February 2020

FSA Encourages Producers to Enroll Soon in Agriculture Risk Coverage and Price Loss Coverage Programs

USDA Reminds Producers of Feb. 28 Deadline for Conservation Reserve Program General Signup

Higher Limits Now Available on USDA Farm Loans

Goshen County FSA Updates

Message From County Executive Director

Be aware of the following deadlines coming up:

- February 28, 2020 is the final date to complete an offer for General CRP enrollment
- March 15, 2020 is the final date to enroll in the 2019 ARCPLC
- April 1, 2020 is the deadline to enroll most crops into the 2020 Non-insured Disaster Assistance Program (NAP); Deadline for Hemp coverage is March 15, 2020

FSA is cleaning up our producer record database. If you have any unreported changes of address, zip code, phone number, email address or an incorrect name or business name on file they need to be reported to our office. Changes in your farm operation, like the addition of a farm by lease or purchase, need to be reported to our office as well. Producers participating in FSA and NRCS programs are required to timely report changes in their farming operation to the County Committee in writing and update their CCC-902 Farm Operating Plan. If you have any updates or corrections, please call your local FSA office to update your records.

On a personal note, I am retiring from FSA at the end of this month. I wish you all the very best in the future.

FSA Encourages Producers to Enroll Soon in Agriculture Risk Coverage and Price Loss Coverage Programs
USDA’s Farm Service Agency (FSA) encourages agricultural producers to enroll now in the Agriculture Risk Loss (ARC) and Price Loss Coverage (PLC) programs. March 15, 2020 is the enrollment deadline for the 2019 crop year.

Although more than 200,000 producers have enrolled to date, FSA anticipates 1.5 million producers will enroll for ARC and PLC. By enrolling soon, producers can beat the rush as the deadline nears.

FSA offices have multiple programs competing for the time and attention of our staff. Because of the importance and complexities of the ARC and PLC programs; and to ensure FSA meets your program delivery expectations, please do not wait to start the enrollment process. Call your FSA county office and make an appointment soon to ensure your elections are made and contracts signed well ahead of the deadlines.

ARC and PLC provide financial protections to farmers from substantial drops in crop prices or revenues and are vital economic safety nets for most American farms.

The programs cover the following commodities: barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium and short grain rice, safflower seed, seed cotton, sesame, soybeans, sunflower seed and wheat.

Until March 15, producers who have not yet enrolled in ARC or PLC for 2019 can enroll for both 2019 and 2020 during the same visit to an FSA county office unless yield updates are requested. Additionally, farm owners have a one-time opportunity to update PLC payment yields that take effect beginning with crop year 2020. If the owner accompanies the producer to the office, the yield update and enrollments may be completed during the same office visit.

More Information

For more information on ARC and PLC, download our program fact sheet or our 2014-2018 farm bills comparison fact sheet. Online ARC and PLC election decision tools are available at fsa.usda.gov/arc/plc. To enroll, contact your FSA county office for an appointment.
Farmers and private landowners who are either enrolling for the first time or re-enrolling for another 10- to 15-year term.

Farmers and ranchers who enroll in CRP receive yearly rental payments for voluntarily establishing long-term, resource-conserving plant species, such as approved grasses or trees (known as “covers”), which can control soil erosion, improve water quality and develop wildlife habitat on marginally productive agricultural lands.

CRP has 22 million acres enrolled, but the 2018 Farm Bill lifted the cap to 27 million acres.

Signed into law in 1985, CRP is one of the largest private-lands conservation programs in the U.S. It was originally intended to primarily control soil erosion and potentially stabilize commodity prices by taking marginal lands out of production. The program has evolved over the years, providing many conservation and economic benefits. Marking its 35th anniversary in 2020, CRP has had many successes, including:

- Preventing more than 9 billion tons of soil from eroding, enough soil to fill 600 million dump trucks;
- Reducing nitrogen and phosphorous runoff relative to annually tilled cropland by 95 and 85 percent respectively;
- Sequestering an annual average of 49 million tons of greenhouse gases, equal to taking 9 million cars off the road;
- Creating more than 3 million acres of restored wetlands while protecting more than 175,000 stream miles with riparian forest and grass buffers, enough to go around the world 7 times; and
- Benefiting bees and other pollinators and increased populations of ducks, pheasants, turkey, bobwhite quail, prairie chickens, grasshopper sparrows and many other birds.

The CRP continuous signup is ongoing, which enables producers to enroll for certain practices. FSA plans to open the Soil Health and Income Protection Program, a CRP pilot program, in early 2020, and the 2020 CRP Grasslands signup runs from March 16, 2020 to May 15, 2020.

To enroll in CRP, contact your local FSA county office or visit fsa.usda.gov/crp. To locate your local FSA office, visit farmers.gov/service-locator.

---

**Higher Limits Now Available on USDA Farm Loans**

Higher limits are now available for borrowers interested in USDA’s farm loans, which help agricultural producers purchase farms or cover operating expenses. The 2018 Farm Bill increased the amount that producers can borrow through direct and guaranteed loans available through USDA’s Farm Service Agency (FSA) and made changes to other loans, such as microloans and emergency loans.

Key changes include:

- The Direct Operating Loan limit increased from $300,000 to $400,000, and the Guaranteed Operating Loan limit increased from $1.429 million to $1.75 million. Operating loans help producers pay for normal operating expenses, including machinery and equipment, seed, livestock feed, and more.
- The Direct Farm Ownership Loan limit increased from $300,000 to $600,000, and the Guaranteed Farm Ownership Loan limit increased from $1.429 million to $1.75 million. Farm ownership loans help producers become owner-operators of family farms as well as improve and expand current operations.
- Producers can now receive both a $50,000 Farm Ownership Microloan and a $50,000 Operating Microloan. Previously, microloans were limited to a combined $50,000. Microloans provide flexible access to credit for small, beginning, niche, and non-traditional farm operations.
- Producers who previously received debt forgiveness as part of an approved FSA restructuring plan are now eligible to apply for emergency loans. Previously, these producers were ineligible.
Beginning and socially disadvantaged producers can now receive up to a 95 percent guarantee against the loss of principal and interest on a loan, up from 90 percent.

About Farm Loans

Direct farm loans, which include microloans and emergency loans, are financed and serviced by FSA, while guaranteed farm loans are financed and serviced by commercial lenders. For guaranteed loans, FSA provides a guarantee against possible financial loss of principal and interest.

For more information on FSA farm loans, visit www.fsa.usda.gov or contact your local USDA service center.

Persons with disabilities who require accommodations to attend or participate in this meeting should contact Darrell Jones at 307-532-4880 extension 2 or Federal Relay Service at 1-800-877-8339.
