**Farm Service Agency Now Accepting Nominations for Farmers and Ranchers to Serve on Local County Committees**

The U.S. Department of Agriculture (USDA) Farm Service Agency (FSA) is now accepting nominations for county committee members. Elections will occur in certain Local Administrative Areas (LAA) for members. LAAs are elective areas for FSA committees in a single county or multi-county jurisdiction. This may include LAAs that are focused on an urban or suburban area.
County committee members make important decisions about how Federal farm programs are administered locally. All nomination forms for the 2022 election must be postmarked or received in the local FSA office by Aug. 1, 2022.

Agricultural producers who participate or cooperate in a USDA program and reside in the LAA that is up for election this year, may be nominated for candidacy for the county committee. A cooperating producer is someone who has provided information about their farming or ranching operation to FSA, even if they have not applied or received program benefits. Individuals may nominate themselves or others and qualifying organizations may also nominate candidates. USDA encourages minority producers, women, and beginning farmers or ranchers to nominate, vote and hold office.

Nationwide, more than 7,700 dedicated members of the agricultural community serve on FSA county committees. The committees are made up of three to 11 members who serve three-year terms. Producers serving on FSA county committees play a critical role in the day-to-day operations of the agency. Committee members are vital to how FSA carries out disaster programs, as well as conservation, commodity and price support programs, county office employment and other agricultural issues.

More Information

Producers should contact their local FSA office today to register and find out how to get involved in their county’s election, including if their LAA is up for election this year. To be considered, a producer must be registered and sign an FSA-669A nomination form. Urban farmers should use an FSA-669-A-3 for urban county committees. The form and other information about FSA county committee elections are available at fsa.usda.gov/elections.

Election ballots will be mailed to eligible voters beginning Nov. 7, 2022. Producers can find their local USDA Service Center at farmers.gov/service-locator.

USDA Offers Drought Impacted Nevada Farmers and Ranchers Immediate Disaster Assistance

USDA's Farm Service Agency (FSA) offers disaster assistance and low-interest loan programs to assist you in your recovery efforts following drought. Available programs and loans include:

- **Non-Insured Crop Disaster Assistance Program (NAP)** - provides financial assistance to producers of non-insurable crops when low yields, loss of inventory, or prevented planting occur due to natural disasters including qualifying drought (includes native grass for grazing).

- **Livestock Forage Disaster Program (LFP)** – provides compensation to eligible livestock producers who suffered grazing losses for covered livestock due to drought on privately owned or cash leased land.

- **Livestock Indemnity Program (LIP)** - offers payments to eligible producers for livestock death losses in excess of normal mortality due to adverse weather. Drought is not an eligible adverse weather event, except when associated with anthrax, a condition that occurs because of drought and directly results in the death of eligible livestock.

- **Tree Assistance Program (TAP)** – provides assistance to eligible orchardists and nursery tree growers for qualifying tree, shrub and vine losses due to natural disasters including excessive wind and qualifying drought.

- **Emergency Assistance for Livestock, Honeybees, and Farm-Raised Fish Program (ELAP)** - provides emergency relief for losses due to feed or water shortages, disease, adverse weather, or other conditions, which are not adequately addressed by other disaster programs.

- **Emergency Loan Program** – available to producers with agriculture operations located in a county under a primary or contiguous Secretarial Disaster designation. These low interest loans help producers recover from production and physical losses.
• **Emergency Conservation Program (ECP)** - provides emergency funding for farmers and ranchers to
rehabilitate land severely damaged by natural disasters and to implement emergency water conservation
measures in periods of severe drought.

To establish or retain FSA program eligibility, you must report prevented planting and failed acres (crops and
grasses). Prevented planting acreage must be reported on form FSA-576, Notice of Loss, no later than 15 calendar
days after the final planting date as established by FSA and Risk Management Agency (RMA).

For more information on these programs, visit [fsa.usda.gov/disaster](http://fsa.usda.gov/disaster).

---

**Risk Management**

For producers who have risk protection through Federal Crop Insurance or the Noninsured Crop Disaster Assistance
Program (NAP), we want to remind you to report crop damage to your crop insurance agent or the local Farm
Service Agency (FSA) office.

If you have crop insurance, contact your agent within 72 hours of discovering damage and be sure to follow up in
writing within 15 days. If you have NAP coverage, file a Notice of Loss (also called Form CCC-576) within 15 days of
loss becoming apparent, except for hand-harvested crops, which should be reported within 72 hours.

---

**Applying for FSA Direct Loans**

FSA offers direct farm ownership and direct farm operating loans to producers who want to establish, maintain, or
strengthen their farm or ranch. Direct loans are processed, approved and serviced by FSA loan officers.

Direct farm operating loans can be used to purchase livestock and feed, farm equipment, fuel, farm chemicals,
insurance, and other costs including family living expenses. Operating loans can also be used to finance minor
improvements or repairs to buildings and to refinance some farm-related debts, excluding real estate.

Direct farm ownership loans can be used to purchase farmland, enlarge an existing farm, construct and repair
buildings, and to make farm improvements.

The maximum loan amount for direct farm ownership loans is $600,000 and the maximum loan amount for direct
operating loans is $400,000 and a down payment is not required. Repayment terms vary depending on the type of
loan, collateral and the producer’s ability to repay the loan. Operating loans are normally repaid within seven years
and farm ownership loans are not to exceed 40 years.

Please contact your local FSA office for more information or to apply for a direct farm ownership or operating loan.

---

**The June 1, 2022 NRCS Streamflow Forecasts Have Been Issued**

The final streamflow forecasts for the season are available on the Nevada Snow Survey webpage: [https://www.nrcs.usda.gov/wps/portal/nrcs/main/nv/snow/](https://www.nrcs.usda.gov/wps/portal/nrcs/main/nv/snow/).

On June 1st the only SNOTELs with snow still on the ground were Independence Lake (Truckee Basin), Leavitt Lake
(Walker Basin), and Pole Creek Ranger Station (Snake Basin). Melt-out at most SNOTELs was ~1-3 weeks ahead
of median this season. Snow continues to melt above the SNOTEL network on shady aspects especially along the
Sierra Crest and in the Ruby Mountains. May precipitation was below normal in the Sierra, but above normal in the
Northern Great Basin, Humboldt, Clover Valley & Franklin, Owyhee and Snake basins.
Water year precipitation since October 1 continues to be near median across Nevada, ranging from 88% of median in Eastern Nevada and the Spring Mountains to 102% in the Lower Humboldt basin. The first Water Supply Outlook Report of next season will be published in early January. Until then, SNOTEL data and products are available on the Nevada Snow Survey webpage.

**Sign Up to be Counted in the 2022 Census of Agriculture by June 30**

Sign up and be counted in the 2022 Ag Census! Agriculture producers who did not receive the 2017 Census of Agriculture and do not receive other USDA surveys or censuses have until June 30 to sign up to receive the 2022 Census of Agriculture at nass.usda.gov/AgCensus. This once-every-five-years data collection begins this November.

The Ag Census includes every American operation – large or small, urban or rural – from which $1,000 or more of agricultural products are produced and sold, or would normally be produced and sold, in the ag census year. This can include hobby farms with livestock, such as chickens or horses, or crops growing in the backyard or on a rooftop. The data inform policy and program decisions that directly impact producers, their operations, industries, and communities. A complete count, with every producer getting and taking the opportunity to be represented in these data, is vital.

On the NASS Ag Census webpage, producers can also access frequently asked questions, explore past and current Ag Census data, access tools to help spread the word about the upcoming Ag Census, learn about Ag Census special studies, and more.

**USDA’s National Agricultural Statistics Service (NASS) Upcoming Publications and Resources**

**Cash Rents Survey:**

Data Collection: February through June 21.

Partnership w/ USDA – Farm Service Agency (FSA).

Data on rental rates on Irrigated Cropland, Non-Irrigated Cropland and Pasture by County.

- Publication Releases:
  - August 5, 2022 for State level data (3 pm ET)
  - August 26 for County level data (3 pm ET)

**Upcoming Releases:**

End of each month- Monthly Hay Prices, Included in ‘Agricultural Prices’ release

Weekly Crop Progress & Condition (April through November). Monthly, other months. (first of week)

**June 23** – Livestock Slaughter (3 pm ET)
Applying for Youth Loans

The Farm Service Agency (FSA) makes loans to youth to establish and operate agricultural income-producing projects in connection with 4-H clubs, FFA and other agricultural groups. Projects must be planned and operated with the help of the organization advisor, produce sufficient income to repay the loan and provide the youth with practical business and educational experience. The maximum loan amount is $5,000.

Youth Loan Eligibility Requirements:

- Be a citizen of the United States (which includes Puerto Rico, the Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands) or a legal resident alien
- Be 10 years to 20 years of age
- Comply with FSA's general eligibility requirements
- Be unable to get a loan from other sources
- Conduct a modest income-producing project in a supervised program of work as outlined above

Resources:

- Nevada NASS Website:
- USDA NASS:
  - https://www.nass.usda.gov/
  - NASS' Newsroom: https://www.nass.usda.gov/Newsroom/Executive_Briefings/index.php
- USDA NASS Census:
  - https://www.nass.usda.gov/AgCensus/
- NASS YouTube Channel:
  - https://www.youtube.com/usda_nass
• Demonstrate capability of planning, managing and operating the project under guidance and assistance from a project advisor. The project supervisor must recommend the youth loan applicant, along with providing adequate supervision.

For help preparing the application forms, contact your local USDA Service Center or visit fsa.usda.gov.

---

**Foreign Buyers Notification**

The Agricultural Foreign Investment Disclosure Act (AFIDA) requires all foreign owners of U.S. agricultural land to report their holdings to the Secretary of Agriculture. Foreign persons who have purchased or sold agricultural land in the county are required to report the transaction to FSA within 90 days of the closing. Failure to submit the AFIDA form could result in civil penalties of up to 25 percent of the fair market value of the property. County government offices, realtors, attorneys and others involved in real estate transactions are reminded to notify foreign investors of these reporting requirements. The data gained from these disclosures is used in the preparation of periodic reports to the President and Congress concerning the effect of such holdings upon family farms and rural communities. Click here for more information on AFIDA.

---

**Ask the Expert: A Farm Operating Loan Q&A with Jack Carlile**

In this Ask the Expert, Jack Carlile, Farm Loan Manager for the USDA Farm Service Agency (FSA), answers questions about farm operating loans and when producers should apply in order to secure funds for the current crop year.

As the Farm Loan Manager for the Cherokee County Service Center, Jack is responsible for managing the loan making and loan servicing activities for five counties in northeast Oklahoma. His office provides services for over 650 farm loan customers. Jack was raised on a cross bred cow/calf operation that his grandparents started. Over the years, each generation has added to the operation by purchasing additional pasture. The operation also grows and bales their own hay. Jack’s agriculture background and degree in agriculture economics from Oklahoma State University help him better understand the financing needs of his producers.

**Who can apply for FSA Farm Loans?**

Anyone can apply for FSA’s loan programs. Applications will be considered on basic eligibility requirements. To apply for a loan, you must meet the following general eligibility requirements including:

- Be a U.S. citizen or qualified alien.
- Operator of a family farm or ranch.
- Have a satisfactory credit history.
- Unable to obtain credit elsewhere at reasonable rates and terms to meet actual needs.
- Not be delinquent on any federal debts.

**What can I purchase with operating loans?**

Farm Operating Loans are traditionally used for purchasing capital items such as farm machinery, equipment, or livestock. Loan funds can also be used to help pay typical operating expenses for farming and ranching operations. For example, a rancher may use an operating loan to purchase forage for his cattle to feed them through the winter or a row crop producer may use an operating loan for paying for inputs like seed or fertilizer.

**What is the maximum loan amount and terms?**
The maximum loan amount for a Direct Farm Operating Loan is $400,000. Direct loans are made and serviced by FSA.

Producers can also apply for Guaranteed Operating Loans that are made by your commercial lender, and guaranteed against loss by FSA. The maximum loan amount for a Guaranteed Farm Operating Loan is $1,825,000. Loan terms for operating loans range from one to seven years.

**How do I apply?**

If you’re interested in applying for a farm loan, you can pick up an application by visiting your local FSA office. Visit [farmers.gov](http://farmers.gov) to find the USDA Service Center nearest you.

When applying for a loan, you will need a business plan, which must include:

- Your mission, vision, and goals for your farm or ranch.
- Your current assets and liabilities.
- Marketing Plan (what your operation will produce and where you will market and sell your products.)
- Whether the amount of income your operation generates will be enough to pay your business and family living expenses.

**When should I apply for an operating loan?**

I would recommend beginning the application process a few months in advance of needing the funds to allow time for the request to be processed, and for any necessary security checks and searches to be completed. That allows time for the funds to be available for your use when most needed.

**Where can I find more information?**

To learn more about FSA loans visit [farmers.gov/loans](http://farmers.gov/loans) or [fsa.usda.gov/farmloans](http://fsa.usda.gov/farmloans). Fact sheets and application packages are also available at your USDA Service Center. To learn more about other types of FSA loans or to find the right loan for your operation, use the Farm Loan Discovery Tool by visiting [farmers.gov/loans/farm-loan-discovery-tool](http://farmers.gov/loans/farm-loan-discovery-tool).

---

**Obtaining Payments Due to Deceased Producers**

In order to claim a Farm Service Agency (FSA) payment on behalf of a deceased producer, all program conditions for the payment must have been met before the applicable producer’s date of death.

If a producer earned a FSA payment prior to his or her death, the following is the order of precedence for the representatives of the producer:

- administrator or executor of the estate
- the surviving spouse
- surviving sons and daughters, including adopted children
- surviving father and mother
- surviving brothers and sisters
- heirs of the deceased person who would be entitled to payment according to the State law

For FSA to release the payment, the legal representative of the deceased producer must file a form FSA-325 to claim the payment for themselves or an estate. The county office will verify that the application, contract, loan
agreement, or other similar form requesting payment issuance, was signed by the applicable deadline by the
deceased or a person legally authorized to act on their behalf at that time of application.

If the application, contract or loan agreement form was signed by someone other than the deceased participant, FSA
will determine whether the person submitting the form has the legal authority to submit the form.

Payments will be issued to the respective representative’s name using the deceased program participant’s tax
identification number. Payments made to representatives are subject to offset regulations for debts owed by the
deceased.

FSA is not responsible for advising persons in obtaining legal advice on how to obtain program benefits that may be
due to a participant who has died, disappeared or who has been declared incompetent.

Update Your Records

FSA is cleaning up our producer record database and needs your help. Please report any changes of address, zip
code, phone number, email address or an incorrect name or business name on file to our office. You should also
report changes in your farm operation, like the addition of a farm by lease or purchase. You should also report any
changes to your operation in which you reorganize to form a Trust, LLC or other legal entity.

FSA and NRCS program participants are required to promptly report changes in their farming operation to the
County Committee in writing and to update their Farm Operating Plan on form CCC-902.

To update your records, contact your local USDA Service Center.

USDA Seeks Proposals for Joint Chiefs’ Landscape
Restoration Partnership

WASHINGTON – The U.S. Department of Agriculture (USDA) is asking for
proposals for the Joint Chiefs’ Landscape Restoration Partnership to improve
forest health on public and private lands. USDA’s Natural Resources
Conservation Service (NRCS) and the Forest Service are seeking the proposals
from partners by Aug. 5, 2022 for fiscal year 2023.

Joint Chiefs’ aligns with the Biden-Harris administration’s broader effort to reduce
wildfire threats to communities and landowners, protect water quality and supply,
and improve wildlife habitat for at-risk species. Most recently, President Biden’s Bipartisan Infrastructure Law
codified the initiative, showing broad support for the effort because of its inclusion in the once-in-a-generation
investment to improve infrastructure and rural communities. Fiscal year 2023 projects will build on the fiscal year
2022 investment of more than $48 million on projects that will mitigate wildfire risk, protect water quality, improve
wildlife habitat, restore forest ecosystems and ultimately contribute to USDA’s efforts to combat climate change.

“The Joint Chiefs’ will align with USDA’s shared stewardship strategy by selecting projects that demonstrate a cross-
boundary effort, work at the appropriate scale and have mutually defined priorities that support local communities,”
said NRCS Chief Terry Cosby. “Partnerships at all levels – federal, state, Tribal and local—lead to well-developed,
successful continued conservation with large scale impacts. Joint Chiefs’ has a proven record of success, as further
reflected in the program’s inclusion in the Bipartisan Infrastructure Law.”

“Joint Chiefs’ funding is an invaluable tool to help confront the wildfire crisis across all lands,” said Forest Service
Chief Randy Moore. “Working with our partners through the Joint Chiefs’ program is an important element that
supports the agency’s 10-year wildfire strategy by increasing the scale of our wildfire prevention efforts while
restoring the health of forests, watersheds and habitats across the country.”

Opportunities to Collaborate
Joint Chiefs’ project proposals are developed through a collaborative process between NRCS, Forest Service and partners. Past partners have included county, state, non-governmental, Tribal, utilities or private individual stakeholders. The collaboration process and partnerships will depend on the specific community needs of each project. Proposals are reviewed and vetted at multiple levels in the agencies based on local, state, Tribal and regional priorities.

NRCS and Forest Service national offices will evaluate the proposals and will announce the selected projects in late fall 2022.

Evaluation

In selecting proposals, NRCS and the Forest Service will prioritize:

- Clear descriptions with goals and objectives, deliverables, timeline and measurable desired outcomes.
- Reduction of wildfire risk in a municipal watershed or the wildland-urban interface (WUI). A municipal watershed is a watershed from which municipal water is provided by a utility. The WUI as defined by the Healthy Forest Restoration Act of 2003 (16 U.S.C. 6511).
- Development of the proposal through a collaborative process with participation from diverse stakeholders.
- Increase of forest workforce capacity or forest business infrastructure and development.
- Leveraging existing authorities and non-federal funding contributions from partners.
- Support of established state, Tribal and regional priorities. Proposals should describe how the eligible activities were prioritized across the landscape and the source of the state or regional priorities (e.g., fireshed analysis, wildfire risk assessment, state technical committee watershed prioritization, Endangered Species Act recovery plan, state wildlife action plan, etc.).
- Alignment with USDA priorities and the Justice40 initiative, including benefits to historically underserved communities and climate mitigation and adaptation efforts.
- Partner participation in proposal development or project implementation.
- Coordination (i.e., pre-planning) with individual landowners within the proposal footprint.
- The geographic distribution of individual project activities across the landscape demonstrates a focus on resource conditions and a balance between land ownerships.
- Education and outreach to local communities about the project.

More Information

USDA has invested more than $349 million across 110 projects in nine years through Joint Chiefs’ projects, which focus on areas where public forests and grasslands intersect with privately-owned lands. Since 2014, these projects have delivered important forest and rangeland funding to 41 states and Puerto Rico. NRCS and the Forest Service also collaborate and coordinate to advance shared priorities through other programs and funding mechanisms and will continue to build on this collaboration to respond to disasters, address climate change, and advance equity.

Landowners should contact their local NRCS and Forest Service office for more information.

USDA touches the lives of all Americans each day in so many positive ways. Under the Biden-Harris administration, USDA is transforming America’s food system with a greater focus on more resilient local and regional food production, fairer markets for all producers, ensuring access to safe, healthy and nutritious food in all communities, building new markets and streams of income for farmers and producers using climate smart food and forestry practices, making historic investments in infrastructure and clean energy capabilities in rural America, and committing to equity across the Department by removing systemic barriers and building a workforce more representative of America.
