## USDA Adds More Eligible Commodities for Farm Storage Facility Loans

*New Provisions Increase On-Farm Storage for Dairy, Flowers, Meats*

FSA's Farm Storage Facility Loan (FSFL) program, which provides low-interest financing to producers to build or upgrade storage facilities, will now include dairy, flowers and meats as eligible commodities.

For 15 years, the FSFL program has provided affordable financing, allowing American farmers and ranchers to construct or expand storage on the farm and by adding eligible commodities; these low-interest loans will help even more family farmers and ranchers to expand on-site storage.

The new commodities eligible for facility loans include floriculture, hops, rye, milk, cheese, butter, yogurt, meat and poultry (unprocessed), eggs, and aquaculture (excluding systems that maintain live animals through uptake and discharge of water). Commodities already eligible for the loans include corn, grain sorghum, rice, soybeans, oats, peanuts, wheat, barley, minor oilseeds harvested as whole grain, pulse crops (lentils, chickpeas and dry peas), hay, honey, renewable biomass, and fruits, nuts and vegetables for cold storage facilities.

Producers do not need to demonstrate the lack of commercial credit availability to apply. The loans are designed to assist a diverse range of farming operations, including small and mid-sized businesses, new farmers, operations supplying local food and farmers markets, non-traditional farm products, and underserved producers.

To learn more about the FSA Farm Storage Facility Loan, visit [www.fsa.usda.gov/pricesupport](http://www.fsa.usda.gov/pricesupport) or contact your local FSA county office. To find your local

## USDA Announces Conservation Incentives for Working Grass, Range and Pasture Lands

Beginning Sept. 1, farmers and ranchers can apply for financial assistance to help conserve working grasslands, rangeland and pastureland while maintaining the areas as livestock grazing lands.

The initiative is part of the voluntary Conservation Reserve Program (CRP), a federally funded program that for 30 years has assisted agricultural producers with the cost of restoring, enhancing and protecting certain grasses, shrubs and trees to improve water quality, prevent soil erosion and reduce loss of wildlife habitat. In return, the U.S. Department of Agriculture (USDA) provides participants with rental payments and cost-share assistance. CRP has helped farmers and ranchers prevent more than 8 billion tons of soil from eroding, reduce nitrogen and phosphorous runoff relative to cropland by 95 and 85 percent respectively, and even sequester 43 million tons of greenhouse gases annually, equal to taking 8 million cars off the road.

The CRP-Grasslands initiative will provide participants who establish long-term, resource-conserving covers with annual rental payments up to 75 percent of the grazing value of the land. Cost-share assistance also is available for up to 50 percent of the covers and other practices, such as cross fencing to support rotational grazing or improving pasture cover to benefit pollinators or other wildlife. Participants may still conduct common grazing practices, produce hay, mow, or harvest for seed production, conduct fire rehabilitation, and construct firebreaks and fences.

With the publication of the CRP regulation today, the Farm Service Agency will accept applications on an ongoing basis beginning Sept. 1, 2015, with those applications scored against published ranking criteria, and approved based on the competitiveness of the offer. The ranking period will occur at least once per year and be announced at least 30 days prior to its start. The end of the first ranking period will be Nov. 20, 2015.

To learn more about participating in CRP-Grasslands or SAFE, visit [www.fsa.usda.gov/crp](http://www.fsa.usda.gov/crp) or consult with the local Farm Service Agency county office. To locate a nearby Farm Service Agency office, visit <http://offices.usda.gov>. To learn more about the 30th anniversary of CRP, visit [www.fsa.usda.gov/CRPis30](http://www.fsa.usda.gov/CRPis30) or follow on Twitter using #CRPis30.

## Reporting Organic Crops

Producers who want to use the Noninsured Crop Disaster Assistance Program (NAP) organic price and selected the "organic" option on their NAP application must report their crops as organic.

When certifying organic acres, the buffer zone acreage must be included in the organic acreage.

Producers must also provide a current organic plan, organic certificate or documentation from a certifying agent indicating an organic plan is in effect. Documentation must include:

- name of certified individuals
- address
- telephone number
- effective date of certification
- certificate number
- list of commodities certified
- name and address of certifying agent
- a map showing the specific location of each field of certified organic, including the buffer zone acreage

Certification exemptions are available for producers whose annual gross agricultural income from organic sales totals \$5,000 or less. Although exempt growers are not required to provide a written certificate, they are still required to provide a map showing the specific location of each field of certified organic, transitional and buffer zone acreage.

Certification exemptions are available for producers whose annual gross agricultural income from organic sales totals

\$5,000 or less. Although exempt growers are not required to provide a written certificate, they are still required to provide a map showing the specific location of each field of certified organic, transitional and buffer zone acreage.

For questions about reporting organic crops, contact your local FSA office. To find your local office, visit <http://offices.usda.gov>.

---

## NAP Deadline Approaching for 2016 Crops

Producers are reminded to apply for 2016 Noninsured Crop Disaster Assistance Program (NAP) benefits by September 1, 2015. The September 1, 2015 deadline includes value loss crops (Aquaculture, Christmas Trees, Ginseng, Turfgrass Sod, Nursery, Mushrooms, Floriculture and Propagation Stock Nonornamental Nursery), small grain coverage and other crops. The deadline for crops planted in the spring is December 1/March 15.

Eligible producers can apply for 2016 NAP coverage at their local FSA Office using form CCC-471, Application for Coverage. The service fee for basic NAP coverage is the lesser of \$250 per crop or \$750 per producer per administrative county, not to exceed a total of \$1,875 for a producer with farming interest in multiple counties. Producers interested in buy-up coverage must pay a premium, in addition to the service fee. The maximum premium will be \$6,563.

Producer meeting the definition of a socially disadvantaged farmer or rancher, beginning farmer or rancher or limited resource farmer or rancher will have service fees waived. Producers meeting this definition that choose to purchase buy-up coverage will also have service fees waived and the premium will be capped at \$3,282.

The application and service fee must be filed by September 1, 2015 for value loss crops, small grains, and other crops.

---

## Enrollment for 2016 Dairy Margin Protection Program Began July 1

FSA announced that starting July 1, 2015, dairy farmers can enroll in [Margin Protection Program for coverage in 2016](#). The voluntary program, established by the 2014 Farm Bill, provides financial assistance to participating dairy operations when the margin – the difference between the price of milk and feed costs – falls below the coverage level selected by the farmer.

The Margin Protection Program gives participating dairy producers the flexibility to select coverage levels best suited for their operation. Enrollment begins July 1 and ends on Sept. 30, 2015, for coverage in 2016. Participating farmers will remain in the program through 2018 and pay a \$100 administrative fee each year. Producers also have the option of selecting a different coverage level during open enrollment each year. Margin Protection Program payments are based on an operation's historical production. An operation's historical production will increase by 2.61 percent in 2016 if the operation participated in 2015, providing a stronger safety net.

USDA also has an online resource available to help dairy producers decide which level of coverage will provide them with the strongest safety net under a variety of conditions. The enhanced Web tool, available at [www.fsa.usda.gov/mpptool](http://www.fsa.usda.gov/mpptool), allows dairy farmers to quickly and easily combine their unique operation data and other key variables to calculate their coverage needs based on price projections. Producers can also review historical data or estimate future coverage based on data projections. The secure site can be accessed via computer, mobile phone, or tablet, 24 hours a day, seven days a week.

Dairy operations enrolling in the program must meet conservation compliance provisions. Producers participating in the Livestock Gross Margin insurance program may register for the Margin Protection Program, but this new margin program will only begin once their livestock dairy insurance coverage has ended. Producers must also submit form CCC-782 for 2016, confirming their Margin Protection Program coverage level selection, to the local Farm Service Agency (FSA) office. If electing higher coverage for 2016, dairy producers can either pay the premium in full at the time of enrollment or pay a minimum of 25 percent of the premium by Feb. 1, 2016.

For more information, visit FSA online at [www.fsa.usda.gov/dairy](http://www.fsa.usda.gov/dairy) for more information, or stop by a local FSA office to learn more about the Margin Protection Program. To find a local FSA office in your area, visit <http://offices.usda.gov>.

# USDA Offers Flood Impacted WY Farmers and Ranchers Immediate Disaster Assistance

*Farm Service Agency Stands Ready to Assist Agricultural Producers Slammed by Recent Heavy Rains*

WY Farm Service Agency (FSA) reminds farmers and ranchers across the state of federal farm program benefits that may be available to help eligible producers recover from recent heavy rains and flooding.

FSA offers disaster assistance and low-interest loan programs to assist agricultural producers in their recovery efforts following floods or similar qualifying natural disasters. Available programs and loans include:

- **Non-Insured Crop Disaster Assistance Program (NAP)** - provides financial assistance to producers of non-insurable crops when low yields, loss of inventory, or prevented planting occur due to natural disasters (includes native grass for grazing). Eligible producers must have purchased NAP coverage for 2015 crops.
- **Livestock Indemnity Program (LIP)** - offers payments to eligible producers for livestock death losses in excess of normal mortality due to adverse weather. Eligible losses may include those determined by FSA to have been caused by hurricanes, floods, blizzards, wildfires, tropical storms, tornados lightening, extreme heat, and extreme cold. Producers will be required to provide verifiable documentation of death losses resulting from an eligible adverse weather event and must submit a notice of loss to their local FSA office within 30 calendar days of when the loss of livestock is apparent.
- **Tree Assistance Program (TAP)** – provides assistance to eligible orchardists and nursery tree growers for qualifying tree, shrub and vine losses due to natural disaster.
- **Emergency Assistance for Livestock, Honeybees, and Farm-Raised Fish Program (ELAP)** - provides emergency relief for losses due to feed or water shortages, disease, adverse weather, or other conditions, which are not adequately addressed by other disaster programs. ELAP covers physically damaged or destroyed livestock feed that was purchased or mechanically harvested forage or feedstuffs intended for use as feed for the **producer's** eligible livestock. In order to be considered eligible, harvested forage must be baled; forage that is only cut, raked or windrowed is not eligible. Producers must submit a notice of loss to their local FSA office within 30 calendar days of when the loss is apparent.

ELAP also covers up to 150 lost grazing days in instances when a producer has been forced to remove livestock from a grazing pasture due to floodwaters.

For beekeepers, ELAP covers beehive losses (the physical structure) in instances where the hive has been destroyed by a natural disaster including flooding, high winds and tornadoes.

- **Emergency Loan Program** – Available to producers with agriculture operations located in a county under a primary or contiguous **Secretarial Disaster designation**. These low interest loans help producers recover from production and physical losses due to drought, flooding.
- **Emergency Conservation Program (ECP)** - provides emergency funding for farmers and ranchers to rehabilitate land severely damaged by natural disasters; includes fence loss.
- **HayNet** - is an Internet-based Hay and Grazing Net Ad Service allowing farmers and ranchers to share 'Need Hay' ads and 'Have Hay' ads online. Farmers also can use another feature to post advertisements for grazing land, specifically ads announcing the availability of grazing land or ads requesting a need for land to graze. [www.fsa.usda.gov/haynet](http://www.fsa.usda.gov/haynet).

To establish or retain FSA program eligibility, farmers and ranchers must report prevented planting and failed acres (crops and grasses). Prevented planting acreage must be reported on form FSA-576, Notice of Loss, no later than 15 calendar days after the final planting date as established by FSA and Risk Management Agency (RMA).

For more information on disaster assistance programs and loans visit [www.fsa.usda.gov/](http://www.fsa.usda.gov/) or contact your local FSA Office. To find your local FSA county office, visit <http://offices.usda.gov>.

---

## 2015 ACREAGE REPORTING DATES

In order to comply with FSA program eligibility requirements, all producers are encouraged to visit their local FSA office to file an accurate crop certification report by the applicable deadline.

Acreage reporting dates vary by crop and by county so please contact your local FSA office for a list of county-specific deadlines.

The following exceptions apply to acreage reporting dates:

- If the crop has not been planted by the applicable acreage reporting date, then the acreage must be reported no later than 15 calendar days after planting is completed.
- If a producer acquires additional acreage after the applicable acreage reporting date, then the acreage must be reported no later than 30 calendar days after purchase or acquiring the lease. Appropriate documentation must be provided to the county office.
- If a perennial forage crop is reported with the intended use of “cover only,” “green manure,” “left standing,” or “seed,” then the acreage must be reported by July 15th.

Noninsured Crop Disaster Assistance Program (NAP) policy holders should note that the acreage reporting date for NAP covered crops is the earlier of the applicable dates or 15 calendar days before grazing or harvesting of the crop begins.

For questions regarding crop certification and crop loss reports, please contact your local FSA office.

---

## Filing a Notice of Loss

The CCC-576, Notice of Loss, is used to report failed acreage and prevented planting and may be completed by any producer with an interest in the crop. Timely filing a Notice of Loss is required for all crops including grasses. For losses on crops covered by the Non-Insured Crop Disaster Assistance Program (NAP), you must file a CCC-576, Notice of Loss, in the FSA County Office within 15 days of the occurrence of the disaster or when losses become apparent.

Producers of hand-harvested crops must notify FSA of damage or loss through the administrative County Office within 72 hours of the date of damage or loss first becomes apparent. This notification can be provided by filing a CCC-576, email, fax or phone. Producers who notify the County Office by any method other than by filing the CCC-576 are still required to file a CCC-576, Notice of Loss, within the required 15 calendar days.

If filing for prevented planting, an acreage report and CCC-576 must be filed within 15 calendar days of the final planting date for the crop.

---

## ARC, PLC and CTAP Acreage Maintenance

Producers enrolled in Agriculture Risk Coverage (ARC), Price Loss Coverage (PLC) or the Cotton Transition Assistance Program (CTAP) must protect all cropland and noncropland acres on the farm from wind and water erosion and noxious weeds. Producers who sign ARC county or individual contracts and PLC contracts agree to effectively control noxious weeds on the farm according to sound agricultural practices. If a producer fails to take necessary actions to correct a maintenance problem on a farm that is enrolled in ARC, PLC or CTAP, the County Committee may elect to terminate the contract for the program year.

---

## USDA Packages Disaster Protection with Loans to Benefit Specialty

## Crop and Diversified Producers

*Free basic coverage and discounted premiums available for new and underserved loan applicants*

U.S. Department of Agriculture (USDA) Farm Service Agency (FSA) today announced that producers who apply for FSA farm loans also will be offered the opportunity to enroll in new disaster loss protections created by the 2014 Farm Bill. The new coverage, available from the Noninsured Crop Disaster Assistance Program (NAP), is available to FSA loan applicants who grow non-insurable crops, so this is especially important to fruit and vegetable producers and other specialty crop growers.

New, underserved and limited income specialty growers who apply for farm loans could qualify for basic loss coverage at no cost, or higher coverage for a discounted premium.

The basic disaster coverage protects at 55 percent of the market price for crop losses that exceed 50 percent of production. Covered crops include “specialty” crops, for instance, vegetables, fruits, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, hay, forage, grazing and energy crops. FSA allows beginning, underserved or limited income producers to obtain NAP coverage up to 90 days after the normal application closing date when they also apply for FSA credit.

In addition to free basic coverage, beginning, underserved or limited income producers are eligible for a 50 percent discount on premiums for the higher levels of coverage that protect up to 65 percent of expected production at 100 percent of the average market price. Producers also may work with FSA to protect value-added production, such as organic or direct market crops, at their fair market value in those markets. Targeted underserved groups eligible for free or discounted coverage are American Indians or Alaskan Natives, Asians, Blacks or African Americans, Native Hawaiians or other Pacific Islanders, Hispanics, and women.

FSA offers a variety of loan products, including farm ownership loans, operating loans and microloans that have a streamlined application process.

Growers need not apply for an FSA loan, nor be a beginning, limited resource, or underserved farmer, to be eligible for Noninsured Crop Disaster Assistance Program assistance. To learn more, visit [www.fsa.usda.gov/nap](http://www.fsa.usda.gov/nap) or [www.fsa.usda.gov/farmloans](http://www.fsa.usda.gov/farmloans), or contact your local FSA office at <https://offices.usda.gov>.
