Utah FSA Newsletter - April 15, 2024

In This Issue:

Dairy Producers Can Enroll for 2024 Dairy Margin Coverage (DMC) Until April 29!!

Producers have until April 29, 2024, to sign up for 2024 DMC coverage!! The 2024 Dairy Margin Coverage (DMC) is an important safety net program offered through the U.S. Department of Agriculture (USDA) that provides producers with price support to help offset milk and feed price differences. This year's DMC signup began Feb. 28, 2024, and ends April 29, 2024. For those who sign up for 2024 DMC coverage, payments may begin as soon as March 4, 2024, for any payments that triggered in January 2024.

USDA's Farm Service Agency (FSA) has revised the regulations for DMC to allow eligible dairy operations to make a one-time adjustment to established production history. This adjustment will be accomplished by combining previously established supplemental production history with DMC production history for those dairy operations that participated in Supplemental Dairy Margin Coverage during a prior coverage year. DMC has also been authorized through calendar year 2024. Congress passed a 2018 Farm Bill extension requiring these regulatory changes to the program.

DMC is a voluntary risk management program that offers protection to dairy producers when the difference between the all-milk price and the average feed price (the margin) falls below a certain dollar amount selected by the producer. In 2023, Dairy Margin Coverage payments triggered in 11 months including two months, June and July, where the margin fell below the catastrophic level of $4.00 per hundredweight, a first for Dairy Margin Coverage or its predecessor Margin Protection Program.

2024 DMC Coverage and Premium Fees

FSA has revised DMC regulations to extend coverage for calendar year 2024, which is retroactive to Jan. 1, 2024, and to provide an adjustment to the production history for dairy operations with less than 5 million pounds of production. In previous years, smaller dairy operations could establish a supplemental production history and receive Supplemental Dairy Margin Coverage. For 2024, dairy producers can establish one adjusted base production history through DMC for each participating dairy operation to better reflect the operation's current production.

For 2024 DMC enrollment, dairy operations that established supplemental production history through Supplemental Dairy Margin Coverage for coverage years 2021 through 2023, will combine the supplemental production history with established production history for one adjusted base production history.

For dairy operations enrolled in 2023 DMC under a multi-year lock-in contract, lock-in eligibility will be extended until Dec. 31, 2024. In addition, dairy operations enrolled in multi-year lock-in contracts are eligible for the discounted DMC premium rate during the 2024 coverage year. To confirm 2024 DMC lock-in coverage or opt out in favor of an annual contract for 2024, dairy operations having lock-in contracts must enroll during the 2024 DMC enrollment period.

DMC offers different levels of coverage, even an option that is free to producers, minus a $100 administrative fee. The administrative fee is waived for dairy producers who are considered limited resource, beginning, socially disadvantaged or a military veteran.
To determine the appropriate level of DMC coverage for a specific dairy operation, producers can use the online dairy decision tool.

DMC Payments

DMC payments are calculated using updated feed and premium hay costs, making the program more reflective of actual dairy producer expenses. These updated feed calculations use 100% premium alfalfa hay.

More Information

USDA also offers other risk management tools for dairy producers, including the Dairy Revenue Protection (DRP) plan that protects against a decline in milk revenue (yield and price) and the Livestock Gross Margin (LGM) plan, which provides protection against the loss of the market value of milk minus the feed costs. Both DRP and LGM livestock insurance policies are offered through the Risk Management Agency. Producers should contact their local crop insurance agent for more information.

For more information on DMC, visit the DMC webpage or contact your local USDA Service Center.

Emergency Assistance for Livestock, Honeybee, and Farm-Raised Fish Program (ELAP)

ELAP provides emergency assistance to eligible livestock, honeybee, and farm-raised fish producers who have losses due to disease, adverse weather or other conditions, such as blizzards and wildfires, not covered by other agricultural disaster assistance programs.

Eligible losses include:

- **Livestock -** grazing losses not covered under the Livestock Forage Disaster Program (LFP), loss of purchased feed and/or mechanically harvested feed due to an eligible adverse weather event, additional cost of transporting water and feed because of an eligible drought and additional cost associated with gathering livestock to treat for cattle tick fever.
- **Honeybee -** loss of purchased feed due to an eligible adverse weather event, cost of additional feed purchased above normal quantities due to an eligible adverse weather condition, colony losses in excess of normal mortality due to an eligible weather event or loss condition, including CCD, and hive losses due to eligible adverse weather.
- **Farm-Raised Fish -** death losses in excess of normal mortality and/or loss of purchased feed due to an eligible adverse weather event.

If you've suffered eligible livestock, honeybee, or farm-raised fish losses during calendar year 2024, you must file a notice of loss and an application for payment by Jan. 30, 2025.

Keeping Livestock Inventory Records

Livestock inventory records are necessary in the event of a natural disaster, so remember to keep them updated.

When disasters strike, the USDA Farm Service Agency (FSA) can help you if you've suffered excessive livestock death losses and grazing or feed losses due to eligible natural disasters.

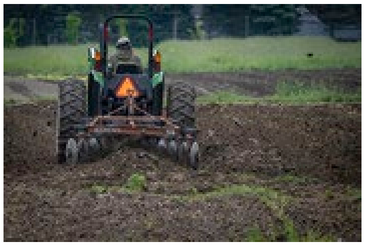
To participate in the Livestock Indemnity Program (LIP), you'll be required to provide verifiable documentation of death losses resulting from an eligible adverse weather event and must submit a notice of loss to your local FSA office no later than 60 calendar days after the end of the calendar year in which the eligible loss condition occurred. For the Emergency Assistance for Livestock, Honeybees, and Farm-raised Fish Program (ELAP), you must submit a notice of loss to your local FSA office no later than the annual program application deadline of January 30 following the program year in which the loss occurred and should maintain documentation and receipts.

You should record all pertinent information regarding livestock inventory records including:

- Documentation of the number, kind, type, and weight range of livestock
- Beginning inventory supported by birth recordings or purchase receipts.

For more information on documentation requirements, contact your local USDA Service Center or visit fsa.usda.gov.

Before You Break Out New Ground, Ensure Your Farm Meets Conservation Compliance



The term “sodbusting” is used to identify the conversion of land from native vegetation to commodity crop production after December 23, 1985. As part of the conservation provisions of the Food Security Act of 1985, if you’re proposing to produce agricultural commodities (crops that require annual tillage including one pass planting operations and sugar cane) on land that has been determined highly erodible and that has no crop history prior to December 23, 1985, that land must be farmed in accordance with a conservation plan or system that ensures no substantial increase in soil erosion.

Eligibility for many USDA programs requires compliance with a conservation plan or system on highly erodible land (HEL) used for the production of agricultural commodities. This includes Farm Service Agency (FSA) loan, disaster assistance, safety net, price support, and conservation programs; Natural Resources Conservation Service (NRCS) conservation programs; and Risk Management Agency (RMA) Federal crop insurance.

Before you clear or prepare areas not presently under production for crops that require annual tillage, you are required to file Form AD-1026 “Highly Erodible Land Conservation and Wetland Conservation Certification,” with FSA indicating the area to be brought into production. The notification will be referred to NRCS to determine if the field is considered highly erodible land. If the field is considered HEL, you are required to implement a conservation plan or system that limits the erosion to the tolerable soil loss (T) for the predominant HEL soil on those fields.

In addition, prior to removing trees or conducting any other land manipulations that may affect wetlands, remember to update form AD-1026, to ensure you remain in compliance with the wetland conservation provisions.

Prior to purchasing or renting new cropland acres, it is recommended that you check with your local USDA Service Center to ensure your activities will be in compliance with the highly erodible land and wetland conservation provisions.

For additional information on highly erodible land conservation and wetland conservation compliance, contact your local USDA Service Center.

USDA Now Accepting Farm Loan Payments Online

The U.S. Department of Agriculture (USDA) announced today that most farm loan borrowers will soon be able to make payments to their direct loans online through the Pay My Loan feature on farmers.gov in early February. Pay My Loan is part of a broader effort by USDA's Farm Service Agency (FSA) to streamline its processes, especially for producers who may have limited time during the planting or harvest seasons to visit a local FSA office; modernize and improve customer service; provide additional customer self-service tools; and expand credit access to assist more producers.

On average, local USDA Service Centers process more than 225,000 farm loan payments each year. Pay My Loan gives most borrowers an online repayment option and relieves them from needing to call, mail, or visit a Service Center to pay their loan installment. Farm loan payments can now be made at the borrower's convenience, on their schedule and outside of FSA office hours.

Pay My Loan also provides time savings for FSA's farm loan employees by minimizing manual payment processing activities. This new service for producers means that farm loan employees will have more time to focus on reviewing and processing new loans or servicing requests.

The Pay My Loan feature can be accessed at farmers.gov/loans. To use the payment feature, producers must establish a USDA customer account and a USDA Level 2 eAuthentication ("eAuth") account or a Login.gov account. This initial release only allows individuals with loans to make online payments. For now, borrowers with jointly payable checks will need to continue to make loan payments through their local office.

FSA has a significant initiative underway to streamline and automate the Farm Loan Program customer-facing business process. For the over 26,000 producers who submit a direct loan application annually, FSA has made various improvements including:

- The Online Loan Application, an interactive, guided application that is paperless and provides helpful features including an electronic signature option, the ability to attach supporting documents such as tax returns, complete a balance sheet, and build a farm operating plan.
- The Loan Assistance Tool that provides customers with an interactive online, step-by-step guide to identifying the direct loan products that may be a fit for their business needs and to understanding the application process.
- A simplified direct loan paper application, which reduced loan applications by more than half, from 29 pages to 13 pages.

Farmers.gov Local Dashboard Now Available for Producers in all 50 States

Farmers in all 50 states can now access county specific farming data and USDA resources all in one place via the new farmers.gov local dashboard. Your farmers.gov local dashboard includes farming data and USDA resources including USDA news, commodity pricing, weather forecasts, historical climate data, past storm events, USDA service center locator and additional state resources for your state and county. The dashboard transforms complex data sets into easy-to-read charts and graphs to help you quickly find information that matters to you.

Applying for FSA Direct Loans

FSA offers direct farm ownership and direct farm operating loans to producers who want to establish, maintain, or strengthen their farm or ranch. Direct loans are processed, approved and serviced by FSA loan officers.

Direct farm operating loans can be used to purchase livestock and feed, farm equipment, fuel, farm chemicals, insurance, and other costs including family living expenses. Operating loans can also be used to finance minor improvements or repairs to buildings and to refinance some farm-related debts, excluding real estate.

Direct farm ownership loans can be used to purchase farmland, enlarge an existing farm, construct and repair buildings, and to make farm improvements.

The maximum loan amount for direct farm ownership loans is $600,000 and the maximum loan amount for direct operating loans is $400,000 and a down payment is not required. Repayment terms vary depending on the type of loan, collateral and the producer's ability to repay the loan. Operating loans are normally repaid within seven years and farm ownership loans are not to exceed 40 years.

Please contact your local FSA office for more information or to apply for a direct farm ownership or operating loan.

Environmental Review Required Before Project Implementation

The National Environmental Policy Act (NEPA) requires Federal agencies to consider all potential environmental impacts for federally funded projects before the project is approved.

For all Farm Service Agency (FSA) programs, an environmental review must be completed before actions are approved, such as site preparation or ground disturbance. These programs include, **but are not limited to**, the Emergency Conservation Program (ECP), Farm Storage Facility Loan (FSFL) program and farm loans. If project implementation begins before FSA has completed an environmental review, the request will be denied. Although there are exceptions regarding the Stafford Act and emergencies, it’s important to wait until you receive written approval of your project proposal before starting any actions.

Applications cannot be approved until FSA has copies of all permits and plans. Contact your local FSA office early in your planning process to determine what level of environmental review is required for your program application so that it can be completed timely.

Obtaining Payments Due to Deceased Producers

In order to claim a Farm Service Agency (FSA) payment on behalf of a deceased producer, all program conditions for the payment must have been met before the applicable producer's date of death.

If a producer earned a FSA payment prior to his or her death, the following is the order of precedence for the representatives of the producer:

- administrator or executor of the estate
- the surviving spouse
- surviving sons and daughters, including adopted children
- surviving father and mother
- surviving brothers and sisters
- heirs of the deceased person who would be entitled to payment according to the State law

For FSA to release the payment, the legal representative of the deceased producer must file a form FSA-325 to claim the payment for themselves or an estate. The county office will verify that the application, contract, loan agreement, or other similar form requesting payment issuance, was signed by the applicable deadline by the deceased or a person legally authorized to act on their behalf at that time of application.

If the application, contract or loan agreement form was signed by someone other than the deceased participant, FSA will determine whether the person submitting the form has the legal authority to submit the form.

Payments will be issued to the respective representative's name using the deceased program participant's tax identification number. Payments made to representatives are subject to offset regulations for debts owed by the deceased.

FSA is not responsible for advising persons in obtaining legal advice on how to obtain program benefits that may be due to a participant who has died, disappeared or who has been declared incompetent.

Applying for Youth Loans

The Farm Service Agency (FSA) makes loans to youth to establish and operate agricultural income-producing projects in connection with 4-H clubs, FFA and other agricultural groups. Projects must be planned and operated with the help of the organization advisor, produce sufficient income to repay the loan and provide the youth with practical business and educational experience. The maximum loan amount is $5,000.

Youth Loan Eligibility Requirements:

- Be a citizen of the United States (which includes Puerto Rico, the Virgin Islands, Guam, American Samoa, the Commonwealth of the Northern Mariana Islands) or a legal resident alien
- Be 10 years to 20 years of age
- Comply with FSA's general eligibility requirements
- Conduct a modest income-producing project in a supervised program of work as outlined above
- Demonstrate capability of planning, managing and operating the project under guidance and assistance from a project advisor. The project supervisor must recommend the youth loan applicant, along with providing adequate supervision.

For help preparing the application forms, contact your local USDA Service Center or visit fsa.usda.gov.
