Census of Agriculture Countdown Begins for America's Farmers and Ranchers

America's farmers and ranchers will soon have the opportunity to strongly represent agriculture in their communities and industry by taking part in the 2017 Census of Agriculture. Conducted every five years by the U.S. Department of Agriculture's (USDA) National Agricultural Statistics Service (NASS), the census, to be mailed at the end of this year, is a complete count of all U.S. farms, ranches, and those who operate them.

The Census of Agriculture highlights land use and ownership, operator characteristics, production practices, income and expenditures, and other topics. The 2012 Census of Agriculture revealed

775.857.8500 x 128

District Director:

Gus Wegren
775.857.8500 x 143

Farm Loan Chief:

Carolyn Estrada
775.857.8500 x 120

Farm Loan Manager:

Daniel Ferraro
775.623.5025 x 107

Acting Farm Program Chief:

Katie Nuffer
775.623.5025 x 104

Elko FSA Office:

To find contact information for your local office go to www.fsa.usda.gov/nv

that over three million farmers operated more than two million farms, spanning over 914 million acres. This was a four percent decrease in the number of U.S. farms from the previous census in 2007. However, agriculture sales, income, and expenses increased between 2007 and 2012. This telling information and thousands of other agriculture statistics are a direct result of responses to the Census of Agriculture.

Producers who are new to farming or did not receive a Census of Agriculture in 2012 still have time to sign up to receive the 2017 Census of Agriculture report form by visiting www.agcensus.usda.gov and clicking on the 'Make Sure You Are Counted' button through June. NASS defines a farm as any place from which \$1,000 or more of agricultural products were produced and sold, or normally would have been sold, during the census year (2017).

Supervised Credit

Farm Service Agency (FSA) Farm Loan programs are considered supervised credit. Unlike loans from a commercial lender, FSA loans are intended to be temporary in nature. Therefore, it is our goal to help you graduate to commercial credit, and our farm loan staff is available to help borrowers through training and credit counseling.

The FSA team will help borrowers identify their goals to ensure financial success. Through this process, FSA staff will advise borrowers in developing strategies and a plan to meet your operation's goals and graduate to commercial credit. Ultimately, the borrower is responsible for the success of the farming operation, but FSA's staff will help in an advisory role to provide the tools necessary to help you achieve your operational goals and manage your finances.

For more information on FSA farm loan programs, visit www.fsa.usda.gov.

Communication is Key in Lending

Farm Service Agency (FSA) is committed to

providing our farm loan borrowers the tools necessary to be a success. A part of ensuring this success is providing guidance and counsel from the loan application process through the borrower's graduation to commercial lending institutions. While it is FSA's commitment to advise borrowers as they identify goals and evaluate progress, it is crucial for borrowers to communicate with their farm loan staff when changes occur. It is the borrower's responsibility to alert FSA to any of the following:

- Any proposed or significant changes in the farming operation;
- Any significant changes to family income or expenses;
- The development of problem situations;
- Any losses or proposed significant changes in security

In addition, if a farm loan borrower cannot make payments to suppliers, other creditors, or FSA on time, contact your farm loan staff immediately to discuss loan servicing option

For more information on FSA farm loan programs, visit www.fsa.usda.gov.

Filing CCC-941 Adjusted Gross Income (AGI) Certifications

Many producers have experienced delays in receiving Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) payments, Loan Deficiency Payments (LDPs) and Market Gains on Marketing Assistance Loans (MALs) because they have not filed form CCC-941, Adjusted Gross Income Certification. LDPs will not be paid until all eligible producers, including landowners who share in the crop, have filed a valid CCC-941.

Producers without a valid CCC-941 certifying their compliance with the average adjusted gross income provisions will not receive payments that have been processed. All farm operator/tenants/owners who have not filed a CCC-941 and have pending payments should IMMEDIATELY file the form with their recording county FSA office. Farm operators and tenants are encouraged to ensure that their landowners have filed the form. FSA has been issuing 2016 LDPs and Market Gains.

FSA can accept the CCC-941 for 2015, 2016 and 2017. Unlike the past, producers must have the CCC-941 certifying their AGI compliance before any payments can be issued.

Payment Limitations by Program

The 2014 Farm Bill established a maximum dollar amount for each program that can be received

annually, directly or indirectly, by each person or legal entity. Payment limitations vary by program for 2014 through 2018.

Below is an overview of payment limitations by program.

Commodity and Price Support Programs

The annual limitation for the Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) programs, Loan Deficiency Payments (LDPs) and Market Loan Gains is \$125,000 total.

Conservation Programs

The Conservation Reserve Program (CRP) annual rental payment and incentive payment is limited to \$50,000. CRP contracts approved before Oct. 1, 2008, may exceed the limitation, subject to payment limitation rules in effect on the date of contract approval.

The Emergency Conservation Program (ECP) has an annual limit of \$200,000 per disaster event. The Emergency Forest Restoration Program (EFRP) has an annual limit of \$500,000 per disaster event.

Disaster Assistance Programs

The annual limitation of \$125,000 applies to the Emergency Assistance for Livestock, Honeybees and Farm-Raised Fish Program (ELAP), Livestock Forage Disaster Program (LFP) and Livestock Indemnity Program (LIP). The total payments received under ELAP, LFP and LIP may not exceed \$125,000. A separate limitation of \$125,000 applies to Tree Assistance Program (TAP) payments. There is also a separate \$125,000 payment limit for the Noninsured Crop Disaster Assistance Program (NAP).

Payment limitations also apply to Natural Resources Conservation Service (NRCS) programs. Contact your local NRCS office more information.

For more information on FSA payment limitations by program, visit https://www.fsa.usda.gov/Assets/USDA-FSA-Public/usdafiles/FactSheets/2015/payment_eligibility_payment_limitations.pdf.

Cover Crop Guidelines

Recently the Farm Service Agency (FSA), Natural Resources Conservation Service (NRCS) and Risk Management Agency (RMA) worked together to develop consistent, simple and a flexible policy for cover crop practices.

The termination and reporting guidelines were updated for cover crops.

Termination:

The cover crop termination guidelines provide the timeline for terminating cover crops, are based on zones and apply to non-irrigated cropland. To view the zones and additional guidelines visit <https://www.nrcs.usda.gov/wps/portal/nrcs/main/national/landuse/crops/> and click "Cover Crop Termination Guidelines."

Reporting:

The intended use of cover only will be used to report cover crops. This includes crops that were terminated by tillage and reported with an intended use code of green manure. An FSA

policy change will allow cover crops to be hayed and grazed. Program eligibility for the cover crop that is being hayed or grazed will be determined by each specific program.

If the crop reported as cover only is harvested for any use other than forage or grazing and is not terminated properly, then that crop will no longer be considered a cover crop.

Crops reported with an intended use of cover only will not count toward the total cropland on the farm. In these situations a subsequent crop will be reported to account for all cropland on the farm.

Cover crops include grasses, legumes, and forbs, for seasonal cover and other conservation purposes. Cover crops are primarily used for erosion control, soil health improvement, and water quality improvement. The cover crop may be terminated by natural causes, such as frost, or intentionally terminated through chemical application, crimping, rolling, tillage or cutting. A cover crop managed and terminated according to NRCS Cover Crop Termination Guidelines is **not** considered a crop for crop insurance purposes.

Cover crops can be planted: with no subsequent crop planted, before a subsequent crop, after prevented planting acreage, after a planted crop, or into a standing crop.

New Improvement to Streamline Crop Reporting

Farmers and ranchers filing crop acreage reports with the Farm Service Agency (FSA) and participating insurance providers approved by the Risk Management Agency (RMA) now can provide the common information from their acreage reports at one office and the information will be electronically shared with the other location.

This new process is part of the USDA Acreage Crop Reporting Streamlining Initiative (ACRSI). This interagency collaboration also includes participating private crop insurance agents and insurance companies, all working to streamline the information collected from farmers and ranchers who participate in USDA programs.

Once filing at one location, data that's important to both FSA and RMA will be securely and electronically shared with the other location avoiding redundant and duplicative reporting, as well as saving farmers and ranchers time.

USDA has been working to streamline the crop reporting process for agricultural producers, who have expressed concerns with providing the same basic common information for multiple locations. In 2013, USDA consolidated the deadlines to 15 dates for submitting these reports, down from the previous 54 dates at RMA and 17 dates for FSA. USDA representatives believe farmers and ranchers will experience a notable improvement in the coming weeks as they approach the peak season for crop reporting later this summer.

More than 93 percent of all annual reported acres to FSA and RMA now are eligible for the common data reporting, and USDA is exploring adding more crops. Producers must still visit both locations to validate and sign acreage reports, complete maps or provide program-specific information. The common data from the first-filed acreage report will now be available to pre-populate and accelerate completion of the second report. Plans are underway at USDA to continue building upon the framework with additional efficiencies at a future date.

Farmers and ranchers are also reminded that they can now access their FSA farm information from the convenience of their home computer. Producers can see field boundaries, images of the farm,

conservation status, operator and owner information and much more.

The new customer self-service portal, known as **FSAFarm+**, gives farmers and ranchers online access to securely view, print or export their personal farm data. To enroll in the online service, producers are encouraged to contact their local FSA office for details. To find a local FSA office in your area, visit <http://offices.usda.gov>.

Emergency Conservation Program Assistance Available in Nevada

The Emergency Conservation Program (ECP) provides emergency funding and technical assistance to farmers and ranchers to rehabilitate farmland damaged by natural disasters and to implement emergency water conservation measures in periods of severe drought.

The following counties are eligible for ECP assistance: Carson City, Douglas, Elko, Eureka, Humboldt, Lander, Lyon, Washoe, and Mono, CA

For land to be eligible, the natural disaster must create new conservation problems that, if untreated, would:

- be so costly to rehabilitate that Federal assistance is or will be needed to return the
- land to productive agricultural use
- is unusual and is not the type that would recur frequently in the same area
- affect the productive capacity of the farmland
- impair or endanger the land

A producer qualifying for ECP assistance may receive cost-share levels not to exceed 75 percent of the eligible cost of restoration measures. No producer is eligible for more than \$200,000 cost sharing per natural disaster occurrence. The following types of measures may be eligible:

- removing debris from farmland
- grading, shaping, or releveling severely damaged farmland
- restoring permanent fences
- restoring conservation structures and other similar installations

Producers who suffered a loss from a natural disaster should contact their local FSA Office for ECP deadlines.

To be eligible for assistance, practices must not be started until all of the following are met:

- an application for cost-share assistance has been filed
- the local FSA County Committee (COC) or its representative has conducted an onsite inspection of the damaged area
- the Agency responsible for technical assistance, such as the Natural Resource Conservation Service (NRCS), has made a needs determination, which may include cubic yards of earthmoving, etc., required for rehabilitation

For more information about ECP, please visit www.fsa.usda.gov.
