Farm Loan Graduation Reminder

FSA Direct Loans are considered a temporary source of credit that is available to producers who do not meet normal underwriting criteria for commercial banks.

FSA periodically conducts Direct Loan graduation reviews to determine a borrower’s ability to graduate to commercial credit. If the borrower’s financial condition has improved to a point where they can refinance their debt with commercial credit, they will be asked to obtain other financing and partially or fully pay off their FSA debt.

By the end of a producer’s operating cycle, the Agency will send a letter requesting a current balance sheet, actual financial performance and a projected farm budget. The borrower has 30 days to return the required financial documents. This information will be used to evaluate the borrower’s potential for refinancing to
If a borrower meets local underwriting criteria, FSA will send the borrower’s name, loan type, balance sheet and projected cash flow to commercial lenders. The borrower will be notified when loan information is sent to local lenders.

If any lenders are interested in refinancing the borrower’s loan, FSA will send the borrower a letter with a list of lenders that are interested in refinancing the loan. The borrower must contact the lenders and complete an application for commercial credit within 30 calendar days.

If a commercial lender rejects the borrower, the borrower must obtain written evidence that specifies the reasons for rejection and submit to their local FSA farm loan office.

If a borrower fails to provide the requested financial information or to graduate, FSA will notify the borrower of noncompliance, FSA’s intent to accelerate the loan, and appeal rights.

USDA to Provide Agricultural Credit Training, Expand Opportunities for Farmer Veterans and Beginning Farmers

USDA is partnering with the Farmer Veteran Coalition (FVC) to conduct agricultural credit training sessions in the Midwest for military veterans and beginning farmers and ranchers. States under consideration to host the workshops include Iowa, Illinois, Indiana, Michigan, Minnesota, Missouri, and Nebraska.

These workshops will provide individuals interested in farming as a career, including military veterans, with methods to improve business planning and financial skills, and improve understanding of the risk management tools that can help small farm operations.

Other partners include Niman Ranch a community network of more than 700 independent family farmers and ranchers, and the Farm Credit Council and the Farm Credit System, which provides loans, leases and financial services to farmers, ranchers and rural businesses across the United States. The workshops will also include assistance with credit applications and introductions to local or regional food markets.

To learn more about veterans in agriculture, visit www.usda.gov/veterans. Visit www.fsa.usda.gov/farmloans or your local Farm Service Agency (FSA) office to learn more about FSA’s farm loan programs. To find your local FSA office, visit http://offices.usda.gov. More information also is available from the Farmer Veteran Coalition at www.farmvetco.org.
Dairy Producers Can Enroll for 2018 Coverage

The U.S. Department of Agriculture (USDA) Farm Service Agency (FSA) today announced that starting Sept. 1, 2017, dairy producers can enroll for 2018 coverage in the Margin Protection Program (MPP-Dairy). Secretary Sonny Perdue has utilized additional flexibility this year by providing dairy producers the option of opting out of the program for 2018.

To opt out, a producer should not sign up during the annual registration period. By opting out, a producer would not receive any MPP-Dairy benefits if payments are triggered for 2018. Full details will be included in a subsequent Federal Register Notice. The decision would be for 2018 only and is not retroactive.

The voluntary program, established by the 2014 Farm Bill, provides financial assistance to participating dairy producers when the margin – the difference between the price of milk and feed costs – falls below the coverage level selected by the producer.

MPP-Dairy gives participating dairy producers the flexibility to select coverage levels best suited for their operation. Enrollment ends on Dec. 15, 2017, for coverage in calendar year 2018. Participating farmers will remain in the program through Dec. 31, 2018, and pay a minimum $100 administrative fee for 2018 coverage. Producers have the option of selecting a different coverage level from the previous coverage year during open enrollment.

Dairy operations enrolling in the program must meet conservation compliance provisions and cannot participate in the Livestock Gross Margin Dairy Insurance Program. Producers can mail the appropriate form to the producer’s administrative county FSA office, along with applicable fees, without necessitating a trip to the local FSA office. If electing higher coverage for 2018, dairy producers can either pay the premium in full at the time of enrollment or pay 100 percent of the premium by Sept. 1, 2018. Premium fees may be paid directly to FSA or producers can work with their milk handlers to remit premiums on their behalf.

USDA has a web tool to help producers determine the level of coverage under the MPP-Dairy that will provide them with the strongest safety net under a variety of conditions. The online resource, available at [www.fsa.usda.gov/mpptool](http://www.fsa.usda.gov/mpptool), allows dairy farmers to quickly and easily combine unique operation data and other key variables to calculate their coverage needs based on price projections. Producers can also review historical data or estimate future coverage based on data projections. The secure site can be accessed via computer, Smartphone, tablet or any other platform, 24 hours a day, seven days a week.

For more information, visit FSA online at [www.fsa.usda.gov/dairy](http://www.fsa.usda.gov/dairy) or stop by a local FSA office to learn more about the MPP-Dairy.

Update Your Records

FSA is cleaning up our producer record database. If you have any unreported changes of address or zip code or an incorrect name or business name on file they need to be reported to our office. Changes in your farm operation, like the addition of a farm by lease or purchase, need to be reported to our office as well. Producers participating in FSA and NRCS programs are required to
timely report changes in their farming operation to the County Committee in writing and update their CCC-902 Farm Operating Plan.

If you have any updates or corrections, please call your local FSA office to update your records.

**Farm Reconstitutions**

When changes in farm ownership or operation take place, a farm reconstitution is necessary. The reconstitution — or recon — is the process of combining or dividing farms or tracts of land based on the farming operation.

To be effective for the current Fiscal Year (FY), farm combinations and farm divisions must be requested by **August 1 of the FY** for farms subject to the Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) program. A reconstitution is considered to be requested when all:

- of the required signatures are on FSA-155
- other applicable documentation, such as proof of ownership, is submitted.

Total Conservation Reserve Program (CRP) and non-ARC/PLC farms may be reconstituted at any time.

The following are the different methods used when doing a farm recon:

**Estate Method** — the division of bases, allotments and quotas for a parent farm among heirs in settling an estate;

**Designation of Landowner Method** — may be used when (1) part of a farm is sold or ownership is transferred; (2) an entire farm is sold to two or more persons; (3) farm ownership is transferred to two or more persons; (4) part of a tract is sold or ownership is transferred; (5) a tract is sold to two or more persons; or (6) tract ownership is transferred to two or more persons. In order to use this method the land sold must have been owned for at least three years, or a waiver granted, and the buyer and seller must sign a Memorandum of Understanding;

**DCP Cropland Method** — the division of bases in the same proportion that the DCP cropland for each resulting tract relates to the DCP cropland on the parent tract;

**Default Method** — the division of bases for a parent farm with each tract maintaining the bases attributed to the tract level when the reconstitution is initiated in the system.

---

**2018 Acreage Reporting Dates**

In order to comply with FSA program eligibility requirements, all producers are encouraged to visit their local FSA office to file an accurate crop certification report by the applicable deadline.

Acreage reporting dates vary by crop and by county so please contact your local FSA office for a list of county-specific deadlines.

The following exceptions apply to acreage reporting dates:

- If the crop has not been planted by the applicable acreage reporting date, then the acreage must be reported no later than 15 calendar days after planting is completed.
- If a producer acquires additional acreage after the applicable acreage reporting date,
the acreage must be reported no later than 30 calendars days after purchase or acquiring the lease. Appropriate documentation must be provided to the county office.

- If a perennial forage crop is reported with the intended use of “cover only,” “green manure,” “left standing,” or “seed,” then the acreage must be reported by July 15th.

Noninsured Crop Disaster Assistance Program (NAP) policy holders should note that the acreage reporting date for NAP covered crops is the earlier of the applicable dates or 15 calendar days before grazing or harvesting of the crop begins.

For questions regarding crop certification and crop loss reports, please contact your local FSA office.

---

**USDA Encourages Producers to Consider Risk Protection Coverage before Crop Sales Deadlines**

The Farm Service Agency encourages producers to examine available USDA crop risk protection options, including federal crop insurance and Noninsured Crop Disaster Assistance Program (NAP) coverage, before the applicable crop sales deadline.

Producers are reminded that crops not covered by insurance may be eligible for NAP. The 2014 Farm Bill expanded NAP to include higher levels of protection. Beginning, underserved and limited resource farmers are now eligible for free catastrophic level coverage, as well as discounted premiums for additional levels of protection.

Federal crop insurance covers crop losses from natural adversities such as drought, hail and excessive moisture. NAP covers losses from natural disasters on crops for which no permanent federal crop insurance program is available, including perennial grass forage and grazing crops, fruits, vegetables, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, bioenergy, and industrial crops.

Producers can determine if crops are eligible for federal crop insurance or NAP by visiting [https://webapp.rma.usda.gov/apps/actuarialinformationbrowser2017/CropCriteria.aspx](https://webapp.rma.usda.gov/apps/actuarialinformationbrowser2017/CropCriteria.aspx). NAP basic coverage is available at 55 percent of the average market price for crop losses that exceed 50 percent of expected production, with higher levels of coverage, up to 65 percent of their expected production at 100 percent of the average market price, including coverage for organics and crops marketed directly to consumers.

Deadlines for coverage vary by state and crop. To learn more about NAP visit [www.fsa.usda.gov/nap](http://www.fsa.usda.gov/nap) or contact your local USDA Service Center. To find your local USDA Service Centers go to [http://offices.usda.gov](http://offices.usda.gov).
