### **Dates to Remember**

Sep. 30	NAP Coverage Deadline for all perennial grasses, alfalfa, clover, and mixed forage; and all small grains such as barley, oats, wheat, and rye
Sep. 30	Acreage Reporting Deadline for value loss/controlled environment crops for subsequent year (except nursery). Includes Mollusk, Christmas trees, floriculture and turf grass sod
Oct. 11	All offices closed for Columbus Day
Oct. 12	Pandemic Livestock Indemnity Program Deadline
Oct. 12	Coronavirus Food Assistance Program 2.0 Sign-Up Deadline
Oct. 15	Pandemic Assistance for Timber Harvesters and Haulers program (PATHH) Deadline
Nov. 15	Acreage Reporting Deadline for Fall Seeded Small Grains
Nov. 22	NAP Coverage Deadline for perennial fruits and nuts, strawberries, asparagus, ginger, horseradish, and

	rhubarb
Ongoing	Conservation Reserve Program (CRP) - Continuous Enrollment

## USDA Extends Deadline to Apply for Pandemic Assistance to Livestock Producers with Animal Losses

The U.S. Department of Agriculture (USDA) is providing additional time for livestock	
and poultry producers to apply for the Pandemic Livestock Indemnity Program (PLIP).	
Producers who suffered losses during the pandemic due to insufficient access to	
processing may now apply for assistance for those losses and the cost of	
depopulation and disposal of the animals through Oct. 12, 2021, rather than the	
original deadline of Sept. 17, 2021. PLIP is part of USDA's Pandemic Assistance for	
Producers initiative.	

PLIP provides payments to producers for losses of livestock or poultry depopulated from March 1, 2020 through Dec. 26, 2020, due to insufficient processing access as a result of the pandemic. Payments are based on 80% of the fair market value of the livestock and poultry and for the cost of depopulation and disposal of the animal. Eligible livestock and poultry include swine, chickens and turkeys.

#### **PLIP Program Details**

PLIP payments are calculated by multiplying the number of head of eligible livestock or poultry by the payment rate per head, and then subtracting the amount of any payments the eligible livestock or poultry owner has received for disposal of the livestock or poultry under the Natural Resources Conservation Service (NRCS) Environmental Quality Incentives Program (EQIP) or a state program. The payments will also be reduced by any Coronavirus Food Assistance Program (CFAP 1 and 2) payments paid on the same inventory of swine that were depopulated.

Eligible livestock and poultry producers can apply for PLIP through the Oct. 12, 2021 deadline by completing the FSA-620, Pandemic Livestock Indemnity Program application, and submitting it to any Farm Service Agency county office. Additional documentation may be required. Visit farmers.gov/plip more information on how to apply.

#### **Additional Pandemic Assistance**

Other programs within the Pandemic Assistance for Producer initiative with upcoming deadlines include:

- 12 <u>Coronavirus Food Assistance Program 2</u>, which provides critical support to agricultural producers impacted by COVID-19 market disruptions.
- 15 <u>Pandemic Assistance for Timber Harvesters and Haulers</u>, which provides financial relief to timber harvesting and timber hauling businesses that experienced losses in 2020 due to COVID-19.

To learn more about USDA's commitment to delivery of financial assistance to farmers, ranchers and agricultural producers and businesses who have been impacted by COVID-19 market disruptions, visit <a href="mailto:farmers.gov/pandemic-assistance">farmers.gov/pandemic-assistance</a>.

# **USDA Offers Disaster Assistance for Producers Facing Inclement Weather**

#### **Risk Management**

For producers who have risk protection through Federal Crop Insurance or the Noninsured Crop Disaster Assistance Program (NAP), we want to remind you to report crop damage to your crop insurance agent or the local Farm Service Agency (FSA) office.

If you have crop insurance, contact your agency within 72 hours of discovering damage and be sure to follow up in writing within 15 days. If you have NAP coverage, file a Notice of Loss (also called Form CCC-576) within 15 days of loss becoming apparent, except for hand-harvested crops, which should be reported within 72 hours.

#### **Disaster Assistance**

USDA also offers disaster assistance programs, which is especially important to livestock, fruit and vegetable, specialty and perennial crop producers who have fewer <u>risk management options</u>.

First, the Livestock Indemnity Program (LIP) and Emergency Assistance for Livestock, Honeybee and Farm-raised Fish Program (ELAP) reimburses producers for a portion of the value of livestock, poultry and other animals that died as a result of a qualifying natural disaster event or for loss of grazing acres, feed and forage. And, the Livestock Forage Disaster Program (LFP) provides assistance to producers of grazed forage crop acres that have suffered crop loss due to a qualifying drought. Livestock producers suffering the impacts of drought can also request Emergency Haying and Grazing on Conservation Reserve Program (CRP) acres.

Next, the <u>Tree Assistance Program</u> (TAP) provides cost share assistance to rehabilitate and replant tree, vines or shrubs loss experienced by orchards and nurseries. This complements NAP or crop insurance coverage, which cover the crop but not the plants or trees in all cases.

For LIP and ELAP, you will need to file a Notice of Loss for livestock and grazing or feed losses within 30 days and honeybee losses within 15 days. For TAP, you will need to file a program application within 90 days.

#### **Documentation**

It's critical to keep accurate records to document all losses following this devastating cold weather event. Livestock producers are advised to document beginning livestock numbers by taking time and date-stamped video or pictures prior to after the loss.

Other common documentation options include:

- Purchase records
- Production records
- Vaccination records
- · Bank or other loan documents
- Third-party certification

#### Other Programs

The <u>Emergency Conservation Program</u> and <u>Emergency Forest Restoration Program</u> can assist landowners and forest stewards with financial and technical assistance to restore damaged farmland or forests.

Additionally, FSA offers a variety of loans available including emergency loans that are triggered by disaster declarations and operating loans that can assist producers with credit needs. You can use these loans to replace essential property, purchase inputs like livestock, equipment, feed and seed, or refinance farm-related debts, and other needs.

Meanwhile, USDA's Natural Resources Conservation Service (NRCS) provides financial resources through

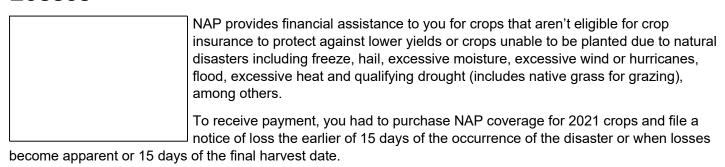

its <u>Environmental Quality Incentives Program</u> to help with immediate needs and long-term support to help recover from natural disasters and conserve water resources. Assistance may also be available for emergency animal mortality disposal from natural disasters and other causes.

#### **Additional Resources**

Additional details – including payment calculations – can be found on our <u>NAP</u>, <u>ELAP</u>, <u>LIP</u>, and <u>TAP</u> fact sheets. On farmers.gov, the <u>Disaster Assistance Discovery Tool</u>, <u>Disaster-at-a-Glance fact sheet</u>, and <u>Farm Loan Discovery</u> Tool can help you determine program or loan options.

While we never want to have to implement disaster programs, we are here to help. To file a Notice of Loss or to ask questions about available programs, contact your local USDA Service Center. All <u>USDA Service Centers</u> are open for business, including those that restrict in-person visits or require appointments because of the pandemic.

## Report Noninsured Crop Disaster Assistance Program (NAP) Losses

For hand-harvested crops and certain perishable crops, you must notify FSA within 72 hours of when a loss becomes apparent.

Eligible crops must be commercially produced agricultural commodities for which crop insurance is not available, including perennial grass forage and grazing crops, fruits, vegetables, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, bioenergy, and industrial crops.

For more information on NAP, contact your local USDA Service Center or visit <u>fsa.usda.gov/nap</u>.

# USDA Accepts More than 2.5 Million Acres in Grassland CRP Signup

The U.S. Department of Agriculture (USDA) has accepted offers for more than 2.5 million acres from agricultural producers and private landowners for enrollment through this year's Grassland Conservation Reserve Program (CRP) Signup. This is double last year's enrollment and brings the total acres enrolled across all CRP signups in 2021 to more than 5.3 million acres, surpassing USDA's 4-million-acre goal. Producers and landowners submitted offers for nearly 4 million acres in Grassland CRP, the highest in the signup's history.

New York producers enrolled 1,058 acres through this year's Grassland CRP signup. Through Grassland CRP, producers and landowners can conserve grasslands, rangelands, and pastures, while retaining the right to conduct common grazing practices, such as haying, mowing, or harvesting seed from the enrolled land, pursuant to approved conservation plans designed to promote thoughtful use while creating and maintaining vital habitat.

#### **Updates to Grassland CRP**

FSA rolled out a number of updates to its CRP signups earlier this year. This included setting a minimum payment rate for Grassland CRP as well as establishing new national priority zones.

Download the "What's New" fact sheet to learn more about CRP updates.

#### **CRP and Climate Change Mitigation**

Additionally, lands enrolled in CRP – including grasslands – play an important role in addressing climate change. For example, this enrollment of more than 2.5 million acres of grazing land into Grassland CRP will mitigate an additional estimated 22,000 metric tons of CO2 equivalent.

#### By the Numbers

In addition to the more than 2.5 million acres enrolled in Grassland CRP, almost 1.9 million acres in offers were accepted through the General CRP Signup and 902,000 acres were accepted so far through the Continuous Signup. Additional enrollment information on the General and Continuous signups is available in the <a href="Aug. 23, 2021">Aug. 23, 2021</a> news release.

The 2018 Farm Bill established a nationwide acreage limit for CRP, with the total number of acres that may be enrolled capped at 25 million acres in fiscal year (FY) 2021 and growing to 27 million by FY 2023. Currently, 20.6 million acres are enrolled. With more than 5.3 million acres accepted for enrollment, the USDA will start 2022 off with about 22.9 million acres, leaving room for further enrollment and program expansion up to the FY 2022 cap of 25.5 million.

#### More Information

For more information on Grassland CRP or any other CRP program, contact your local FSA county office or visit <u>fsa.usda.gov/crp</u>. To locate your local FSA office, visit <u>farmers.gov/service-locator</u>.

### **Applying for FSA Direct Loans**

FSA offers direct farm ownership and direct farm operating loans to producers who want to establish, maintain, or strengthen their farm or ranch. Direct loans are processed, approved and serviced by FSA loan officers.

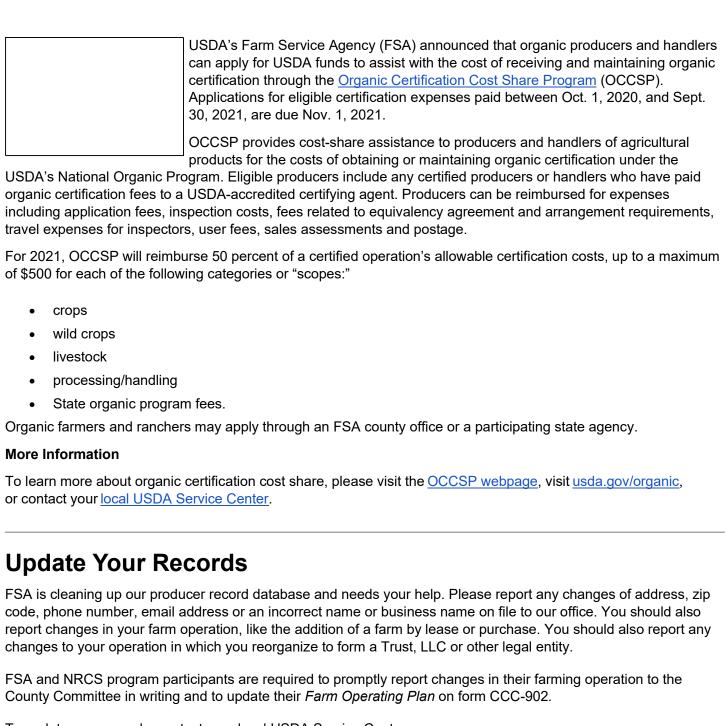

Direct farm operating loans can be used to purchase livestock and feed, farm equipment, fuel, farm chemicals, insurance, and other costs including family living expenses. Operating loans can also be used to finance minor improvements or repairs to buildings and to refinance some farm-related debts, excluding real estate.

Direct farm ownership loans can be used to purchase farmland, enlarge an existing farm, construct and repair buildings, and to make farm improvements.

The maximum loan amount for direct farm ownership loans is \$600,000 and the maximum loan amount for direct operating loans is \$400,000 and a down payment is not required. Repayment terms vary depending on the type of loan, collateral and the producer's ability to repay the loan. Operating loans are normally repaid within seven years and farm ownership loans are not to exceed 40 years.

Please contact your local FSA office for more information or to apply for a direct farm ownership or operating loan.

## USDA Accepting Applications to Help Cover Costs for Organic Certification

To update your records, contact your local USDA Service Center.

### **Loan Options Available from FSA**

FSA offers a wide range of low-interest loans that can meet the financial needs of any farm operation for just about any purpose. The traditional **farm operating and farm ownership loans** can help large and small farm operations take advantage of early purchasing discounts for spring inputs as well expenses throughout the year.

**Microloans** are a simplified loan program that will provide up to \$50,000 for both Farm Ownership and Operating Microloans to eligible applicants. These loans, targeted for smaller and non-traditional operations, can be used for operating expenses, starting a

new operation, purchasing equipment, and other needs associated with a farming operation. Loans to beginning farmers and members of underserved groups are a priority.

Other types of loans available include:

**Marketing Assistance Loans** allow producers to use eligible commodities as loan collateral and obtain a 9-month loan while the crop is in storage. These loans provide cash flow to the producer and allow them to market the crop when prices may be more advantageous.

**Farm Storage Facility Loans** can be used to build permanent structures used to store eligible commodities, for storage and handling trucks, or portable or permanent handling equipment. A variety of structures are eligible under this loan, including bunker silos, grain bins, hay storage structures, and refrigerated structures for vegetables and fruit. A producer may borrow up to \$500,000 per loan.

## Linkage Requirements for Payments Received Under WHIP+ and/or QLA

If you received a payment under the Wildfires and Hurricanes Indemnity Program+ (WHIP+) or the Quality Loss Adjustment Program (QLA) for crop production and/or quality losses occurring in 2018, 2019, or 2020 crop years, you are required to meet linkage requirements by obtaining federal crop insurance or Non-Insured Crop Disaster Assistance Program (NAP) coverage at the 60/100 level, or higher, for both the 2022 and 2023 crop years.

When applying for WHIP+ or QLA, form FSA-895 (Crop Insurance and/or NAP Coverage Agreement) was submitted acknowledging the requirement to obtain federal crop insurance, if available, or NAP coverage if federal crop insurance is not available. The coverage requirement is applicable to the physical location county of the crop that received WHIP+ and/or QLA benefits.

Producers should not delay contacting their federal crop insurance agent or local county FSA Office to inquire about coverage options, as **failure to obtain the applicable coverage by the sales/application closing date will result in the required refund of WHIP+ benefits received on the applicable crop, plus interest.** You can determine if crops are eligible for federal crop insurance or NAP by <u>visiting the RMA website</u>.

For more information, contact your local USDA Service Center or visit fsa.usda.gov.

### Streamlining How You Find Information on Farmers.gov

If you've been to farmers.gov before, things may look a little different from the last time you were here. We've made some changes, to improve how you find information so that you can find what you need even more easily and efficiently.

The big, green navigation bar near the top of every page – it's different now. It opens up, to show descriptions and subtopics, making it quicker and easier to figure out what's where and reduce guessing. Why? Two reasons: First, farmers.gov has grown a lot over the years and the old navigation wasn't designed for the load. Second, because you asked for it. We analyzed your comments through the "Feedback" button on the site and tested our new designs and information organization with real farmers and ranchers through surveys and live testing sessions.

Along with the new website navigation, we restructured how our pages and topics are grouped and organized to help you easily access the information you need. We also relabeled some of our existing pages using more direct language. This means that pages or information you've used before may have different labels or be in new places.

#### Important changes:

- The old Fund page is now called Loans. The Loans page has information and resources about USDA loans, including the Farm Loan Programs.
- The Recover page is now Protection and Recovery. This page has information to help you prepare and recover from natural disasters, and to mitigate risk for your operation.
- The Conserve page is now Conservation. This page hasn't changed much and still has information on how to implement conservation practices, improve and preserve natural resources, and address conservation concerns.
- The Manage page is now Working With Us. This page connects you with resources that tell you how USDA can help you start, expand, enhance, or improve your agricultural operation.
- The Connect page has been replaced with Your Business, a guide to USDA resources that cater to your specific operation. Information that was on the Connect page has been moved to the Contact Us page and the Get Involved page.

We are always updating farmers.gov based on your feedback and to stay up-to-date with important USDA announcements. We've recently created some new webpages, and updated some existing ones, to better equip you with the vital information you need. There are even more new pages coming soon, so stay tuned!

For farmers.gov, we don't guess what farmers and ranchers want from a website. We start by asking, then test our designs with volunteers who are also farmers and ranchers.

There's a feedback button on every page of farmers.gov. Based on your feedback, we looked for ways to make our site easier to use and to build the information that you're looking for. Live user testing sessions provide data, such as this heatmap, showing where testers tended to click during an exercise.

You helped us create the new navigation design, the new information organization, and told us how to speak using your words, and not legalese.

Check out farmers.gov today!
