Farm Service Agency

Notice of Funds Availability (NOFA) Inviting Applications for the Implementation of an American Indian Credit Outreach Initiative

AGENCY: Farm Service Agency, USDA.

ACTION: Notice.

SUMMARY: The Farm Service Agency (FSA) soliciting applications for competitive cooperative agreement funds for Fiscal Year (FY) 2007 to initiate a credit outreach initiative targeted to American Indian farmers, ranchers and youth residing primarily on Indian reservations within the contiguous United States. FSA anticipates the availability of \$1,166,400 in funding. FSA requests proposals from eligible 501(c)(3) nonprofit organizations, land-grant institutions and federally-recognized Indian tribal governments interested in a competitively-awarded cooperative agreement to create and implement a mechanism that will provide credit outreach and promotion, pre-loan education, one-on-one loan application preparation assistance and other related services as proposed by the successful applicant that are specific to FSA's Agricultural Credit Programs.

The successful applicant must provide evidence that it has the capability to put in place a data tracking system that thoroughly records all credit outreach-specific related activities and has the ability to provide detailed statistical information on an ad hoc basis. This database must also be functional on a real-time basis as well as being available online through the Internet.

This request for proposals is made prior to passage of a final appropriations bill to allow applicants sufficient time to submit proposals, give the Agency maximum time to process applications, and permit continuity of this program. If actual funding differs from that anticipated (\$1,166,400) based on

historical funding levels, then the Agency will publish a separate Notice of Funds Availability.

DATES: Applications should be completed and submitted as soon as possible, and must be received by the Agency no later than November 24, 2006. Late applications will not be accepted and will be returned to the applicant. Applicants must ensure that the service they use to deliver their applications can do so by the deadline. Due to recent security concerns, packages sent to the Agency by mail have been delayed several days or even weeks.

ADDRESSES: Submit proposals and other required materials to Mike Hill, Acting Director, Outreach Staff, Farm Service Agency, USDA, STOP 0511, Suite 508 Portals Building, 1400 Independence Avenue, SW., Washington, DC 20250-0511.

Mike Hill at (202) 690-1299, or at mike.hill@wdc.usda.gov.

SUPPLEMENTARY INFORMATION:

Objective

This solicitation is issued pursuant to 7 U.S.C. 2204b(b)(4) authorizing the Secretary of Agriculture to enter into cooperative agreements to improve the coordination and effectiveness of Federal programs affecting rural areas. The principal objective of this cooperative agreement is to initiate a national outreach program that enables American Indian farmers, ranchers, and youth primarily located on Indian reservations in the contiguous United States to understand and have access to the various FSA Agriculture Credit Programs. All proposed approaches must have, within three months upon acceptance of award: (1) A data tracking system that thoroughly records all credit outreach specific activities and has the ability to provide detailed statistical information on an ad hoc basis, that must also be functional on a real-time basis as well as being available online through the Internet, and (2) the applicant must demonstrate its ability to learn to deliver these credit outreach services utilizing the FSA online Farm Business Plan software program.

Proposals should demonstrate innovative and unique ways of ensuring that American Indians: (1) Will be provided a targeted promotional campaign about, (2) have ready access to, (3) are educated about and (4) can obtain one-on-one assistance specific to the various FSA Agricultural Credit Programs. Applicants must also demonstrate and provide evidence of their ability to record and track

program-specific data which can be accessed on a real-time basis and be available online through the Internet.

Background

Today, American Indians own and control approximately 56 million acres of agricultural lands held in trust by the United States Government and administered, for the most part, by the Bureau of Indian Affairs (BIA) of the Department of the Interior. Land-based agricultural enterprises are considered the primary source of revenue for most tribes, due in large part to their severe isolation from any urban type industrial development activities. Thus, protecting this resource is an important function of the elected tribal officials charged with operating business activities that take place within reservations.

In the late 1800's the United States Government recognized the significant needs of agriculture, the agricultural community, and the impacts they had on the American economy and the world as a whole. With this in mind, the government created the United States Department of Agriculture (USDA) to insure a safe, reliable, and cheap supply of food for this country and ultimately the world. The USDA provides farmers and ranchers technical, financial, and educational resources.

Until 1987, American Indian agricultural producers on reservations had been less able to benefit from USDA services. Since 1987, changes, such as Farm Bills with Indian-specific language, have begun to close some of the gaps in American Indians' lack of access to USDA's programs and services. As positive as these changes were, they did not fully address an implementation plan or the funds to implement sorely needed agribusiness education and direct services to American Indian Reservation farmers and ranchers as a group.

On May 13, 2002, President Bush signed into law the "Farm Security and Rural Investment Act of 2002" (2002-Farm Bill). Again, American Indian Reservation farmers and ranchers are faced with the challenge of understanding and accessing the programs and services afforded through this new law. With this in mind, American Indian agribusinesses, as well as individual Indians, have consistently reported that the primary need in Indian agriculture was access to the capital required to own and operate their own farm or ranch. Therefore, FSA has undertaken this initiative to create and implement a mechanism that will provide credit outreach and other related services related to FSA's Agricultural Credit Programs as a way to

resolve some of the credit needs of Indian agriculture.

Natural Resources Conservation Service

Environmental Assessment; Rehabilitation of Grade Stabilization Structure 2, Turtle Creek Watershed, Sary County NE

AGENCY: Natural Resources Conservation Service, USDA.

ACTION: Notice of Availability, Finding of No Significant Impact.

SUMMARY: The Natural Resources Conservation Service (NRCS) prepared an Environmental Assessment in compliance with the National Environmental Policy Act (NEPA), as amended. Pursuant to the implementing regulations for NEPA (40 CFR parts 1500-1508); the USDA Departmental Policy for the NEPA (7 CFR part 1b); the Natural Resources Conservation Service Regulations (7 CFR part 650); and the Natural Resources Conservation Service policy (General Manual Title 190, Part 410); the Natural Resources Conservation Service gives notice that an environmental impact statement is not being prepared for the rehabilitation of grade stabilization Structure 2 in Turtle Creek Watershed, Sary County Nebraska. The Environmental Assessment was developed in coordination with the sponsoring local organization (Papio-Missouri River Natural Resources District) for a federally assisted action to address grade stabilization in the Turtle Creek Watershed and the status of grade stabilization dam Structure 2. Upon consideration of the affected environment, alternatives, environmental consequences, and comments and coordination with concerned public and agencies, the State Conservationist for NRCS, Nebraska found that based on the significance and context and intensity that the proposed action is not a major federal action significantly affecting the quality of the human environment. Thus, a Finding of No Significant Impact (FONSI) was made.

FOR FURTHER INFORMATION CONTACT: Stephen K. Chick, State Conservationist, U.S. Department of Agriculture, Natural Resources Conservation Service, Federal Building, Room 152, 100 Centennial

Mall North, Lincoln, Nebraska 68508-3866; telephone (402) 437-5300.

SUPPLEMENTARY INFORMATION: The sponsoring local organization concurs with this determination and agrees with carrying forward the proposed project. Structure 2 no longer meets the NRCS safety and performance standards for a High Hazard Class structure. The proposed action is to rehabilitate Structure 2 to a full-flow grade stabilization structure, meet safety requirements, and extend its life for 100 years. The existing principal spillway would be removed, the auxiliary spillway would be abandoned, the top of dam would be lowered to remove storage capacity and a broad-crested weir chute spillway would be built. Existing embankment removed from the structure would be placed in the existing auxiliary spillway and graded to drain.

Information regarding this finding may be obtained at the contact information listed above. No administrative action on implementation of the proposed funding action will be taken until 30 days after the date of this publication in the **Federal Register**.
