Message from the Acting State Executive Director

Effective on Monday, April 19, most Service Centers that are currently operating at up to 50% office staffing may begin to accept visitors by appointment only.

To make an appointment contact your local service center. Please visit farmers.gov/coronavirus for the latest information on Service Center status.

The FSA is and will continue to offer alternative methods in conducting business with the local FSA offices aside from our traditional methods of post mail and drop boxes. Alternative methods include, telephonic and virtual appointments. In addition FSA also accepts applications, signatures, documents through FAX, e-mail, OneSpan, and BOX.

Compliance (Acreage Reporting)

Annual Acreage Reporting is required for many FSA programs. Annual acreage reporting also helps you establish planting history. Please contact your local FSA office to inquire about the acreage reporting deadlines for your respective crops. The next Acreage Reporting Deadline in New Mexico is May 15 for the following crops:

- onions, pecan trees, spring barley, spring wheat, and potatoes (for Curry, Lea and Roosevelt counties)

Note, if there is NAP coverage on your crop and the onset of grazing or harvest is before the state’s acreage reporting date, you must report your acreage 15 calendar days prior to the start of grazing or harvest to remain in compliance with the NAP program.
2021 AgriFuture Zoom

A special version of the AgriFuture Educational Institute will be held via Zoom Monday, June 21 from 4 to 5:15 p.m. MT. Get those taste buds ready, and prepare to learn about the future of marketing ag products. This special AgriFuture Zoom will feature producers of specialty items via a New Mexico food product box and will include a “tasting” component. The registration fee is $15, and the registration deadline is 5 p.m. Thursday, May 13. Register at https://www.nmflb.org/2021agrifuture. Questions? Visit https://www.nmda.nmsu.edu/agrifuture/ or email Kristie Garcia at krgarcia@nmda.nmsu.edu.

About AgriFuture:

AgriFuture aims to connect, inform and inspire the next generation of farmers, ranchers and all people involved in agriculture. The New Mexico Department of Agriculture and a dozen other New Mexico agencies and agriculture organizations host AgriFuture in even-numbered years. (The 2020 event was not held due to the pandemic.) AgriFuture is geared toward anyone 18 to 40 years of age but is open to anyone older or younger who is interested in being a part of the future of agriculture. Current producers of any age are highly encouraged to join alongside future producers to learn and share insights.

Confidentiality Notice: New Mexico has a very broad public records law. Most written communications to or from state employees are public records. Your e-mail communications may therefore be subject to public disclosure. This e-mail, including all attachments is for the sole use of the intended recipients. Any unauthorized review, use, disclosure or distribution is prohibited unless specifically provided under the New Mexico Inspection of Public Records Act.

Farmers.gov Feature Helps Producers Find Farm Loans that Fit Their Operation

Farmers and ranchers can use the Farm Loan Discovery Tool on farmers.gov to find information on USDA farm loans that may best fit their operations.

USDA’s Farm Service Agency (FSA) offers a variety of loan options to help farmers finance their operations. From buying land to financing the purchase of equipment, FSA loans can help.

USDA conducted field research in eight states, gathering input from farmers and FSA farm loan staff to better understand their needs and challenges.

How the Tool Works

Farmers who are looking for financing options to operate a farm or buy land can answer a few simple questions about what they are looking to fund and how much money they need to borrow. After submitting their answers, farmers will receive information on farm loans that best fit their specific needs. The loan application and additional resources also will be provided.

Farmers can download application quick guides that outline what to expect from preparing an application to receiving a loan decision. There are four guides that cover loans to individuals, entities, and youth, as well as information on microloans. The guides include general eligibility requirements and a list of required forms and documentation for each type of loan. These guides can help farmers prepare before their first USDA service center visit with a loan officer.

Farmers can access the Farm Loan Discovery Tool by visiting farmers.gov/fund and clicking the “Start” button. Follow the prompts and answer five simple questions to receive loan information that is applicable to your agricultural operation. The tool is built to run on any modern browser like Chrome, Edge, Firefox, or the Safari browser, and is fully functional on mobile devices. It does not work in Internet Explorer.

About Farmers.gov
In 2018, USDA unveiled farmers.gov, a dynamic, mobile-friendly public website combined with an authenticated portal where farmers will be able to apply for programs, process transactions, and manage accounts.

The *Farm Loan Discovery Tool* is one of many resources on farmers.gov to help connect farmers to information that can help their operations. Earlier this year, USDA launched the *My Financial Information* feature, which enables farmers to view their loan information, history, payments, and alerts by logging into the website.

USDA is building farmers.gov for farmers, by farmers. In addition to the interactive farm loan features, the site also offers a Disaster Assistance Discovery Tool. Farmers can visit farmers.gov/recover/disaster-assistance-tool#step-1 to find disaster assistance programs that can help their operation recover from natural disasters.

---

**Maintaining Good Credit History**

Farm Service Agency (FSA) loans require applicants to have a satisfactory credit history. A credit report is requested for all FSA direct farm loan applicants. These reports are reviewed to verify outstanding debts, see if bills are paid timely and to determine the impact on cash flow.

Information on your credit report is strictly confidential and is used only as an aid in conducting FSA business.

Our farm loan staff will discuss options with you if you have an unfavorable credit report and will provide a copy of your report. If you dispute the accuracy of the information on the credit report, it is up to you to contact the issuing credit report company to resolve any errors or inaccuracies.

There are multiple ways to remedy an unfavorable credit score:

- Make sure to pay bills on time
  - Setting up automatic payments or automated reminders can be an effective way to remember payment due dates.
- Pay down existing debt
- Keep your credit card balances low
- Avoid suddenly opening or closing existing credit accounts

FSA’s farm loan staff will guide you through the process, which may require you to reapply for a loan after improving or correcting your credit report.

---

**Double-Cropping**

Each year, state committees review and approve or disapprove county committee recommended changes or additions to specific combinations of crops.

Double-cropping is approved when two specific crops have the capability to be planted and carried to maturity for the intended use, as reported by the producer, on the same acreage within a crop year under normal growing conditions. The specific combination of crops recommended by the county committee must be approved by the state committee.

Double-cropping is approved in New Mexico on a county-by-county basis. Contact your local FSA Office for a list of approved double-cropping combinations for your county.

A crop following a cover crop terminated according to termination guidelines is approved double cropping and these combinations do not have to be approved by the state committee.
After Identifying Gaps in Previous Aid, USDA Announces ‘Pandemic Assistance for Producers’ to Distribute Resources More Equitably

Agriculture Secretary Tom Vilsack announced that USDA is establishing new programs and efforts to bring financial assistance to farmers, ranchers and producers who felt the impact of COVID-19 market disruptions. The new initiative—USDA Pandemic Assistance for Producers—will reach a broader set of producers than in previous COVID-19 aid programs.

USDA is dedicating at least $6 billion toward the new programs. The Department will also develop rules for new programs that will put a greater emphasis on outreach to small and socially disadvantaged producers, specialty crop and organic producers, timber harvesters, as well as provide support for the food supply chain and producers of renewable fuel, among others. Existing programs like the Coronavirus Food Assistance Program (CFAP) will fall within the new initiative and, where statutory authority allows, will be refined to better address the needs of producers.

USDA Pandemic Assistance for Producers was needed, said Vilsack, after a review of previous COVID-19 assistance programs targeting farmers identified a number of gaps and disparities in how assistance was distributed as well as inadequate outreach to underserved producers and smaller and medium operations.

USDA will reopen sign-up for CFAP 2 for at least 60 days beginning on April 5, 2021. The USDA Farm Service Agency (FSA) has committed at least $2.5 million to improve outreach for CFAP 2 and will establish partnerships with organizations with strong connections to socially disadvantaged communities to ensure they are informed and aware of the application process.

USDA Pandemic Assistance for Producers – 4 Parts

Part 1: Investing $6 Billion to Expand Help & Assistance to More Producers

USDA will dedicate at least $6 billion to develop a number of new programs or modify existing proposals using discretionary funding from the Consolidated Appropriations Act and other coronavirus funding that went unspent by the previous administration.

Part 2: Adding $500 Million of New Funding to Existing Programs

USDA expects to begin investing approximately $500 million in expedited assistance through several existing programs this spring, with most by April 30.

Part 3: Carrying Out Formula Payments under CFAP 1, CFAP 2, CFAP AA

The Consolidated Appropriations Act, 2021, enacted December 2020 requires FSA to make certain payments to producers according to a mandated formula. USDA is now expediting these provisions because there is no discretion involved in interpreting such directives, they are self-enacting.

- An increase in CFAP 1 payment rates for cattle. Cattle producers with approved CFAP 1 applications will automatically receive these payments beginning in April. Information on the additional payment rates for cattle can be found on farmers.gov/cfap. Eligible producers do not need to submit new applications, since payments are based on previously approved CFAP 1 application. USDA estimates additional payments of more than $1.1 billion to more than 410,000 producers, according to the mandated formula.

- Additional CFAP assistance of $20 per acre for producers of eligible crops identified as CFAP 2 flat-rate or price-trigger crops beginning in April. This includes alfalfa, corn, cotton, hemp, peanuts, rice, sorghum, soybeans, sugar beets and wheat, among other crops. FSA will automatically issue payments to eligible price trigger and flat-rate crop producers based on the eligible acres included on their CFAP 2 applications. Eligible producers do not need to submit a new CFAP 2 application. For a list of all eligible row-crops, visit farmers.gov/cfap. USDA estimates additional payments of more than $4.5 billion to more than 560,000 producers, according to the mandated formula.
USDA will finalize routine decisions and minor formula adjustments on applications and begin processing payments for certain applications filed as part of the CFAP Additional Assistance program in the following categories:

- Applications filed for pullets and turfgrass sod;
- A formula correction for row-crop producer applications to allow producers with a non-Actual Production History (APH) insurance policy to use 100% of the 2019 Agriculture Risk Coverage-County Option (ARC-CO) benchmark yield in the calculation;
- Sales commodity applications revised to include insurance indemnities, Noninsured Crop Disaster Assistance Program payments, and Wildfire and Hurricane Indemnity Program Plus payments, as required by statute; and
- Additional payments for swine producers and contract growers under CFAP Additional Assistance remain on hold and are likely to require modifications to the regulation as part of the broader evaluation and future assistance; however, FSA will continue to accept applications from interested producers.

**Part 4: Reopening CFAP 2 Sign-Up to Improve Access & Outreach to Underserved Producers**

As noted above, USDA will re-open sign-up for of CFAP 2 for at least 60 days beginning on April 5, 2021.

- FSA has committed at least $2.5 million to establish partnerships and direct outreach efforts intended to improve outreach for CFAP 2 and will cooperate with grassroots organizations with strong connections to socially disadvantaged communities to ensure they are informed and aware of the application process.

Please visit [www.farmers.gov](http://www.farmers.gov) for additional information and announcements under the USDA Pandemic Assistance to Producers initiative, which will help to expand and more equitably distribute financial assistance to producers and farming operations during the COVID-19 national emergency.

**Change to Policy on Filing a Notice of Loss for Grazed Forage Producers with NAP Coverage**

For the 2021 and subsequent crop years, NAP forage producers with the intended use of grazing who elect to use independent assessments or other approved alternative loss percentage methods to establish their loss are no longer required to file a CCC-576 Notice of Loss with FSA. However, a CCC-576 Application for Payment form must be submitted to FSA no later than 60 calendar days after the coverage period ends.

Producers that elect to have the grazing loss determined using similar mechanically harvested units still must timely file a CCC-576 Notice of Loss within 15 days of the disaster event or damage to the crop first becomes apparent or within 15 days of harvest.

**The Importance of Responding to NASS Surveys**

USDA’s National Agricultural Statistics Service (NASS) conducts hundreds of surveys every year and prepares reports covering virtually every aspect of U.S. agriculture.

If you receive a survey questionnaire, please respond quickly and online if possible.

The results of the surveys help determine the structure of USDA farm programs, such as soil rental rates for the Conservation Reserve Program and prices and yields used for the Agriculture Risk Coverage and Price Loss Coverage programs. This county-level data is critical for USDA farm payment determinations. Survey responses also help associations, businesses and policymakers advocate for their industry and help educate others on the importance of agriculture.
NASS safeguards the privacy of all respondents and publishes only aggregate data, ensuring that no individual operation or producer can be identified.

NASS data is available online at nass.usda.gov/Publications and through the searchable Quick Stats database. Watch a video on how NASS data is used at youtube.com/watch?v=m-4zjn26io&feature=youtu.be.
