USDA Reminds WY Producers to File Crop Acreage Reports

Agricultural producers in Wyoming who have not yet completed their [crop acreage reports](#) after planting should make an appointment with their Farm Service Agency (FSA) office before the applicable deadline.

An acreage report documents a crop grown on a farm or ranch and its intended uses. Filing an accurate and timely acreage report for all crops and land uses, including failed acreage and prevented planted acreage, can prevent the loss of benefits.

How to File a Report

Service Center staff continue to work with agricultural producers via phone, email, and other digital tools. Because of the pandemic, some [USDA Service Centers](#) are open to limited visitors. Contact your Service Center to set up an in-person or phone appointment.

To file a crop acreage report, you will need to provide:

- Crop and crop type or variety.
- Intended use of the crop.
- Number of acres of the crop.
- Map with approximate boundaries for the crop.
- Planting date(s).
- Planting pattern, when applicable.
- Producer shares.
- Irrigation practice(s).
- Acreage prevented from planting, when applicable.
- Other information as required.

Acreage Reporting Details

The following exceptions apply to acreage reporting dates:

- If the crop has not been planted by the acreage reporting date, then the acreage must be reported no later than 15 calendar days after planting is completed.
- If a producer acquires additional acreage after the acreage reporting date, then the acreage must be reported no later than 30 calendar days after purchase or acquiring the lease. Appropriate documentation must be provided to the county office.

Producers should also report crop acreage they intended to plant, but due to natural disaster, were unable to plant. Prevented planting acreage must be reported on form CCC-576, Notice of Loss, no later than 15 calendar days after the final planting date as established by FSA and USDA's Risk Management Agency.

Noninsured Crop Disaster Assistance Program (NAP) policy holders should note that the acreage reporting date for NAP-covered crops is the earlier of the dates listed above or 15 calendar days before grazing or harvesting of the crop begins.

More Information

For questions, please contact your local FSA office. To locate your local FSA office visit farmers.gov/service-center-locator.

USDA Announces Inaugural Federal Advisory Committee for Urban Agriculture

Agriculture Secretary Tom Vilsack selected 12 members to serve on the U.S. Department of Agriculture's (USDA) inaugural Secretary's Advisory Committee for Urban Agriculture to provide input on policy development and to help identify barriers to urban agriculture as USDA works to promote urban farming and the economic opportunities it provides in cities across the country.

The new Secretary's Advisory Committee is part of USDA's efforts to support urban agriculture, creating a network for feedback. Urban agriculture plays an important role in producing fresh, healthy food in areas where grocery stores are scarce, and also provides jobs and beautifies neighborhoods.

Secretary's Advisory Committee for Urban Agriculture

The Committee is made up of agricultural producers, and representatives from the areas of higher education or extension programs, non-profits, business and economic development, supply chains and financing. Members include:

- **Jerry Ann Hebron**, Mich., Urban Producer
- **Bobby Wilson**, Ga., Urban Producer
- **Viraj Puri**, N.Y., Innovative Producer
- **Kaben Smallwood**, Okla., Innovative Producer
- **Sally Brown**, Wash., Higher Education
- **John Erwin**, Md., Higher Education
- **Carl Wallace**, Ohio, Non-Profit Representative
- **John Lebeaux**, Mass., Business and Economic Development Representative
- **Zachari Curtis**, D.C., Supply Chain Experience
- **Allison Paap**, Calif., Financing Entity Representative
- **Tara Chadwick**, Fla., Related Experience
- **Angela Mason**, Ill., Related Experience

USDA and the Office of Urban Agriculture and Innovative Production peer reviewed more than 300 nominees, and Vilsack made the final selections. Selections ensured geographic, racial and gender diversity and a broad range of agricultural experience. The new members will serve terms of one to three years.

The first meeting of this inaugural committee, which will be open to the public, will take place in late February. More details will be available in the *Federal Register* and at farmers.gov/urban and the new [Federal Advisory Committee for Urban Agriculture website](#).

USDA and Urban Agriculture

The advisory committee and county committees are part of a broad USDA investment in urban agriculture. Other efforts include:

- Grants that target areas of food access, education, business and start-up costs for new farmers, and development of policies related to zoning and other needs of urban production.
- Cooperative agreements that develop and test strategies for planning and implementing municipal compost plans and food waste reduction plans.
- Investing \$260,000 for risk management training and crop insurance education for historically underserved and urban producers through partnerships between USDA's [Risk Management Agency](#)(RMA) and the University of Maryland, University of Connecticut, and Michigan State University Center for Regional Food Systems.
- Providing technical and financial assistance through conservation programs offered by USDA's [Natural Resources Conservation Service](#)(NRCS).
- Organizing 11 [Farm Service Agency](#) (FSA) urban and suburban county committees. FSA will organize additional committees.

The Office of Urban Agriculture and Innovative Production was established through the 2018 Farm Bill. It is led by NRCS and works in partnership with numerous USDA agencies that support urban agriculture. Its mission is to encourage and promote urban, indoor, and other emerging agricultural practices, including community composting and food waste reduction. More information is available at farmers.gov/urban and the new [Federal Advisory Committee for Urban Agriculture website](#).

Additional resources that may be of interest to urban agriculture entities include grants from USDA's [Agricultural Marketing Service](#) and [National Institute of Food and Agriculture](#) as well as [FSA loans](#).

What's New and Improved for Specialty Crop Producers?

Does your operation include specialty crops? Whether you grow fruits, vegetables, tree nuts, dried fruits, horticulture, or nursery crops - USDA is here for you.

Over the past year, USDA has stepped up our support of specialty crop producers and local and regional food systems. USDA believes specialty crop producers are integral to the food system of the future, and we are working to improve available options for specialty crop producers as well as ensure equity in program delivery.

What's New?

The Risk Management Agency (RMA) rolled out a new insurance option for small-scale producers who sell locally, which is named **Micro Farm**. This new insurance coverage option simplifies record keeping and covers post-production costs, such as washing and value-added products. It is available now, and you can learn more from an Approved Insurance Provider or your [RMA specialty crop liaison](#).

In addition to Micro Farm, RMA rolled out other new insurance options in the past year, including: **California Citrus Trees, Florida Citrus, Production and Revenue History option for Florida strawberries, and Hurricane Insurance Protection-Wind Index (HIP-WI)**. These new options either fill gaps in coverage or offer advantages over other policies. Since 2020, producers weathered several major hurricanes. The new HIP-WI played a crucial role in recovery with more than \$250 million in indemnities paid so far with most payments issued in a matter of weeks following a hurricane.

[Interest in growing and insuring specialty crops](#) has grown significantly with \$1 billion in liabilities for 1990 to \$22 billion in liabilities for 2021. ([For more details, check out reports on our Specialty Crops webpage.](#))

The Farm Service Agency (FSA) also offered pandemic assistance for organic producers. The new [Organic and Transitional Education and Certification Program](#) (OTECP) provided assistance to help cover loss of markets, increased costs, labor shortages and expenses related to obtaining or renewing their organic certification.

What's Improved?

In the past year, RMA made improvements to existing policies -- including [Whole-Farm Revenue Protection](#), a key insurance option for specialty crop producers. Beginning in the 2021 crop year, direct market producers could report two or more commodities using a new combined direct marketing code.

This reduced a tremendous burden for diversified producers and allowed them to receive a premium rate discount for diversification. For 2022, RMA increased coverage for organic and aquaculture producers and enabled organic producers to report certified organic acreage as long as the request for certification had been made by the reporting date, which provides additional flexibility to producers.

Want to Learn More?

These new and improved options for specialty crop producers are but a few of USDA's strides over the past year to build a fairer, more transparent food system rooted in local and regional production. To learn more, please read [USDA's January 19, 2022, news release](#).

For crop insurance, visit [RMA's Specialty Crops webpage](#) or [contact your specialty crop liaison](#).

Also, if there is not a standard offer for the crop you would like insured, you may still be able to get a written agreement for coverage. RMA Regional Offices review these requests to help provide coverage. These requests also provide Regional Offices the opportunity to review the possible expansion of the policy to your county.

Lastly, you can read our [Specialty Crops webpage on farmers.gov](#) and [question-and-answer with two specialty crop liaisons](#), Adrienne Steinacher and Matt Wilkin.

Higher Loan Limit Now Available for USDA Guaranteed Farm Loans

The U.S. Department of Agriculture (USDA) announced a higher loan limit will be available for borrowers seeking a guaranteed farm loan starting Oct. 1, 2021, from \$1.776 million to \$1.825 million.

FSA farm loans offer access to funding for a wide range of producer needs, from securing land to financing the purchase of equipment. Guaranteed loans are financed and serviced by commercial lenders. FSA provides up to a 95% guarantee against possible financial loss of principal and interest. Guaranteed loans can be used for both farm ownership and operating purposes.

In fiscal year 2021, FSA saw continued strong demand for guaranteed loans. FSA obligated more than \$3.4 billion in guaranteed farm ownership and operating loans. This includes nearly \$1.2 billion for beginning farmers. The number of guaranteed borrowers has grown by 10% to more than 38,750 farmers and ranchers over the last decade. FSA expects the increasing demand for farm loans to continue into fiscal year 2022.

Disaster Set-Aside Extension

USDA has additional support available to producers given the recent outbreaks of the COVID-19 Delta variant and has extended the availability of COVID-19 Disaster Set-Aside (DSA) for installments due through Jan. 31, 2022. In addition, FSA will permit a second DSA for COVID-19 and a second DSA for natural disasters for those who had an initial COVID-19 DSA. Requests for a COVID-19 DSA or a second DSA must be received no later than May 1, 2022.

Last year, FSA broadened the use of the DSA. Normally used in the wake of natural disasters, the DSA can now allow farmers with USDA farm loans who are affected by COVID-19 and determined to be eligible, to have their next payment set aside. The set-aside payment's due date is moved to the final maturity date of the loan or extended up to twelve months in the case of an annual operating loan. Any principal set-aside will continue to accrue interest until it is repaid. This will improve the borrower's cashflow in the current production cycle.

More Information

Producers can explore available options on all FSA loan options at fsa.usda.gov or by contacting their [local USDA Service Center](#). Service Center staff continue to work with agricultural producers via phone, email, and other digital tools. Because of the pandemic, some [USDA Service Centers](#) are open to limited visitors. Contact your

Service Center to set up an in-person or phone appointment. Additionally, more information related to USDA's response and relief for producers can be found at farmers.gov/coronavirus.
