### New Hampshire Farm Service Agency

James C. Cleveland Federal Building  
53 Pleasant Street, Room 1601  
Concord, NH 03301

Phone: 603-224-7941  
Fax: 855-428-0330

[www.fsa.usda.gov/nh](http://www.fsa.usda.gov/nh)

**State Executive Director:**  
Jeffrey Holmes

### USDA Opens Signup for Market Facilitation Program

*Enrollment Open through Dec. 6*

Signup is ongoing for the Market Facilitation Program (MFP), a U.S. Department of Agriculture (USDA) program to assist farmers who continue to suffer from damages because of unjustified trade retaliation from foreign nations. Through MFP, USDA will provide up to \$14.5 billion in direct payments to impacted producers, part of a broader trade relief package announced in late July. The sign-up period runs through Dec. 6, 2019.

MFP payments will be made to producers of certain non-specialty and specialty crops as well as dairy and hog producers.

#### **Non-Specialty Crops**

MFP payments will be made to producers of alfalfa hay, barley, canola, corn, crambe, dried beans, dry peas, extra-long staple cotton, flaxseed, lentils, long grain and medium grain rice, millet, mustard seed, oats, peanuts, rapeseed, rye, safflower, sesame

**State Committee:**

Kathy Sherman, Chair  
Madison Hardy  
Gary LeClair  
Scott Mason  
Kirk Scamman

To find contact information for your local office go to [www.fsa.usda.gov/nh](http://www.fsa.usda.gov/nh)

seed, small and large chickpeas, sorghum, soybeans, sunflower seed, temperate japonica rice, triticale, upland cotton, and wheat.

MFP assistance for 2019 crops is based on a single county payment rate multiplied by a farm's total plantings to the MFP-eligible crops in aggregate in 2019. Those per acre payments are not dependent on which of those crops are planted in 2019. A producer's total payment-eligible plantings cannot exceed total 2018 plantings. [View payment rates by county.](#)

**Dairy and Hogs**

Dairy producers who were in business as of June 1, 2019, will receive a per hundredweight payment on production history, and hog producers will receive a payment based on the number of live hogs owned on a day selected by the producer between April 1 and May 15, 2019.

**Specialty Crops**

MFP payments will also be made to producers of almonds, cranberries, cultivated ginseng, fresh grapes, fresh sweet cherries, hazelnuts, macadamia nuts, pecans, pistachios, and walnuts. Each specialty crop will receive a payment based on 2019 acres of fruit or nut bearing plants, or in the case of ginseng, based on harvested acres in 2019.

**More Information**

Payments will be made in up to three tranches, with the second and third tranches evaluated as market conditions and trade opportunities dictate. If conditions warrant, the second and third tranches will be made in November and early January.

MFP payments are limited to a combined \$250,000 for non-specialty crops per person or legal entity. MFP payments are also limited to a combined \$250,000 for dairy and hog producers and a combined \$250,000 for specialty crop producers. However, no applicant can receive more than \$500,000. Eligible applicants must also have an average adjusted gross income (AGI) for tax years 2015, 2016, and 2017 of less than \$900,000, or 75 percent of the person's or legal entity's average AGI for those tax years must have been derived from farming and ranching. Applicants must also comply with the provisions of the Highly Erodible Land and Wetland Conservation regulations.

More information can be found on [farmers.gov/mfp](http://farmers.gov/mfp), including payment information and a program application.

## USDA Announces New Decision Tool for New Dairy Margin Coverage Program

USDA announced the availability of a new [web-based tool](#) – developed in partnership with the University of Wisconsin – to help dairy producers evaluate various scenarios using different coverage levels through the new [Dairy Margin Coverage](#) (DMC) program.

The 2018 Farm Bill authorized DMC, a voluntary risk management program that offers financial protection to dairy producers when the difference between the all milk price and the average feed cost (the margin) falls below a certain dollar amount selected by the producer. It replaces the program previously known as the Margin Protection Program for Dairy. Sign up for this USDA Farm Service Agency (FSA) program opened on June 17.

The University of Wisconsin launched the decision support tool in cooperation with FSA and funded through a cooperative agreement with the USDA Office of the Chief Economist. The tool was designed to help producers determine the level of coverage under a variety of conditions that will provide them with the strongest financial safety net. It allows farmers to simplify their coverage level selection by combining operation data and other key variables to calculate coverage needs based on price projections.

The decision tool assists producers with calculating total premiums costs and administrative fees associated with participation in DMC. It also forecasts payments that will be made during the coverage year.

For more information, access the tool at [fsa.usda.gov/dmc-tool](https://fsa.usda.gov/dmc-tool). For DMC sign up, eligibility and related program information, visit [fsa.usda.gov](https://fsa.usda.gov) or contact your local [USDA Service Center](#).

## Storage and Handling Trucks Eligible for Farm Storage Facility Loans

Farm Storage Facility Loans (FSFL) provide low-interest financing so producers can build or upgrade facilities to store commodities. Some storage and handling trucks are eligible for the FSFL. These include:

- **Cold Storage Trucks**-A van or truck designed to carry perishable freight at specific temperatures. Cold storage trucks can be ice-cooled or equipped with any variety of mechanical refrigeration systems.
- **Flatbed Trucks**-Truck with an open body in the form of a platform with no side walls for easy loading and unloading. These trucks can be categorized into different sizes which range from light, medium, or heavy duty, compact or full-size, or short and expandable beds.
- **Grain Trucks**-A piece of farm equipment specially made to accommodate grain products and are traditionally truck chassis units with a mounted grain “dump” body where grain commodities are transported from a field to either a grain elevator or a storage bin.

- **Storage Trucks with a Chassis Unit**-Commonly referred to as a box truck, box van or straight truck, is a truck with a cargo body mounted on the same chassis with the engine and cab.

To be eligible for FSFL, the storage and handling truck must be less than 15 years old and have a maximum of four axles with a gross weight rating of 60,000 pounds or less. Pick-up trucks, semi-trucks, dump trucks, and simple insulated and ventilated vans are ineligible for FSFL.

FSFL for storage and handling trucks must be \$100,000 or less. FSFL-financed storage and handling trucks must be used for the purpose for which they were acquired for the entire FSFL term.

Eligible commodities include grains, oilseeds, pulse crops, hay, honey, renewable biomass commodities, fruits and vegetables, floriculture, hops, maple sap, milk, cheese, yogurt, butter, eggs, meat/poultry (unprocessed), rye and aquaculture.

For more information or to apply for a FSFL, contact your local [FSA Service Center](#).

## Report Noninsured Crop Disaster Assistance Program (NAP) Losses

The Noninsured Crop Disaster Assistance Program (NAP) provides financial assistance to producers of non-insurable crops when low yields, loss of inventory, or prevented planting occur due to natural disasters including freeze, hail, excessive moisture, excessive wind or hurricanes, flood, excessive heat and qualifying drought (includes native grass for grazing), among others.

Eligible producers must have purchased NAP coverage for 2019 crops. A notice of loss must be filed the earlier of 15 days of the occurrence of the disaster or when losses become apparent or 15 days of the final harvest date.

Producers of hand-harvested crops and certain perishable crops must notify FSA within 72 hours of when a loss becomes apparent.

Eligible crops must be commercially produced agricultural commodities for which crop insurance is not available, including perennial grass forage and grazing crops, fruits, vegetables, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, bioenergy, and industrial crops.

For more information on NAP, contact your local FSA office or visit [www.fsa.usda.gov/nap](http://www.fsa.usda.gov/nap).

## Higher Limits Now Available on USDA Farm Loans

Higher limits are now available for borrowers interested in USDA's farm loans, which help agricultural producers purchase farms or cover operating expenses. The 2018 Farm Bill increased the amount that producers can borrow through direct and guaranteed loans available through USDA's Farm Service Agency (FSA) and made changes to other loans, such as microloans and emergency loans.

Key changes include:

- The Direct Operating Loan limit increased from \$300,000 to \$400,000, and the Guaranteed Operating Loan limit increased from \$ 1.429 million to \$1.75 million. Operating loans help producers pay for normal operating expenses, including machinery and equipment, seed, livestock feed, and more.
- The Direct Farm Ownership Loan limit increased from \$300,000 to \$600,000, and the Guaranteed Farm Ownership Loan limit increased from \$1.429 million to \$1.75 million. Farm ownership loans help producers become owner-operators of family farms as well as improve and expand current operations.
- Producers can now receive both a \$50,000 Farm Ownership Microloan and a \$50,000 Operating Microloan. Previously, microloans were limited to a combined \$50,000. Microloans provide flexible access to credit for small, beginning, niche, and non-traditional farm operations.
- Producers who previously received debt forgiveness as part of an approved FSA restructuring plan are now eligible to apply for emergency loans. Previously, these producers were ineligible.
- Beginning and socially disadvantaged producers can now receive up to a 95 percent guarantee against the loss of principal and interest on a loan, up from 90 percent.

### About Farm Loans

Direct farm loans, which include microloans and emergency loans, are financed and serviced by FSA, while guaranteed farm loans are financed and serviced by commercial lenders. For guaranteed loans, FSA provides a guarantee against possible financial loss of principal and interest.

For more information on FSA farm loans, visit [www.fsa.usda.gov](http://www.fsa.usda.gov) or contact your [local USDA service center](#).

---

## Using FSA Direct Farm Ownership Loans for Construction

The USDA Farm Service Agency's (FSA) [Direct Farm Ownership loans](#) are a resource to help farmers and ranchers become owner-operators of family farms, improve and expand current operations, increase agricultural productivity, and assist with land tenure to save farmland for future generations.

Depending on the applicant's needs, there are three types of Direct Farm Ownership Loans: regular, down payment and joint financing. FSA also offers a [Direct Farm Ownership Microloan](#) option for smaller financial needs up to \$50,000.

Amongst other purposes, Direct Farm Ownership Loans can be used to construct, purchase or improve farm dwellings, service buildings or other facilities and improvements essential to an operation.

To do this, applicants must provide FSA with an estimate of the total cost of all planned development that completely describe the work, prior to loan approval and must show proof of sufficient funds to pay for the total cost of all planned development at or before loan closing. In some instances, applicants may be asked to provide certified plans, specifications or contract documents. The applicant cannot incur any debts for materials or labor or make any expenditures

for development purposes prior to loan closing with the expectation of being reimbursed from FSA funds.

Construction and development work may be performed either by the contract method or the borrower method. Under the contract method, construction and development contractors perform work according to a written contract with the applicant or borrower. An applicant for a direct loan to finance a construction project must obtain a surety bond that guarantees both payment and performance in the amount of the construction contract from a construction contractor.

A surety bond is required when a contract exceeds \$100,000, an authorized agency official determines that a surety bond appears advisable to protect the borrower against default of the contractor or a contract provides for partial payments in excess of the amount of 60 percent of the value of the work in place.

Under the borrower method, the applicant or borrower will perform the construction and development work. The borrower method may only be used when the authorized agency official determines, based on information from the applicant, that the applicant possesses or arranges to obtain the necessary skill and managerial ability to complete the work satisfactorily and that such work will not interfere with the applicant's farming operation or work schedule.

Potential applicants should visit with FSA early in the initial project planning process to ensure environmental compliance.

For more eligibility requirements and information about FSA Loan programs, contact your local FSA office or visit [www.fsa.usda.gov](http://www.fsa.usda.gov). To find your local FSA office, visit <http://offices.usda.gov>.
