- Producers Urged to Consider NAP Risk Protection Coverage Before Crop Sales Deadlines
- Current FSA Loan Interest Rates
- USDA Opens 2022 Signup for Dairy Margin Coverage, Expands Program for Supplemental Production
- USDA Announces February 25, 2022, Application Deadline for Conservation Stewardship Program
- Disaster Assistance Available for Livestock Losses
- USDA Announces Conservation Reserve Program Signups for 2022
- USDA Provides $1.8 Billion to Offset Market Fluctuations

**Dates to Remember**

**February 4, 2022:** Deadline to sign up for [Organic and Transitional Education and Certification Program (OTECP)](https://www.otecp.org)

**February 18, 2022:** [Dairy Margin Coverage and Supplemental Dairy Margin Coverage](https://www.fsa.usda.gov) enrollment deadline.

**February 21, 2022:** USDA Service Centers closed in observance of Washington’s Birthday

**February 25, 2022:** [Spot Market Hog Pandemic Program (SMHPP)](https://www.fsa.usda.gov) Deadline to apply

**March 1, 2022:** [Livestock Indemnity Program](https://www.fsa.usda.gov) deadline to submit application for payment for 2021 losses

**March 11, 2022:** [General CRP](https://www.fsa.usda.gov) Sign Up Deadline

**March 15, 2022:** [ARC/PLC](https://www.fsa.usda.gov) Program Sign Up Deadline

**March 15, 2022:** [NAP](https://www.fsa.usda.gov) Deadline for all Spring Seeded Annual Crops
Disaster Set-Aside Program for Farm Loan Borrowers

Farm Service Agency (FSA) borrowers with farms located in designated primary or contiguous disaster areas who are unable to make their scheduled FSA loan payments should consider the Disaster Set-Aside (DSA) program.

DSA is available to producers who suffered losses as a result of a natural disaster and relieves immediate and temporary financial stress. FSA is authorized to consider setting aside the portion of a payment/s needed for the operation to continue on a viable scale.

Borrowers must have at least two years left on the term of their loan in order to qualify.

Borrowers have eight months from the date of the disaster designation to submit a complete application. The application must include a written request for DSA signed by all parties liable for the debt along with production records and financial history for the operating year in which the disaster occurred. FSA may request additional information from the borrower in order to determine eligibility.

All farm loans must be current or less than 90 days past due at the time the DSA application is complete. Borrowers may not set aside more than one installment on each loan.

The amount set-aside, including interest accrued on the principal portion of the set-aside, is due on or before the final due date of the loan.

For more information, contact your local USDA Service Center at or visit fsa.usda.gov.

Producers Urged to Consider NAP Risk Protection Coverage Before Crop Sales Deadlines

The USDA Farm Service Agency (FSA) encourages you to review available USDA crop risk protection options, including federal crop insurance and Noninsured Crop Disaster Assistance Program (NAP) coverage, before the crop deadline. The local sales closing date for crop insurance is March 15, 2022 for barley, cabbage, corn, cucumbers, dry beans, forage seeding, grain sorghum, green peas, hemp, mint, oats, popcorn, potatoes, processing beans, soybeans, sweet corn, and whole farm revenue protection. Wisconsin Sales Closing deadlines for NAP for all spring seeded crops is also March, 15, 2022.

If you received a payment under the Wildfires and Hurricanes Indemnity Program+ (WHIP+) or the Quality Loss Adjustment Program (QLA) for crop production and/or quality losses occurring in 2018, 2019, or 2020 crop years, you are required to meet linkage requirements by obtaining federal crop insurance or Non-Insured Crop Disaster Assistance Program (NAP) coverage at the 60/100 level, or higher, for both the 2022 and 2023 crop years.
When applying for WHIP+ or QLA, form FSA-895 (Crop Insurance and/or NAP Coverage Agreement) was submitted acknowledging the requirement to obtain federal crop insurance, if available, or NAP coverage if federal crop insurance is not available. The coverage requirement is applicable to the physical location county of the crop that received WHIP+ and/or QLA benefits.

You can determine if crops are eligible for federal crop insurance or NAP by visiting the RMA website.

NAP offers two levels of coverage. Basic coverage is available at 55 percent of the average market price for crop losses that exceed 50 percent of expected production. Higher levels of coverage may be purchased, from 50 to 65 percent of expected production in 5 percent increments, at 100 percent of the average market price. Organic and direct market producers may be eligible for additional price incentives with their NAP coverage.

For all coverage levels, the NAP service fee is the lesser of $325 per crop or $825 per producer per county, not to exceed a total of $1,950 for a producer with farming interests in multiple counties.

Beginning, underserved, veterans and limited resource farmers are now eligible for free catastrophic level coverage.

Federal crop insurance coverage is sold and delivered solely through private insurance agents. Agent lists are available at all USDA Service Centers or at USDA's online Agent Locator. You can use the USDA Cost Estimator to predict insurance premium costs.

For more information on NAP, service fees, sales deadlines, contact your local USDA Service Center or visit fsa.usda.gov.

Qualified veteran farmers or ranchers are eligible for a service fee waiver and premium reduction, if the NAP applicant meets certain eligibility criteria.

---

**Current FSA Loan Interest Rates**

*Current loan rates as of February 1, 2022.*

**Farm Loan Interest Rates:**

- Farm Operating - Direct: 2.250%
- Farm Operating - Microloan: 2.250%
- Farm Ownership - Direct: 2.875%
- Farm Ownership - Microloan: 2.875%
- Farm Ownership - Direct, Joint Financing: 2.500%
- Farm Ownership - Down Payment: 1.500%
- Emergency - Amount of Actual Loss: 3.250%

**Farm Storage Facility Loans (FSFL):**
USDA Opens 2022 Signup for Dairy Margin Coverage, Expands Program for Supplemental Production

As part of the Biden-Harris Administration’s ongoing efforts to support dairy farmers and rural communities, the U.S. Department of Agriculture (USDA) opened signup for the Dairy Margin Coverage (DMC) program and expanded the program to allow dairy producers to better protect their operations by enrolling supplemental production. This signup period — which runs from Dec. 13, 2021 to Feb. 18, 2022 — enables producers to get coverage through this important safety-net program for another year as well as get additional assistance through the new Supplemental DMC.

Supplemental DMC will provide $580 million to better help small- and mid-sized dairy operations that have increased production over the years but were not able to enroll the additional production. Now, they will be able to retroactively receive payments for that supplemental production. Additionally, USDA’s Farm Service Agency (FSA) updated how feed costs are calculated, which will make the program more reflective of actual dairy producer expenses.

**Supplemental DMC Enrollment**

Eligible dairy operations with less than 5 million pounds of established production history may enroll supplemental pounds based upon a formula using 2019 actual milk marketings, which will result in additional payments. Producers will be required to provide FSA with their 2019 Milk Marketing Statement.

Supplemental DMC coverage is applicable to calendar years 2021, 2022 and 2023. Participating dairy operations with supplemental production may receive retroactive supplemental payments for 2021 in addition to payments based on their established production history.

Supplemental DMC will require a revision to a producer’s 2021 DMC contract and must occur before enrollment in DMC for the 2022 program year. Producers will be able to revise 2021 DMC contracts and then apply for 2022 DMC by contacting their local USDA Service Center.

**DMC 2022 Enrollment**

Please visit the [Farm Loan Program](#) webpage for more information.
After making any revisions to 2021 DMC contracts for Supplemental DMC, producers can sign up for 2022 coverage. DMC provides eligible dairy producers with risk management coverage that pays producers when the difference between the price of milk and the cost of feed falls below a certain level. So far in 2021, DMC payments have triggered for January through October for more than $1.0 billion.

For DMC enrollment, producers must certify with FSA that the operation is commercially marketing milk, sign all required forms and pay the $100 administrative fee. The fee is waived for farmers who are considered limited resource, beginning, socially disadvantaged, or a military veteran. To determine the appropriate level of DMC coverage for a specific dairy operation, producers can use the online dairy decision tool.

**Updates to Feed Costs**

USDA is also changing the DMC feed cost formula to better reflect the actual cost dairy farmers pay for high-quality alfalfa hay. FSA will calculate payments using 100% premium alfalfa hay rather than 50%. The amended feed cost formula will make DMC payments more reflective of actual dairy producer expenses.

---

**USDA Announces February 25, 2022, Application Deadline for Conservation Stewardship Program**

The U.S. Department of Agriculture’s Natural Resources Conservation Service (NRCS) in Wisconsin is now accepting applications for the Conservation Stewardship Program (CSP) through February 25, 2022, to be considered for funding in 2022. Through CSP, NRCS helps farmers, ranchers and forest landowners earn payments for expanding conservation activities while maintaining agricultural production on their land. CSP also encourages adoption of new technologies and management techniques.

Changes in the 2018 Farm Bill authorize NRCS to accept new CSP enrollments from 2020–2023 and makes additional improvements to the program. Some highlights include the following.

- NRCS now enrolls eligible, high-ranking applications based on dollars rather than acres.
- Higher payment rates are now available under the 2018 Farm Bill for certain conservation activities, including cover crops and resource conserving crop rotations.
- NRCS now provides specific support for organic and for transitioning to organic production activities through CSP.

While applications are accepted throughout the year, interested producers should submit applications to their local NRCS office by February 25, 2022, to ensure their applications are considered for 2022 funding.
About the Program

CSP is offered in Wisconsin through continuous signups. The program provides many benefits including increased crop yields, decreased inputs, wildlife habitat improvements and increased resilience to weather extremes. CSP is for working lands including cropland, pastureland, rangeland, nonindustrial private forestland and agricultural land under the jurisdiction of a tribe.

For additional information about CSP, contact your local service center. USDA Service Centers are open for business by phone appointment only and field work will continue with appropriate social distancing. While program delivery staff will continue to come into the office, they will be working with producers by phone, and using online tools whenever possible.

Online services are available to customers with an eAuthentication (eAuth) account, which provides access to the farmers.gov portal where producers can view USDA farm loan information and payments and view and track certain USDA program applications and payments. An eAuth account is a way for you to interact with USDA websites online. It gives you the ability to identify yourself to the USDA via your User ID and password. It permits you to access a wide range of USDA applications across the many USDA agencies and their services. Customers who do not already have an eAuth account can enroll at farmers.gov/sign-in.

All Service Center visitors wishing to conduct business with NRCS, Farm Service Agency, or any other Service Center agency are required to call their Service Center to schedule a phone appointment. More information can be found at farmers.gov/coronavirus.

Disaster Assistance Available for Livestock Losses

The Livestock Indemnity Program (LIP) provides assistance to you for livestock deaths in excess of normal mortality caused by adverse weather, disease and attacks by animals reintroduced into the wild by the federal government or protected by federal law.

For disease losses, FSA county committees can accept veterinarian certifications that livestock deaths were directly related to adverse weather and unpreventable through good animal husbandry and management.

For 2021 livestock losses, you must file a notice within 30 calendar days of when the loss is first apparent. You then must provide the following supporting documentation to your local FSA office no later than 60 calendar days after the end of the calendar year in which the eligible loss condition occurred.

- Proof of death documentation
- Copy of grower’s contracts
USDA has established normal mortality rates for each type and weight range of eligible livestock, i.e. Adult Beef Cow = 1.5% and Non-Adult Beef Cattle (less than 250 pounds) = 5%. These established percentages reflect losses that are considered expected or typical under “normal” conditions.

In addition to filing a notice of loss, you must also submit an application for payment by March 1, 2022.

USDA Announces Conservation Reserve Program Signups for 2022

Agricultural producers and landowners can sign up soon for the Conservation Reserve Program (CRP), a cornerstone conservation program offered by the U.S. Department of Agriculture (USDA) and a key tool in the Biden-Harris Administration effort to address climate change and achieve other natural resource benefits. The General CRP signup will run from Jan. 31 to March 11, and the Grassland CRP signup will run from April 4 to May 13.

Producers and landowners enrolled 4.6 million acres into CRP signups in 2021, including 2.5 million acres in the largest Grassland CRP signup in history. There are currently 22.1 million acres enrolled, and FSA is aiming to reach the 25.5-million-acre cap statutorily set for fiscal year 2022.

CRP Signups

General CRP helps producers and landowners establish long-term, resource-conserving plant species, such as approved grasses or trees, to control soil erosion, improve water quality and enhance wildlife habitat on cropland.

Meanwhile, Grassland CRP is a working lands program, helping landowners and operators protect grassland, including rangeland and pastureland and certain other lands, while maintaining the areas as working grazing lands. Protecting grasslands contributes positively to the economy of many regions, provides biodiversity of plant and animal populations and provides important carbon sequestration benefits to deliver lasting climate outcomes.

Alongside these programs, producers and landowners can enroll acres in Continuous CRP under the ongoing sign up, which includes projects available through the Conservation Reserve Enhancement Program (CREP) and State Acres for Wildlife Enhancement (SAFE).

Climate Benefits

Last year, FSA enacted a Climate-Smart Practice Incentive for CRP General and Continuous signups, to better target CRP on addressing climate change. This incentive aims to increase carbon sequestration and reduce greenhouse gas emissions. CRP’s climate-smart practices include establishment of trees and permanent
grasses, development of wildlife habitat and wetland restoration. The Climate-Smart Practice Incentive is annual, and the amount is based on the benefits of each practice type.

Additionally, in order to better target the program toward climate outcomes, USDA invested $10 million last year in the CRP Monitoring, Assessment and Evaluation (MAE) program to measure and monitor the soil carbon and climate resilience impacts of conservation practices over the life of new CRP contracts. This will enable the agency to further refine the program and practices to provide producers tools for increased climate resilience.

**USDA Provides $1.8 Billion to Offset Market Fluctuations**

The U.S. Department of Agriculture (USDA) has issued $1.8 billion in payments to agricultural producers who enrolled in the Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) programs for the 2020 crop year. These payments provide critical support to help mitigate fluctuations in either revenue or prices for certain crops. These two USDA safety-net programs help producers of certain crops build back better after facing the impacts of COVID-19 and other challenges.

In addition, USDA’s Farm Service Agency (FSA) is encouraging producers to contact their local USDA Service Centers to make or change elections and to enroll for 2022 ARC or PLC, providing future protections against market fluctuations. The election and enrollment period opened on Oct. 18, 2021 and runs through March 15, 2022.

**2020 Payments and Contracts**

ARC and PLC payments for a given crop year are paid out the following fall to allow actual county yields and the Market Year Average prices to be finalized. FSA processed payments to producers enrolled in 2020 ARC-County (ARC-CO), ARC-Individual (ARC-IC) and PLC for covered commodities that triggered for the crop year.

For ARC-CO, view the [2020 ARC-CO Benchmark Yields and Revenues online database](#) for payment rates applicable to their county and each covered commodity.

For PLC, payments have triggered for barley, canola, chickpeas (large and small), dry peas, flaxseed, lentils, peanuts, seed cotton and wheat. More information on rice payments will be announced later this fall and in early 2022.

For ARC-IC, producers should contact their local FSA office for additional information pertaining to 2020 payment information, which relies on producer-specific yields for the crop and farm to determine benchmark yields and actual year yields when calculating revenues.

**By the Numbers**
More than 1.7 million contracts were signed in 2019. In 2020, producers signed nearly 1.8 million ARC or PLC contracts, and 251 million out of 273 million base acres were enrolled in the programs. In 2021, signed contracts surpassed 1.8 million.

Since the ARC and PLC were authorized by the 2014 Farm Bill and reauthorized by the 2018 Farm Bill, these safety-net programs have paid out more than $32.5 billion to producers of covered commodities.

2022 Elections and Enrollment

Producers can elect coverage and enroll in ARC-CO or PLC, which are both crop-by-crop, or ARC-IC, which is for the entire farm. Although election changes for 2022 are optional, producers must enroll through a signed contract each year. Also, if a producer has a multi-year contract on the farm and makes an election change for 2022, it will be necessary to sign a new contract.

If an election is not submitted by the deadline of March 15, 2022, the election remains the same as the 2021 election for crops on the farm. Farm owners cannot enroll in either program unless they have a share interest in the farm.

Covered commodities include barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium and short grain rice, safflower seed, seed cotton, sesame, soybeans, sunflower seed, and wheat.

Web-Based Decision Tools

In partnership with USDA, the University of Illinois and Texas A&M University offer web-based decision tools to assist producers in making informed, educated decisions using crop data specific to their respective farming operations. Tools include:

- [Gardner-farmdoc Payment Calculator](#), a tool available through the University of Illinois allows producers to estimate payments for farms and counties for ARC-CO and PLC.
- [ARC and PLC Decision Tool](#), a tool available through Texas A&M tallows producers to estimate payments and yield updates and expected payments for 2022.

Crop Insurance Considerations

ARC and PLC are part of a broader safety net provided by USDA, which also includes crop insurance and marketing assistance loans.

Producers are reminded that ARC and PLC elections and enrollments can impact eligibility for some crop insurance products.

Producers on farms with a PLC election have the option of purchasing Supplemental Coverage Option (SCO) through their Approved Insurance Provider; however, producers on farms where ARC is the election are ineligible for SCO on their planted acres for that crop on that farm.
Unlike SCO, the Enhanced Coverage Option (ECO) is unaffected by an ARC election. Producers may add ECO regardless of the farm program election.

Upland cotton farmers who choose to enroll seed cotton base acres in ARC or PLC are ineligible for the stacked income protection plan (STAX) on their planted cotton acres for that farm.

**More Information**

For more information on ARC and PLC, visit the [ARC and PLC webpage](#) or contact your local [USDA Service Center](#).
