Farm Storage Facility Loans
Now Includes Loans for Portable Farm Storage and Handling Equipment

FSA’s Farm Storage Facility Loan (FSFL) program provides low-interest financing to producers to build or upgrade storage facilities, including new options to help farmers purchase portable storage and handling equipment. The loans, which now include a smaller microloan option with lower down payments, are designed to help producers, including new, small and mid-sized producers, grow their businesses and markets.

The program also offers a new “microloan” option, which allows applicants seeking less than $50,000 to qualify for a reduced down payment of five percent and no requirement to provide three years of production history. Farms and ranches of all sizes are eligible. The microloan option is expected to be of particular benefit to smaller farms and ranches, and specialty crop producers who may not have access to commercial storage or on-farm storage after harvest. These producers can invest in washing and handling equipment or refrigeration units and trucks that can store commodities before delivering them to markets. Qualified permanent facilities include grain bins, hay barns, forage bunks, milk houses, and cold storage facilities for eligible commodities. Producers do not need to demonstrate the lack of commercial
Please contact your local FSA Office for questions specific to your operation or county.

Earlier this year, FSA significantly expanded the list of commodities eligible for Farm Storage Facility Loan. Eligible commodities now include:

- Fruits & Vegetables
- Grains
- Hay & Forage
- Meat, Poultry & Eggs
- Milk, Cheese, Butter & Yogurt
- Honey
- Hops
- Maple Sap
- Renewable Biomass
- Aquaculture
- Floriculture

FSAfarm+, FSA’s Customer Self-Service Portal

The U.S. Department of Agriculture (USDA) Farm Service Agency (FSA) has launched a new tool to provide farmers and ranchers with remote access to their personal farm information using their home computers. Farmers and ranchers can now view, print or export their personal farm data all without visiting an FSA county office.

The program, known as FSAfarm+, provides you with secure access to view your personal FSA data, such as base and yields, Conservation Reserve Program data, other conservation program acreage, Highly Erodible Land Conservation and Wetland Conservation status information, field boundaries, farm imagery, name and address details, contact information and membership interest and shares in the operation. This data will be available in real time, at no cost to the producer and allow operators and owners to export and print farm records, including maps. Producers also can electronically share their data with a crop insurance agent from their own personal computer.

Farm operators and owners first will need “Level 2 eAuthentication” to access the webportal. This level of security ensures that personal information is protected for each user. Level 2 access can be obtained by going to www.eauth.usda.gov, completing the required information and then visiting your local FSA office to finalize access.

For more information on FSAfarm+, the customer self-service portal, contact your local FSA office. To find your local FSA county office, click http://offices.usda.gov.

Youth Loans

The Farm Service Agency makes loans to youth to establish and operate agricultural income-producing projects in connection with 4-H clubs, FFA and other agricultural groups. Projects must be planned and operated with the help of the organization advisor, produce sufficient income to repay the loan and provide the youth with practical business and educational experience. The maximum loan amount is $5000.
Youth Loan Eligibility Requirements:

- Be a citizen of the United States (which includes Puerto Rico, the Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands) or a legal resident alien
- Be 10 years to 20 years of age
- Comply with FSA's general eligibility requirements
- Be unable to get a loan from other sources
- Conduct a modest income-producing project in a supervised program of work as outlined above
- Demonstrate capability of planning, managing and operating the project under guidance and assistance from a project advisor. The project supervisor must recommend the youth loan applicant, along with providing adequate supervision.

Stop by the county office for help preparing and processing the application forms.

Measurement Service

Farmers who would like a guarantee on their crop plantings and land use acreages can make it official by using the FSA measurement service. Producers must file a request with the county office staff and pay the cost of a field visit to have stake and referencing done on the farm. Measurement service is available using digital imagery. If an on-site visit is not required producers are charged a reduced rate.

Incorrect acreage self-certification can result in reduced program payments, penalty or loss of eligibility.

USDA Expands Farm Loans for Native Americans Farming and Ranching on Tribal Land

Department Awards First Loan Under Highly Fractionated Indian Land Program

USDA has approved and obligated the first loan under the Highly Fractionated Indian Land Loan program (HFIL). The program, made possible by the 2014 Farm Bill, provides revolving loan funds to qualified intermediary lenders, allowing qualified tribes and individuals the ability to purchase tribal farmland that has multiple owners.

The first recipient, the Native American Community Development Corporation Financial Services, Inc. (NACDCFS) of Browning, Mont., will lend funds directly to tribal members through a $10 million intermediary HFIL loan from USDA’s Farm Service Agency (FSA). NACDCFS addresses critical needs in Native American communities related to the growth of family assets, supports economic development, and enhances the quality of life for communities and residents located on or near Montana’s seven Indian reservations. NACDCFS provides one-on-one technical assistance to Native American entrepreneurs and agricultural producers. NACDCFS is a 501(c) (3), certified Native Community Development Financial Institution (CDFI), through the U.S. Department of Treasury.

Under the 1887 Dawes Act, Indian reservation land was divided and allotted to individual tribal members such that with the passing of each generation, title ownership was divided and parcelled among heirs, while the land was not. As a result, land once owned by a single person could today be owned by hundreds or thousands of individuals, resulting in what is known as “highly fractionated Indian land.” In many instances, landowners are unknown or cannot be located, which complicates the coordination of ownership or prevents the use of the property altogether. There are more than 245,000 owners of three million fractionated land interests spanning approximately 150 Indian
reservations.

Under HFIL, tribes and tribal members can submit an application directly to an intermediary lender. To participate, intermediary lenders first must be approved by USDA. The lenders may be private and tribal nonprofit corporations, public agencies, Indian tribes or lenders subject to federal or state regulation (such as a credit union or other financial institution). FSA will lend to the intermediary, which will lend to the applicant. The intermediary lender also will administer the loan for the applicant.

For more information on the program, visit [www.fsa.usda.gov/farmloans](http://www.fsa.usda.gov/farmloans) or contact the local FSA county office. To find the local FSA office, visit [http://offices.usda.gov](http://offices.usda.gov).

**USDA Financial Assistance Available to Help Farmers Create Conservation Buffers**

USDA is assisting farmers with the cost of establishing up to 20,000 acres of new conservation buffers and other practices on and near farms that produce crops.

The financial assistance is available from the USDA Conservation Reserve Program (CRP), a federally funded voluntary program that contracts with agricultural producers so that environmentally sensitive land is not farmed or roused, but instead used for conservation benefits. CRP participants establish long-term, resource-conserving plant species, such as approved grasses or trees (known as “covers”) to control soil erosion, improve water quality and develop wildlife habitat. In return, FSA provides participants with rental payments and cost-share assistance. Contract duration is between 10 and 15 years.

For conservation buffers, funds are available for establishing shrubs and trees, or supporting pollinating species, and can be planted in blocks or strips. Interested organic producers can offer eligible land for enrollment in this initiative at any time.

For an interactive tour of CRP success stories, visit [www.fsa.usda.gov/CRPis30](http://www.fsa.usda.gov/CRPis30) or follow #CRPis30 on Twitter. To learn more about FSA programs visit a local FSA office or [www.fsa.usda.gov](http://www.fsa.usda.gov). To find your local FSA office, visit [http://offices.usda.gov](http://offices.usda.gov).

**USDA Resumes Incentives to Grow the Bioeconomy and Improve Forest Health**

USDA announced that $1.5 million will be available in fiscal year 2017 for farmers and foresters who harvest and deliver biomass for renewable energy. The funds are from the Biomass Crop Assistance Program (BCAP), which was reauthorized by the 2014 Farm Bill.

In fiscal year 2017, there is $3 million total available for BCAP, half of which is for harvesting and delivering forest or agricultural residues to a USDA-approved energy facility. BCAP also provides financial assistance to farmers and ranchers who establish and maintain new crops of biomass for energy or biobased products; additional information on the resumption of those funds will be announced at a later date.

Facilities seeking to be qualified by USDA to accept BCAP-funded biomass can begin enrollment Nov. 14 through Dec. 5, 2016. Also, between Jan. 9, 2017, through March 15, 2017, USDA will accept applications from foresters and farmers seeking incentives to remove biomass residues from fields or national forests for delivery to energy generation facilities. The retrieval payments are provided at match of $1 for $1, up to $20 per dry ton. Eligible crops include corn residue, orchard waste or diseased or insect-infested wood materials.
Tree Assistance Program (TAP) Sign-up

Orchardists and nursery tree growers who experience losses from natural disasters during calendar year 2016 must submit a TAP application either 90 calendar days after the disaster event or the date when the loss is apparent. TAP was authorized by the Agricultural Act of 2014 as a permanent disaster program. TAP provides financial assistance to qualifying orchardists and nursery tree growers to replant or rehabilitate eligible trees, bushes and vines damaged by natural disasters.

Eligible tree types include trees, bushes or vines that produce an annual crop for commercial purposes. Nursery trees include ornamental, fruit, nut and Christmas trees that are produced for commercial sale. Trees used for pulp or timber are ineligible.

To qualify for TAP, orchardists must suffer a qualifying tree, bush or vine loss in excess of 15 percent mortality from an eligible natural disaster. The eligible trees, bushes or vines must have been owned when the natural disaster occurred; however, eligible growers are not required to own the land on which the eligible trees, bushes and vines were planted.

If the TAP application is approved, the eligible trees, bushes and vines must be replaced within 12 months from the date the application is approved. The cumulative total quantity of acres planted to trees, bushes or vines, for which a producer can receive TAP payments, cannot exceed 500 acres annually.

Unauthorized Disposition of Grain

If loan grain has been disposed of through feeding, selling or any other form of disposal without prior written authorization from the county office staff, it is considered unauthorized disposition. The financial penalties for unauthorized dispositions are severe and a producer’s name will be placed on a loan violation list for a two-year period. Always call before you haul any grain under loan.

MAL and LDP Policy Changes for Crop Years 2015-2018

The Agricultural Act of 2014 authorized 2014-2018 crop year Marketing Assistance Loans (MALs) and Loan Deficiency Payments (LDPs), with a few minor policy changes.

Among the changes, farm-stored MAL collateral transferred to warehouse storage will retain the original loan rate, be allowed to transfer only the outstanding farm-stored quantity with no additional quantity allowed and will no longer require producers to have a paid for measurement service when moving or commingling loan collateral.

MALs and LDPs provide financing and marketing assistance for wheat, feed grains, soybeans, and other oilseeds, pulse crops, rice, peanuts, cotton, wool and honey. MALs provide producers interim financing after harvest to help them meet cash flow needs without having to sell their commodities when market prices are typically at harvest-time lows. A producer who is eligible to obtain a loan, but agrees to forgo the loan, may obtain an LDP if such a payment is available. Marketing loan provisions and LDPs are not available for sugar and extra-long staple cotton.

FSA is now accepting requests for 2016 MALs and LDPs for all eligible commodities after harvest.
Before MAL repayments with a market loan gain or LDP disbursements can be made, producers must meet the requirements of actively engaged in farming, cash rent tenant and member contribution.

Commodity certificates are available to loan holders who have outstanding nonrecourse loans for wheat, feed grains, pulse crops (dry peas, lentils, large and small chickpeas), wool, soybeans and designated minor oilseeds. These certificates can be purchased at the posted county price (or adjusted world price or national posted price) for the quantity of commodity under loan, and must be immediately exchanged for the collateral, satisfying the loan. MALs redeemed with commodity certificates are not subject to the actively engaged in farming, cash-rent tenant, Adjusted Gross Income provisions or the payment limitation.

To be considered eligible for an LDP, producers must have form CCC-633EZ, Page 1 on file at their local FSA Office before losing beneficial interest in the crop. Pages 2, 3 or 4 of the form must be submitted when payment is requested.

The 2014 Farm Bill also establishes payment limitations per individual or entity not to exceed $125,000 annually on certain commodities for the following program benefits: price loss coverage payments, agriculture risk coverage payments, marketing loan gains (MLGs) and LDPs. These payment limitations do not apply to MAL loan disbursements or redemptions using commodity certificate exchange.

Adjusted Gross Income (AGI) provisions were modified by the 2014 Farm Bill, which states that a producer whose total applicable three-year average AGI exceeds $900,000 is not eligible to receive an MLG or LDP. Producers must have a valid CCC-941 on file to earn a market gain of LDP. The AGI does not apply to MALs redeemed with commodity certificate exchange.

For more information and additional eligibility requirements, please visit a nearby USDA Service Center or FSA's website www.fsa.usda.gov.
