New York State FSA Newsletter

SED Comments

As I approach the last day of my time here at USDA Farm Service Agency, I reflect back on some of the highlights of the last eight years here at FSA:

• Farm Storage Facility Loans – In the last year or so we have been able to greatly expand the commodities, structures and machinery that you can purchase using Farm Storage Facility Loans. I’m proud to say, a lot of these changes originate right here in New York! From cold storage, to refrigerated trucks, to milk houses, find out if a Farm Storage Facility Loan can work for you!
• Microlonans – This administration introduced microlonans, low interest loans up to $50,000 that require less paperwork and experience than traditional FSA Loans.
• Speaking of traditional FSA Loans, we have been able to reduce the closing time significantly here in New York State.
• Buy-Up Protection for NAP (Non-Insured Crop and Disaster Protection) – In the last farm bill, buy-up protection was added to the NAP program, making it a much more beneficial insurance program for farmers. Forage quality buy-up protection was also added, giving forage producers an insurance option as well, based not just on quantity, but
Farm Loan Chief:
John Liddington

Please contact your local FSA Office for questions specific to your operation or county.

http://offices.usda.gov

the quality of the forage.

• Urban Agriculture – this summer I toured a roof top farm in Brooklyn that produces 10 tons/acre! This is just one example of many diverse urban ag projects happening in New York City, and other urban areas around the State. There is so much interest in fact, we've been able to add a new position based in Brooklyn. Our Urban Ag Outreach Specialist position is the first of its kind in the country! I'm excited to see the impact this position will have.

• Sadly, we've also had to deal with numerous disasters over my time here, including floods, frost and most recently, the worst drought in recorded New York history. We've worked diligently to make the National Disaster Programs work as well as they can in New York, especially the Emergency Conservation Program and Livestock Feed Program.

I am very thankful for my time here at FSA, getting to meet so many farmers from across our state and beyond, and working with all the great support organizations that exist in New York. One the best parts of this position is getting to know the FSA workforce here in New York. They are a great group, committed to providing you the farmers, the best customer service possible! As I return to my family's vegetable farm in the Schoharie Valley, I'm grateful for this opportunity at USDA and all the people that have made this experience a great one!

Thank you,
Jim Barber

Consider Risk Protection Coverage before Feb. 1 Deadline

The USDA Farm Service Agency (FSA) reminds producers to review available USDA crop risk protection options, including federal crop insurance and Noninsured Crop Disaster Assistance Program (NAP) coverage, before the crop deadline of February 1st.

Federal crop insurance covers crop losses from natural adversities such as drought, hail and excessive moisture. NAP covers losses from natural disasters on crops for which no permanent federal crop insurance program is available, including perennial grass forage and grazing crops, fruits, vegetables, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, bioenergy, and industrial crops.

The following crops in New York have a NAP application deadline of February 1, 2017:
Beets
Burdock
Chicory
Greens
Herbs
Leeks
Lettuce
Onions
Radicchio
Radishes
Scallions
Shallots
Turnips

USDA has partnered with Michigan State University and the University of Illinois to create an online tool at www.fsa.usda.gov/nap that allows producers to determine whether their crops are eligible for federal crop insurance or NAP and to explore the best level of protection for their operation. NAP
basic coverage is available at 55 percent of the average market price for crop losses that exceed 50 percent of expected production, with higher levels of coverage, up to 65 percent of their expected production at 100 percent of the average market price available, including coverage for organics and crops marketed directly to consumers. Crops intended for grazing are not eligible for additional NAP coverage.

Federal crop insurance coverage is sold and delivered solely through private insurance agents. Agent lists are available at all USDA Service Centers or at USDA’s online Agent Locator: http://prodwebnlb.rma.usda.gov/apps/AgentLocator/#. Producers can use the USDA Cost Estimator, https://ewebapp.rma.usda.gov/apps/costestimator/Default.aspx, to predict insurance premium costs.

For more information on NAP, service fees, premiums and sales deadlines, contact your local FSA office or visit the web at www.fsa.usda.gov/nap.

---

**Update Your Records**

FSA is cleaning up our producer record database. If you have any unreported changes of address or zip code or an incorrect name or business name on file they need to be reported to our office. Changes in your farm operation, like the addition of a farm by lease or purchase, need to be reported to our office as well. Producers participating in FSA and NRCS programs are required to timely report changes in their farming operation to the County Committee in writing and update their CCC-902 Farm Operating Plan.

If you have any updates or corrections, please call your local FSA office to update your records.

---

**Livestock Forage Losses Deadline Jan. 30**

Producers may be eligible to apply for 2016 Livestock Forage Disaster Program (LFP) benefits on native pasture, improved pasture, and forage sorghum.

LFP provides compensation to eligible livestock producers who suffer grazing losses for covered livestock due to drought on privately owned or cash leased land or fire on federally managed land.

**Eligible livestock producers must complete a CCC-853 and the required supporting documentation no later than January 30, 2017 for 2016 losses.**

County committees can only accept LFP applications after notification is received by the National Office of qualifying drought or if a federal agency prohibits producers from grazing normal permitted livestock on federally managed lands due to qualifying fire.

Additional Information about LFP, including eligible livestock and fire criteria, is available at your local FSA office or online at: www.fsa.usda.gov.

**Organic Producers and Handlers May Apply for Certification Cost Share Reimbursements; Expanded Eligibility for Transition and State Certification Cost**

The U.S. Department of Agriculture (USDA) today announced that starting March 20, 2017, organic producers and handlers will be able to visit over 2,100 USDA Farm Service Agency (FSA) offices to apply for federal reimbursement to assist with the cost of receiving and maintaining organic or transitional certification.

USDA reimburses organic producers up to 75 percent of the cost of organic certification, but only about half of the nation’s organic operations currently participate in the program. Starting March 20,
USDA will provide a uniform, streamlined process for organic producers and handlers to apply for organic cost share assistance either by mail or in person.

USDA is making changes to increase participation in the National Organic Certification Cost Share Program (NOCCSP) and the Agricultural Management Assistance Organic Certification Cost Share Program, and at the same time provide more opportunities for organic producers to access other USDA programs, such as disaster protection and loans for farms, facilities and marketing. Producers can also access information on nonfederal agricultural resources, and get referrals to local experts, including organic agriculture, through USDA’s Bridges to Opportunity service at the local FSA office.

Historically, many state departments of agriculture have obtained grants to disburse reimbursements to those producers and handlers qualifying for cost share assistance. FSA will continue to partner with states to administer the programs. For states that want to continue to directly administer the programs, applications will be due Feb. 17, 2017.

Eligible producers include any certified producers or handlers who have paid organic or transitional certification fees to a USDA-accredited certifying agent. Application fees, inspection costs, fees related to equivalency agreement/arrangement requirements, travel/per diem for inspectors, user fees, sales assessments and postage are all eligible for a cost share reimbursement from USDA.

Once certified, producers and handlers are eligible to receive reimbursement for up to 75 percent of certification costs each year up to a maximum of $750 per certification scope—crops, livestock, wild crops and handling. Today’s announcement also adds transitional certification and state organic program fees as additional scopes.

To learn more about organic certification cost share, please visit www.fsa.usda.gov/organic or contact a local FSA office by visiting http://offices.usda.gov.

**USDA Makes it Easier to Transfer Land to the Next Generation of Farmers and Ranchers**

Allows for Transfer of Certain Conservation Reserve Program Land to New Farmers; Provides Priority Enrollment in Working Lands Conservation Programs

Beginning Jan. 9, 2017, the U.S. Department of Agriculture (USDA) will offer an early termination opportunity for certain Conservation Reserve Program (CRP) contracts, making it easier to transfer property to the next generation of farmers and ranchers, including family members. The land that is eligible for the early termination is among the least environmentally sensitive land enrolled in CRP.

This change to the CRP program is just one of many that USDA has implemented based on recommendations from the Land Tenure Advisory Subcommittee formed by Agriculture Secretary Tom Vilsack in 2015.

Normally if a landowner terminates a CRP contract early, they are required to repay all previous payments plus interest. The new policy waives this repayment if the land is transferred to a beginning farmer or rancher through a sale or lease with an option to buy. With CRP enrollment close to the Congressionally-mandated cap of 24 million acres, the early termination will also allow USDA to enroll other land with higher conservation value elsewhere.

Acres terminated early from CRP under these land tenure provisions will be eligible for priority enrollment consideration into the CRP Grasslands, if eligible; or the Conservation Stewardship Program or Environmental Quality Incentives Program, as determined by the Natural Resources Conservation Service.

According to the Tenure, Ownership and Transition of Agricultural Land survey, conducted by USDA in 2014, U.S. farmland owners expect to transfer 93 million acres to new ownership during
2015-2019. This represents 10 percent of all farmland across the nation. Details on the early termination opportunity will be available starting on Jan. 9, 2017, at local USDA service centers. For more information about CRP and to find out if your acreage is eligible for early contract termination, contact your local Farm Service Agency (FSA) office or go online at www.fsa.usda.gov/crp. To locate your local FSA office, visit http://offices.usda.gov.

USDA Announces Streamlined Guaranteed Loans and Additional Lender Category for Small-Scale Operators
Options Help More Beginning, Small and Urban Producers Gain Access to Credit

The U.S. Department of Agriculture (USDA) announced the availability of a streamlined version of USDA guaranteed loans, which are tailored for smaller scale farms and urban producers. The program, called EZ Guarantee Loans, uses a simplified application process to help beginning, small, underserved and family farmers and ranchers apply for loans of up to $100,000 from USDA-approved lenders to purchase farmland or finance agricultural operations.

USDA today also unveiled a new category of lenders that will join traditional lenders, such as banks and credit unions, in offering USDA EZ Guarantee Loans. Microlenders, which include Community Development Financial Institutions and Rural Rehabilitation Corporations, will be able to offer their customers up to $50,000 of EZ Guaranteed Loans, helping to reach urban areas and underserved producers. Banks, credit unions and other traditional USDA-approved lenders, can offer customers up to $100,000 to help with agricultural operation costs.

EZ Guarantee Loans offer low interest rates and terms up to seven years for financing operating expenses and 40 years for financing the purchase of farm real estate. USDA-approved lenders can issue these loans with the Farm Service Agency (FSA) guaranteeing the loan up to 95 percent.

USDA is providing a 90-day period for the public to review and comment on program improvements. To review program details, visit www.regulations.gov, reference RIN 0560-AI34 and follow the instructions to submit comments.

More than half of all FSA loans go to new farmers and more than a quarter to underserved borrowers. FSA also offers loans of up to $5,000 to young farmers and ranchers though the Youth Loan Program. Loans are made to eligible youth to finance agricultural projects, with almost 9,000 young people now participating. More information about the available types of FSA farm loans can be found at www.fsa.usda.gov/farmloans or by contacting your local FSA office. To find your nearest office location, visit http://offices.usda.gov

Breaking New Ground

Agricultural producers are reminded to consult with FSA and NRCS before breaking out new ground for production purposes as doing so without prior authorization may put a producer’s federal farm program benefits in jeopardy. This is especially true for land that must meet Highly Erodible Land (HEL) and Wetland Conservation (WC) provisions.

Producers with HEL determined soils are required to apply tillage, crop residue and rotational requirements as specified in their conservation plan.

Producers should notify FSA as a first point of contact prior to conducting land clearing or drainage type projects to ensure the proposed actions meet compliance criteria such as clearing any trees to create new cropland, then these areas will need to be reviewed to ensure such work will not risk your eligibility for benefits.

Landowners and operators complete the form AD-1026 - Highly Erodible Land Conservation (HELC) and Wetland Conservation (WC) Certification to identify the proposed action and allow FSA
to determine whether a referral to Natural Resources Conservation Service (NRCS) for further review is necessary.

**Maintaining the Quality of Farm-Stored Loan Grain**

Bins are ideally designed to hold a level volume of grain. When bins are overfilled and grain is heaped up, airflow is hindered and the chance of spoilage increases.

Producers who take out marketing assistance loans and use the farm-stored grain as collateral should remember that they are responsible for maintaining the quality of the grain through the term of the loan.

**Disaster Set-Aside (DSA) Program**

FSA borrowers with farms located in designated primary or contiguous disaster areas who are unable to make their scheduled FSA loan payments should consider the Disaster Set-Aside (DSA) program.

DSA is available to producers who suffered losses as a result of a natural disaster and is intended to relieve immediate and temporary financial stress. FSA is authorized to consider setting aside the portion of a payment/s needed for the operation to continue on a viable scale.

Borrowers must have at least two years left on the term of their loan in order to qualify.

Borrowers have eight months from the date of the disaster designation to submit a complete application. The application must include a written request for DSA signed by all parties liable for the debt along with production records and financial history for the operating year in which the disaster occurred. FSA may request additional information from the borrower in order to determine eligibility.

All farm loans must be current or less than 90 days past due at the time the DSA application is complete. Borrowers may not set aside more than one installment on each loan.

The amount set-aside, including interest accrued on the principal portion of the set-aside, is due on or before the final due date of the loan.

For more information, contact your local FSA farm loan office.

**USDA Climate Hub ‘Energy Generation and Efficiency’ Building Block**

Through the Agricultural Act of 2014, USDA has several authorities that encourage the adoption of renewable energy and energy efficiency technologies. The Energy Generation and Efficiency Building Block supports energy efficiency improvements in rural homes and on farm operations, for example, through EQIP’s National On-Farm Energy Initiative. This Building Block also provides opportunities to reduce Greenhouse Gas (GHG) emissions from energy generation and use, for example, through the Rural Energy for America Program. To learn more about energy generation and efficiency opportunities from USDA click the following link: [http://www.usda.gov/oce/climate_change/building_blocks/10_EnergyGenerationEfficiency.pdf](http://www.usda.gov/oce/climate_change/building_blocks/10_EnergyGenerationEfficiency.pdf)

For more information about the USDA Climate Hubs click here: [http://www.climatehubs.oce.usda.gov/](http://www.climatehubs.oce.usda.gov/)
