Fax: 855-778-8909

#### **State Executive Director:**

Gary H. Groves

#### **State Committee:**

Bonnie Wenger, Chair

### **USDA Offers Disaster Assistance for Pennsylvania Farmers Hurt by 2018 Disasters**

Agricultural producers affected by natural disasters in 2018, can apply through the Wildfire and Hurricane Indemnity Program Plus (WHIP+). Sign-up for this U.S. Department of Agriculture (USDA) program began Sept. 11, 2019.

#### **WHIP+ Eligibility**

WHIP+ will be available for eligible producers who have suffered eligible losses of certain crops, trees, bushes or vines in counties with a Presidential Emergency Disaster Declaration or a Secretarial Disaster Designation (primary counties only). Disaster losses must have been a result of hurricanes, floods, tornadoes, typhoons, volcanic activity, snowstorms or wildfires that occurred in 2018. Also, producers in counties that did not receive a disaster declaration or designation may still apply for WHIP+ but must provide supporting documentation to establish that the crops were directly affected by a qualifying disaster loss.

George Greig

A list of counties that received qualifying disaster declarations and designations is available at [farmers.gov/recover/whip-plus](https://farmers.gov/recover/whip-plus).

Doug Graybill

Because grazing and livestock losses, other than milk losses, are covered by other disaster recovery programs offered through FSA, those losses are not eligible for WHIP+.

Barron (Boots) Hetherington

Bill Hoover

Eligible crops include those for which federal crop insurance or Noninsured Crop Disaster Assistance Program (NAP) coverage is available, excluding crops intended for grazing. A list of crops covered by crop insurance is available through USDA's Risk Management Agency (RMA) Actuarial Information Browser at [webapp.rma.usda.gov/apps/actuarialinformationbrowser](https://webapp.rma.usda.gov/apps/actuarialinformationbrowser).

**Division Chiefs:**

Rebecca Csutoras

**Farm Programs**

David Poorbaugh

The WHIP+ payment factor ranges from 75 percent to 95 percent, depending on the level of crop insurance coverage or NAP coverage that a producer obtained for the crop. Producers who did not insure their crops in 2018 or 2019 will receive 70 percent of the expected value of the crop. Insured crops (either crop insurance or NAP coverage) will receive between 75 percent and 95 percent of expected value; those who purchased the highest levels of coverage will receive 95-percent of the expected value.

**Farm Loan Programs**

To find contact information for your local office go to [www.fsa.usda.gov/pa](https://www.fsa.usda.gov/pa)

At the time of sign-up, producers will be asked to provide verifiable and reliable production records. If a producer is unable to provide production records, WHIP+ payments will be determined based on the lower of either the actual loss certified by the producer and determined acceptable by FSA or the county expected yield and county disaster yield. The county disaster yield is the production that a producer would have been expected to make based on the eligible disaster conditions in the county.

WHIP+ payments for 2018 disasters will be eligible for 100 percent of their calculated value. WHIP+ payments for 2019 disasters will be limited to an initial 50 percent of their calculated value, with an opportunity to receive up to the remaining 50 percent after January 1, 2020, if sufficient funding remains.

Both insured and uninsured producers are eligible to apply for WHIP+. But all producers receiving WHIP+ payments will be required to purchase crop insurance or NAP, at the 60 percent coverage level or higher, for the next two available, consecutive crop years after the crop year for which WHIP+ payments were paid. Producers who fail to purchase crop insurance for the next two applicable, consecutive years will be required to pay back the WHIP+ payment.

Additional information about WHIP+ program eligibility and payment limitations can be found at [farmers.gov/recover](https://farmers.gov/recover) or by contacting your local [USDA Service Center](#).

## USDA Safety Net Program Enrollment for 2019 and 2020

Agricultural producers now can enroll in the Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) programs – two U.S. Department of Agriculture (USDA) safety net programs – for the 2019 and 2020 crop year.

ARC provides income support payments on historical base acres when actual crop revenue declines below a specified guaranteed level. PLC provides income support payments on historical base acres when the effective price for a covered commodity falls below its reference price. The 2018 Farm Bill reauthorized and updated both programs.

Signup for the 2019 crop year closes March 15, 2020, while signup for the 2020 crop year closes June 30, 2020. Producers who have not yet enrolled for 2019 can enroll for both 2019 and 2020 during the same visit to an FSA county office.

ARC and PLC have options for the farm operator who is actively farming the land as well as the owner of the land. Farm owners also have a one-time opportunity to update PLC payment yields beginning with crop year 2020. If the farm owner and producer visit the FSA county office together, FSA can also update yield information during that visit.

Covered commodities include barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium and short grain rice, safflower seed, seed cotton, sesame, soybeans, sunflower seed and wheat.

---

## Farm Storage Facility Loans

FSA's Farm Storage Facility Loan (FSFL) program provides low-interest financing to producers to build or upgrade storage facilities and to purchase portable (new or used) structures, equipment and storage and handling trucks.

The low-interest funds can be used to build or upgrade permanent facilities to store commodities. Eligible commodities include corn, grain sorghum, rice, soybeans, oats, peanuts, wheat, barley, minor oilseeds harvested as whole grain, pulse crops (lentils, chickpeas and dry peas), hay, honey, renewable biomass, fruits, nuts and vegetables for cold storage facilities, floriculture, hops, maple sap, rye, milk, cheese, butter, yogurt, meat and poultry (unprocessed), eggs, and aquaculture (excluding systems that maintain live animals through uptake and discharge of water). Qualified facilities include grain bins, hay barns and cold storage facilities for eligible commodities.

Loans up to \$100,000 can be secured by a promissory note/security agreement. Loans exceeding \$100,000 require additional security.

Producers do not need to demonstrate the lack of commercial credit availability to apply. The loans are designed to assist a diverse range of farming operations, including small and mid-sized businesses, new farmers, operations supplying local food and farmers markets, non-traditional farm products, and underserved producers.

To learn more about the FSA Farm Storage Facility Loan, visit [www.fsa.usda.gov/pricesupport](http://www.fsa.usda.gov/pricesupport) or contact your local FSA county office. To find your local FSA county office, visit <http://offices.usda.gov>.

## Environmental Review Required Before Project Implementation

The National Environmental Policy Act (NEPA) requires Federal agencies to consider all potential environmental impacts for federally-funded projects before the project is approved.

For all Farm Service Agency (FSA) programs, an environmental review must be completed before actions are approved, such as site preparation or ground disturbance. These programs include, but are not limited to, the Emergency Conservation Program (ECP), Farm Storage Facility Loan (FSFL) program and farm loans. If project implementation begins before FSA has completed an environmental review, this will result in a denial of the request. There are exceptions regarding the Stafford Act and emergencies. It is important to wait until you receive written approval of your project proposal before starting any actions, including, but not limited to, vegetation clearing, site preparation or ground disturbance.

Remember to contact your local FSA office early in your planning process to determine what level of environmental review is required for your program application so that it can be completed timely.

Applications cannot be approved contingent upon the completion of an environmental review. FSA must have copies of all permits and plans before an application can be approved.

---

## Communication is Key in Lending

Farm Service Agency (FSA) is committed to providing our farm loan borrowers the tools necessary to be a success. A part of ensuring this success is providing guidance and counsel from the loan application process through the borrower's graduation to commercial lending institutions. While it is FSA's commitment to advise borrowers as they identify goals and evaluate progress, it is crucial for borrowers to communicate with their farm loan staff when changes occur. It is the borrower's responsibility to alert FSA to any of the following:

- Any proposed or significant changes in the farming operation;
- Any significant changes to family income or expenses;
- The development of problem situations;
- Any losses or proposed significant changes in security

In addition, if a farm loan borrower cannot make payments to suppliers, other creditors, or FSA on time, contact your farm loan staff immediately to discuss loan servicing options.

For more information on FSA farm loan programs, visit <https://www.fsa.usda.gov/>.
