**Coronavirus Food Assistance Program 2.0 Sign-Up**

**Acreage Reporting Deadline**

**CRP-General Sign-Up Deadline**

**County Committee Nominations Due**
Thursday, July 15, is the Acreage Reporting Deadline for Most Spring Planted Crops

Agricultural producers in New York who have not yet completed their crop acreage reports after planting should make an appointment with their Farm Service Agency (FSA) office before the applicable deadline.

An acreage report documents a crop grown on a farm or ranch and its intended uses. Filing an accurate and timely acreage report for all crops and land uses, including failed acreage and prevented planted acreage, can prevent the loss of benefits.

How to File a Report

The following acreage reporting dates are applicable in New York:

July 15, 2021: Corn, Soybeans, Spring Planted Small Grains and most other crops including CRP and cover crops

August 16, 2021: Cabbage and Beans

Acreage reporting dates vary by crop and by county. Contact your local FSA office for a list of acreage reporting deadlines by crop.

Service Center staff continue to work with agricultural producers via phone, email, and other digital tools. Because of the pandemic, some USDA Service Centers are open to limited visitors. Contact your Service Center to set up an in-person or phone appointment.

To file a crop acreage report, you will need to provide:

- Crop and crop type or variety.
- Intended use of the crop.
- Number of acres of the crop.
- Map with approximate boundaries for the crop.
- Planting date(s).
- Planting pattern, when applicable.
- Producer shares.
- Irrigation practice(s).
- Acreage prevented from planting, when applicable.
- Other information as required.

Acreage Reporting Details
The following exceptions apply to acreage reporting dates:

- If the crop has not been planted by the acreage reporting date, then the acreage must be reported no later than 15 calendar days after planting is completed.

- If a producer acquires additional acreage after the acreage reporting date, then the acreage must be reported no later than 30 calendar days after purchase or acquiring the lease. Appropriate documentation must be provided to the county office.

Producers should also report crop acreage they intended to plant, but due to natural disaster, were unable to plant. Prevented planting acreage must be reported on form CCC-576, Notice of Loss, no later than 15 calendar days after the final planting date as established by FSA and USDA’s Risk Management Agency.

Noninsured Crop Disaster Assistance Program (NAP) policy holders should note that the acreage reporting date for NAP-covered crops is the earlier of the dates listed above or 15 calendar days before grazing or harvesting of the crop begins.

**More Information**

For questions, please contact your local FSA office. To locate your local FSA office visit [farmers.gov/service-center-locator](https://farmers.gov/service-center-locator).

---

**USDA to Provide Pandemic Assistance to Livestock Producers for Animal Losses**

Livestock and poultry producers who suffered losses during the pandemic due to insufficient access to processing can apply for assistance for those losses and the cost of depopulation and disposal of the animals. The U.S. Department of Agriculture (USDA) Secretary Vilsack announced the Pandemic Livestock Indemnity Program (PLIP) in [recorded] remarks at the National Pork Industry Conference in Wisconsin Dells, WI. The announcement is part of USDA’s Pandemic Assistance for Producers initiative. Livestock and poultry producers can apply for assistance through USDA’s Farm Service Agency (FSA) July 20 through Sept. 17, 2021.

The Consolidated Appropriations Act, 2021, authorized payments to producers for losses of livestock or poultry depopulated from March 1, 2020 through December 26, 2020, due to insufficient processing access as a result of the pandemic. PLIP payments will be based on 80% of the fair market value of the livestock and poultry and for the cost of depopulation and disposal of the animal. Eligible livestock and poultry include swine, chickens and turkeys.

**PLIP Program Details**

Eligible livestock must have been depopulated from March 1, 2020, through December 26, 2020, due to insufficient processing access as a result of the pandemic. Livestock must have been physically located in the U.S. or a territory of the U.S. at the time of depopulation.

Eligible livestock owners include persons or legal entities who, as of the day the eligible livestock was depopulated, had legal ownership of the livestock. Packers, live poultry dealers and contract growers are not eligible for PLIP.
PLIP payments compensate participants for 80% of both the loss of the eligible livestock or poultry and for the cost of depopulation and disposal based on a single payment rate per head. PLIP payments will be calculated by multiplying the number of head of eligible livestock or poultry by the payment rate per head, and then subtracting the amount of any payments the eligible livestock or poultry owner has received for disposal of the livestock or poultry under the Natural Resources Conservation Service (NRCS) Environmental Quality Incentives Program (EQIP) or a state program. The payments will also be reduced by any Coronavirus Food Assistance Program (CFAP 1 and 2) payments paid on the same inventory of swine that were depopulated.

There is no per person or legal entity payment limitation on PLIP payments. To be eligible for payments, a person or legal entity must have an average adjusted gross income (AGI) of less than $900,000 for tax years 2016, 2017 and 2018.

Applying for Assistance

Eligible livestock and poultry producers can apply for PLIP starting July 20, 2021, by completing the FSA-620, Pandemic Livestock Indemnity Program application, and submitting it to any FSA county office. Additional documentation may be required. Visit farmers.gov/plip for a copy of the Notice of Funding Availability and more information on how to apply.

Applications can be submitted to the FSA office at any USDA Service Center nationwide by mail, fax, hand delivery or via electronic means. To find your local FSA office, visit farmers.gov/service-locator. Livestock and poultry producers can also call 877-508-8364 to speak directly with a USDA employee ready to offer assistance.

USDA Offers Disaster Assistance for Producers Facing Inclement Weather

Severe weather events create significant challenges and often result in catastrophic loss for agricultural producers. Despite every attempt to mitigate risk, your operation may suffer losses. USDA offers several programs to help with recovery.

Risk Management

For producers who have risk protection through Federal Crop Insurance or the Noninsured Crop Disaster Assistance Program (NAP), we want to remind you to report crop damage to your crop insurance agent or the local Farm Service Agency (FSA) office.

If you have crop insurance, contact your agency within 72 hours of discovering damage and be sure to follow up in writing within 15 days. If you have NAP coverage, file a Notice of Loss (also called Form CCC-576) within 15 days of loss becoming apparent, except for hand-harvested crops, which should be reported within 72 hours.

Disaster Assistance

USDA also offers disaster assistance programs, which is especially important to livestock, fruit and vegetable, specialty and perennial crop producers who have fewer risk management options.
Honeybee and Farm-raised Fish Program (ELAP) reimburses producers for a portion of the value of livestock, poultry and other animals that died as a result of a qualifying natural disaster event or for loss of grazing acres, feed and forage. And, the Livestock Forage Disaster Program (LFP) provides assistance to producers of grazed forage crop acres that have suffered crop loss due to a qualifying drought. Livestock producers suffering the impacts of drought can also request Emergency Haying and Grazing on Conservation Reserve Program (CRP) acres.

Next, the Tree Assistance Program (TAP) provides cost share assistance to rehabilitate and replant tree, vines or shrubs loss experienced by orchards and nurseries. This complements NAP or crop insurance coverage, which cover the crop but not the plants or trees in all cases.

For LIP and ELAP, you will need to file a Notice of Loss for livestock and grazing or feed losses within 30 days and honeybee losses within 15 days. For TAP, you will need to file a program application within 90 days.

Documentation

It’s critical to keep accurate records to document all losses following this devastating cold weather event. Livestock producers are advised to document beginning livestock numbers by taking time and date-stamped video or pictures prior to after the loss.

Other common documentation options include:

- Purchase records
- Production records
- Vaccination records
- Bank or other loan documents
- Third-party certification

Other Programs

The Emergency Conservation Program and Emergency Forest Restoration Program can assist landowners and forest stewards with financial and technical assistance to restore damaged farmland or forests.

Additionally, FSA offers a variety of loans available including emergency loans that are triggered by disaster declarations and operating loans that can assist producers with credit needs. You can use these loans to replace essential property, purchase inputs like livestock, equipment, feed and seed, or refinance farm-related debts, and other needs.

Meanwhile, USDA’s Natural Resources Conservation Service (NRCS) provides financial resources through its Environmental Quality Incentives Program to help with immediate needs and long-term support to help recover from natural disasters and conserve water resources. Assistance may also be available for emergency animal mortality disposal from natural disasters and other causes.

Additional Resources

Additional details – including payment calculations – can be found on our NAP, ELAP, LIP, and TAP fact sheets. On farmers.gov, the Disaster Assistance
you determine program or loan options.

While we never want to have to implement disaster programs, we are here to help. To file a Notice of Loss or to ask questions about available programs, contact your local USDA Service Center. All USDA Service Centers are open for business, including those that restrict in-person visits or require appointments because of the pandemic.

---

**USDA Announces Dates for Conservation Reserve Program Grasslands Signups**

Agricultural producers and landowners in New York can apply for the Conservation Reserve Program (CRP) Grasslands signup until August 20. This year, the U.S. Department of Agriculture (USDA) updated signup options to provide greater incentives for producers and increased the program’s conservation and climate benefits, including setting a minimum rental rate and identifying two national priority zones.

The CRP Grassland signup is competitive, and USDA’s Farm Service Agency (FSA) will provide for annual rental payments for land devoted to conservation purposes.

**New York FSA will present a webinar on CRP Grasslands on Wednesday, July 21st at 10 a.m.** The webinar is free however pre-registration is required. The webinar will be recorded, and a link will be sent to all who register. Please register here: [https://crpgrasslands.eventbrite.com](https://crpgrasslands.eventbrite.com)

**Grasslands Signup**

CRP Grasslands helps New York landowners and operators protect grassland, including rangeland, and pastureland and certain other lands, while maintaining the areas as working grazing lands. Protecting grasslands contributes positively to the economy of many regions, provides biodiversity of plant and animal populations, and provides important carbon sequestration benefits.

FSA has updated the Grasslands Signup to establish a minimum rental rate of $15 per acre, which will benefit 1,300 counties.

To focus on important wildlife corridors, FSA also identified National Grassland Priority Zones, providing extra incentives to producers for enrolling grasslands in important migratory corridors and environmentally sensitive areas – the Greater Yellowstone Elk Migration Corridor and the Severe Wind Erosion – Dust Bowl Zone. Counties within these two zones get extra ranking points as well as $5 added to their rental rate. The CRP Grasslands Ranking Factors fact sheet has additional information.

**How to Sign Up**

To enroll in the CRP Grasslands signup, producers and landowners should contact USDA by the August 20 deadline. Service Center staff continue to work with agricultural producers via phone, email, and other digital tools. Because of the pandemic, some USDA Service Centers are open to limited visitors. Contact your Service Center to set up an in-person or phone appointment. Additionally, more information related to USDA’s response and relief for producers can be found at farmers.gov/coronavirus.

More Information on CRP
Signed into law in 1985, CRP is one of the largest voluntary private-lands conservation programs in the United States. It was originally intended to primarily control soil erosion and potentially stabilize commodity prices by taking marginal lands out of production. The program has evolved over the years, providing many conservation and economic benefits. The program marked its 35-year anniversary this past December.

Farm Service Agency Now Accepting Nominations for County Committee Members

The U.S. Department of Agriculture (USDA) Farm Service Agency (FSA) began accepting nominations for county committee members on June 15. Elections will occur in certain Local Administrative Areas (LAA) for these members who make important decisions about how federal farm programs are administered locally. All nomination forms for the 2021 election must be postmarked or received in the local FSA office by Aug. 2, 2021.

Agricultural producers who participate or cooperate in a USDA program, and reside in the LAA that is up for election this year, may be nominated for candidacy for the county committee. A cooperating producer is someone who has provided information about their farming or ranching operation to FSA, even if they have not applied or received program benefits. Individuals may nominate themselves or others and qualifying organizations may also nominate candidates. USDA encourages minority producers, women and beginning farmers or ranchers to nominate, vote, and hold office.

Nationwide, more than 7,700 dedicated members of the agricultural community serving on FSA county committees. The committees are made up of three to 11 members who serve three-year terms. Producers serving on FSA county committees play a critical role in the day-to-day operations of the agency. Committee members are vital to how FSA carries out disaster programs, as well as conservation, commodity and price support programs, county office employment and other agricultural issues.

LAAs are elective areas for FSA committees in a single county or multi-county jurisdiction. This may include LAAs that are focused on an urban or suburban area.

More Information

Producers should contact their local FSA office today to register and find out how to get involved in their county's election. They should check with their local USDA Service Center to see if their LAA is up for election this year. To be considered, a producer must be registered and sign an FSA-669A nomination form or an FSA-669-A-3 for urban county committees. The form and other information about FSA county committee elections are available at fsa.usda.gov/elections.

Election ballots will be mailed to eligible voters beginning Nov. 1, 2021. To find your local USDA Service Center, visit farmers.gov/service-locator.

Farmers.gov Feature Helps Producers Find Farm Loans that Fit Their Operation
information on USDA farm loans that may best fit their operations.

USDA's Farm Service Agency (FSA) offers a variety of loan options to help farmers finance their operations. From buying land to financing the purchase of equipment, FSA loans can help.

USDA conducted field research in eight states, gathering input from farmers and FSA farm loan staff to better understand their needs and challenges.

How the Tool Works

Farmers who are looking for financing options to operate a farm or buy land can answer a few simple questions about what they are looking to fund and how much money they need to borrow. After submitting their answers, farmers will receive information on farm loans that best fit their specific needs. The loan application and additional resources also will be provided.

Farmers can download application quick guides that outline what to expect from preparing an application to receiving a loan decision. There are four guides that cover loans to individuals, entities, and youth, as well as information on microloans. The guides include general eligibility requirements and a list of required forms and documentation for each type of loan. These guides can help farmers prepare before their first USDA service center visit with a loan officer.

Farmers can access the Farm Loan Discovery Tool by visiting farmers.gov/fund and clicking the "Start" button. Follow the prompts and answer five simple questions to receive loan information that is applicable to your agricultural operation. The tool is built to run on any modern browser like Chrome, Edge, Firefox, or the Safari browser, and is fully functional on mobile devices. It does not work in Internet Explorer.

About Farmers.gov

In 2018, USDA unveiled farmers.gov, a dynamic, mobile-friendly public website combined with an authenticated portal where farmers will be able to apply for programs, process transactions, and manage accounts.

The Farm Loan Discovery Tool is one of many resources on farmers.gov to help connect farmers to information that can help their operations. Earlier this year, USDA launched the My Financial Information feature, which enables farmers to view their loan information, history, payments, and alerts by logging into the website.

USDA is building farmers.gov for farmers, by farmers. In addition to the interactive farm loan features, the site also offers a Disaster Assistance Discovery Tool. Farmers can visit farmers.gov/recover/disaster-assistance-tool#step-1 to find disaster assistance programs that can help their operation recover from natural disasters.

For more information, contact your local USDA Service Center or visit farmers.gov.

---

Report Noninsured Crop Disaster Assistance Program (NAP) Losses
To protect against lower yields or crops unable to be planted due to natural disasters including freeze, hail, excessive moisture, excessive wind or hurricanes, flood, excessive heat and qualifying drought (includes native grass for grazing), among others.

To receive payment, you had to purchase NAP coverage for 2021 crops and file a notice of loss the earlier of 15 days of the occurrence of the disaster or when losses become apparent or 15 days of the final harvest date.

For hand-harvested crops and certain perishable crops, you must notify FSA within 72 hours of when a loss becomes apparent.

Eligible crops must be commercially produced agricultural commodities for which crop insurance is not available, including perennial grass forage and grazing crops, fruits, vegetables, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, bioenergy, and industrial crops.

For more information on NAP, contact your local USDA Service Center or visit fsa.usda.gov/nap.

---

**Update Your Records**

FSA is cleaning up our producer record database and needs your help. Please report any changes of address, zip code, phone number, email address or an incorrect name or business name on file to our office. You should also report changes in your farm operation, like the addition of a farm by lease or purchase. You should also report any changes to your operation in which you reorganize to form a Trust, LLC or other legal entity.

FSA and NRCS program participants are required to promptly report changes in their farming operation to the County Committee in writing and to update their *Farm Operating Plan* on form CCC-902.

To update your records, contact your local USDA Service Center.

---

**FSA Offers Joint Financing Option on Direct Farm Ownership Loans**

The USDA Farm Service Agency's (FSA) [Direct Farm Ownership loans](#) can help farmers and ranchers become owner-operators of family farms, improve and expand current operations, increase agricultural productivity, and assist with land tenure to save farmland for future generations.

There are three types of Direct Farm Ownership Loans: regular, down payment and joint financing. FSA also offers a [Direct Farm Ownership Microloan](#) option for smaller financial needs up to $50,000.

Joint financing allows FSA to provide more farmers and ranchers with access to capital. FSA lends up to 50 percent of the total amount financed. A commercial lender, a State program or the seller of the property being purchased, provides the balance of loan funds,
$600,000, and the repayment period for the loan is up to 40 years.

The operation must be an eligible farm enterprise. Farm Ownership loan funds cannot be used to finance nonfarm enterprises and all applicants must be able to meet general eligibility requirements. Loan applicants are also required to have participated in the business operations of a farm or ranch for at least three years out of the 10 years prior to the date the application is submitted. The applicant must show documentation that their participation in the business operation of the farm or ranch was not solely as a laborer.

For more information about farm loans, contact your local USDA Service Center or visit fsa.usda.gov.

---

**Environmental Review Required Before Project Implementation**

The National Environmental Policy Act (NEPA) requires Federal agencies to consider all potential environmental impacts for federally funded projects before the project is approved.

For all Farm Service Agency (FSA) programs, an environmental review must be completed before actions are approved, such as site preparation or ground disturbance. These programs include, **but are not limited to**, the Emergency Conservation Program (ECP), Farm Storage Facility Loan (FSFL) program and farm loans. If project implementation begins before FSA has completed an environmental review, the request will be denied. Although there are exceptions regarding the Stafford Act and emergencies, it’s important to wait until you receive written approval of your project proposal before starting any actions.

Applications cannot be approved until FSA has copies of all permits and plans. Contact your local FSA office early in your planning process to determine what level of environmental review is required for your program application so that it can be completed timely.
