A Special 2018 Ag Day Message from: Boone Peeler, State Executive Director, South Carolina Farm Service Agency

***National Agriculture Day Celebrates American Food and Fiber
Production***

It's National Agriculture Day, a day designated each year by the [Agriculture Council of America \(ACA\)](#) to celebrate the accomplishments of agriculture. South Carolina [Farm Service Agency \(FSA\)](#) joins the council in recognizing farmers, ranchers and foresters for their contributions to the nation's outstanding quality of life.

This year's theme, **Agriculture: Food for Life**, spotlights the hard work of American producers who diligently work to provide food, fiber and more to the United States and countries around the world. To ensure a prosperous future for American agriculture, FSA provides continuous support to agriculturalists across the country.

Acting Administrative Officer:

Kenn Jameson

Farm Programs Chief:

Amy Turner

Farm Loan Programs Chief:

William Shelley

Producers can contact their [local FSA Office](#) for more information or to schedule an appointment.

Important Dates and

Deadlines:

May 11: Deadline to Apply for the Cotton Ginning Cost-Share Program

May 15: Acreage Reporting Deadline for Tomatoes (planted 3/15 - 4/30).

FSA is rural America's engine for economic growth, job creation and development, offering local service to millions of rural producers. In fiscal year 2017, [USDA Farm Loan programs](#) provided \$6 billion in support to producers across America, the second highest total in FSA history. FSA also distributed \$1.6 billion in [Conservation Reserve Program \(CRP\)](#) payments to over 375,000 Americans to improve water quality, reduce soil erosion and increase wildlife habitat.

For agricultural producers who suffered market downturns in 2016, USDA is issuing approximately \$8 billion in payments under the [Agriculture Risk Coverage \(ARC\) and Price Loss Coverage \(PLC\) programs](#). USDA also continues to provide extensive assistance in response to natural [disasters](#) throughout the country, including last year's hurricanes in Florida, Texas, Puerto Rico and the Virgin Islands, drought in the northern high plains, wildfires in the west and central plains, floods, tornados, freezes and other catastrophic weather events.

To support [beginning farmers and ranchers](#), Agriculture Secretary Sonny Perdue signed a Memorandum of Understanding with officials from [SCORE](#), the nation's largest volunteer network of expert business mentors, to support new and beginning farmers. The agreement provides new help and resources for beginning ranchers, veterans, women, socially disadvantaged Americans and others, providing new tools to help them both grow and thrive in agribusiness.

I am honored to administer programs that enable our producers to manage their risks when the agriculture industry faces hardship. On behalf of the South Carolina Farm Service Agency, I would like to thank our agricultural producers for continuing to feed our nation and the world.

USDA Microloans Help Farmers Purchase Farmland and Improve Property

Producers, Including Beginning and Underserved Farmers, Have a New Option to Gain Access to Land

The U.S. Department of Agriculture (USDA) is offering farm ownership microloans, creating a new financing avenue for farmers to buy and improve property. These microloans are especially helpful to beginning or underserved farmers, U.S. veterans looking for a career in farming, and those who have small and mid-sized farming operations.

The microloan program has been hugely successful, providing more than 16,800 low-interest loans, totaling over \$373 million to producers across the country. Microloans have helped farmers and ranchers with operating costs, such as feed, fertilizer, tools, fencing, equipment, and living expenses since 2013. Seventy percent of loans have gone to new farmers.

Now, microloans will be available to also help with farm land and building purchases, and soil and water conservation improvements. FSA designed the expanded program to simplify the application process, expand eligibility requirements and expedite smaller real estate loans to help farmers strengthen their operations. Microloans provide up to \$50,000 to qualified producers, and can be issued to the applicant directly from the USDA Farm Service Agency (FSA).

To learn more about the FSA microloan program visit www.fsa.usda.gov/microloans, or contact your local FSA office.

Farm Reconstitutions

When changes in farm ownership or operation take place, a farm reconstitution is necessary. The reconstitution — or recon — is the process of combining or dividing farms or tracts of land based on the farming operation.

To be effective for the current Fiscal Year (FY), farm combinations and farm divisions must be requested by **August 1 of the FY** for farms subject to the Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) program. A reconstitution is considered to be requested when all:

- of the required signatures are on FSA-155
- other applicable documentation, such as proof of ownership, is submitted.

Total Conservation Reserve Program (CRP) and non-ARC/PLC farms may be reconstituted at any time.

The following are the different methods used when doing a farm recon:

Estate Method — the division of bases, allotments and quotas for a parent farm among heirs in settling an estate;

Designation of Landowner Method — may be used when (1) part of a farm is sold or ownership is transferred; (2) an entire farm is sold to two or more persons; (3) farm ownership is transferred to two or more persons; (4) part of a tract is sold or ownership is transferred; (5) a tract is sold to two or more persons; or (6) tract ownership is transferred to two or more persons. In order to use this method the land sold must have been owned for at least three years, or a waiver granted, and the buyer and seller must sign a Memorandum of Understanding;

DCP Cropland Method — the division of bases in the same proportion that the DCP cropland for each resulting tract relates to the DCP cropland on the parent tract;

Default Method — the division of bases for a parent farm with each tract maintaining the bases attributed to the tract level when the reconstitution is initiated in the system.

USDA Announces Changes to Fruit, Vegetable and Wild Rice Planting Rules

Farm Service Agency (FSA) has announced fruit, vegetable and wild rice provisions that affect producers who intend to participate in certain programs authorized by the Agricultural Act of 2014.

Producers who intend to participate in the Agriculture Risk Coverage (ARC) or Price Loss Coverage (PLC) programs are subject to an acre-for-acre payment reduction when fruits and nuts, vegetables or wild rice are planted on the payment acres of a farm. Payment reductions do not apply to mung beans, dry peas, lentils or chickpeas. Planting fruits, vegetables or wild rice on acres that are not considered payment acres will not result in a payment reduction. Farms that are eligible to participate in ARC/PLC but are not enrolled for a particular year may plant unlimited fruits, vegetables and wild rice for that year but will not receive ARC/PLC payments for that year. Eligibility for succeeding years is not affected.

Planting and harvesting fruits, vegetables and wild rice on ARC/PLC acreage is subject to the acre-for-acre payment reduction when those crops are planted on either more than 15 percent of the base acres of a farm enrolled in ARC using the county coverage or PLC, or more than 35 percent of the base acres of a farm enrolled in ARC using the individual coverage.

Fruits, vegetables and wild rice that are planted in a double-cropping practice will not cause a payment reduction if the farm is in a double-cropping region as designated by the USDA's Commodity Credit Corporation.

Recourse Seed Cotton Loans

Cotton producers can request a recourse seed cotton loan at their local Farm Service Agency (FSA) office. Due to this year's large cotton crop and delayed ginning, these seed cotton loans can provide interim financing to producers until their cotton is ginned.

Recourse seed cotton loans are available from the beginning of harvest through March 31, 2018. Seed cotton loans must be repaid by May 31, 2018.

After the cotton has been ginned, the seed cotton loan is repaid with proceeds from the ginned cotton.

County Offices will provide written or e-mail notification to every Cooperative Marketing Association (CMA) or Loan Servicing Agent (LSA) used by the producer to ensure that the proceeds from a ginned cotton loan are used to repay a seed cotton loan obligation. Any proceeds obtained from LSA or CMA, whether from a loan or Loan Deficiency Payment (LDP), will be jointly payable to the producer and to the Commodity Credit Corporation if these proceeds are from a loan for the same cotton that is collateral for the seed cotton loan.

Contact your local FSA office to learn about eligible requirements or to request a seed cotton loan.

Direct Loans

FSA offers direct farm ownership and direct farm operating Loans to producers who want to establish, maintain or strengthen their farm or ranch. FSA loan officers process, approve and service direct loans.

Direct farm operating loans can be used to purchase livestock and feed, farm equipment, fuel, farm chemicals, insurance and other costs including family living expenses. Operating loans can also be used to finance minor improvements or repairs to buildings and to refinance some farm-related debts, excluding real estate.

Direct farm ownership loans can be used to purchase farmland, enlarge an existing farm, construct and repair buildings, and to make farm improvements.

The maximum loan amount for both direct farm ownership and operating loans is \$300,000 and a down payment is not required. Repayment terms vary depending on the type of loan, collateral and the producer's ability to repay the loan. Operating loans are normally repaid within seven years and farm ownership loans are not to exceed 40 years.

Please contact your local FSA office for more information or to apply for a direct farm ownership or operating loan.

Farmers to Receive Documentation of USDA Services

Farm Service Agency (FSA) reminds agricultural producers that FSA provides a receipt to customers who request or receive assistance or information on FSA programs.

The 2014 Farm Bill requires a customer receipt to be issued for any agricultural program assistance requested from FSA, the Natural Resources Conservation Service (NRCS) and Rural Development (RD). Receipts include the date, summary of the visit and any agricultural information, program and/or loan assistance provided to an individual or entity. Electronic receipts for acreage reports began on Aug. 1, 2016.

A service is any information, program or loan assistance provided whether through a visit, email, fax or letter.

Measurement Service

Farmers who would like a guarantee on their crop plantings and land use acreages can make it official by using the FSA measurement service. Producers must file a request with the county office staff and pay the cost of a field visit to have stake and referencing done on the farm. Measurement service is available using digital imagery. If an on-site visit is not required producers are charged a reduced rate.

Incorrect acreage self-certification can result in reduced program payments, penalty or loss of eligibility.

Power of Attorney

For those who find it difficult to visit the county office personally because of work schedules, distance, health, etc., FSA has a power of attorney form available that enables you to designate another person to conduct your business at the office. If you are interested, please contact our office or any Farm Service Agency office near you for more information. Power of Attorney provisions do not apply to farm loan programs.

Organic Farming Workshop

Clemson University's Cooperative Extension Service will host an Organic Farming Workshop on Friday, April 6, 2018 from 10:00am - 2:30pm at the Pee Dee Research and Education Center located at 2200 Pocket Road, Florence, SC.

Topics will include:

- What it means to be certified USDA organic
- An overview of certified organic operations in South Carolina
- Clemson University's Organic Certification Program including the process, application requirements, and fees
- General compliance requirements for certified organic operations
- Common challenges for certified operations.

There will also be a special presentation on "SC consumers' perception of organic agricultural products." This study, funded by USDA's Natural Resources Conservation Service (NRCS), investigated the demand for organic agricultural products in SC. We conducted an online survey in different counties of SC to gauge residents' perception of and their willingness to pay for different categories of local organic agricultural products in SC. Results of this study will be presented in this workshop.

The workshop is free.

For more information and to register, contact Jennifer Boyles at 843-616-0786 or by email at jbyls@clermson.edu.

Should you require special accommodations due to a disability, please notify our office ten days prior to the event. This material is based upon work that is supported by the National Institute of Food and Agriculture, U.S. Department of Agriculture, under award number 2016-70017-25351.
