

Yield Adjustment Factor

Owners will have a 1-time opportunity in 2020 to update PLC yields of covered commodity base crops on their farm, regardless of program election. The updated yield will be equal to 90% of the producer's average yield per planted acre in crop years 2013-2017, subject to the ratio obtained by dividing the 2008-2012 average national yield by the 2013-2017 average national yield for the covered commodity.

That factor has been computed and is shown in the table below.

Covered Commodity	National Yield Factor	Covered Commodity	National Yield Factor	Covered Commodity	National Yield Factor
Barley	0.9437	Lentils	1.0000	Rice, Temp Japonica	0.9591
