To our ranchers and farmers,

USDA's Farm Service Agency (FSA) encourages agricultural producers to enroll now in the Agriculture Risk Loss (ARC) and Price Loss Coverage (PLC) programs. **March 15, 2020** is the enrollment deadline for the 2019 crop year.

FSA offices have multiple programs competing for the time and attention of our staff. Because of the importance and complexities of the ARC and PLC programs; and to ensure FSA meets your program delivery expectations, please do not wait to start the enrollment process. Call your FSA county office and make an appointment soon to ensure your elections are made and contracts signed well ahead of the deadlines.

ARC and PLC provide financial protections to farmers from substantial drops in crop prices or revenues and are vital economic safety nets for most American farms.

The programs cover the following commodities: barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium and short grain rice, safflower seed, seed cotton, sesame, soybeans, sunflower seed and wheat.

Until March 15, producers who have not yet enrolled in ARC or PLC for 2019 can enroll for both 2019 and 2020 during the same visit to an FSA county office unless yield updates are requested. Additionally, farm owners have a one-time opportunity to update PLC payment yields that take effect

Next County Committee Meeting: TBA

beginning with crop year 2020. If the owner accompanies the producer to the office, the yield update and enrollments may be completed during the same office visit.

Please give us a call if we can be of further assistance.

Best Regards,

Linda

USDA Announces Details of Risk Management Programs for Hemp Producers

WASHINGTON, D.C., February 6, 2020 – The U.S. Department of Agriculture (USDA) today announced the availability of two programs that protect hemp producers' crops from natural disasters. A pilot hemp insurance program through Multi-Peril Crop Insurance (MPCI) provides coverage against loss of yield because of insurable causes of loss for hemp grown for fiber, grain or Cannabidiol (CBD) oil and the Noninsured Crop Disaster Assistance Program (NAP) coverage protects against losses associated with lower yields, destroyed crops or prevented planting where no permanent federal crop insurance program is available. **Producers may apply now, and the deadline to sign up for both programs is *March 16, 2020*.**

"We are pleased to offer these coverages to hemp producers. Hemp offers new economic opportunities for our farmers, and they are anxious for a way to protect their product in the event of a natural disaster," said Farm Production and Conservation Undersecretary Bill Northey.

Multi-Peril Crop Insurance Pilot Insurance Program

The MPCI pilot insurance is a new crop insurance option for hemp producers in select counties of 21 states for the 2020 crop year. The program is available for eligible producers in certain counties in Alabama, California, Colorado, Illinois, Indiana, Kansas, Kentucky, Maine, Michigan, Minnesota, Montana, New Mexico, New York, North Carolina, North Dakota, Oklahoma, Oregon, Pennsylvania, Tennessee, Virginia and Wisconsin. Information on eligible counties is accessible through the USDA Risk Management Agency's [Actuarial Information Browser](#).

Among other requirements, to be eligible for the pilot program, a hemp producer must have at least one year of history producing the crop and have a contract for the sale of the insured hemp. In addition, the minimum acreage requirement is 5 acres for CBD and 20 acres for grain and fiber. Hemp will not qualify for replant payments or prevented plant payments under MPCI.

This pilot insurance coverage is available to hemp growers in addition to revenue protection for hemp offered under the Whole-Farm Revenue Protection plan of insurance. Also, beginning with the 2021 crop year, hemp will be insurable under the Nursery crop insurance program and the Nursery Value Select pilot crop insurance program. Under both nursery programs, hemp will be insurable if grown in containers and in accordance with federal regulations, any applicable state or tribal laws and terms of the crop insurance policy.

Noninsured Crop Disaster Assistance Program

NAP provides coverage against loss for hemp grown for fiber, grain, seed or CBD for the 2020 crop year where no permanent federal crop insurance program is available.

NAP basic 50/55 coverage is available at 55 percent of the average market price for crop losses that exceed 50 percent of expected production. Buy-up coverage is available in some cases. The 2018 Farm Bill allows for buy-up levels of NAP coverage from 50 to 65 percent of expected production in 5 percent increments, at 100 percent of the average market price. Premiums apply for buy-up coverage. Deadline to apply for 2020 coverage is March 16, 2020.

For all coverage levels, the NAP service fee is \$325 per crop or \$825 per producer per county, not to exceed \$1,950 for a producer with farming interests in multiple counties.

Eligibility Requirements

Under a regulation authorized by the 2018 Farm Bill and issued in October 2019, all growers must have a license to grow hemp and must comply with applicable state, tribal or federal regulations or operate under a state or university research pilot, as authorized by the 2014 Farm Bill.

Producers must report hemp acreage to FSA after planting to comply with federal and state law enforcement. The Farm Bill defines hemp as containing 0.3 percent or less tetrahydrocannabinol (THC) on a dry-weight basis. Hemp having THC above the federal statutory compliance level of 0.3 percent is an uninsurable or ineligible cause of loss and will result in the hemp production being ineligible for production history purposes.

For more information on USDA risk management programs for hemp producers, visit farmers.gov/hemp to read our [frequently asked questions](#). For more information on the U.S. Domestic Hemp Production Program, visit USDA's Agricultural Marketing Services' website to read their [frequently asked questions](#).

Sheridan~Johnson County is Eligible for Emergency Loans

Sheridan~Johnson County was declared a primary disaster due to flooding using the streamlined Secretarial Disaster Designation process {Secretarial Disaster Designation S4527, Dated 9/6/2019}. Under this designation, producers with operations in any primary or contiguous county are eligible to apply for low interest emergency loans.

Emergency loans help producers recover from production and physical losses due to drought, flooding and other natural disasters or quarantine. Emergency loan funds may be used to:

- Restore or replace essential property;
- Pay all or part of production costs associated with the disaster year;
- Pay essential family living expenses;
- Reorganize the farming operation; and
- Refinance certain debts.

Producers have eight months from the date of the declaration to apply for emergency loan assistance. FSA will consider each loan application on its own merits, taking into account the extent of losses, security available and repayment ability. Producers can borrow up to 100 percent of actual production or physical losses, to a maximum amount of \$500,000.

For more information about emergency loans, please contact your local FSA office or visit www.fsa.usda.gov. Sheridan and Johnson County producers please contact Rob Weppner at (307) 682-8843 extension 2 or email him at rob.weppner@usda.gov

Persons with disabilities who require accommodations to attend or participate in this meeting should contact Linda Benzel at 307-683-4202 or Federal Relay Service at 1-800-877-8339.
