New York State FSA Newsletter

FSA Is Hiring In New York

Farm Service Agency (FSA) is hiring multiple positions across New York State.

We are hiring Farm Loan Officer Trainee (Loan Assistant) positions in Bath or Cortland, Canandaigua, Canton and Marcy. This is a training position to become a Farm Loan Officer. For more information and how to apply click here (choose Syracuse as the location, let us know your location preferences in your resume): https://www.usajobs.gov/GetJob/ViewDetails/556317100

We are also hiring Farm Loan Program technicians in Greenwich and Bath. For more information and how to apply click here (choose Syracuse as the location, let us know your location preferences in your resume): https://www.usajobs.gov/GetJob/ViewDetails/556318900
Barbara Hanselman

Executive Officer:
Mark Dennis

Farm Loan Chief:
John Liddington

To find contact information for your local New York office click here.

February Interest Rates:

Farm Storage Facility Loans:
- 3 year: 1.625%
- 5 year: 1.625%
- 7 year: 1.750%
- 10 year: 1.875%
- 12 year: 1.875%

Commodity Loans: 2.5%

Farm Loan Programs:
- Farm Operating: 2.625%
- Farm Ownership: 3.25%
- Conservation Loans: 3.25%
- Direct Down Payment: 1.5%
- Joint Financing: 2.5%

Successful applicants must be reliable, have a professional attitude and enjoy working with the public. If you are interested or know of someone who might be interested, please share this information with them.

Contact your local farm loan office if you have specific questions regarding the position. To find your local office click here.

USDA is an equal opportunity provider, employer, and lender.

Going to the NY Farm Show?

USDA Farm Service Agency will have a booth at the New York Farm Show next week on February 27-29! The show is at the New York State Fairgrounds in Syracuse. The FSA booth will be in the new Expo Center in booth E984. Look for FSA there as well as local events in your area! If you would like FSA to consider being at your event, please email lynnette.wright@usda.gov.

FSA Encourages Producers to Enroll Soon in Agriculture Risk Coverage and Price Loss Coverage Programs

USDA’s Farm Service Agency (FSA) encourages agricultural producers to enroll now in the Agriculture Risk Loss (ARC) and Price Loss Coverage (PLC) programs. March 15, 2020 is the enrollment deadline for the 2019 crop year.

Although more than 200,000 producers have enrolled to date, FSA anticipates 1.5 million producers will enroll for ARC and PLC. By enrolling soon, producers can beat the rush as the deadline nears.

FSA offices have multiple programs competing for the time and attention of our staff. Because of the importance and complexities of the ARC and PLC programs; and to ensure FSA meets your...
program delivery expectations, please do not wait to start the enrollment process. Call your FSA county office and make an appointment soon to ensure your elections are made and contracts signed well ahead of the deadlines.

ARC and PLC provide financial protections to farmers from substantial drops in crop prices or revenues and are vital economic safety nets for most American farms.

The programs cover the following commodities: barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium and short grain rice, safflower seed, seed cotton, sesame, soybeans, sunflower seed and wheat.

Until March 15, producers who have not yet enrolled in ARC or PLC for 2019 can enroll for both 2019 and 2020 during the same visit to an FSA county office unless yield updates are requested. Additionally, farm owners have a one-time opportunity to update PLC payment yields that take effect beginning with crop year 2020. If the owner accompanies the producer to the office, the yield update and enrollments may be completed during the same office visit.

More Information

For more information on ARC and PLC, download our program fact sheet or our 2014-2018 farm bills comparison fact sheet. Online ARC and PLC election decision tools are available at fsa.usda.gov/arc/plc. To enroll, contact your FSA county office for an appointment.

---

**USDA Reminds Producers of Feb. 28 Deadline for Conservation Reserve Program General Signup**

The U.S. Department of Agriculture (USDA) reminds agricultural producers interested in the Conservation Reserve Program (CRP) 2020 general signup that there is less than two weeks before the enrollment deadline of February 28, 2020. This signup is available to farmers and private landowners who are either enrolling for the first time or re-enrolling for another 10- to 15-year term.

Farmers and ranchers who enroll in CRP receive yearly rental payments for voluntarily establishing long-term, resource-conserving plant species, such as approved grasses or trees (known as “covers”), which can control soil erosion, improve water quality and develop wildlife habitat on marginally productive agricultural lands.

CRP has 22 million acres enrolled, but the 2018 Farm Bill lifted the cap to 27 million acres.

Signed into law in 1985, CRP is one of the largest private-lands conservation programs in the U.S. It was originally intended to primarily control soil erosion and potentially stabilize commodity prices by taking marginal lands out of production. The program has evolved over the years, providing many conservation and economic benefits. Marking its 35th anniversary in 2020, CRP has had many successes, including:

- Preventing more than 9 billion tons of soil from eroding, enough soil to fill 600 million dump trucks;
- Reducing nitrogen and phosphorous runoff relative to annually tilled cropland by 95 and 85 percent respectively;
- Sequestering an annual average of 49 million tons of greenhouse gases, equal to taking 9 million cars off the road;
- Creating more than 3 million acres of restored wetlands while protecting more than 175,000 stream miles with riparian forest and grass buffers, enough to go around the world 7 times; and
- Benefiting bees and other pollinators and increased populations of ducks, pheasants,
turkey, bobwhite quail, prairie chickens, grasshopper sparrows and many other birds.

The CRP continuous signup is ongoing, which enables producers to enroll for certain practices. FSA plans to open the Soil Health and Income Protection Program, a CRP pilot program, in early 2020, and the 2020 CRP Grasslands signup runs from March 16, 2020 to May 15, 2020.

To enroll in CRP, contact your local FSA county office or visit fsa.usda.gov/crp. To locate your local FSA office, visit farmers.gov/service-locator.

---

**FSA Offers Joint Financing Option on Direct Farm Ownership Loans**

The U.S. Department of Agriculture (USDA) today announced the availability of two programs that protect hemp producers’ crops from natural disasters. A pilot hemp insurance program through Multi-Peril Crop Insurance (MPCI) provides coverage against loss of yield because of insurable causes of loss for hemp grown for fiber, grain or Cannabidiol (CBD) oil and the Noninsured Crop Disaster Assistance Program (NAP) coverage protects against losses associated with lower yields, destroyed crops or prevented planting where no permanent federal crop insurance program is available. Producers may apply now, and the deadline to sign up for both programs is March 16, 2020.

**Noninsured Crop Disaster Assistance Program**

NAP provides coverage against loss for hemp grown for fiber, grain, seed or CBD for the 2020 crop year where no permanent federal crop insurance program is available.

NAP basic 50/55 coverage is available at 55 percent of the average market price for crop losses that exceed 50 percent of expected production. Buy-up coverage is available in some cases. The 2018 Farm Bill allows for buy-up levels of NAP coverage from 50 to 65 percent of expected production in 5 percent increments, at 100 percent of the average market price. Premiums apply for buy-up coverage.

For all coverage levels, the NAP service fee is $325 per crop or $825 per producer per county, not to exceed $1,950 for a producer with farming interests in multiple counties.

**Multi-Peril Crop Insurance Pilot Insurance Program**

The MPCI pilot insurance is a new crop insurance option for hemp producers in select counties of 21 states for the 2020 crop year. The program is available for eligible producers in certain counties in Alabama, California, Colorado, Illinois, Indiana, Kansas, Kentucky, Maine, Michigan, Minnesota, Montana, New Mexico, New York, North Carolina, North Dakota, Oklahoma, Oregon, Pennsylvania, Tennessee, Virginia and Wisconsin. Information on eligible counties is accessible through the USDA Risk Management Agency’s Actuarial Information Browser.

Among other requirements, to be eligible for the pilot program, a hemp producer must have at least one year of history producing the crop and have a contract for the sale of the insured hemp. In addition, the minimum acreage requirement is 5 acres for CBD and 20 acres for grain and fiber. Hemp will not qualify for replant payments or prevented plant payments under MPCI.

This pilot insurance coverage is available to hemp growers in addition to revenue protection for hemp offered under the Whole-Farm Revenue Protection plan of insurance. Also, beginning with the 2021 crop year, hemp will be insurable under the Nursery crop insurance program and the Nursery Value Select pilot crop insurance program. Under both nursery programs, hemp will be insurable if grown in containers and in accordance with federal regulations, any applicable state or tribal laws and terms of the crop insurance policy.
Eligibility Requirements

Under a regulation authorized by the 2018 Farm Bill and issued in October 2019, all growers must have a license to grow hemp and must comply with applicable state, tribal or federal regulations or operate under a state or university research pilot, as authorized by the 2014 Farm Bill.

Producers must report hemp acreage to FSA after planting to comply with federal and state law enforcement. The Farm Bill defines hemp as containing 0.3 percent or less tetrahydrocannabinol (THC) on a dry-weight basis. Hemp having THC above the federal statutory compliance level of 0.3 percent is an uninsurable or ineligible cause of loss and will result in the hemp production being ineligible for production history purposes.

For more information on USDA risk management programs for hemp producers, visit farmers.gov/hemp to read our frequently asked questions. For more information on the U.S. Domestic Hemp Production Program, visit USDA’s Agricultural Marketing Services’ website to read their frequently asked questions.

The Importance of Responding to NASS Surveys

The U.S. Department of Agriculture's National Agricultural Statistics Service (NASS) conducts hundreds of surveys every year and prepares reports covering virtually every aspect of U.S. agriculture.

Producers who receive survey questionnaires should respond quickly and online if possible.

The results of the surveys help determine the structure of USDA farm programs, such as soil rental rates for the Conservation Reserve Program and prices and yields used for the Agriculture Risk Coverage and Price Loss Coverage programs. This county-level data is critical for USDA farm payment determinations. Survey responses also help associations, businesses and policymakers advocate for their industry and help educate others on the importance of agriculture.

NASS safeguards the privacy of all respondents and publishes only aggregate data, ensuring that no individual operation or producer can be identified.

NASS data is available online at www.nass.usda.gov/Publications and through the searchable Quick Stats database. Watch a video on how NASS data is used at https://www.youtube.com/watch?v=m-4zjnh26io&feature=youtu.be.

Farm Storage Facility Loans

FSA's Farm Storage Facility Loan (FSFL) program provides low-interest financing to producers to build or upgrade storage facilities and to purchase portable (new or used) structures, equipment and storage and handling trucks.

The low-interest funds can be used to build or upgrade permanent facilities to store commodities. Eligible commodities include corn, grain sorghum, rice, soybeans, oats, peanuts, wheat, barley, minor oilseeds harvested as whole grain, pulse crops (lentils, chickpeas and dry peas), hay, hemp, honey, renewable biomass, fruits, nuts and vegetables for cold storage facilities, floriculture, hops, maple syrup and sap, rye, milk, cheese, butter, yogurt, meat and poultry (unprocessed), eggs, and aquaculture (excluding systems that maintain live animals through uptake and discharge of water). Qualified facilities include grain bins, hay barns and cold storage facilities for eligible commodities.

Loans up to $100,000 can be secured by a promissory note/security agreement. Loans exceeding
$100,000 require additional security.

Producers do not need to demonstrate the lack of commercial credit availability to apply. The loans are designed to assist a diverse range of farming operations, including small and mid-sized businesses, new farmers, operations supplying local food and farmers markets, non-traditional farm products, and underserved producers.

To learn more about the FSA Farm Storage Facility Loan, visit www.fsa.usda.gov/pricesupport or contact your local FSA county office. To find your local FSA county office, visit http://offices.usda.gov.

Farmers.gov Feature Helps Producers Find Farm Loans that Fit Their Operation

A new online tool can help farmers and ranchers find information on U.S. Department of Agriculture (USDA) farm loans that may best fit their operations. USDA has launched the new Farm Loan Discovery Tool as the newest feature on farmers.gov, the Department’s self-service website for farmers.

USDA’s Farm Service Agency (FSA) offers a variety of loan options to help farmers finance their operations. From buying land to financing the purchase of equipment, FSA loans can help. Compared to this time last year, FSA has seen an 18 percent increase in the amount it has obligated for direct farm ownership loans, and through the 2018 Farm Bill, has increased the limits for several loan products.

USDA conducted field research in eight states, gathering input from farmers and FSA farm loan staff to better understand their needs and challenges.

How the Tool Works

Farmers who are looking for financing options to operate a farm or buy land can answer a few simple questions about what they are looking to fund and how much money they need to borrow. After submitting their answers, farmers will be provided information on farm loans that best fit their specific needs. The loan application and additional resources also will be provided.

Farmers can download application quick guides that outline what to expect from preparing an application to receiving a loan decision. There are four guides that cover loans to individuals, entities, and youth, as well as information on microloans. The guides include general eligibility requirements and a list of required forms and documentation for each type of loan. These guides can help farmers prepare before their first USDA service center visit with a loan officer.

Farmers can access the Farm Loan Discovery Tool by visiting farmers.gov/fund and clicking the “Start” button. Follow the prompts and answer five simple questions to receive loan information that is applicable to your agricultural operation. The tool is built to run on any modern browser like Chrome, Edge, Firefox, or the Safari browser, and is fully functional on mobile devices. It does not work in Internet Explorer.

About Farmers.gov

In 2018, USDA unveiled farmers.gov, a dynamic, mobile-friendly public website combined with an authenticated portal where farmers will be able to apply for programs, process transactions, and manage accounts.

The Farm Loan Discovery Tool is one of many resources on farmers.gov to help connect farmers to information that can help their operations. Earlier this year, USDA launched the My Financial Information feature, which enables farmers to view their loan information, history, payments, and
alerts by logging into the website.

USDA is building farmers.gov for farmers, by farmers. In addition to the interactive farm loan features, the site also offers a Disaster Assistance Discovery Tool. Farmers can visit farmers.gov/recover/disaster-assistance-tool#step-1 to find disaster assistance programs that can help their operation recover from natural disasters.

With feedback from customers and field employees who serve those customers, farmers.gov delivers farmer-focused features through an agile, iterative process to deliver the greatest immediate value to America’s agricultural producers – helping farmers and ranchers do right, and feed everyone.

For more information or to locate your USDA Service Center, visit farmers.gov.

**Producers Urged to Consider NAP Risk Protection Coverage Before Crop Sales Deadlines**

The USDA Farm Service Agency (FSA) reminds producers to review available USDA crop risk protection options, including federal crop insurance and Noninsured Crop Disaster Assistance Program (NAP) coverage, before the crop deadlines.

Federal crop insurance covers crop losses from natural adversities such as drought, hail and excessive moisture. NAP covers losses from natural disasters on crops for which no permanent federal crop insurance program is available, including perennial grass forage and grazing crops, fruits, vegetables, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, bioenergy, and industrial crops.

The following crops have a NAP application deadline approaching:

**March 16:**
*Most Annual Fruits & Vegetables, as well as Buckwheat, Hemp, Hops, Millet, Sorghum Grain, Soybeans and Sunflowers*

Producers can determine if crops are eligible for federal crop insurance or NAP by visiting https://webapp.rma.usda.gov/apps/ActuarialInformationBrowser2018/CropCriteria.aspx.

The 2018 Farm Bill reinstates higher levels of coverage, from 50 to 65 percent of expected production in 5 percent increments, at 100 percent of the average market price. Producers of organics and crops marketed directly to consumers also may exercise the “buy-up” option to obtain NAP coverage of 100 percent of the average market price at the coverage levels of between 50 and 65 percent of expected production. NAP basic coverage is available at 55 percent of the average market price for crop losses that exceed 50 percent of expected production.

For all coverage levels, the NAP service fee is the lesser of $325 per crop or $825 per producer per county, not to exceed a total of $1,950 for a producer with farming interests in multiple counties.

Federal crop insurance coverage is sold and delivered solely through private insurance agents. Agent lists are available at all USDA Service Centers or at USDA’s online Agent Locator: http://prodwebnlb.rma.usda.gov/apps/AgentLocator/#. Producers can use the USDA Cost Estimator, https://ewebapp.rma.usda.gov/apps/costestimator/Default.aspx, to predict insurance premium costs.

For more information on NAP, service fees, sales deadlines, contact your local FSA office or visit the web at www.fsa.usda.gov/nap.
Supervised Credit

Farm Service Agency (FSA) Farm Loan programs are considered supervised credit. Unlike loans from a commercial lender, FSA loans are intended to be temporary in nature. Therefore, it is our goal to help you graduate to commercial credit, and our farm loan staff is available to help borrowers through training and credit counseling.

The FSA team will help borrowers identify their goals to ensure financial success. Through this process, FSA staff will advise borrowers in developing strategies and a plan to meet your operation’s goals and graduate to commercial credit. Ultimately, the borrower is responsible for the success of the farming operation, but FSA’s staff will help in an advisory role to provide the tools necessary to help you achieve your operational goals and manage your finances.

For more information on FSA farm loan programs, visit www.fsa.usda.gov.

USDA Swine Small Enterprise Study

From July 2020 through January 2021, the U.S. Department of Agriculture’s (USDA) National Animal Health Monitoring System (NAHMS), in collaboration with the USDA’s National Agricultural Statistics Service (NASS), will conduct its third national study of U.S. small enterprise swine operations.

New York producers are included in this study that will take an in-depth look at small enterprise swine operations (fewer than 1,000 pigs) and provide new information regarding animal health and management practices used on these operations, as well as the alternative marketing strategies they implement.

Approximately 5,000 swine operations from 38 states will be asked to participate in the study. These states account for about 95 percent of U.S. swine operations with fewer than 1,000 pigs.

Participation in any NAHMS study is voluntary. In June 2020, selected producers will be mailed a letter describing the study and be provided with a questionnaire to complete and return. Producers who don’t respond to the questionnaire will be called by a NASS representative to arrange a convenient time to complete the questionnaire via a telephone interview.

The privacy of every questionnaire participant is protected. Data will only be presented in an aggregate or summary manner.

For more information, please contact Charles Haley at 970-494-7216 or charles.a.haley@aphis.usda.gov.
