Farmers.gov Feature Helps Producers Find Farm Loans that Fit Their Operation

Farmers and ranchers can use the Farm Loan Discovery Tool on farmers.gov to find information on USDA farm loans that may best fit their operations.

USDA’s Farm Service Agency (FSA) offers a variety of loan options to help farmers finance their operations. From buying land to financing the purchase of equipment, FSA loans can help.

USDA conducted field research in eight states, gathering input from farmers and FSA farm loan staff to better understand their needs and challenges.

How the Tool Works

Farmers who are looking for financing options to operate a farm or buy land can answer a few simple questions about what they are looking to fund and how much money they need to borrow. After submitting their answers, farmers will receive information on farm loans that best fit their specific needs. The loan application and additional resources also will be provided.

Farmers can download application quick guides that outline what to expect from preparing an application to receiving a loan decision. There are four guides that cover loans to individuals, entities, and youth, as well as information on microloans. The guides include general eligibility requirements and a list of required forms and documentation for each type of loan. These guides can help farmers prepare before their first USDA service center visit with a loan officer.

Farmers can access the Farm Loan Discovery Tool by visiting farmers.gov/fund and clicking the “Start” button. Follow the prompts and answer five simple questions to receive loan information that is applicable to your agricultural operation. The tool is built to run on any modern browser like Chrome, Edge, Firefox, or the Safari browser, and is fully functional on mobile devices. It does not work in Internet Explorer.

About Farmers.gov

In 2018, USDA unveiled farmers.gov, a dynamic, mobile-friendly public website combined with an authenticated portal where farmers will be able to apply for programs, process transactions, and manage accounts.

The Farm Loan Discovery Tool is one of many resources on farmers.gov to help connect farmers to information that can help their operations. Earlier this year, USDA launched the My Financial Information feature, which enables farmers to view their loan information, history, payments, and alerts by logging into the website.

USDA is building farmers.gov for farmers, by farmers. In addition to the interactive farm loan features, the site also offers a Disaster Assistance Discovery Tool. Farmers can visit farmers.gov/recover/disaster-
assistance-tool#step-1 to find disaster assistance programs that can help their operation recover from natural disasters.

For more information, contact your County USDA Service Center or visit farmers.gov.

**USDA Offers Drought Impacted Farmers and Ranchers Immediate Disaster Assistance**

USDA’s Farm Service Agency (FSA) offers disaster assistance and low-interest loan programs to assist you in your recovery efforts following drought. Available programs and loans include:

- **Non-Insured Crop Disaster Assistance Program (NAP)** - provides financial assistance to producers of non-insurable crops when low yields, loss of inventory, or prevented planting occur due to natural disasters including qualifying drought (includes native grass for grazing).
- **Livestock Forage Disaster Program (LFP)** – provides compensation to eligible livestock producers who suffered grazing losses for covered livestock due to drought on privately owned or cash leased land.
- **Livestock Indemnity Program (LIP)** - offers payments to eligible producers for livestock death losses in excess of normal mortality due to adverse weather. Drought is not an eligible adverse weather event, except when associated with anthrax, a condition that occurs because of drought and directly results in the death of eligible livestock.
- **Tree Assistance Program (TAP)** – provides assistance to eligible orchardists and nursery tree growers for qualifying tree, shrub and vine losses due to natural disasters including excessive wind and qualifying drought.
- **Emergency Assistance for Livestock, Honeybees, and Farm-Raised Fish Program (ELAP)** - provides emergency relief for losses due to feed or water shortages, disease, adverse weather, or other conditions, which are not adequately addressed by other disaster programs.
- **Emergency Loan Program** – available to producers with agriculture operations located in a county under a primary or contiguous Secretarial Disaster designation. These low interest loans help producers recover from production and physical losses.
- **Emergency Conservation Program (ECP)** - provides emergency funding for farmers and ranchers to rehabilitate land severely damaged by natural disasters and to implement emergency water conservation measures in periods of severe drought.

To establish or retain FSA program eligibility, you must report prevented planting and failed acres (crops and grasses). Prevented planting acreage must be reported on form FSA-576, Notice of Loss, no later than 15 calendar days after the final planting date as established by FSA and Risk Management Agency (RMA).

For more information on these programs, contact your County USDA Service Center or visit fsa.usda.gov/disaster.

**Conservation Efforts Continue on America’s Farms, Ranches Amid Challenging Year**

The USDA’s Natural Resources Conservation Service continued its conservation work across the country despite a tough 2020 marked with a pandemic and several natural disasters. The agency helped farmers, ranchers and forest landowners implement conservation practices on their working lands, which help conserve natural resource such as soil, water and wildlife as well as boost
producers’ bottom lines. Additionally, NRCS launched new online tools that increased the efficiency, effectiveness and delivery of crucial programs.

This year, NRCS worked with producers and communities to:

- Develop more than 100,000 conservation plans.
- Co-invest $1.32 billion through the Environmental Quality Incentives Program (EQIP) to put conservation practices on 10 million acres, as well as $507 million through the Conservation Stewardship Program (CSP) to put conservation enhancements on 9.3 million acres.
- Enroll more than 430 new easements, totaling 230,000 acres, into the Agricultural Conservation Easement Program (ACEP).
- Enter into over 420 agreements with local sponsors to cooperatively implement emergency recovery measures through the Emergency Watershed Protection Program (EWP) and obligated more than $251 million in EWP funds in FY 2020.

**Conservation at Work Video Series**

A new video series from NRCS and farmers.gov, Conservation at Work, presents short and easy to understand videos about popular conservation practices. These videos feature producers explaining how an individual practice helps their land and why they are using it.

The videos shine the spotlight on farmers, ranchers, and forestland owners from across the U.S. who explain why they’ve implemented the conservation practices and how they work on their land. They also provide insight into how each practice is helping them protect and improve resources and save time and money.

The first 15 videos cover:

- Brush Management
- Cover Crop
- Forest Stand Improvement
- Grade Stabilization
- Grassembled Waterway
- High Tunnel
- No Till
- Nutrient Management
- Prescribed Grazing
- Pumping Station
- Sprinkler System
- Trails and Walkways
- Waste Storage
- Water & Sediment Control Basin
- Wetland Restoration

The Conservation at Work video series can be found at farmers.gov/conserve/conservationatwork.
