Understanding the U.S. Drought Monitor

Are drought conditions affecting your agricultural operation? The U.S. Drought Monitor (USDM) is a resource producers can use to help determine how to best respond and react to a drought as it develops or lingers.

The USDM is an online, weekly map showing the location, extent, and severity of drought across the United States. It categorizes the entire country as being in one of six levels of drought. The map is released on Thursdays and depicts conditions for the week.

The USDM provides producers with the latest information about drought conditions where they live, enabling producers to best respond and react to a drought as it develops or lingers. In some cases, the USDM may help a producer make specific decisions about their operation, such as reducing the stocking rate because forage is not growing. For others, it may provide a convenient big-picture snapshot of broader environmental conditions.

The USDM incorporates varying data – rain, snow, temperature, streamflow, reservoir levels, soil moisture, and more – as well as first-hand information submitted from on-the-ground sources such as photos, descriptions, and experiences. The levels of drought are connected to the frequency of occurrence across several different drought indicators. What makes the USDM unique is that it is not a strictly numeric product. The mapmakers rely on their judgment and a nationwide network of 450-plus experts to interpret conditions for each region. They synthesize their discussion and analysis into a single depiction of drought for the entire country.

USDA uses the Drought Monitor to determine a producer’s eligibility for certain drought assistance programs, like the Livestock Forage Disaster Program and Emergency Haying or Grazing on Conservation Reserve Program acres.

Additionally, the Farm Service Agency uses the Drought Monitor to trigger and “fast track” Secretarial Disaster Designations which then provides producers impacted by drought access to emergency loans that can assist with credit needs.

Learn more about the U.S. Drought Monitor.

USDA Expands and Renews Conservation Reserve Program in Effort to Boost Enrollment and Address Climate Change
USDA will open enrollment in the Conservation Reserve Program (CRP) with higher payment rates, new incentives, and a more targeted focus on the program’s role in climate change mitigation. Additionally, USDA is announcing investments in partnerships to increase climate-smart agriculture, including $330 million in 85 Regional Conservation Partnership Program (RCPP) projects and $25 million for On-Farm Conservation Innovation Trials.

Conservation Reserve Program

USDA's goal is to enroll up to 4 million new acres in CRP by raising rental payment rates and expanding the number of incentivized environmental practices allowed under the program. CRP is one of the world’s largest voluntary conservation programs with a long track record of preserving topsoil, sequestering carbon, and reducing nitrogen runoff, as well providing healthy habitat for wildlife.

CRP is a powerful tool when it comes to climate mitigation, and acres currently enrolled in the program mitigate more than 12 million metric tons of carbon dioxide equivalent (CO2e). If USDA reaches its goal of enrolling an additional 4 million acres into the program, it will mitigate an additional 3 million metric tons of CO2 equivalent and prevent 90 million pounds of nitrogen and 33 million tons of sediment from running into our waterways each year.

New Climate-Smart Practice Incentive

To target the program on climate change mitigation, FSA is introducing a new Climate-Smart Practice Incentive for CRP general and continuous signups that aims to increase carbon sequestration and reduce greenhouse gas emissions. Climate-Smart CRP practices include establishment of trees and permanent grasses, development of wildlife habitat, and wetland restoration. The Climate-Smart Practice Incentive is annual, and the amount is based on the benefits of each practice type.

Higher Rental Rates and New Incentives

In 2021, CRP is capped at 25 million acres, and currently 20.8 million acres are enrolled. Furthermore, the cap will gradually increase to 27 million acres by 2023. To help increase producer interest and enrollment, FSA is:

- **Adjusting soil rental rates.** This enables additional flexibility for rate adjustments, including a possible increase in rates where appropriate.
- **Increasing payments for Practice Incentives from 20% to 50%.** This incentive for continuous CRP practices is based on the cost of establishment and is in addition to cost share payments.
- **Increasing payments for water quality practices.** Rates are increasing from 10% to 20% for certain water quality benefiting practices available through the CRP continuous signup, such as grassed waterways, riparian buffers, and filter strips.
- **Establishing a CRP Grassland minimum rental rate.** This benefits more than 1,300 counties with rates currently below the minimum.

To learn more about updates to CRP, download our “What's New with CRP” fact sheet.

After Identifying Gaps in Previous Aid, USDA Announces ‘Pandemic Assistance for Producers’ to Distribute Resources More Equitably
Agriculture Secretary Tom Vilsack announced that USDA is establishing new programs and efforts to bring financial assistance to farmers, ranchers and producers who felt the impact of COVID-19 market disruptions. The new initiative—USDA Pandemic Assistance for Producers—will reach a broader set of producers than in previous COVID-19 aid programs.

USDA is dedicating at least $6 billion toward the new programs. The Department will also develop rules for new programs that will put a greater emphasis on outreach to small and socially disadvantaged producers, specialty crop and organic producers, timber harvesters, as well as provide support for the food supply chain and producers of renewable fuel, among others. Existing programs like the Coronavirus Food Assistance Program (CFAP) will fall within the new initiative and, where statutory authority allows, will be refined to better address the needs of producers.

USDA Pandemic Assistance for Producers was needed, said Vilsack, after a review of previous COVID-19 assistance programs targeting farmers identified a number of gaps and disparities in how assistance was distributed as well as inadequate outreach to underserved producers and smaller and medium operations.

USDA will reopen sign-up for CFAP 2 for at least 60 days beginning on April 5, 2021. The USDA Farm Service Agency (FSA) has committed at least $2.5 million to improve outreach for CFAP 2 and will establish partnerships with organizations with strong connections to socially disadvantaged communities to ensure they are informed and aware of the application process.

**USDA Pandemic Assistance for Producers – 4 Parts**

*Part 1: Investing $6 Billion to Expand Help & Assistance to More Producers*

USDA will dedicate at least $6 billion to develop a number of new programs or modify existing proposals using discretionary funding from the Consolidated Appropriations Act and other coronavirus funding that went unspent by the previous administration.

*Part 2: Adding $500 Million of New Funding to Existing Programs*

USDA expects to begin investing approximately $500 million in expedited assistance through several existing programs this spring, with most by April 30.

*Part 3: Carrying Out Formula Payments under CFAP 1, CFAP 2, CFAP AA*

The Consolidated Appropriations Act, 2021, enacted December 2020 requires FSA to make certain payments to producers according to a mandated formula. USDA is now expediting these provisions because there is no discretion involved in interpreting such directives, they are self-enacting.

- An increase in CFAP 1 payment rates for cattle. Cattle producers with approved CFAP 1 applications will automatically receive these payments beginning in April. Information on the additional payment rates for cattle can be found on farmers.gov/cfap. Eligible producers do not need to submit new applications, since payments are based on previously approved CFAP 1 application. USDA estimates additional payments of more than $1.1 billion to more than 410,000 producers, according to the mandated formula.

- Additional CFAP assistance of $20 per acre for producers of eligible crops identified as CFAP 2 flat-rate or price-trigger crops beginning in April. This includes alfalfa, corn, cotton, hemp, peanuts, rice, sorghum, soybeans, sugar beets and wheat, among other crops. FSA will automatically issue payments to eligible price trigger and flat-rate crop producers based on the eligible acres included on their CFAP 2 applications. Eligible producers do not need to submit a new CFAP 2 application. For a list of all eligible row-crops, visit farmers.gov/cfap. USDA estimates additional payments of more than $4.5 billion to more than 560,000 producers, according to the mandated formula.

- USDA will finalize routine decisions and minor formula adjustments on applications and begin processing payments for certain applications filed as part of the CFAP Additional Assistance program in the following categories:
  - Applications filed for pullets and turfgrass sod;
A formula correction for row-crop producer applications to allow producers with a non-Actual Production History (APH) insurance policy to use 100% of the 2019 Agriculture Risk Coverage-County Option (ARC-CO) benchmark yield in the calculation;

Sales commodity applications revised to include insurance indemnities, Noninsured Crop Disaster Assistance Program payments, and Wildfire and Hurricane Indemnity Program Plus payments, as required by statute; and

Additional payments for swine producers and contract growers under CFAP Additional Assistance remain on hold and are likely to require modifications to the regulation as part of the broader evaluation and future assistance; however, FSA will continue to accept applications from interested producers.

**Part 4: Reopening CFAP 2 Sign-Up to Improve Access & Outreach to Underserved Producers**

As noted above, USDA will re-open sign-up for of CFAP 2 for at least 60 days beginning on April 5, 2021.

- FSA has committed at least $2.5 million to establish partnerships and direct outreach efforts intended to improve outreach for CFAP 2 and will cooperate with grassroots organizations with strong connections to socially disadvantaged communities to ensure they are informed and aware of the application process.

Please visit [www.farmers.gov](http://www.farmers.gov) for additional information and announcements under the USDA Pandemic Assistance to Producers initiative, which will help to expand and more equitably distribute financial assistance to producers and farming operations during the COVID-19 national emergency.

**FSA Implements Set-Aside Loan Provision for Customers Impacted by COVID-19**

*Set-Aside Delays Loan Payments for Borrowers*

USDA’s Farm Service Agency (FSA) will broaden the use of the Disaster Set-Aside (DSA) loan provision, normally used in the wake of natural disasters, to allow farmers with USDA farm loans who are affected by COVID-19, and are determined eligible, to have their next payment set aside. In some cases, FSA may also set aside a second payment for farmers who have already had one payment set aside because of a prior designated disaster.

FSA direct loan borrowers will receive a letter with the details of the expanded Disaster Set-Aside authorities, which includes the possible set-aside of annual operating loans, as well as explanations of the additional loan servicing options that are available. To discuss or request a loan payment Set-Aside, borrowers should call or email the farm loan staff at their local FSA county office.

The set-aside payment’s due date is moved to the final maturity date of the loan or extended up to twelve months in the case of an annual operating loan. Any principal set-aside will continue to accrue interest until it is repaid. This aims to improve the borrower’s cashflow in the current production cycle.

FSA previously announced it was relaxing the loan-making process and adding flexibilities for servicing direct and guaranteed loans to provide credit to producers in need. Direct loan applicants and borrowers are encouraged to contact their local FSA county office to discuss loan making and servicing flexibilities and other needs or concerns. Customers participating in FSA’s guaranteed loan programs are encouraged to contact their lender. Information on these flexibilities, and office contact information, can be found on [farmers.gov/coronavirus](http://farmers.gov/coronavirus).

FSA will be accepting most forms and applications by facsimile or electronic signature. Some services are also available online to customers with an eAuth account, which provides access to the [farmers.gov](http://farmers.gov) portal where producers can view USDA farm loan information and certain program applications and payments. Customers can track payments, report completed practices, request conservation assistance and electronically sign documents. Customers who do not already have an eAuth account can enroll at [farmers.gov/sign-in](http://farmers.gov/sign-in).
