Mercedes Jauregui Guadron

**Program Technicians:**  
Julianna Eckley  
Carol Zogata

**County Committee:**  
Jim Hellyer - Chairman  
Stan Horton - Vice- Chairman  
Will O'Neal - Member

### Monthly Message from Your Local County Office

Fremont County has recently experienced changes in our local staffing. On January 6, 2020 CED, Annie Bryce accepted a new position with the Agency in the FSA State Office located in Casper. After 15 years of providing support to the farmers and ranchers of Fremont County, Annie is now the Farm Program Specialist for the entire state of Wyoming. As a result, the Riverton office will seek your patience and understanding as we transition her former responsibilities to other employees.

For the immediate future, Brian Harrell, Farm Loan Manager for the southwestern third of the state will also be the Acting CED for Fremont County. Due to the geographic area of responsibility and limited staffing we will highly recommend that you schedule appointments with this office when possible. And, thank you, and congratulations to Annie on her new assignment with FSA.

**Next County Committee  
Meeting: TBA**

## **USDA Safety Net Program Enrollment for 2019 and 2020**

Agricultural producers now can enroll in the Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) programs – two U.S. Department of Agriculture (USDA) safety net programs – for the 2019 and 2020 crop year.

ARC provides income support payments on historical base acres when actual crop revenue declines below a specified guaranteed level. PLC provides income support payments on historical base acres when the effective price for a covered commodity falls below its reference price. The 2018 Farm Bill reauthorized and updated both programs.

Signup for the 2019 crop year closes March 15, 2020, while signup for the 2020 crop year closes June 30, 2020. Producers who have not yet enrolled for 2019 can enroll for both 2019 and 2020 during the same visit to an FSA county office.

ARC and PLC have options for the farm operator who is actively farming the land as well as the owner of the land. Farm owners also have a one-time opportunity to update PLC payment yields beginning with crop year 2020. If the farm owner and producer visit the FSA county office together, FSA can also update yield information during that visit.

Covered commodities include barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium and short grain rice, safflower seed, seed cotton, sesame, soybeans, sunflower seed and wheat.

### **2018 Crop Year ARC and PLC Payments**

FSA began processing payments last week for 2018 ARC-County (ARC-CO) and PLC on covered commodities that met payment triggers on enrolled farms in the 2018 crop year. In addition to the \$1.5 billion now in process, FSA anticipates it will issue another \$1 billion in November once USDA's National Agricultural Statistics Service publishes additional commodity prices for the 2018 crop.

Producers who had 2018 covered commodities enrolled in ARC-CO can visit [www.fsa.usda.gov/arc-plc](http://www.fsa.usda.gov/arc-plc) for payment rates applicable to their county and each covered commodity. For farms and covered commodities enrolled in 2018 PLC, the following crops met payment triggers: barley, canola, corn, dry peas, grain sorghum, lentils, peanuts, large chickpeas, sunflower seed, flaxseed, rapeseed, seed cotton, long grain rice, medium/short grain rice and wheat.

Oats, small chickpeas, mustard seed, safflower, crambe, sesame seed and soybeans did not meet 2018 PLC payment triggers.

2018 PLC payment rates for the following covered commodities have not been determined: temperate Japonica rice.

### **More Information**

For more information on ARC and PLC including two online decision tools that assist producers in making enrollment and election decisions specific to their operations, visit the [ARC and PLC webpage](#).

## Livestock Losses

The Livestock Indemnity Program (LIP) provides assistance to eligible producers for livestock deaths in excess of normal mortality caused by adverse weather, disease and attacks by animals reintroduced into the wild by the federal government or protected by federal law.

LIP compensates livestock owners and contract growers for livestock death losses in excess of normal mortality due to adverse weather, including losses due to hurricanes, floods, blizzards, wildfires, extreme heat or extreme cold.

For disease losses, FSA county committees can accept veterinarian certifications that livestock deaths were directly related to adverse weather and unpreventable through good animal husbandry and management.

For 2020 livestock losses, eligible livestock owners must file a notice within 30 calendar days of when the loss is first apparent.

Participants must provide the following supporting documentation to their local FSA office no later than 60 calendar days after the end of the calendar year in which the eligible loss condition occurred.

- Proof of death documentation
- Copy of grower's contracts
- Proof of normal mortality documentation

USDA has established normal mortality rates for each type and weight range of eligible livestock, i.e. Adult Beef Cow = 2% and Non-Adult Beef Cattle (less than 400 pounds) = 4.3%. These established percentages reflect losses that are considered expected or typical under "normal" conditions.

In addition to filing a notice of loss, producers must also submit an application for payment by March 1, 2020.

Additional Information about LIP is available at your local FSA office or online at: [www.fsa.usda.gov](http://www.fsa.usda.gov).

## Submit Loan Requests for Financing Early

The Farm Loan team in Fremont County is already working on operating loans for spring 2020 so it is important that potential borrowers submit their requests early so they can be timely processed. The farm loan team can help determine which loan programs are best for applicants.

FSA offers a wide range of low-interest loans that can meet the financial needs of any farm operation for just about any purpose. The traditional **farm operating and farm ownership loans** can help large and small farm operations take advantage of early purchasing discounts for spring inputs as well expenses throughout the year.

**Microloans** are a simplified loan program that will provide up to \$50,000 for both Farm Ownership and Operating Microloans to eligible applicants. These loans, targeted for smaller operations and non-traditional operations, can be used for operating expenses, starting a new agricultural enterprise, purchasing equipment, and other needs associated with a farming operation. The staff at the Fremont County FSA office can provide more details on farm operating and microloans and provide loan applications. Loans to beginning farmers and members of underserved groups are a priority.

Other types of loans available include:

**Marketing Assistance Loans** allow producers to use eligible commodities as loan collateral and obtain a 9-month loan while the crop is in storage. These loans provide cash flow to the producer and allow them to market the crop when prices may be more advantageous.

**Farm Storage Facility Loans** can be used to build permanent structures used to store eligible commodities, or for storage and handling trucks, or portable or permanent handling equipment. A variety of structures are eligible under this loan, including bunker silos, grain bins, hay storage structures and refrigerated structures for vegetables and fruit. A producer may borrow up to \$500,000 per loan.

Please call the Fremont County office if you have questions about any of the loans available through FSA.
