Commodity Program Payments: $3,736,105

New Jersey producers received substantial monetary support during FY 2014 in the form of commodity and price support program payments.

$2,246,224 - Direct and Counter Cyclical Program (DCP) Direct payments provide income support to producers of eligible commodities based on production history (acreage and yields) and do not depend on the current production choices. Counter-cyclical payments are made when the effective price for eligible commodities is less than the target price.

$766,926 - Commodity Loans are available to eligible producers who use crops as collateral. The Commodity Credit Corporation (CCC) makes loans for eligible commodities that are farm or warehouse stored.

$5,225 - Milk Income Loss Contract (MILC) provides compensation to dairy producers when domestic milk prices fall below a specified level.

$717,730 - Farm Storage Facility Loans (FSFL) The Commodity Credit Corporation (CCC), through FSA, makes loans to producers to build or upgrade farm storage and handling facilities for eligible commodities.

Conservation: $686,719

FSA made significant investments toward conserving and improving soil, water, and wildlife resources in New Jersey. Conservation investments in FY 2014 include:

$360,105 - Conservation Reserve Program (CRP) provides financial incentives, cost-share and rental payments to producers who convert highly erodible cropland or environmentally sensitive acreage to long-term vegetative cover.

$38,983 - Grassland Reserve Program (GRP) is a voluntary program designed to protect grasslands from conversion to cropland or other uses.

$105,930 - Emergency Conservation Program (ECP) provides emergency funding for farmers to rehabilitate farmland damaged by natural disasters, and to enact emergency water conservation measures during periods of severe drought.

$181,701 - Emergency Forest Restoration Program (EFRP) funds restoration of forestland damaged by 2011 drought and wildfires. Planted trees help reduce flood effects, protect water sources, decrease soil erosion and improve wildlife habitat.
