Many Farm Service Agency programs require all program participants, either individuals or legal entities, to be “actively engaged in farming”. This means participants provide a significant contribution to the farming operation, whether it is capital, land, equipment, active personal labor and/or management. For entities, each partner, stockholder or member with an ownership interest, must contribute active personal labor and/or management to the operation on a regular basis.

The 2014 Farm Bill established additional payment eligibility provisions relating to the farm management component of meeting “actively engaged in farming”. These new provisions apply to joint operations comprised of non-family members or partners, stockholders or persons with an ownership in the farming operation. Effective for 2016 and subsequent crop years, non-family joint operations are afforded to one member that may use a significant contribution of active personal management exclusively to meet the
requirements to be determined “actively engaged in farming”. The person or member will be defined as the Farm Manager for the purposes of administering these new management provisions.

In some instances, additional persons or members of a non-family member joint operation who meet the definition of Farm Manager may also be allowed to use such a contribution of active personal management to meet the eligibility requirements. However, under no circumstances may the number of Farm Managers in a non-family joint operation exceed a total of three in any given crop and program year.

### Farm Service Agency (FSA) and Risk Management Agency (RMA) to Prevent Fraud, Waste, and Abuse

FSA supports the RMA in the prevention of fraud, waste, and abuse of the Federal Crop Insurance Program. FSA has been and will continue to, assist RMA and insurance providers by monitoring crop conditions throughout the growing season. FSA will continue to refer all suspected cases of fraud, waste and abuse directly to RMA. Producers can report suspected cases to the county office staff, the RMA office, or the Office of the Inspector General.

### USDA’s Farm Service Agency Expands Bridges to Opportunity Nationwide

The U.S. Department of Agriculture’s (USDA) Farm Service Agency (FSA) announced the expansion of a unique service for farmers and ranchers. FSA’s Bridges to Opportunity program provides a one-stop-shop that connects producers with resources, programs and educational services offered across the department, as well as from other USDA partner organizations. Bridges to Opportunity, which currently provides enhanced customer support to more than 150,000 customers in 20 states, will expand to serve customers across the country before the end of the month using fiscal year 2016 funds.

FSA’s presence in over 2,100 county offices, in nearly every rural county, puts the agency in a unique position to partner with non-governmental organizations to reach thousands of agricultural producers who can benefit from the programs and services. Bridges to Opportunity allows FSA employees to search and obtain a list of all local, state, regional and national organizations that may be able assist local producers with their specific need. For example, FSA’s Houston County office in Texas partnered with many agricultural organizations to serve producers affected by severe drought. When drought-stricken agricultural producers came to the county office looking for assistance, FSA employees were able to provide traditional services, such as the Livestock Forage Program and the Emergency loan program administered by FSA, as well as
connect local farmers with local, regional, and national organizations that provide drought assistance and education.

Bridges to Opportunity was developed by FSA to provide producers with a more comprehensive customer service experience by connecting them with other USDA agencies and nonfederal partners. Through Bridges to Opportunity, FSA county office employees have the tools to connect farmers, ranchers and anyone interested in agriculture with customized expertise on topics ranging including organic production, beginning farmer resources, integrated pest management, disaster assistance, conservation practices, agricultural educational courses, loans, grants and other financial assistance that can start, grow or benefit farming and ranching operations.

For more information about Bridges to Opportunity, please contact your local FSA county office.

USDA Makes it Easier to Transfer Land to the Next Generation of Farmers and Ranchers

Allows for Transfer of Certain Conservation Reserve Program Land to New Farmers; Provides Priority Enrollment in Working Lands Conservation Programs

U.S. Department of Agriculture (USDA) is offering an early termination opportunity for certain Conservation Reserve Program (CRP) contracts, making it easier to transfer property to the next generation of farmers and ranchers, including family members. The land that is eligible for the early termination is among the least environmentally sensitive land enrolled in CRP.

Normally if a landowner terminates a CRP contract early, they are required to repay all previous payments plus interest. The new policy waives this repayment if the land is transferred to a beginning farmer or rancher through a sale or lease with an option to buy. With CRP enrollment close to the Congressionally-mandated cap of 24 million acres, the early termination will also allow USDA to enroll other land with higher conservation value elsewhere.

Acres terminated early from CRP under these land tenure provisions will be eligible for priority enrollment consideration into the CRP Grasslands, if eligible; or the Conservation Stewardship Program or Environmental Quality Incentives Program, as determined by the Natural Resources Conservation Service.

According to the Tenure, Ownership and Transition of Agricultural Land survey, conducted by USDA in 2014, U.S. farmland owners expect to transfer 93 million acres to new ownership during 2015-2019. This represents 10 percent of all farmland across the nation. Details on the early termination opportunity will be available starting on Jan. 9, 2017, at local USDA service centers. For more information about CRP and to find out if your acreage is eligible for early contract termination, contact your local Farm Service Agency (FSA) office or go online at www.fsa.usda.gov/crp.
Organic Producers and Handlers May Apply for Certification Cost Share Reimbursements; Expanded Eligibility for Transition and State Certification Cost

Starting March 20, 2017, organic producers and handlers will be able to visit over 2,100 USDA Farm Service Agency (FSA) offices to apply for federal reimbursement to assist with the cost of receiving and maintaining organic or transitional certification.

USDA reimburses organic producers up to 75 percent of the cost of organic certification, but only about half of the nation’s organic operations currently participate in the program. Starting March 20, USDA will provide a uniform, streamlined process for organic producers and handlers to apply for organic cost share assistance either by mail or in person.

USDA is making changes to increase participation in the National Organic Certification Cost Share Program (NOCCSP) and the Agricultural Management Assistance Organic Certification Cost Share Program, and at the same time provide more opportunities for organic producers to access other USDA programs, such as disaster protection and loans for farms, facilities and marketing. Producers can also access information on nonfederal agricultural resources, and get referrals to local experts, including organic agriculture, through USDA’s Bridges to Opportunity service at the local FSA office.

Historically, many state departments of agriculture have obtained grants to disburse reimbursements to those producers and handlers qualifying for cost share assistance. FSA will continue to partner with states to administer the programs. For states that want to continue to directly administer the programs, applications will be due Feb. 17, 2017.

Eligible producers include any certified producers or handlers who have paid organic or transitional certification fees to a USDA-accredited certifying agent. Application fees, inspection costs, fees related to equivalency agreement/arrangement requirements, travel/per diem for inspectors, user fees, sales assessments and postage are all eligible for a cost share reimbursement from USDA.

Once certified, producers and handlers are eligible to receive reimbursement for up to 75 percent of certification costs each year up to a maximum of $750 per certification scope—crops, livestock, wild crops and handling. This announcement also adds transitional certification and state organic program fees as additional scopes.

To learn more about organic certification cost share, please visit www.fsa.usda.gov/organic or contact a local FSA office by visiting http://offices.usda.gov.

Farmers to Receive Documentation of USDA Services

Farm Service Agency (FSA) reminds agricultural producers that FSA provides a receipt to customers who request or receive assistance or information on FSA programs.

The 2014 Farm Bill requires a customer receipt to be issued for any agricultural program assistance requested from FSA, the National Resources Conservation Service (NRCS) and Rural Development (RD). Receipts include the date, summary of the visit and any agricultural information, program and/or loan assistance provided to an individual or entity. Electronic receipts for acreage reports began on Aug. 1, 2016.

A service is any information, program or loan assistance provided whether through a visit, email, fax or letter.
USDA Financial Assistance Available to Help Organic Farmers Create Conservation Buffers

USDA is assisting organic farmers with the cost of establishing up to 20,000 acres of new conservation buffers and other practices on and near farms that produce organic crops.

The financial assistance is available from the USDA Conservation Reserve Program (CRP), a federally funded voluntary program that contracts with agricultural producers so that environmentally sensitive land is not farmed or ranched, but instead used for conservation benefits. CRP participants establish long-term, resource-conserving plant species, such as approved grasses or trees (known as “covers”) to control soil erosion, improve water quality and develop wildlife habitat. In return, FSA provides participants with rental payments and cost-share assistance. Contract duration is between 10 and 15 years.

For conservation buffers, funds are available for establishing shrubs and trees, or supporting pollinating species, and can be planted in blocks or strips. Interested organic producers can offer eligible land for enrollment in this initiative at any time.

Other USDA FSA programs that assist organic farmers include:

- The Noninsured Crop Disaster Assistance Program that provides financial assistance for 55 to 100 percent of the average market price for organic crop losses between 50 to 65 percent of expected production due to a natural disaster.

- Marketing assistance loans that provide interim financing to help producers meet cash flow needs without having to sell crops during harvest when market prices are low, and deficiency payments to producers who forgo the loan in return for a payment on the eligible commodity.

- A variety of loans for operating expenses, ownership or guarantees with outside lenders, including streamlined microloans that have a lower amount of paperwork.

- Farm Storage Facility Loans for that provide low-interest financing to build or upgrade storage facilities for organic commodities, including cold storage, grain bins, bulk tanks and drying and handling equipment.

- Services such as mapping farm and field boundaries and reporting organic acreage that can be provided to a farm’s organic certifier or crop insurance agent.

Visit [www.fsa.usda.gov/organic](http://www.fsa.usda.gov/organic) to learn more about how FSA can help organic farmers. For an interactive tour of CRP success stories, visit [www.fsa.usda.gov/CRPis30](http://www.fsa.usda.gov/CRPis30) or follow #CRPis30 on Twitter. To learn more about FSA programs visit a local FSA office or [www.fsa.usda.gov](http://www.fsa.usda.gov). To find your local FSA office, visit [http://offices.usda.gov](http://offices.usda.gov)

**Reporting Organic Crops**

Producers who want to use the Noninsured Crop Disaster Assistance Program (NAP) organic price and selected the "organic" option on their NAP application must report their crops as organic.

When certifying organic acres, the buffer zone acreage must be included in the organic acreage.
Producers must also provide a current organic plan, organic certificate or documentation from a certifying agent indicating an organic plan is in effect. Documentation must include:

- name of certified individuals
- address
- telephone number
- effective date of certification
- certificate number
- list of commodities certified
- name and address of certifying agent
- a map showing the specific location of each field of certified organic, including the buffer zone acreage

Certification exemptions are available for producers whose annual gross agricultural income from organic sales totals $5,000 or less. Although exempt growers are not required to provide a written certificate, they are still required to provide a map showing the specific location of each field of certified organic, transitional and buffer zone acreage.

For questions about reporting organic crops, contact your local FSA office. To find your local office, visit http://offices.usda.gov.

**ARC/PLC Acreage Maintenance**

Producers enrolled in the Agriculture Risk Coverage (ARC) or Price Loss Coverage (PLC) programs must protect all cropland and noncropland acres on the farm from wind and water erosion and noxious weeds. Producers who sign ARC county or individual contracts and PLC contracts agree to effectively control noxious weeds on the farm according to sound agricultural practices. If a producer fails to take necessary actions to correct a maintenance problem on a farm that is enrolled in ARC or PLC, the County Committee may elect to terminate the contract for the program year.

**Youth Loans**

The Farm Service Agency makes loans to youth to establish and operate agricultural income-producing projects in connection with 4-H clubs, FFA and other agricultural groups. Projects must be planned and operated with the help of the organization advisor, produce sufficient income to repay the loan and provide the youth with practical business and educational experience. The maximum loan amount is $5000.

**Youth Loan Eligibility Requirements:**

- Be a citizen of the United States (which includes Puerto Rico, the Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands) or a legal resident alien
- Be 10 years to 20 years of age
- Comply with FSA’s general eligibility requirements
- Be unable to get a loan from other sources
- Conduct a modest income-producing project in a supervised program of work as outlined above
- Demonstrate capability of planning, managing and operating the project under guidance and assistance from a project advisor.

The project supervisor must recommend the youth loan applicant, along with providing adequate
supervision.

Stop by the county office for help preparing and processing the application forms.
