearing season if, left untreated, the weeds, insects or undesirable species would adversely impact the approved cover. In this instance, spot treatment is limited to the affected areas in the field and requires County Committee approval prior to beginning the spot treatment. The County Committee will consult with NRCS to determine if such activities are needed to maintain the approved cover.

Annual mowing of CRP for generic weed control, or for cosmetic purposes, is prohibited at all times.

Opportunity to Request a Referendum: Soybean Promotion, Research, and Information Program

The USDA Agricultural Marketing Service (AMS) announced that soybean producers may request a referendum on the Soybean Promotion and Research Order, as authorized under the Soybean Promotion, Research, and Consumer Information Act. Participation in the Request for Referendum is voluntary, and producers should only participate if they wish to request a referendum on the program.

The results of the Request for Referendum will be published in a notice in the Federal Register. If at least 10 percent of eligible producers, as determined by USDA, participate in the Request for Referendum, a referendum will be held within one year from that determination.

Interested soybean producers may request a referendum during a four-week period beginning on May 6 and ending May 31, 2019. Form LS-51-1, Soybean Promotion and Research Order Request for Referendum, may be downloaded online, or obtained by mail, fax, or in person from Farm Service Agency (FSA) county offices during this time.

Completed forms and supporting documentation must be returned to the appropriate county FSA office by fax or in person no later than close of business May 31, 2019, or if returned by mail, must be postmarked by midnight May 31, 2019, and received in the county FSA office by close of business on June 6, 2019.

For detailed information, including eligibility, read the full AMS announcement. To find your local office, visit www.farmers.gov.
Disaster Set-Aside (DSA) Program

FSA borrowers with farms located in designated primary or contiguous disaster areas who are unable to make their scheduled FSA loan payments should consider the Disaster Set-Aside (DSA) program.

DSA is available to producers who suffered losses as a result of a natural disaster and is intended to relieve immediate and temporary financial stress. FSA is authorized to consider setting aside the portion of a payment/s needed for the operation to continue on a viable scale.

Borrowers must have at least two years left on the term of their loan in order to qualify.

Borrowers have eight months from the date of the disaster designation to submit a complete application. The application must include a written request for DSA signed by all parties liable for the debt along with production records and financial history for the operating year in which the disaster occurred. FSA may request additional information from the borrower in order to determine eligibility.

All farm loans must be current or less than 90 days past due at the time the DSA application is complete. Borrowers may not set aside more than one installment on each loan.

The amount set-aside, including interest accrued on the principal portion of the set-aside, is due on or before the final due date of the loan.

For more information, contact your local FSA farm loan office.
