Farmers and Ranchers in New Mexico Can Now Apply for Financial Assistance through USDA’s Coronavirus Food Assistance Program

Online Tools and Toll-Free Number Available to Assist Producers

Agricultural producers can now apply for USDA’s Coronavirus Food Assistance Program (CFAP), which provides direct payments to offset impacts from the coronavirus pandemic. The application and a payment calculator are now available online, and USDA’s Farm Service Agency (FSA) staff members are available via phone, fax and online tools to help producers complete applications. The agency set up a call center in order to simplify how they serve new customers across the nation.

Applications will be accepted through August 28, 2020. Through CFAP, USDA is making available $16 billion for vital financial assistance to producers of agricultural commodities who have suffered a five-percent-or-greater price decline due to COVID-19 and face additional significant marketing costs as a result of lower demand, surplus production, and disruptions to shipping patterns and the orderly marketing of commodities.

We also want to remind producers that the program is structured to ensure the availability of funding for all eligible producers who apply.

In order to do this, producers will receive 80 percent of their maximum total payment upon approval of the application. The remaining portion of the payment, not to exceed the payment limit, will be paid at a later date nationwide, as funds remain available.

Producers can download the CFAP application and other eligibility forms from [farmers.gov/cfap](http://farmers.gov/cfap). Also, on that webpage, producers can find a payment calculator to help identify sales and inventory records needed to apply and calculate potential payments.
Additionally, producers in search of one-on-one support with the CFAP application process can call 877-508-8364 to speak directly with a USDA employee ready to offer assistance. This is a good first step before a producer engages the team at the FSA county office at their local USDA Service Center.

Applying for Assistance

Producers of all eligible commodities will apply through their local FSA office. Those who use the online calculator tool will be able to print off a pre-filled CFAP application, sign, and submit to your local FSA office either electronically or via hand delivery. Please contact your local office to determine the preferred method. Find contact information for your local office at farmers.gov/cfap.

Documentation to support the producer’s application and certification may be requested after the application is filed. FSA has streamlined the signup process to not require an acreage report at the time of application and a USDA farm number may not be immediately needed.

Additional Commodities

USDA is also establishing a process for the public to identify additional commodities for potential inclusion in CFAP. Specifically, USDA is looking for data on agricultural commodities, that are not currently eligible for CFAP, that the public believes to have either:

1. suffered a five percent-or-greater price decline between mid-January and mid-April as a result of the COVID-19 pandemic,
2. shipped but subsequently spoiled due to loss of marketing channel, or
3. not left the farm or remained unharvested as mature crops.

More information about this process is available on farmers.gov/cfap.

More Information

To find the latest information on CFAP, visit farmers.gov/cfap or call 877-508-8364.

USDA Service Centers are open for business by phone appointment only, and field work will continue with appropriate social distancing. While program delivery staff will continue to come into the office, they will be working with producers by phone and using online tools whenever possible. All Service Center visitors wishing to conduct business with the FSA, Natural Resources Conservation Service, or any other Service Center agency are required to call their Service Center to schedule a phone appointment. More information can be found at farmers.gov/coronavirus.

USDA Announces Updates for Honeybee Producers

The U.S. Department of Agriculture’s Farm Service Agency (FSA) announced updates to the Emergency Assistance for Livestock, Honeybees and Farm-Raised Fish Program (ELAP). These updates include changes required by the 2018 Farm Bill as well as discretionary changes intended to improve the administration of the program and clarify existing program requirements. ELAP was previously administered based on FSA’s fiscal year but will now run according to the calendar year. Producers are still required to submit an application for payment within 30 calendar days of the end of the program year. This is not a policy change but will affect the deadline. The signup deadline for calendar year 2020 losses is February 1, 2021.

Starting in 2020, producers will have 15 days from when the loss is first apparent, instead of 30 days, to file a honeybee notice of loss. This change provides consistency between ELAP and the Noninsured Crop Disaster Assistance Program, which also has a 15-day notice of loss period for honey. For other covered losses, including livestock feed, grazing and farm-raised fish losses, the notice of loss deadline for ELAP will remain 30 days from when the loss is first apparent to the producer.
Program participants who were paid for the loss of a honeybee colony or hive in either or both of the previous two years will be required to provide additional documentation to substantiate how current year inventory was acquired.

If the honeybee colony loss incurred was because of Colony Collapse Disorder, program participants must provide a producer certification that the loss was a direct result of at least three of the five symptoms of Colony Collapse Disorder, which include:

- the loss of live queen and/or drone bee populations inside the hives;
- rapid decline of adult worker bee population outside the hives, leaving brood poorly or completely unattended;
- absence of dead adult bees inside the hive and outside the entrance of the hive;
- absence of robbing collapsed colonies; and
- at the time of collapse, varroa mite and Nosema populations are not at levels known to cause economic injury or population decline.

For honeybees, ELAP covers colony losses, honeybee hive losses (the physical structure) and honeybee feed losses in instances where the colony, hive or feed has been destroyed by a natural disaster or, in the case of colony losses, because of Colony Collapse Disorder. Colony losses must be in excess of normal mortality.

ELAP also provides emergency assistance to eligible producers of livestock and farm-raised fish including for feed and grazing losses. It covers losses because of eligible adverse weather or loss conditions, including blizzards and wildfires on federally managed lands. ELAP also covers losses resulting from the cost of transporting water to livestock due to an eligible drought.

For more information on ELAP visit farmers.gov/recover or contact your FSA County Office. To locate your local FSA office, visit farmers.gov/service-locator.

**USDA Offers Targeted Farm Loan Funding for Underserved Groups and Beginning Farmers**

The USDA Farm Service Agency (FSA) reminds producers that FSA offers targeted farm ownership and farm operating loans to assist underserved applicants as well as beginning farmers and ranchers.

USDA defines underserved applicants as a group whose members have been subjected to racial, ethnic, or gender prejudice because of their identity as members of the group without regard to their individual qualities. For farm loan program purposes, targeted underserved groups are women, African Americans, American Indians and Alaskan Natives, Hispanics and Asians and Pacific Islanders.

Underserved or beginning farmers and ranchers who cannot obtain commercial credit from a bank can apply for either FSA direct loans or guaranteed loans. Direct loans are made to applicants by FSA. Guaranteed loans are made by lending institutions who arrange for FSA to guarantee the loan. FSA can guarantee up to 95 percent of the loss of principal and interest on a loan. The FSA guarantee allows lenders to make agricultural credit available to producers who do not meet the lender’s normal underwriting criteria.

The direct and guaranteed loan program provides for two types of loans: farm ownership loans and farm operating loans. In addition to customary farm operating and ownership loans, FSA now offers Microloans through the direct loan program. The focus of Microloans is on the financing needs of small, beginning farmer, niche and non-traditional farm operations. Microloans are available for both ownership and operating finance needs. To learn more about microloans, visit fsa.usda.gov/microloans.

To qualify as a beginning producer, the individual or entity must meet the eligibility requirements outlined for direct or guaranteed loans. Additionally, individuals and all entity members must have
operated a farm for less than 10 years. Applicants must materially or substantially participate in the operation.

For more information on FSA’s farm loan programs and targeted underserved and beginning farmer guidelines, visit fsa.usda.gov/farmloans.

**USDA Accepting Proposals for State Acres for Wildlife Enhancement Initiative**

The U.S. Department of Agriculture’s Farm Service Agency (FSA) is now accepting new or modified proposals from state governments for its State Acres for Wildlife Enhancement (SAFE) Initiative. Through SAFE, vital habitat is restored to meet high-priority state wildlife conservation goals. The deadline to submit proposals is July 10.

SAFE practices must be used to restore animal habitats for the following categories:

- rare, threatened and endangered species
- species that have suffered a significant population decline
- species that provide significant social or economic value to the community.

SAFE grass and tree practices were moved to the Conservation Reserve Program (CRP) General Signup in 2019 and competed against other offers, while buffer and wetland practices remain under continuous CRP signup.

When submitted, proposals must include an overview of the project accomplishments, a list of all practices planned, the commitment of the state and participants and the planned outreach efforts.

For more information about SAFE and submitting a proposal, contact your FSA state office at 505-761-4900.

**USDA Packages Disaster Protection with Loans to Benefit Specialty Crop and Diversified Producers**

*Free basic coverage available for new and underserved loan applicants*

Producers who apply for FSA farm loans will be offered the opportunity to enroll in the Noninsured Crop Disaster Assistance Program (NAP). NAP is available to producers who grow noninsurable crops and is especially important to fruit and vegetable producers and other specialty crop growers.

New, underserved and limited income specialty growers who apply for farm loans could qualify for basic loss coverage at no cost.

The basic disaster coverage protects at 55 percent of the market price for crop losses that exceed 50 percent of production. Covered crops include “specialty” crops, for instance, vegetables, fruits, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, hay, forage, grazing and energy crops. FSA allows beginning, underserved or limited income producers to obtain NAP coverage up to 90 days after the normal application closing date when they also apply for FSA credit.

Producers also may work with FSA to protect value-added production, such as organic or direct market crops, at their fair market value in those markets. Targeted underserved groups eligible for free or discounted coverage are American Indians or Alaskan Natives, Asians, Blacks or African Americans, Native Hawaiians or other Pacific Islanders, Hispanics, and women.

FSA offers a variety of loan products, including farm ownership loans, operating loans and microloans that have a streamlined application process.
Growers need not apply for an FSA loan, nor be a beginning, limited resource, or underserved farmer, to be eligible for Noninsured Crop Disaster Assistance Program assistance. To learn more, visit fsa.usda.gov/nap or fsa.usda.gov/farmloans, or contact your local FSA office at offices.usda.gov.

**Update Your Records**

FSA is cleaning up our producer record database. If you have any unreported changes of address, zip code, phone number, email address or an incorrect name or business name on file they need to be reported to our office. Changes in your farm operation, like the addition of a farm by lease or purchase, need to be reported to our office as well. Producers participating in FSA and NRCS programs are required to timely report changes in their farming operation to the County Committee in writing and update their CCC-902 Farm Operating Plan.

If you have any updates or corrections, please call your local FSA office to update your records.

**New Mexico Conservation Funding Announcement**

The NRCS New Mexico Conservation Funding Opportunity (NFO), Opportunity Number USDA-NRCS-NM-CTA-20-NOFO0001015, has been posted to Grants.gov and is open for applications through July 15, 2020.

Conservation partners are invited to apply for NRCS assistance for the following opportunities:

1. **Conservation Outreach Workshops**: Promote public awareness of NRCS programs, and further the development of NRCS relationships with its conservation partners and participants, women agricultural producers, veterans, minority and limited resource landowners, beginning farmers, and historically underserved agricultural producers, producers in urban areas, acequias, and land grants. Direct involvement of conservation partners will enhance effectiveness of programs and ensure widest dissemination to the public while, also, offering an opportunity to provide information on current agricultural topics of interest to underserved segments of the regional agricultural population.

2. **Technical Workshops and/or Field Days on Native Plant Community Adoption, and/or Pollinator Habitat**: Provide learning opportunities to educate New Mexico agricultural producers who are following or considering native plant communities in rangeland systems. Opportunities will provide education and demonstration on topics including, but not limited to plant establishment, management techniques, details regarding rotational grazing and stockpiling, and native plant community adoption. Applicant must demonstrate the capability to unite members of the agriculture science and technology communities to share their knowledge with producers and other interested parties.

3. **Organic and Specialty Crop Workshops**: Provide learning opportunities to educate New Mexico agricultural producers, who are following or considering the use of organics, or considering transitioning to organic cropping systems for vegetables, fruits, specialty crops, produce, berries, and non-traditional agricultural production efforts in New Mexico. Examples include: Promotion and expansion of field-to-market efforts; voluntary landowner supported efforts to educate producers on how to implement organic farming techniques and improve understanding of organic labeling, marketing, and organic production benefits; and encourage technical assistance, education, research, technology transfer, and public awareness of economically and environmentally sustainable agricultural production techniques associated with organic and specialty crop production.

**FEDERAL AWARD INFORMATION**

1. **Estimated Funding** The total amount of Federal funding the agency expects to award through this opportunity is up to $100,000.

2. **Start Dates and Performance Periods** Projects will be 1 year in duration. Applicants should plan their projects based on a project start date of September 1, 2020.

3. **Type of Federal Award** The agency plans to award cooperative agreements pursuant to this opportunity.
4. **Number of Awards** The agency expects to make 5 awards.
