From the State Executive Director

Happy National Ag Week!

March 14 is designated as National Ag Day. Today and every day, FSA employees show their support for the farmers and ranchers throughout Texas who work to provide food and fiber for our state, country and nation.

Our hard-working farmers and ranchers provide economic stability by supporting rural economies and creating much-needed jobs in our local communities.

Today, we join our fellow USDA agencies, commodity groups, partner organizations and consumers in thanking agricultural producers. We appreciate your hard work, sacrifice and commitment to an industry that is no stranger to challenges. Just know that we're here to support you along the way.

FSA is proud to offer a variety of programs to help fund your operations, manage risk, conserve natural resources and recover from natural disasters.

As we move forward with implementing a new Farm Bill, please make sure that all of your information on file with FSA is correct. Please contact your local office if you need to update any changes of address, zip code, phone number, email address, farm ownership or lease or an incorrect name or business name on file.

Producers who enrolled in the Market Facilitation Program have until **May 1, 2019**, to certify crop production and provide all required eligibility paperwork.

If you need to conduct any business with your local FSA office, please call to make an appointment.

Sincerely,

Gary L. Six
State Executive Director
Farm Service Agency – Texas

Today and All Days, We Thank #OurFarmers

Happy National Ag Day!

We celebrate by highlighting just a few of the farmers working hard to grow food, fiber, and fuel for our nation and beyond.

These farmers dedicate their lives to providing for us all. Today and every day, join us in thanking them.

USDA Outlines Eligibility for 2019 Supplemental Coverage Option Regarding Elections for Agriculture Risk Coverage and Price Loss Coverage

The U.S. Department of Agriculture's Risk Management Agency (RMA) announced that producers who purchased or plan to purchase the [2019 Supplemental Coverage Option \(SCO\) policy](#) should report Agriculture Risk Coverage (ARC) or Price Loss Coverage (PLC) election intentions to their crop insurance agent by March 15, 2019, or the acreage reporting date, whichever is later.

Producers have the option to elect either ARC or PLC through the Farm Service Agency (FSA) to receive benefits. The 2018 Farm Bill allows producers to make an election in 2019, which covers the 2019 and 2020 crop years.

The Federal Crop Insurance Act prohibits producers from having SCO on farms where they elect ARC. Because of the timing of the Farm Bill, FSA's ARC/PLC election period will not occur until after the SCO sales closing dates and acreage reporting dates.

Producers who purchased SCO policies with sales closing dates of Feb. 28, 2019, or earlier may cancel their SCO policy by March 15, 2019. This allows producers, particularly those who intend to elect ARC for all their acres, to no longer incur crop insurance costs for coverage for which they will not be eligible.

Producers with SCO coverage now have the option to file an ARC/PLC acreage intention report with their crop insurance agent by the later of the acreage reporting date or March 15, 2019. This report will adjust the acreage report by specifying the intended ARC or PLC election by FSA Farm Number. The number of eligible acres on farms with an intention of PLC will be the number of acres insured for SCO regardless of any actual elections made with FSA. If a producer does not file an ARC/PLC acreage intention report, SCO will cover all acres as though the producer elected PLC.

The existing penalties for misreporting eligible acreage on the SCO endorsement will not apply in 2019.

Additional details about SCO can be found at www.rma.usda.gov.

USDA Encourages Producers to Consider NAP Risk Protection Coverage before Crop Sales Deadlines

The Farm Service Agency encourages producers to examine available USDA crop risk protection options, including federal crop insurance and Noninsured Crop Disaster Assistance Program (NAP) coverage, before the applicable crop sales deadline.

Producers are reminded that crops not covered by insurance may be eligible for NAP. Beginning, underserved and limited resource farmers are now eligible for free catastrophic level coverage.

Federal crop insurance covers crop losses from natural adversities such as drought, hail and excessive moisture. NAP covers losses from natural disasters on crops for which no permanent federal crop insurance program is available, including perennial grass forage and grazing crops, fruits, vegetables, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, bioenergy, and industrial crops.

Producers can determine if crops are eligible for federal crop insurance or NAP by visiting <https://webapp.rma.usda.gov/apps/ActuarialInformationBrowser2018/CropCriteria.aspx>.

NAP basic coverage is available at 55 percent of the average market price for crop losses that exceed 50 percent of expected production.

Deadlines for coverage vary by state and crop. To learn more about NAP visit www.fsa.usda.gov/nap or contact your local USDA Service Center. To find your local USDA Service Centers go to <http://offices.usda.gov>.

Federal crop insurance coverage is sold and delivered solely through private insurance agents. Agent lists are available at all USDA Service Centers or at USDA's online Agent Locator: <http://prodwebnlb.rma.usda.gov/apps/AgentLocator/#>. Producers can use the USDA Cost Estimator, <https://ewebapp.rma.usda.gov/apps/costestimator/Default.aspx>, to predict insurance premium costs.

Breaking New Ground

Agricultural producers are reminded to consult with FSA and NRCS before breaking out new ground for production purposes as doing so without prior authorization may put a producer's federal farm program benefits in jeopardy. This is especially true for land that must meet Highly Erodible Land (HEL) and Wetland Conservation (WC) provisions.

Producers with HEL determined soils are required to apply tillage, crop residue and rotational requirements as specified in their conservation plan.

Producers should notify FSA as a first point of contact prior to conducting land clearing or drainage type projects to ensure the proposed actions meet compliance criteria such as clearing any trees to create new cropland, then these areas will need to be reviewed to ensure such work will not risk your eligibility for benefits.

Landowners and operators complete the form AD-1026 - Highly Erodible Land Conservation (HELIC) and Wetland Conservation (WC) Certification to identify the proposed action and allow FSA to determine whether a referral to Natural Resources Conservation Service (NRCS) for further review is necessary.

Producers are Encouraged to Report Prevented Planting and Failed Acres

USDA Farm Service Agency (FSA) reminds producers to report prevented planting and failed acres in order to establish or retain FSA program eligibility for some programs.

Producers should report crop acreage they intended to plant, but due to natural disaster, were prevented from planting. Prevented planting acreage must be reported on form *CCC-576, Notice of Loss*, no later than 15 calendar days after the final planting date as established by FSA and Risk Management Agency (RMA).

Contact your local FSA office for a list of final planting dates by crop.

If a producer is unable to report the prevented planting acreage within the 15 calendar days following the final planting date, a late-filed report can be submitted. Late-filed reports will only be accepted if FSA conducts a farm visit to assess the eligible disaster condition that prevented the crop from being planted. A measurement service fee will be charged.

Additionally, producers with failed acres should also use form *CCC-576, Notice of Loss*, to report failed acres.

Producers of hand-harvested crops must notify FSA of damage or loss through the administrative County Office within 72 hours of the date of damage or loss first becomes apparent. This notification can be provided by filing a *CCC-576*, email, fax or phone. Producers who notify the County Office by any method other than by filing the *CCC-576* are still required to file a *CCC-576, Notice of Loss*, within the required 15 calendar days.

For losses on crops covered by the Non-Insured Crop Disaster Assistance Program (NAP), producers must file a *Notice of Loss* within 15 days of the occurrence of the disaster or when losses become apparent. Producers must timely file a *Notice of Loss* for failed acres on all crops including grasses.

Final Planting Dates

All producers are encouraged to contact their local FSA office for more information on the final planting date for specific crops. The final planting dates vary by crop, planting period and county so please contact your local FSA office for a list of county-specific planting deadlines. The timely planting of a crop, by the final planting date, may prevent loss of program benefits.

USDA Offers Targeted Farm Loan Funding for Underserved Groups and Beginning Farmers

The USDA Farm Service Agency (FSA) reminds producers that FSA offers targeted farm ownership and farm operating loans to assist underserved applicants as well as beginning farmers and ranchers.

USDA defines underserved applicants as a group whose members have been subjected to racial, ethnic, or gender prejudice because of their identity as members of the group without regard to their individual qualities. For farm loan program purposes, targeted underserved groups are women, African Americans, American Indians and Alaskan Natives, Hispanics and Asians and Pacific Islanders.

Underserved or beginning farmers and ranchers who cannot obtain commercial credit from a bank can apply for either FSA direct loans or guaranteed loans. Direct loans are made to applicants by FSA. Guaranteed loans are made by lending institutions who arrange for FSA to guarantee the loan. FSA can guarantee up to 95 percent of the loss of principal and interest on a loan. The FSA guarantee allows lenders to make agricultural credit available to producers who do not meet the lender's normal underwriting criteria.

The direct and guaranteed loan program provides for two types of loans: farm ownership loans and farm operating loans. In addition to customary farm operating and ownership loans, FSA now offers Microloans through the direct loan program. The focus of Microloans is on the financing needs of small, beginning farmer, niche and non-traditional farm operations. Microloans are available for both ownership and operating finance needs. To learn more about microloans, visit www.fsa.usda.gov/microloans.

To qualify as a beginning producer, the individual or entity must meet the eligibility requirements outlined for direct or guaranteed loans. Additionally, individuals and all entity members must have operated a farm for less than 10 years. Applicants must materially or substantially participate in the operation.

For more information on FSA's farm loan programs and targeted underserved and beginning farmer guidelines, visit www.fsa.usda.gov/farmloans.

Guaranteed Loan Program

FSA guaranteed loans allow lenders to provide agricultural credit to farmers who do not meet the lender's normal underwriting criteria. Farmers and ranchers apply for a guaranteed loan through a lender, and the lender arranges for the guarantee. FSA can guarantee up to 95 percent of the loss of principal and interest on a loan. Guaranteed loans can be used for both farm ownership and operating purposes.

Guaranteed farm ownership loans can be used to purchase farmland, construct or repair buildings, develop farmland to promote soil and water conservation or to refinance debt.

Guaranteed operating loans can be used to purchase livestock, farm equipment, feed, seed, fuel, farm chemicals, insurance and other operating expenses.

FSA can guarantee farm ownership and operating loans up to \$1,750,000. Repayment terms vary depending on the type of loan, collateral and the producer's ability to repay the loan. Operating loans are normally repaid within seven years and farm ownership loans are not to exceed 40 years.

Please contact your lender or local FSA farm loan office for more information on guaranteed loans.

Beginning Farmer Loans

FSA assists beginning farmers to finance agricultural enterprises. Under these designated farm loan programs, FSA can provide financing to eligible applicants through either direct or guaranteed loans. FSA defines a beginning farmer as a person who:

- Has operated a farm for not more than 10 years
- Will materially and substantially participate in the operation of the farm
- Agrees to participate in a loan assessment, borrower training and financial management program sponsored by FSA
- Does not own a farm in excess of 30 percent of the county's average size farm.

Additional program information, loan applications, and other materials are available at your local USDA Service Center. You may also visit www.fsa.usda.gov.

MAL and LDP Policy

The Agricultural Act of 2014 authorized 2014-2018 crop year Marketing Assistance Loans (MALs) and Loan Deficiency Payments (LDPs), with a few minor policy changes.

Among the changes, farm-stored MAL collateral transferred to warehouse storage will retain the original loan rate, be allowed to transfer only the outstanding farm-stored quantity with no additional quantity allowed and will no longer require producers to have a paid for measurement service when moving or commingling loan collateral.

MALs and LDPs provide financing and marketing assistance for wheat, feed grains, soybeans, and other oilseeds, pulse crops, rice, peanuts, cotton, wool and honey. MALs provide producers interim financing after harvest to help them meet cash flow needs without having to sell their commodities when market prices are typically at harvest-time lows. A producer who is eligible to obtain a loan, but agrees to forgo the loan, may obtain an LDP if such a payment is available. Marketing loan provisions and LDPs are not available for sugar and extra-long staple cotton.

FSA is now accepting requests for 2018 MALs and LDPs for all eligible commodities after harvest. Requests for loans and LDPs shall be made on or before the final availability date for the respective commodities.

Before MAL repayments with a market loan gain or LDP disbursements can be made, producers must meet the requirements of actively engaged in farming, cash rent tenant and member contribution.

Commodity certificates are available to loan holders who have outstanding nonrecourse loans for wheat, upland cotton, rice, feed grains, pulse crops (dry peas, lentils, large and small chickpeas), peanuts, wool, soybeans and designated minor oilseeds. These certificates can be purchased at the posted county price (or adjusted world price or national posted price) for the quantity of commodity under loan, and must be immediately exchanged for the collateral, satisfying the loan. MALs redeemed with commodity certificates are not subject to the actively engaged in farming, cash-rent tenant, Adjusted Gross Income provisions or the payment limitation.

To be considered eligible for an LDP, producers must have form [CCC-633EZ, Page 1](#) on file at their local FSA Office before losing beneficial interest in the crop. Pages 2, 3 or 4 of the form must be submitted when payment is requested.

The 2014 Farm Bill also establishes payment limitations per individual or entity not to exceed \$125,000 annually on certain commodities for the following program benefits: price loss coverage payments, agriculture risk coverage payments, marketing loan gains (MLGs) and LDPs. These payment limitations do not apply to MAL loan disbursements or redemptions using commodity certificate exchange.

Adjusted Gross Income (AGI) provisions were modified by the 2014 Farm Bill, which states that a producer whose total applicable three-year average AGI exceeds \$900,000 is not eligible to receive an MLG or LDP. Producers must have a valid CCC-941 on file to earn a market gain of LDP. The AGI does not apply to MALs redeemed with commodity certificate exchange.

For more information and additional eligibility requirements, please visit a nearby USDA Service Center or FSA's website www.fsa.usda.gov.

Maintaining the Quality of Farm-Stored Loan Grain

Bins are ideally designed to hold a level volume of grain. When bins are overfilled and grain is heaped up, airflow is hindered and the chance of spoilage increases.

Producers who take out marketing assistance loans and use the farm-stored grain as collateral should remember that they are responsible for maintaining the quality of the grain through the term of the loan.

Unauthorized Disposition of Grain

If loan grain has been disposed of through feeding, selling or any other form of disposal without prior written authorization from the county office staff, it is considered unauthorized disposition. The financial penalties for unauthorized dispositions are severe and a producer's name will be placed on a loan violation list for a two-year period. Always call before you haul any grain under loan.
