2022 Avian Influenza in the United States - What you need to know!

Commercial producers and backyard enthusiast alike are asked to practice good biosecurity and report sick or dead birds.

To date, USDA's National Veterinary Services Laboratories has confirmed the presence of Highly Pathogenic Avian Influenza (HPAI) in commercial and backyard flocks in several states including Wyoming. Avian influenza viruses are classified as either "low pathogenic (LPAI)" or "highly pathogenic (HPAI)" based on their genetic features and the severity of the disease they cause in poultry. Caused by an influenza type A virus, HPAI can infect poultry (such as chickens, turkeys, pheasants, quail, domestic ducks, geese, and guinea fowl) and wild birds (especially waterfowl).

The clinical signs of birds affected with all forms of Avian Influenza may show one or more of the following:

- Sudden death without clinical signs
- Decreased water consumption up to 72 hours before other clinical signs
- Lack of energy and appetite
- Decreased egg production
- Soft-shelled or misshapen eggs
- Swelling of the head, eyelids, comb, wattles, and hocks
- Purple discoloration of the wattles, combs, and legs
- Nasal discharge
- Coughing, sneezing
- Lack of coordination
- Diarrhea

In addition to the disease infecting domestic birds, it is important to know that wild birds can also be infected and show no signs of illness. They can carry the disease to new areas when migrating, potentially exposing domestic poultry to the virus. The [APHIS' wild bird surveillance program](#) provides an early warning system for the introduction and distribution of avian influenza viruses of concern in the United States, allowing APHIS and the poultry industry to take timely and rapid action.

With the recent detections of avian influenza in wild birds and domestic poultry in the United States, bird owners should review their biosecurity practices and stay vigilant to protect poultry and pet birds from transmission of this

disease. The following bio-safety guidelines are effective methods for safeguarding commercial operations and smaller flocks:

- Backyard flock owners should practice strict biosecurity, including preventing birds from exposure and/or co-mingling with wild birds and other types of poultry.
- Shower, change clothes, and clean and disinfect footwear before entering your poultry housing areas.
- Respiratory protection such as a medical facemask would also be important and remember to always wear clean clothes when encountering healthy domestic birds.
- Carefully follow safe entry and exit procedures into your flock's clean area.
- Reduce the attractiveness for wild birds to stop at your place by cleaning up litter and spilled feed around poultry housing areas.
- If you have free range guinea fowl and waterfowl, consider bringing them into coops or flight pens under nets to prevent interaction of domesticated poultry with wild birds and their droppings.
- It is best to restrict visitors from interacting with your birds currently.
- Do not touch sick or dead wildlife and keep them away from domestic poultry
- Try not to handle sick or deceased domestic birds (if you must, use proper personal protective equipment to minimize direct contact and cautiously disinfect anything that comes into contact with the deceased and or sick bird).

As part of the existing USDA Avian Influenza response plans, Federal and State partners as well as industry are responding quickly and decisively to these outbreaks by following these five basic steps:

- **Quarantine** – restricting movement of poultry and poultry-moving equipment into and out of the control area;
- **Eradicate** – depopulate the affected flock(s);
- **Monitor region** – testing wild and domestic birds in a broad area around the quarantine area;
- **Disinfect** – kills the virus in the affected flock locations; and
- **Test** – confirming that the poultry farm is AI virus-free.

Sick or deceased domestic birds should be reported to your local veterinarian. Positive domestic cases are handled by APHIS and its partners. States that have confirmed cases of Avian Influenza should work closely with USDA-APHIS on surveillance, reporting and control efforts. Disposal methods will be evaluated on a case-by-case basis depending on a variety of factors, including the size of the flock, space requirements, associated costs, local conditions, and applicable laws/regulations.

The United States has the strongest Avian Influenza surveillance program in the world, where we actively look for the disease and provide fair market value compensation to affected producers to encourage reporting.

If you do not raise domestic birds or have a poultry operation but you encounter sick or dead wild birds, please use bio-safety measures, and report your findings through USDA's toll-free number at 1-866-536-7593.

According to the Centers for Disease Control, this strain of Avian Influenza is a low risk to the public. While the transmission rate from animals to humans is low, it is a zoonotic disease, meaning it can be shared between species. To learn more about Avian Influenza and to remain up to date on the latest related news and information, you can visit the [USDAAPHIS webpage](#).

USDA Announces Inaugural Federal Advisory Committee on Urban Agriculture

Agriculture Secretary Tom Vilsack selected 12 members to serve on the USDA's inaugural Secretary's Advisory Committee for Urban Agriculture to provide input on policy development and to help identify barriers to urban agriculture as USDA works to promote urban farming and the economic opportunities it provides in cities across the country.

The new Secretary's Advisory Committee is part of USDA's efforts to support urban agriculture, creating a network for feedback. Urban agriculture plays an important role in producing fresh, healthy food in areas where grocery stores are scarce, and also provides jobs and beautifies neighborhoods.

The Committee is made up of agricultural producers, and representatives from the areas of higher education or extension programs, non-profits, business and economic development, supply chains and financing.

Members include:

- **Jerry Ann Hebron**, Mich., Urban Producer
- **Bobby Wilson**, Ga., Urban Producer
- **Viraj Puri**, N.Y., Innovative Producer
- **Kaben Smallwood**, Okla., Innovative Producer
- **Sally Brown**, Wash., Higher Education
- **John Erwin**, Md., Higher Education
- **Carl Wallace**, Ohio, Non-Profit Representative
- **John Lebeaux**, Mass., Business and Economic Development Representative
- **Zachari Curtis**, D.C., Supply Chain Experience
- **Allison Paap**, Calif., Financing Entity Representative
- **Tara Chadwick**, Fla., Related Experience
- **Angela Mason, III.**, Related Experience

USDA and the Office of Urban Agriculture and Innovative Production peer reviewed more than 300 nominees, and Vilsack made the final selections. Selections ensured geographic, racial and gender diversity and a broad range of agricultural experience. The new members will serve terms of one to three years. More information is available at farmers.gov/urban and the new Federal Advisory Committee for Urban Agriculture website at www.usda.gov/partnerships/advisory-committee-urban-ag-innovative-production.

New Online Tool Allows Farmers, Ranchers to Easily Report Anticompetitive Practices

Farmers, ranchers, and other producers and growers now have a one-stop shop to help ensure they are treated fairly. The new farmerfairness.gov portal developed jointly by the U.S. Department of Agriculture (USDA) and Department of Justice (DOJ) allows you to report potential violations of livestock and poultry antitrust laws, including the Packers and Stockyards Act.

Agriculture Secretary Tom Vilsack recently expressed concern that producers across the country have for too long faced a marketplace that benefits a few large companies over the farmers and ranchers who grow and raise our food.

For example, ranchers received more than 60 cents of every dollar a consumer spent on beef 50 years ago, compared to approximately 39 cents today. Hog farmers fared worse over the past 50 years, as their share of the consumer dollar fell from between 40 to 60 cents 50 years ago to approximately 19 cents today.

In order to assure economic opportunity and fairness for all, this portal makes it easy for farmers and ranchers to register a complaint or tip and provide details that would aid an investigation.

Who may submit a complaint or tip?

Anyone who suspects a violation of Federal law governing fair and competitive marketing and contract growing of livestock and poultry, including the Packers and Stockyards Act.

What information should I provide?

Those reporting potential violations of the Packers and Stockyards Act and other competition laws via the online portal are asked to submit the following information:

- The names of companies, individuals, or organizations that are involved,
- A description of any possible violations of the Packers and Stockyards Act or other [federal antitrust laws](#),
- Examples of the conduct that may violate one or more of these laws,
- Any other relevant details about the violation, and
- The names of companies, individuals, or organizations that may be harmed by the alleged violation and how they are harmed.

What is the process following submission of a complaint or tip?

Complaints and tips will go through a preliminary review by USDA Packers and Stockyards Division staff and Department of Justice staff. If a complaint raises sufficient concern under the Packers and Stockyards Act or antitrust laws, it will be selected for further investigation by the appropriate agency. This action may lead to the opening of a formal investigation.

USDA or DOJ staff will only contact complainants if additional information is needed.

Will my confidentiality be protected?

Both USDA and DOJ will protect the confidentiality of the complainants to the fullest extent possible under the law. For any information provided, DOJ and USDA will follow their respective Privacy and Confidentiality Policies found at: [DOJ Confidentiality](#) and [USDA Privacy](#). Packers and Stockyards regulations regarding confidentiality also apply: [PSD Confidentiality](#). DOJ and USDA commit to supporting relevant whistleblower protections, including newly applicable protections [for criminal antitrust complainants against unlawful retaliation](#).

To submit an anonymous complaint or tip, complainants or tipsters should provide appropriate details but not enter their names or contact information. Neither USDA nor DOJ will be able to contact anonymous complainants or tips to obtain additional information that might be needed to evaluate your complaint tip, or to engage in future correspondence regarding your complaint or tip.

Farmers, ranchers, and other producers and growers deserve the benefits of fair and competitive markets for their products and services. This portal is an additional tool to support and protect these individuals who are vital to agriculture and our food supply.

USDA to Extend Application Deadlines for Partnerships for Climate-Smart Commodities Funding Opportunity

The U.S. Department of Agriculture (USDA) is extending the deadlines to apply for the Partnerships for Climate-Smart Commodities funding opportunity after requests from many stakeholders. The new deadlines to apply via [Grants.gov](#) by 11:59 p.m. ET:

- First Funding Pool – May 6, 2022 Proposals from \$5 million to \$100 million
- Second Funding Pool – June 10, 2022 Proposals from \$250,000 to \$4,999,999

The Partnerships for Climate-Smart Commodities funding opportunity will finance pilot projects that create market opportunities for U.S. agricultural and forestry products that use climate-smart production practices and include innovative, cost-effective ways to measure and verify greenhouse gas benefits. USDA began accepting project applications for fiscal year 2022 on Feb. 7, 2022, and since then, Department officials have heard from many stakeholders that an extension would allow them to prepare more robust applications to further development of

climate-smart markets for a diverse range of producers. Funding will be provided to partners through the USDA's [Commodity Credit Corporation](#) for pilot projects to provide incentives to producers and landowners to:

- Implement climate-smart production practices, activities, and systems on working lands,
- Measure/quantify, monitor, and verify the carbon and greenhouse gas (GHG) benefits associated with those practices, and
- Develop markets and promote the resulting climate-smart commodities.

How to Apply

A range of public and private entities may apply, including:

- County, city or township governments
- Special district governments
- State governments
- Small businesses
- For profit organizations other than small businesses
- Native American tribal governments (Federally recognized)
- Native American tribal organizations (other than Federally recognized tribal governments)
- Nonprofits having a 501(c)(3) (other than institutions of higher education)
- Nonprofits that do not have a 501(c)(3) (other than institutions of higher education)
- Private institutions of higher education, or
- Public and State-controlled institutions of higher education.

In response to questions received from potential applicants, USDA has also provided additional clarity regarding requirements in the funding opportunity, including:

- The definition of “domestic applicant;”
- Producers’ eligibility as beneficiaries of the funding; and
- Quantification requirements.

[Frequently asked questions](#) are also available on the website to help answer questions.

USDA is committed to equity in program delivery and is specifically seeking proposals from entities serving all types of producers, including small or historically underserved producers. Providing sufficient incentives to encourage producer participation and generating both verifiable greenhouse gas reduction and carbon sequestration benefits are critical to project success and will be considered in the evaluation criteria.

More Information

USDA published a [Request for Information](#) in September 2021 seeking public comment and input on design of this new initiative and used the nearly 400 comments received to inform this funding opportunity. The [funding opportunity has received praise](#) from across multiple industries for its support to create innovative and cost-effective markets.

Visit [usda.gov](https://www.usda.gov) for additional information, including details on Partnerships for Climate-Smart Commodities and resources to support your application.

Ask the Expert: A Farm Operating Loan Q&A with Jack Carlile

In this Ask the Expert, Jack Carlile, Farm Loan Manager for the USDA Farm Service Agency (FSA), answers questions about farm operating loans and when producers should apply in order to secure funds for the current crop year.

As the Farm Loan Manager for the Cherokee County Service Center, Jack is responsible for managing the loan making and loan servicing activities for five counties in northeast Oklahoma. His office provides services for over 650 farm loan customers. Jack was raised on a cross bred cow/calf operation that his grandparents started. Over the years, each generation has added to the operation by purchasing additional pasture. The operation also grows and bales their own hay. Jack's agriculture background and degree in agriculture economics from Oklahoma State University help him better understand the financing needs of his producers.

Who can apply for FSA Farm Loans?

Anyone can apply for FSA's loan programs. Applications will be considered on basic eligibility requirements. To apply for a loan, you must meet the following general eligibility requirements including:

- Be a U.S. citizen or qualified alien.
- Operator of a family farm or ranch.
- Have a satisfactory credit history.
- Unable to obtain credit elsewhere at reasonable rates and terms to meet actual needs.
- Not be delinquent on any federal debts.

What can I purchase with operating loans?

[Farm Operating Loans](#) are traditionally used for purchasing capital items such as farm machinery, equipment, or livestock. Loan funds can also be used to help pay typical operating expenses for farming and ranching operations. For example, a rancher may use an operating loan to purchase forage for his cattle to feed them through the winter or a row crop producer may use an operating loan for paying for inputs like seed or fertilizer.

What is the maximum loan amount and terms?

The maximum loan amount for a Direct Farm Operating Loan is \$400,000. Direct loans are made and serviced by FSA.

Producers can also apply for [Guaranteed Operating Loans](#) that are made by your commercial lender, and guaranteed against loss by FSA. The maximum loan amount for a Guaranteed Farm Operating Loan is \$1,825,000. Loan terms for operating loans range from one to seven years.

How do I apply?

If you're interested in applying for a farm loan, you can pick up an application by visiting your local FSA office. Visit farmers.gov to find the USDA Service Center nearest you.

When applying for a loan, you will need a business plan, which must include:

- Your mission, vision, and goals for your farm or ranch.
- Your current assets and liabilities.
- Marketing Plan (what your operation will produce and where you will market and sell your products.)
- Whether the amount of income your operation generates will be enough to pay your business and family living expenses.

When should I apply for an operating loan?

I would recommend beginning the application process a few months in advance of needing the funds to allow time for the request to be processed, and for any necessary security checks and searches to be completed. That allows time for the funds to be available for your use when most needed.

Where can I find more information?

To learn more about FSA loans visit farmers.gov/loans or fsa.usda.gov/farmloans. Fact sheets and application packages are also available at your USDA Service Center. To learn more about other types of FSA loans or to find the right loan for your operation, use the Farm Loan Discovery Tool by visiting farmers.gov/loans/farm-loan-discovery-tool.
