USDA to Provide $6 billion to Commodity and Specialty Crop Producers Impacted by 2020 and 2021 Natural Disasters

The U.S. Department of Agriculture (USDA) today announced that commodity and specialty crop producers impacted by natural disaster events in 2020 and 2021 will soon begin receiving emergency relief payments totaling approximately $6 billion through the Farm Service Agency’s (FSA) new Emergency Relief Program (ERP) to offset crop yield and value losses.

Background

On September 30, 2021, President Biden signed into law the Extending Government Funding and Delivering Emergency Assistance Act (P.L. 117-43), which includes $10 billion in assistance to agricultural producers impacted by wildfires, droughts, hurricanes, winter storms, and other eligible disasters experienced during calendar years 2020 and 2021. FSA recently made payments to ranchers impacted by drought and wildfire through the first phase of the Emergency Livestock Relief Program (ELRP). ERP is another relief component of the Act.

For impacted producers, existing Federal Crop Insurance or Noninsured Crop Disaster Assistance Program (NAP) data is the basis for calculating initial payments. USDA estimates...
that phase one ERP benefits will reach more than 220,000 producers who received indemnities for losses covered by federal crop insurance and more than 4,000 producers who obtained NAP coverage for 2020 and 2021 crop losses.

**ERP Eligibility – Phase One**

ERP covers losses to crops, trees, bushes, and vines due to a qualifying natural disaster event in calendar years 2020 and 2021. Eligible crops include all crops for which crop insurance or NAP coverage was available, except for crops intended for grazing. Qualifying natural disaster events include wildfires, hurricanes, floods, derechos, excessive heat, winter storms, freeze (including a polar vortex), smoke exposure, excessive moisture, qualifying drought, and related conditions.

For drought, ERP assistance is available if any area within the county in which the loss occurred was rated by the U.S. Drought Monitor as having a:

- D2 (severe drought) for eight consecutive weeks; or
- D3 (extreme drought) or higher level of drought intensity.

Lists of [2020](#) and [2021](#) drought counties eligible for ERP is available on the emergency relief website.

To streamline and simplify the delivery of ERP phase one benefits, FSA will send pre-filled application forms to producers where crop insurance and NAP data are already on file. This form includes eligibility requirements, outlines the application process and provides ERP payment calculations. Producers will receive a separate application form for each program year in which an eligible loss occurred. Receipt of a pre-filled application is not confirmation that a producer is eligible to receive an ERP phase one payment.

Additionally, producers must have the following forms on file with FSA within 60 days of the ERP phase one deadline, which will later be announced by FSA’s Deputy Administrator for Farm Programs:

- Form AD-2047, *Customer Data Worksheet*.
- Form CCC-902, *Farm Operating Plan* for an individual or legal entity.
- Form CCC-901, *Member Information for Legal Entities* (if applicable).
- Form FSA-510, *Request for an Exception to the $125,000 Payment Limitation for Certain Programs* (if applicable).
- Form CCC-860, *Socially Disadvantaged, Limited Resource, Beginning and Veteran Farmer or Rancher Certification*, if applicable, for the 2021 program year.
- A highly erodible land conservation (sometimes referred to as HELC) and wetland conservation certification (Form AD-1026 *Highly Erodible Land Conservation (HELC) and Wetland Conservation (WC) Certification*) for the ERP producer and applicable affiliates.

Most producers, especially those who have previously participated in FSA programs, will likely have these required forms on file. However, those who are uncertain or want to confirm the status of their forms can contact their *local FSA county office.*
ERP Payment Calculations – Phase One

For crops covered by crop insurance, the ERP phase one payment calculation for a crop and unit will depend on the type and level of coverage obtained by the producer. Each calculation will use an ERP factor based on the producer’s level of crop insurance or NAP coverage.

- **Crop Insurance** – the ERP factor is 75% to 95% depending on the level of coverage ranging from catastrophic to at least 80% coverage.
- **NAP** – the ERP factor is 75% to 95% depending on the level of coverage ranging from catastrophic to 65% coverage.

Full ERP payment calculation factor tables are available on the emergency relief website and in the program [fact sheet](#).

Applying ERP factors ensures that payments to producers do not exceed available funding and that cumulative payments do not exceed 90% of losses for all producers as required by the Act.

Also, there will be certain payment calculation considerations for area plans under crop insurance policies.

The ERP payment percentage for historically underserved producers, including beginning, limited resource, socially disadvantaged, and veteran farmers and ranchers will be increased by 15% of the calculated payment for crops having insurance coverage or NAP.

To qualify for the higher payment percentage, eligible producers must have a CCC-860, *Socially Disadvantaged, Limited Resource, Beginning and Veteran Farmer or Rancher Certification*, form on file with FSA for the 2021 program year.

Because the amount of loss due to a qualifying disaster event in calendar years 202 and 2021 cannot be separated from the amount of loss caused by other eligible causes of loss as defined by the applicable crop insurance or NAP policy, the ERP phase one payment will be calculated based on the producer’s loss due to *all eligible causes of loss*.

**Future Insurance Coverage Requirements**

All producers who receive ERP phase one payments, including those receiving a payment based on crop, tree, bush, or vine insurance policies, are statutorily required to purchase crop insurance, or NAP coverage where crop insurance is not available, for the next two available crop years, as determined by the Secretary. Participants must obtain crop insurance or NAP, as may be applicable:

- At a coverage level equal to or greater than 60% for insurable crops; or
- At the catastrophic level or higher for NAP crops.

Coverage requirements will be determined from the date a producer receives an ERP payment and may vary depending on the timing and availability of crop insurance or NAP for a producer’s particular crops. The final crop year to purchase crop insurance or NAP coverage to meet the second year of coverage for this requirement is the 2026 crop year.
Emergency Relief – Phase Two (Crop and Livestock Producers)

Today’s announcement is only phase one of relief for commodity and specialty crop producers. Making the initial payments using existing safety net and risk management data will both speed implementation and further encourage participation in these permanent programs, such as Federal crop insurance, as Congress intended.

The second phase of both ERP and ELRP programs will fill gaps and cover producers who did not participate in or receive payments through the existing programs that are being leveraged for phase one implementation. When phase one payment processing is complete, the remaining funds will be used to cover gaps identified under phase two.

Through proactive communication and outreach, USDA will keep producers and stakeholders informed as program details are made available. More information on ERP can be found in the Notice of Funding Availability.

Additional Commodity Loss Assistance

The Milk Loss Program and On-Farm Stored Commodity Loss Program are also funded through the Extending Government Funding and Delivering Emergency Assistance Act and will be announced in a future rule in the Federal Register.

More Information

Additional USDA disaster assistance information can be found on farmers.gov, including the Disaster Assistance Discovery Tool, Disaster-at-a-Glance fact sheet, and Farm Loan Discovery Tool. For FSA and Natural Resources Conservation Service programs, producers should contact their local USDA Service Center. For assistance with a crop insurance claim, producers and landowners should contact their crop insurance agent.

USDA Accepting Applications to Help Cover Costs of Organic, Transitioning Producers

Agricultural producers and handlers who are certified organic, along with producers and handlers who are transitioning to organic production, can now apply for the U.S. Department of Agriculture’s (USDA) Organic and Transitional Education Certification Program (OTECP) and Organic Certification Cost Share Program (OCCSP), which help producers and handlers cover the cost of organic certification, along with other related expenses. Applications for OTECP and OCCSP are both due October 31, 2022.

OTECP covers:

- Certification costs for organic producers and handlers (25% up to $250 per category).
- Eligible expenses for transitional producers, including fees for pre-certification inspections and development of an organic system plan (75% up to $750).
- Registration fees for educational events (75% up to $200).
Soil testing (75% up to $100).

Meanwhile, OCCSP covers 50% or up to $500 per category of certification costs in 2022.

This cost share for certification is available for each of these categories: crops, wild crops, livestock, processing/handling and State organic program fees.

Producers can receive cost share through both OTECP and OCCSP. Both OTECP and OCCSP cover costs incurred from October 1, 2021, to September 30, 2022. Producers have until October 31, 2022 to file applications, and FSA will make payments as applications are received.

To apply, producers and handlers should contact the Farm Service Agency (FSA) at their local USDA Service Center. As part of completing the OCCSP applications, producers and handlers will need to provide documentation of their organic certification and eligible expenses. Organic producers and handlers may also apply for OCCSP through participating State agencies.

Additional details can be found on the OTECP and OCCSP webpages.

---

**FSA Offers Drought Assistance for Livestock Producers Through Emergency Assistance for Livestock, Honey Bees and Farm-raised Fish Program (ELAP)**

If you’ve suffered above normal expenses for hauling feed or water to livestock or hauling livestock to forage/grazing acres due to the impacts of drought, you may be eligible for financial assistance through the Emergency Assistance for Livestock, Honey Bees, and Farm-Raised Fish Program (ELAP).

For eligible producers in qualifying counties, ELAP provides financial assistance for:

- the transportation of water to livestock;
- the above normal cost of mileage for transporting feed to livestock,
- the above normal cost of transporting livestock to forage/grazing acres.*

*Hauling livestock one-way, one haul per animal reimbursement and no payment for “empty miles.”*

Eligible livestock include cattle, buffalo, goats and sheep, among others, that are maintained for commercial use and located in a county where the qualifying drought conditions occur. A county must have had D2 severe drought intensity on the U.S. Drought Monitor for eight consecutive weeks during the normal grazing period, or D3 or D4 drought intensity at any time during the normal grazing period. Producers must have risk in both eligible livestock and eligible grazing land in an eligible county to qualify for ELAP assistance.

**WATER TRANSPORTATION**
For ELAP water transportation assistance, a producer must be transporting water to eligible livestock on eligible grazing land where the producer had adequate livestock watering systems or facilities in place before the drought occurred and where they do not normally require the transportation of water. Payments are for costs associated with personal labor, equipment, hired labor, equipment, and/or contracted water transportation fees. Cost of the water itself is not covered. The ELAP payment formula uses a national average price per gallon.

ABOVE NORMAL COSTS OF TRANSPORTING FEED

ELAP provides financial assistance to livestock producers who incur above normal expenses for transporting feed to livestock during drought. The payment formula excludes the first 25 miles and any mileage over 1,000 miles. The reimbursement rate is 60% of the costs above what would normally have been incurred during the same time period in a normal (non-drought) year. ABOVE NORMAL COSTS OF TRANSPORTING LIVESTOCK TO FORAGE/GRAZING ACRES

ELAP provides financial assistance to livestock producers who are hauling livestock to a new location for feed resources due to insufficient feed and/or grazing in drought-impacted areas. Assistance for Livestock transportation is retroactive to 2021 and available for 2022 and subsequent years. For those interested in this provision for 2021, the deadline to apply for assistance is June 30, 2022. Please contact your county FSA office for additional details.

For calendar year 2022 forward, producers must submit a notice of loss to your local FSA office within 30 calendar days of when the loss is apparent; producers should contact their county FSA office as soon as the loss of water resources or feed resources are known. For ELAP eligibility, documentation of expenses is critical. Producers should maintain records and receipts associated with the costs of transporting water to eligible livestock, the costs of transporting feed to eligible livestock, and the costs of transporting eligible livestock to forage/grazing acres.

ELAP also offers assistance to producers impacted by wildfire. Contact your county FSA office for more information on ELAP resources for wildfire losses. In addition, beekeepers also can benefit from ELAP provisions and should contact their county FSA office within 15 calendar days of when a loss occurs or from when the loss is apparent. For more information regarding ELAP, contact your local County USDA Service Center at fsa.usda.gov/disaster.

USDA to Provide Payments to Livestock Producers Impacted by Drought or Wildfire

The U.S Department of Agriculture (USDA) announced that ranchers who have approved applications through the 2021 Livestock Forage Disaster Program (LFP) for forage losses due to severe drought or wildfire in 2021 will soon begin receiving emergency relief payments for increases in supplemental feed costs in 2021 through the Farm Service Agency’s (FSA) new Emergency Livestock Relief Program (ELRP).

Background
On September 30, 2021, President Biden signed into law the *Extending Government Funding and Delivering Emergency Assistance Act* (P.L. 117-43). This Act includes $10 billion in assistance to agricultural producers impacted by wildfires, droughts, hurricanes, winter storms and other eligible disasters experienced during calendar years 2020 and 2021. Additionally, the Act specifically targets $750 million to provide assistance to livestock producers for losses incurred due to drought or wildfires in calendar year 2021. ELRP is part of FSA’s implementation of the Act.

For impacted producers, USDA will leverage LFP data to deliver immediate relief for increases in supplemental feed costs in 2021. LFP is an important tool that provides up to 60% of the estimated replacement feed cost when an eligible drought adversely impacts grazing lands or 50% of the monthly feed cost for the number of days the producer is prohibited from grazing the managed rangeland because of a qualifying wildfire.

FSA received more than 100,000 applications totaling nearly $670 million in payments to livestock producers under LFP for the 2021 program year.

Congress recognized requests for assistance beyond this existing program and provided specific funding for disaster-impacted livestock producers in 2021.

**ELRP Eligibility – Phase One**

To be eligible for an ELRP payment under phase one of program delivery, livestock producers must have suffered grazing losses in a county rated by the U.S. Drought Monitor as having a D2 (severe drought) for eight consecutive weeks or a D3 (extreme drought) or higher level of drought intensity during the 2021 calendar year, and have applied and been approved for 2021 LFP. Additionally, producers whose permitted grazing on federally managed lands was disallowed due to wildfire are also eligible for ELRP payments, if they applied and were approved for 2021 LFP.

As part of FSA’s efforts to streamline and simplify the delivery of ELRP phase one benefits, producers are not required to submit an application for payment; however, they must have the following forms on file with FSA within a subsequently announced deadline as determined by the Deputy Administrator for Farm Programs:

- CCC-853, *Livestock Forage Disaster Program Application*
- Form AD-2047, *Customer Data Worksheet*.
- Form CCC-902, *Farm Operating Plan* for an individual or legal entity.
- Form CCC-901, *Member Information for Legal Entities* (if applicable).
- Form FSA-510, *Request for an Exception to the $125,000 Payment Limitation for Certain Programs* (if applicable).
- Form CCC-860, *Socially Disadvantaged, Limited Resource, Beginning and Veteran Farmer or Rancher Certification*, if applicable, for the 2021 program year.
- A highly erodible land conservation (sometimes referred to as HELC) and wetland conservation certification (Form AD-1026 *Highly Erodible Land Conservation (HELC) and Wetland Conservation (WC) Certification*) for the ELRP producer and applicable affiliates.
ELRP Payment Calculation – Phase One

To further expedite payments to eligible livestock producers, determine eligibility, and calculate an ELRP phase one payment, FSA will utilize livestock inventories and drought-affected forage acreage or restricted animal units and grazing days due to wildfire already reported by the producer when they submitted a 2021 CCC-853, Livestock Forage Disaster Program Application form.

Phase one ELRP payments will be equal to the eligible livestock producer’s gross 2021 LFP calculated payment multiplied by a payment percentage, to reach a reasonable approximation of increased supplemental feed costs for eligible livestock producers in 2021.

The ELRP payment percentage will be 90% for historically underserved producers, including beginning, limited resource, and veteran farmers and ranchers, and 75% for all other producers. These payments will be subject to a payment limitation.

To qualify for the higher payment percentage, eligible producers must have a CCC-860, Socially Disadvantaged, Limited Resource, Beginning and Veteran Farmer or Rancher Certification, form on file with FSA for the 2021 program year.

Payments to eligible producers through phase one of ELRP are estimated to total more than $577 million.

ELRP - Phase Two

Today’s announcement is only Phase One of relief for livestock producers. FSA continues to evaluate and identify impacts of 2021 drought and wildfire on livestock producers to ensure equitable and inclusive distribution of much-needed emergency relief program benefits.

Emergency Relief Program (ERP) Assistance for Crop Producers

FSA is developing a two-phased process to provide assistance to diversified, row crop and specialty crop operations that were impacted by an eligible natural disaster event in calendar years 2020 or 2021.

This program will provide assistance to crop producers and will follow a two-phased process similar to that of the livestock assistance with implementation of the first phase in the coming weeks. Phase one of the crop assistance program delivery will leverage existing Federal Crop Insurance or Noninsured Crop Disaster Assistance Program data as the basis for calculating initial payments.

Making the initial payments using existing safety net and risk management data will both speed implementation and further encourage participation in these permanent programs, including the Pasture, Rangeland, Forage Rainfall Index Crop Insurance Program, as Congress intended.

The second phase of the crop program will be intended to fill additional assistance gaps and cover eligible producers who did not participate in existing risk management programs.

Through proactive communication and outreach, USDA will keep producers and stakeholders informed as ERP implementation details are made available.
**Additional Livestock Drought Assistance**

Due to the persistent drought conditions in the Great Plains and West, FSA will be offering additional relief through the Emergency Assistance for Livestock, Honeybees and Farm-raised Fish Program (ELAP) to help ranchers cover above normal costs of hauling livestock to forage. This policy enhancement complements previously announced ELAP compensation for hauling feed to livestock. Soon after FSA announced the assistance for hauling feed to livestock, stakeholders were quick to point out that producers also were hauling the livestock to the feed source as well and encouraged this additional flexibility.

It is important to note that, unlike ELRP emergency relief benefits which are only applicable for eligible losses incurred in the 2021 calendar year, this ELAP livestock and feed hauling compensation will not only be retroactive for 2021 but will also be available for losses in 2022 and subsequent years.

To calculate ELAP program benefits, an [online tool](#) is currently available to help producers document and estimate payments to cover feed transportation cost increases caused by drought and will soon be updated to assist producers with calculations associated with drought related costs incurred for hauling livestock to forage.

**More Information**

Additional USDA disaster assistance information can be found on farmers.gov, including USDA resources specifically for producer impacted by [drought](#) and [wildfire](#) and the [Disaster Assistance Discovery Tool](#), [Disaster-at-a-Glance fact sheet](#), and [Farm Loan Discovery Tool](#).

For FSA and Natural Resources Conservation Service programs, producers should contact their local [USDA Service Center](#). For assistance with a crop insurance claim, producers and landowners should contact their [crop insurance agent](#).

---

**Update Your Records**

FSA is cleaning up our producer record database and needs your help. Please report any changes of address, zip code, phone number, email address or an incorrect name or business name on file to our office. You should also report changes in your farm operation, like the addition of a farm by lease or purchase. You should also report any changes to your operation in which you reorganize to form a Trust, LLC or other legal entity.

FSA and NRCS program participants are required to promptly report changes in their farming operation to the County Committee in writing and to update their Farm Operating Plan on form CCC-902.

To update your records, contact your local County USDA Service Center.

---

**Applying for Farm Storage Facility Loans**

The Farm Service Agency’s (FSA) Farm Storage Facility Loan (FSFL) program provides low-interest financing to help you build or upgrade storage facilities and to purchase portable (new or used) structures, equipment and storage and handling trucks.
Eligible commodities include corn, grain sorghum, rice, soybeans, oats, peanuts, wheat, barley, minor oilseeds harvested as whole grain, pulse crops (lentils, chickpeas and dry peas), hay, honey, renewable biomass, fruits, nuts and vegetables for cold storage facilities, floriculture, hops, maple sap, rye, milk, cheese, butter, yogurt, meat and poultry (unprocessed), eggs, and aquaculture (excluding systems that maintain live animals through uptake and discharge of water). Qualified facilities include grain bins, hay barns and cold storage facilities for eligible commodities.

Loans up to $50,000 can be secured by a promissory note/security agreement, loans between $50,000 and $100,000 may require additional security, and loans exceeding $100,000 require additional security.

You do not need to demonstrate the lack of commercial credit availability to apply. The loans are designed to assist a diverse range of farming operations, including small and mid-sized businesses, new farmers, operations supplying local food and farmers markets, non-traditional farm products, and underserved producers.

For more information, contact your local County USDA Service Center or visit fsa.usda.gov/pricesupport.

Farmers.gov Feature Helps Producers Find Farm Loans that Fit Their Operation

Farmers and ranchers can use the Farm Loan Discovery Tool on farmers.gov to find information on USDA farm loans that may best fit their operations.

USDA’s Farm Service Agency (FSA) offers a variety of loan options to help farmers finance their operations. From buying land to financing the purchase of equipment, FSA loans can help.

USDA conducted field research in eight states, gathering input from farmers and FSA farm loan staff to better understand their needs and challenges.

How the Tool Works

Farmers who are looking for financing options to operate a farm or buy land can answer a few simple questions about what they are looking to fund and how much money they need to borrow. After submitting their answers, farmers will receive information on farm loans that best fit their specific needs. The loan application and additional resources also will be provided.

Farmers can download application quick guides that outline what to expect from preparing an application to receiving a loan decision. There are four guides that cover loans to individuals, entities, and youth, as well as information on microloans. The guides include general eligibility requirements and a list of required forms and documentation for each type of loan. These guides can help farmers prepare before their first USDA service center visit with a loan officer.

Farmers can access the Farm Loan Discovery Tool by visiting farmers.gov/fund and clicking the “Start” button. Follow the prompts and answer five simple questions to receive loan
information that is applicable to your agricultural operation. The tool is built to run on any modern browser like Chrome, Edge, Firefox, or the Safari browser, and is fully functional on mobile devices. It does not work in Internet Explorer.

About Farmers.gov

In 2018, USDA unveiled farmers.gov, a dynamic, mobile-friendly public website combined with an authenticated portal where farmers will be able to apply for programs, process transactions, and manage accounts.

The Farm Loan Discovery Tool is one of many resources on farmers.gov to help connect farmers to information that can help their operations. Earlier this year, USDA launched the My Financial Information feature, which enables farmers to view their loan information, history, payments, and alerts by logging into the website.

USDA is building farmers.gov for farmers, by farmers. In addition to the interactive farm loan features, the site also offers a Disaster Assistance Discovery Tool. Farmers can visit farmers.gov/recover/disaster-assistance-tool#step-1 to find disaster assistance programs that can help their operation recover from natural disasters.

For more information, contact your local County USDA Service Center or visit farmers.gov.

Reminders for FSA Direct and Guaranteed Borrowers with Real Estate Security

Farm loan borrowers who have pledged real estate as security for their Farm Service Agency (FSA) direct or guaranteed loans are responsible for maintaining loan collateral. Borrowers must obtain prior consent or approval from FSA or the guaranteed lender for any transaction that affects real estate security. These transactions include, but are not limited to:

- Leases of any kind
- Easements of any kind
- Subordinations
- Partial releases
- Sales

Failure to meet or follow the requirements in the loan agreement, promissory note, and other security instruments could lead to nonmonetary default which could jeopardize your current and future loans.

It is critical that borrowers keep an open line of communication with their FSA loan staff or guaranteed lender when it comes to changes in their operation. For more information on borrower responsibilities, read Your FSA Farm Loan Compass.
