USDA Announces Increase to Certain Incentive Payments for Continuous Conservation Reserve Program

The U.S. Department of Agriculture is increasing incentive payments for practices installed on land enrolled in the Continuous Conservation Reserve Program (CRP). USDA’s Farm Service Agency (FSA) is upping the Practice Incentive Payment for installing practices, from 5 percent to 20 percent. Additionally, producers will receive a 10 percent incentive payment for water quality practices on land enrolled in CRP’s continuous signup. FSA administers CRP on behalf of the Commodity Credit Corporation.

Under continuous CRP, producers can enroll environmentally sensitive land devoted to certain conservation practices with signup...

Farm Loan Programs Chief:
William Shelly

Producers can contact their local FSA office for more information or to schedule an appointment.

Important Dates and Deadlines:
Jan. 15, 2021 : STRP Deadline

Available at any time. FSA automatically accepts offers provided the land and producer meet certain eligibility requirements and the enrollment levels do not exceed the number of acres FSA is allowed to enroll in CRP, which was set by the 2018 Farm Bill.

Signed into law in 1985, CRP is one of the largest private-lands conservation programs in the United States. It was originally intended primarily to control soil erosion and potentially stabilize commodity prices by taking marginal lands out of production. The program has evolved over the years, providing many conservation and economic benefits. The program marks its 35-year anniversary this month. Program successes include:

- Preventing more than 9 billion tons of soil from eroding, which is enough soil to fill 600 million dump trucks;
- Reducing nitrogen and phosphorous runoff relative to annually tilled cropland by 95% and 85%, respectively;
- Sequestering an annual average of 49 million tons of greenhouse gases, equal to taking 9 million cars off the road;
- Creating more than 3 million acres of restored wetlands while protecting more than 175,000 stream miles with riparian forest and grass buffers, which is enough to go around the world seven times; and
- Benefiting bees and other pollinators and increasing populations of ducks, pheasants, turkey, bobwhite quail, prairie chickens, grasshopper sparrows and many other birds.

The successes of CRP contribute to USDA’s Agriculture Innovation Agenda and its goal of reducing the environmental footprint of U.S. agriculture by half by 2050. Earlier this year, U.S. Secretary of Agriculture Sonny Perdue announced the Department-wide initiative to align resources, programs, and research to position American agriculture to better meet future global demands.

For more information on CRP, visit fsa.usda.gov, or contact your local FSA county office.

USDA Supports U.S. Seafood Industry Impacted by Retaliatory Tariffs

U.S. Secretary of Agriculture Sonny Perdue announced that the U.S. Department of Agriculture (USDA) will provide approximately $530 million to support the U.S. seafood industry and commercially licensed fishermen impacted by retaliatory tariffs from foreign governments. The funding will be provided through the Seafood Trade Relief Program and funded through the Commodity Credit Corporation (CCC), administered by USDA’s Farm Service Agency (FSA).

The Seafood Trade Relief Program funding will support the following seafood types:

- Atka mackerel
- Crab (Dungeness, King, Snow, Southern Tanner)
- Flounder
Fishermen can sign-up for relief through the program from September 14, 2020 to January 15, 2021. Fishermen should apply through their local USDA Service Center. To find your local Service Center, visit www.farmers.gov/service-center-locator. The application can be found at www.farmers.gov/seafood.

Enrollment Begins for Agriculture Risk Coverage and Price Loss Coverage Programs for 2021

Agricultural producers can now make elections and enroll in the Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) programs for the 2021 crop year. The signup period opened Tuesday, Oct. 13. These key U.S. Department of Agriculture (USDA) safety-net programs help producers weather fluctuations in either revenue or price for certain crops, and more than $5 billion in payments are in the process of going out to producers who signed up for the 2019 crop year.

Enrollment for the 2021 crop year closes March 15, 2021.

ARC provides income support payments on historical base acres when actual crop revenue declines below a specified guaranteed level. PLC provides income support payments on historical base acres when the effective price for a covered commodity falls below its reference price.

Covered commodities include barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium and short grain rice, safflower seed, seed cotton, sesame, soybeans, sunflower seed and wheat.

2021 Elections and Enrollment

Producers can elect coverage and enroll in crop-by-crop ARC-County or PLC, or ARC-Individual for the entire farm, for the 2021 crop year. Although election changes for 2021 are optional, enrollment (signed contract) is required for each year of the program. If a producer has a multi-year contract on the farm and makes an election change for 2021, it will be necessary to sign a new contract.

If an election is not submitted by the deadline of March 15, 2021, the election defaults to the current election for crops on the farm from the prior crop year.
For crop years 2022 and 2023, producers will have an opportunity to make new elections during those signups. Farm owners cannot enroll in either program unless they have a share interest in the farm.

2019 Crop Year ARC and PLC Payments

FSA began processing payments last week for 2019 ARC-County (ARC-CO) and PLC on covered commodities that met payment triggers on farms enrolled for the 2019 crop year. In addition to the $5 billion now in process, FSA anticipates it will issue additional payments by the end of November for 2019 commodities covered under ARC-Individual (ARC-IC) and additional commodities that trigger PLC and ARC-CO payments for which rates have not yet been published.

Producers who had 2019 covered commodities enrolled in ARC-CO can visit the [ARC and PLC webpage](https://www.fsa.usda.gov/arc-plc) for payment rates applicable to their county and each covered commodity. For farms and covered commodities enrolled in 2019 PLC, the following crops met payment triggers: barley, canola, chickpeas (small and large), corn, dry peas, grain sorghum, lentils, long and medium grain rice, peanuts, seed cotton and wheat.

Oats and soybeans did not meet 2019 PLC payment triggers.

2019 PLC payment rates for the following covered commodities have not been determined: crambe, flaxseed, mustard seed, rapeseed, safflower, sesame seed, sunflower seed and temperate Japonica rice. Payment rates for these commodities will be announced at a later date.

Web-Based Decision Tools

In partnership with USDA, the University of Illinois and Texas A&M University offer web-based decision tools to assist producers in making informed, educated decisions using crop data specific to their respective farming operations. Tools include:

- **Gardner-farmdoc Payment Calculator**, the University of Illinois tool that offers farmers the ability to run payment estimate modeling for their farms and counties for ARC-County and PLC.
- **ARC and PLC Decision Tool**, the Texas A&M tool allows producers to analyze payment yield updates and expected payments for 2021. Producers who have used the tool in the past should see their username and much of their farm data already available in the system.

More Information

For more information on ARC and PLC, including two online decision tools that assist producers in making enrollment and election decisions specific to their operations, visit the [ARC and PLC webpage](https://www.fsa.usda.gov/arc-plc).

For additional questions and assistance, contact your local USDA service center. To locate your local FSA office, visit [farmers.gov/service-locator](https://farmers.gov/service-locator).
Filing CCC-941 Adjusted Gross Income (AGI) Certifications

If you have experienced delays in receiving Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) payments, Loan Deficiency Payments (LDPs) and Market Gains on Marketing Assistance Loans (MALs), it may be because you have not filed form CCC-941, *Adjusted Gross Income Certification*.

If you don’t have a valid CCC-941 on file for the applicable crop year you will not receive payments. All farm operator/tenants/owners who have not filed a CCC-941 and have pending payments should IMMEDIATELY file the form with their recording county FSA office. Farm operators and tenants are encouraged to ensure that their landowners have filed the form.

FSA can accept the CCC-941 for 2018, 2019, 2020 and 2021. Unlike the past, you must have the CCC-941 certifying your AGI compliance before any payments can be issued.

Emergency Assistance for Livestock, Honeybee, and Farm-Raised Fish Program (ELAP)

ELAP provides emergency assistance to eligible livestock, honeybee, and farm-raised fish producers who have losses due to disease, adverse weather or other conditions, such as blizzards and wildfires, not covered by other agricultural disaster assistance programs.

Eligible losses include:

- **Livestock** - grazing losses not covered under the Livestock Forage Disaster Program (LFP), loss of purchased feed and/or mechanically harvested feed due to an eligible adverse weather event, additional cost of transporting water because of an eligible drought and additional cost associated with gathering livestock to treat for cattle tick fever.
- **Honeybee** - loss of purchased feed due to an eligible adverse weather event, cost of additional feed purchased above normal quantities due to an eligible adverse weather condition, colony losses in excess of normal mortality due to an eligible weather event or loss condition, including CCD, and hive losses due to eligible adverse weather.
- **Farm-Raised Fish** - death losses in excess of normal mortality and/or loss of purchased feed due to an eligible adverse weather event.

If you’ve suffered eligible livestock, honeybee, or farm-raised fish losses during calendar year 2020, you must file:

- A notice of loss within 30 calendar days after the loss is apparent (15 days for honeybee losses)
- An application for payment by Jan. 30, 2021

The following ELAP Fact Sheets (by topic) are available online:

- ELAP for Farm-Raised Fish Fact Sheet
- ELAP for Livestock Fact Sheet
- ELAP for Honeybees Fact Sheet
Noninsured Crop Coverage Helps Producers Manage Risks

The Farm Service Agency’s (FSA) Noninsured Crop Disaster Assistance Program (NAP) helps you manage risk through coverage for both crop losses and crop planting that was prevented due to natural disasters. The eligible or “noninsured” crops include agricultural commodities not covered by federal crop insurance.

You must be enrolled in the program and have purchased coverage for the eligible crop in the crop year in which the loss incurred to receive program benefits following a qualifying natural disaster.

NAP Buy-Up Coverage Option

NAP offers higher levels of coverage, from 50 to 65 percent of expected production in 5 percent increments, at 100 percent of the average market price. Buy-up levels of NAP coverage are available if the producer can show at least one year of previously successfully growing the crop for which coverage is being requested.

Producers of organics and crops marketed directly to consumers also may exercise the “buy-up” option to obtain NAP coverage of 100 percent of the average market price at the coverage levels of between 50 and 65 percent of expected production.

NAP basic coverage is available at 55 percent of the average market price for crop losses that exceed 50 percent of expected production.

Buy-up coverage is not available for crops intended for grazing.

NAP Service Fees

For all coverage levels, the NAP service fee is the lesser of $325 per crop or $825 per producer per county, not to exceed a total of $1,950 for a producer with farming interests in multiple counties.

NAP Enhancements for Qualified Military Veterans

Qualified veteran farmers or ranchers are eligible for a service fee waiver and premium reduction, if the NAP applicant meets certain eligibility criteria.

Beginning, limited resource and targeted underserved farmers or ranchers remain eligible for a waiver of NAP service fees and premium reduction when they file form CCC-860, “Socially Disadvantaged, Limited Resource and Beginning Farmer or Rancher Certification.”

For NAP application, eligibility and related program information, visit fsa.usda.gov/nap.

Sign-up for the Tree Assistance Program (TAP)

If you’re an orchardist or nursery tree grower who experienced losses from natural disasters during calendar year 2020, you must submit a TAP application either 90 calendar days after the disaster event or the date when the loss is apparent.
TAP provides financial assistance to help you replant or rehabilitate eligible trees, bushes and vines damaged by natural disasters.

Eligible tree types include trees, bushes or vines that produce an annual crop for commercial purposes. Nursery trees include ornamental, fruit, nut and Christmas trees that are produced for commercial sale. Trees used for pulp or timber are ineligible.

To qualify for TAP, orchardists must suffer a qualifying tree, bush or vine loss in excess of 15 percent mortality from an eligible natural disaster, plus an adjustment for normal mortality. The eligible trees, bushes or vines must have been owned when the natural disaster occurred; however, eligible growers are not required to own the land on which the eligible trees, bushes and vines were planted.

If the TAP application is approved, the eligible trees, bushes and vines must be replaced within 12 months from the date the application is approved. The cumulative total quantity of acres planted to trees, bushes or vines, for which you can receive TAP payments, cannot exceed 1,000 acres annually.

**Applying for FSA Direct Loans**

FSA offers direct farm ownership and direct farm operating loans to producers who want to establish, maintain, or strengthen their farm or ranch. Direct loans are processed, approved and serviced by FSA loan officers.

Direct farm operating loans can be used to purchase livestock and feed, farm equipment, fuel, farm chemicals, insurance, and other costs including family living expenses. Operating loans can also be used to finance minor improvements or repairs to buildings and to refinance some farm-related debts, excluding real estate.

Direct farm ownership loans can be used to purchase farmland, enlarge an existing farm, construct and repair buildings, and to make farm improvements.

The maximum loan amount for direct farm ownership loans is $600,000 and the maximum loan amount for direct operating loans is $400,000 and a down payment is not required. Repayment terms vary depending on the type of loan, collateral and the producer's ability to repay the loan. Operating loans are normally repaid within seven years and farm ownership loans are not to exceed 40 years.

Please contact your local FSA office for more information or to apply for a direct farm ownership or operating loan.

**Communication is Key in Lending**

Farm Service Agency (FSA) is committed to providing our farm loan borrowers the tools necessary to be successful. FSA staff will provide guidance and counsel from the loan application process through the borrower’s graduation to commercial credit. While it is FSA’s commitment to advise borrowers as they identify goals and evaluate progress, it is crucial for borrowers to communicate with their farm loan staff when changes occur. It is the borrower’s responsibility to alert FSA to any of the following:
• Any proposed or significant changes in the farming operation
• Any significant changes to family income or expenses
• The development of problem situations
• Any losses or proposed significant changes in security

If a farm loan borrower can’t make payments to suppliers, other creditors, or FSA on time, contact your farm loan staff immediately to discuss loan servicing options.

For more information on FSA farm loan programs, visit fsa.usda.gov.
