Before You Break Out New Ground, Ensure Your Farm Meets Conservation Compliance

The term “sodbusting” is used to identify the conversion of land from native vegetation to commodity crop production after December 23, 1985. As part of the conservation provisions of the Food Security Act of 1985, if you’re proposing to produce agricultural commodities (crops that require annual tillage including one pass planting operations and sugar cane) on land that has been determined highly erodible and that has no crop history prior to December 23, 1985, that land must be farmed in accordance with a conservation plan or system that ensures no substantial increase in soil erosion.

Eligibility for many USDA programs requires compliance with a conservation plan or system on highly erodible land (HEL) used for the production of agricultural commodities. This includes Farm Service Agency (FSA) loan, disaster assistance, safety net, price support, and conservation programs; Natural Resources Conservation Service (NRCS) conservation programs; and Risk Management Agency (RMA) Federal crop insurance.

Before you clear or prepare areas not presently under production for crops that require annual tillage, you are required to file Form AD-1026 “Highly Erodible Land Conservation and Wetland Conservation Certification,” with FSA indicating the area to be brought into production. The notification will be referred to NRCS to determine if the field is considered

highly erodible land. If the field is considered HEL, you are required to implement a conservation plan or system that limits the erosion to the tolerable soil loss (T) for the predominant HEL soil on those fields.

In addition, prior to removing trees or conducting any other land manipulations that may affect wetlands, remember to update form AD-1026, to ensure you remain in compliance with the wetland conservation provisions.

Prior to purchasing or renting new cropland acres, it is recommended that you check with your local USDA Service Center to ensure your activities will be in compliance with the highly erodible land and wetland conservation provisions.

For additional information on highly erodible land conservation and wetland conservation compliance, contact [your local USDA Service Center](#).

USDA Reminds Producers of Continuous Certification Option for Perennial Forage

The U.S. Department of Agriculture (USDA) reminds agricultural producers with perennial forage crops of an option to report their acreage once, without having to report that acreage in subsequent years, as long as there are no applicable changes on the farm. Interested producers can select the continuous certification option after USDA's Farm Service Agency (FSA) certifies their acreage report.

An acreage report documents a crop grown on a farm or ranch and its intended uses, including perennial crops like mixed forage, birdsfoot trefoil, chicory/radicchio, kochia (prostrata), lespedeza, perennial peanuts and perennial grass varieties. To access many USDA programs, producers must file an accurate and timely acreage report for all crops and land uses, including failed acreage and prevented planting acreage.

The perennial crop continuous certification process requires a producer to initially complete an acreage report certifying the perennial crop acreage. The producer may select the continuous certification option any time after the crop is certified. Once the continuous certification option is selected, the certified acreage will roll forward annually and does not require additional action on the producer's part in subsequent years unless the acreage report changes.

Once an producer selects continuous certification, then continuous certification is applicable to all fields on the farm for the specific crop, crop type and intended use. If continuous certification is selected by any producers sharing in the crop, then the continuous certification is applicable to fields in which the producer has a share for the specific crop, crop type and intended use.

Producers can opt out of continuous certification at any time. The continuous certification will terminate automatically if a change in the farming operation occurs.

How to File a Report

To file a crop acreage report, producers need to provide:

- Crop and crop type or variety.
- Intended use of the crop.
- Number of acres of the crop.
- Map with approximate boundaries for the crop.
- Planting date(s).
- Planting pattern, when applicable.
- Producer shares.
- Irrigation practice(s).
- Acreage prevented from planting, when applicable.
- Other information as required.

More Information

Producers can contact their local FSA office to see if their crops are eligible for continuous certification or to make an appointment. Producers can make an appointment to report acres by contacting their local [USDA Service Center](#).

Ask the Expert: Customer Farm Records Mapping Q&A with Gwen Uecker

In this Ask the Expert, Gwen Uecker answers a few questions about USDA's farmers.gov customer portal. Gwen serves as the Team Lead for the Program Delivery Division (PDD), Common Processes Branch for the Deputy Administrator of Farm Program within Farm Service Agency (FSA). She helps lead PDD's effort to provide personalized customer information via farmers.gov.

A farmers.gov account provides self-service opportunities to FSA and Natural Resources Conservation Service (NRCS) customers via a secure authenticated access process.

What is the value of Customer Farm Records Mapping and why should producers use farmers.gov?

Customer Farm Records Mapping (cFRM) provides you with self-help options and access to FSA data from home 24/7. For example, you do not have to wait for FSA to mail out maps for acreage reporting or make a special trip to the office to pick up your maps. You can print farm tract maps directly from farmers.gov.

New features include the ability to import precision agriculture planting boundaries and create labels containing crop information that can be printed on-farm tract maps. The maps can then be provided to FSA at the local USDA Service Center for completing the annual crop acreage report. You can use the draw tools to determine acres in a drawn area. The drawn area can be printed on a map and provided to the Service Center, a third

party such as a chemical applicator, or exported as a feature file for use in other geospatial applications.

In addition, you can “Switch Profile” to view cFRM data for individuals or entities you are authorized to act on behalf of. This means you can view and print maps for your entity’s farms. Producers can also view and print farm records details, including base and yield information (FSA-156EZ).

The FSA Farm Records Mapping page is accessed by clicking the blue “View Farm Records” button from the farmers.gov LAND tab.

To read the full blog visit [Ask the Expert: Customer Farm Records Mapping Q&A with Gwen Uecker | Farmers.gov](#).

FSA is Accepting CRP Continuous Enrollment Offers

The Farm Service Agency (FSA) is accepting offers for specific conservation practices under the [Conservation Reserve Program \(CRP\) Continuous Signup](#).

In exchange for a yearly rental payment, farmers enrolled in the program agree to remove environmentally sensitive land from agricultural production and to plant species that will improve environmental health and quality. The program’s long-term goal is to re-establish valuable land cover to improve water quality, prevent soil erosion, and reduce loss of wildlife habitat. Contracts for land enrolled in CRP are 10-15 years in length.

Under continuous CRP signup, environmentally sensitive land devoted to certain conservation practices can be enrolled in CRP at any time. Offers for continuous enrollment are not subject to competitive bidding during specific periods. Instead they are automatically accepted provided the land and producer meet certain eligibility requirements and the enrollment levels do not exceed the statutory cap.

For more information, including a list of acceptable practices, contact your County USDA Service Center or visit fsa.usda.gov/crp.

USDA Offers Farmers.gov Features to Help Farmers Hire Workers

The U.S. Department of Agriculture (USDA) offers features on the farmers.gov website designed to help facilitate the employment of H-2A workers.

USDA’s goal is to help farmers navigate the complex H-2A program that is administered by Department of Labor, Department of Homeland Security, and the State Department so hiring a farm worker is an easier process.

The primary new H-2A features on Farmers.gov include:

- A real-time dashboard that enables farmers to track the status of their eligible employer application and visa applications for temporary nonimmigrant workers;
- Streamlining the login information so if a farmer has an existing login.gov account they can save multiple applications tracking numbers for quick look-up at any time;
- Enables easy access to the Department of Labor's (DOL) Foreign Labor Application Gateway (FLAG);
- Allows farmers to track time-sensitive actions taken in the course of Office of Foreign Labor Certification's (OFLC) adjudication of temporary labor certification applications;
- Allowing for farmers to access all application forms on-line.

All information can be found at www.farmers.gov/manage/h2a.

In 2018, USDA unveiled farmers.gov, a dynamic, mobile-friendly public website combined with an authenticated portal where customers can apply for programs, process transactions and manage accounts. With feedback from customers and field employees who serve those customers, farmers.gov delivers farmer-focused features through an agile, iterative process to deliver the greatest immediate value to America's agricultural producers – helping farmers and ranchers do right, and feed everyone.

USDA Provides Payments of Nearly \$800 Million in Assistance to Help Keep Farmers Farming

USDA announced that distressed borrowers with qualifying USDA farm loans have already received nearly \$800 million in assistance, as part of the \$3.1 billion in assistance for distressed farm loan borrowers provided through Section 22006 of the Inflation Reduction Act (IRA). The IRA directed USDA to expedite assistance to distressed borrowers of direct or guaranteed loans administered by USDA's Farm Service Agency (FSA) whose operations face financial risk.

This recent announcement in October 2022 kicks off a process to provide assistance to distressed farm loan borrowers using several complementary approaches, with the goal of keeping them farming, removing obstacles that currently prevent many of these borrowers from returning to farming, and improving the way that USDA approaches borrowing and servicing. Through this assistance, USDA is focused on generating long-term stability and success for distressed borrowers.

Work has already started to bring some relief to distressed farmers. As of Oct. 2022, over 13,000 borrowers have already benefited from the resources provided under the Inflation Reduction Act as follows:

- Approximately 11,000 delinquent direct and guaranteed borrowers had their accounts brought current. USDA also paid the next scheduled annual installment for these direct loan borrowers giving them peace of mind in the near term.

- Approximately 2,100 borrowers who had their farms foreclosed on and still had remaining debt have had this debt resolved in order to cease debt collections and garnishment relieving that burden that has made getting a fresh start more difficult.

In addition to the automatic assistance already provided, USDA has also outlined steps to administer up to an additional \$500 million in payments to benefit the following distressed borrowers:

- USDA will administer \$66 million in separate automatic payments, using COVID-19 pandemic relief funds, to support up to 7,000 direct loan borrowers who used FSA's disaster-set-aside option during the pandemic to move their scheduled payments to the end of their loans.
- USDA is also initiating two case-by-case processes to provide additional assistance to farm loan borrowers. Under the first new process, FSA will review and assist with delinquencies from 1,600 complex cases, including cases in which borrowers are facing bankruptcy or foreclosure. The second new process will add a new option using existing direct loan servicing criteria to intervene more quickly and help an estimated 14,000 financially distressed borrowers who request assistance to avoid even becoming delinquent.

More details on each of the categories of assistance, including a downloadable fact sheet, are available on the [Inflation Reduction Act webpage on farmers.gov](https://www.farmers.gov/inflation-reduction-act).

Similar to other USDA assistance, all of these payments will be reported as income and borrowers are encouraged to consult their tax advisors. USDA also has resources and partnerships with cooperators who can provide additional assistance and help borrowers navigate the process.

The announcement today is only the first step in USDA's efforts to provide assistance to distressed farm loan borrowers and respond to farmers and to improve the loan servicing efforts at USDA by adding more tools and relaxing unnecessary restrictions. Additional announcements and investments in assistance will be made as USDA institutes these additional changes and improvements.

This effort will ultimately also include adding more tools and relaxing unnecessary restrictions through assistance made possible by Congress through the IRA. Further assistance and changes to the approach will be made in subsequent phases.

Background

USDA provides access to credit to approximately 115,000 producers who cannot obtain sufficient commercial credit through direct and guaranteed farm loans, which do not include farm storage facility loans or marketing assistance loans. With the funds and direction Congress provided in Section 22006 of IRA, USDA is taking action to immediately provide relief to qualifying distressed borrowers whose operations are at financial risk while working on making transformational changes to how USDA goes about loan servicing in the long run so that borrowers are provided the flexibility and opportunities needed to address the inherent risks and unpredictability associated with agricultural operations and remain in good financial standing.

In January 2021, [USDA suspended foreclosures](#) and other adverse actions on direct farm loans due to the pandemic and encouraged guaranteed lenders to follow suit. Last week, USDA reiterated this request to guaranteed lenders to provide time for the full set of IRA distressed borrower assistance to be made available before lenders take irreparable actions.

Producers can explore available loan options using the [Farm Loan Discovery Tool on farmers.gov](#) ([also available in Spanish](#)) or by contacting their [local USDA Service Center](#). Producers can also call the FSA call center at 877-508-8364 between 8 a.m. and 7 p.m. Eastern. USDA has tax-related resources available at [farmers.gov/taxes](#).

Farmers.gov Feature Helps Producers Find Farm Loans that Fit Their Operation

Farmers and ranchers can use the *Farm Loan Discovery Tool* on farmers.gov to find information on USDA farm loans that may best fit their operations.

USDA's Farm Service Agency (FSA) offers a variety of loan options to help farmers finance their operations. From buying land to financing the purchase of equipment, FSA loans can help.

USDA conducted field research in eight states, gathering input from farmers and FSA farm loan staff to better understand their needs and challenges.

How the Tool Works

Farmers who are looking for financing options to operate a farm or buy land can answer a few simple questions about what they are looking to fund and how much money they need to borrow. After submitting their answers, farmers will receive information on farm loans that best fit their specific needs. The loan application and additional resources also will be provided.

Farmers can download application quick guides that outline what to expect from preparing an application to receiving a loan decision. There are four guides that cover loans to individuals, entities, and youth, as well as information on microloans. The guides include general eligibility requirements and a list of required forms and documentation for each type of loan. These guides can help farmers prepare before their first USDA service center visit with a loan officer.

Farmers can access the *Farm Loan Discovery Tool* by visiting [farmers.gov/fund](#) and clicking the "Start" button. Follow the prompts and answer five simple questions to receive loan information that is applicable to your agricultural operation. The tool is built to run on any modern browser like Chrome, Edge, Firefox, or the Safari browser, and is fully functional on mobile devices. It does not work in Internet Explorer.

About Farmers.gov

In 2018, USDA unveiled farmers.gov, a dynamic, mobile-friendly public website combined with an authenticated portal where farmers will be able to apply for programs, process transactions, and manage accounts.

The *Farm Loan Discovery Tool* is one of many resources on farmers.gov to help connect farmers to information that can help their operations. Earlier this year, USDA launched the *My Financial Information* feature, which enables farmers to view their loan information, history, payments, and alerts by logging into the website.

USDA is building farmers.gov for farmers, by farmers. In addition to the interactive farm loan features, the site also offers a Disaster Assistance Discovery Tool. Farmers can visit farmers.gov/recover/disaster-assistance-tool#step-1 to find disaster assistance programs that can help their operation recover from natural disasters.
