Update Your Records

FSA is cleaning up our producer record database. If you have any unreported changes of address, zip code, phone number, email address or an incorrect name or business name on file they need to be reported to our office. Changes in your farm operation, like the addition of a farm by lease or purchase, need to be reported to our office as well. Producers participating in FSA and NRCS programs are required to timely report changes in their farming operation to the County Committee in writing and update their CCC-902 Farm Operating Plan.

If you have any updates or corrections, please call your local FSA office to update your records.

Farm Reconstitutions

When changes in farm ownership or operation take place, a farm *reconstitution* is necessary. The reconstitution — or recon — is the process of combining or dividing farms or tracts of land based on the farming operation.

To be effective for the current Fiscal Year (FY), farm combinations and farm divisions must be requested by **August 1 of the FY** for farms subject to the Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) program. A reconstitution is considered to be requested when all:

- of the required signatures are on FSA-155
- other applicable documentation, such as proof of ownership, is submitted

Total Conservation Reserve Program (CRP) and non-ARC/PLC farms may be reconstituted at any time.

The following are the different methods used when doing a farm recon:

Estate Method — the division of bases, allotments and quotas for a parent farm among heirs in settling an estate;

Designation of Landowner Method — may be used when (1) part of a farm is sold or ownership is transferred, (2) an entire farm is sold to two or more persons, (3) farm ownership is transferred to two or more persons, (4) part of a tract is sold or ownership is transferred, (5) a tract is sold to two or more persons, or (6) tract ownership is transferred to two or more persons. In order to use this method the land sold must have been owned for at least three

years, or a waiver granted, and the buyer and seller must sign a Memorandum of Understanding,

DCP Cropland Method — the division of bases in the same proportion that the DCP cropland for each resulting tract relates to the DCP cropland on the parent tract;

Default Method — the division of bases for a parent farm with each tract maintaining the bases attributed to the tract level when the reconstitution is initiated in the system.

Maintaining the Quality of Farm-Stored Loan Grain

Bins are ideally designed to hold a level volume of grain. When bins are overfilled and grain is heaped up, airflow is hindered and the chance of spoilage increases.

Producers who take out marketing assistance loans and use the farm-stored grain as collateral should remember that they are responsible for maintaining the quality of the grain through the term of the loan.

Unauthorized Disposition of Grain

If loan grain has been disposed of through feeding, selling or any other form of disposal without prior written authorization from the county office staff, it is considered unauthorized disposition. The financial penalties for unauthorized dispositions are severe and a producer's name will be placed on a loan violation list for a two-year period. Always call before you haul any grain under loan.

Livestock Losses

The Livestock Indemnity Program (LIP) provides assistance to eligible producers for livestock deaths in excess of normal mortality caused by adverse weather, disease and attacks by animals reintroduced into the wild by the federal government or protected by federal law.

LIP compensates livestock owners and contract growers for livestock death losses in excess of normal mortality due to adverse weather, including losses due to hurricanes, floods, blizzards, wildfires, extreme heat or extreme cold.

For disease losses, FSA county committees can accept veterinarian certifications that livestock deaths were directly related to adverse weather and unpreventable through good animal husbandry and management.

For 2019 livestock losses, eligible livestock owners must file a notice within 30 calendar days of when the loss is first apparent.

Participants must provide the following supporting documentation to their local FSA office no later than 90 calendar days after the end of the calendar year in which the eligible loss condition occurred.

- [Proof of death documentation](#)
- [Copy of growers contracts](#)
- [Proof of normal mortality documentation](#)

USDA has established normal mortality rates for each type and weight range of eligible livestock, i.e. Adult Beef Cow = 1.5% and Non-Adult Beef Cattle (less than 400 pounds) =5%. These established percentages reflect losses that are considered expected or typical under "normal" conditions.

In addition to filing a notice of loss, producers must also submit an application for payment by March 1, 2020. Additional information about LIP is available at your local FSA office or online at www.fsa.usda.gov.

Livestock Inventory Records

Producers are reminded to keep updated livestock inventory records. These records are necessary in the event of a natural disaster.

When disasters strike, the USDA Farm Service Agency (FSA) can assist producers who suffered excessive livestock death losses and grazing or feed losses due to eligible natural disasters.

To participate in livestock disaster assistance programs, producers will be required to provide verifiable documentation of death losses resulting from an eligible adverse weather event and must submit a notice of loss to their local FSA office within 30 calendar days of when the loss of livestock is apparent. For grazing or feed losses, producers must submit a notice of loss to their local FSA office within 30 calendar days of when the loss is apparent and should maintain documentation and receipts.

Producers should record all pertinent information regarding livestock inventory records including:

- [Documentation of the number, kind, type, and weight range of livestock](#)
- [Beginning inventory supported by birth recordings or purchase receipts.](#)

For more information on documentation requirements, contact your local FSA office.

USDA Offers Targeted Farm Loan Funding for Underserved Groups and Beginning Farmers

The USDA Farm Service Agency (FSA) reminds producers that FSA offers targeted farm ownership and farm operating loans to assist underserved applicants as well as beginning farmers and ranchers

USDA defines underserved applicants as a group whose members have been subjected to racial, ethnic, or gender prejudice because of their identity as members of the group without regard to their individual qualities. For farm loan program purposes, targeted underserved groups are women, African Americans, American Indians and Alaskan Natives, Hispanics and Asians and Pacific Islanders

Underserved or beginning farmers and ranchers who cannot obtain commercial credit from a bank can apply for either FSA direct loans or guaranteed loans. Direct loans are made to applicants by FSA. Guaranteed loans are made by lending institutions who arrange for FSA to guarantee the loan. FSA can guarantee up to 95 percent of the loss of principal and interest on a loan. The FSA guarantee allows lenders to make agricultural credit available to producers who do not meet the lender's normal underwriting criteria.

The direct and guaranteed loan program provides for two types of loans: farm ownership loans and farm operating loans. In addition to customary farm operating and ownership loans, FSA now offers Microloans through the direct loan program. The focus of Microloans is on the financing needs of small, beginning farmer, niche and non-traditional farm operations. Microloans are available for both ownership and operating finance needs. To learn more about microloans, visit www.fsa.usda.gov/microloans.

To qualify as a beginning producer, the individual or entity must meet the eligibility requirements outlined for direct or guaranteed loans. Additionally, individuals and all entity members must have operated a farm for less than 10 years. Applicants must materially or substantially participate in the operation.

For more information on FSA's farm loan programs and targeted underserved and beginning farmer guidelines, visit www.fsa.usda.gov/farmloans.

Guaranteed Loan Program

FSA guaranteed loans allow lenders to provide agricultural credit to farmers who do not meet the lender's normal underwriting criteria. Farmers and ranchers apply for a guaranteed loan through a lender, and the lender arranges for the guarantee. FSA can guarantee up to 95 percent of the loss of principal and interest on a loan. Guaranteed loans can be used for both farm ownership and operating purposes.

Guaranteed farm ownership loans can be used to purchase farmland, construct or repair buildings, develop farmland to promote soil and water conservation or to refinance debt.

Guaranteed operating loans can be used to purchase livestock, farm equipment, feed, seed, fuel, farm chemicals, insurance and other operating expenses.

FSA can guarantee farm ownership and operating loans up to \$1,750,000. Repayment terms vary depending on the type of loan, collateral and the producer's ability to repay the loan. Operating loans are normally repaid within seven years and farm ownership loans are not to exceed 40 years.

Please contact your lender or local FSA farm loan office for more information on guaranteed loans.

USDA is an equal opportunity provider, employer and lender. To file a complaint of discrimination, write: USDA, Office of the Assistant Secretary for Civil Rights, Office of Adjudication, 1400 Independence Ave., SW, Washington, DC 20250-9410 or call (866) 632-9992 (Toll-free Customer Service), (800) 877-8339 (Local or Federal relay), (866) 377-8642 (Relay voice users).
