USDA Implements Farm Storage Facility Loan Program

(Bozeman, MT), Aug. 19, 2009 – Bruce Nelson, State Executive Director of USDA's Farm Service Agency in Montana announced that changes to the Farm Storage Facility Loan (FSFL) program have been implemented in accordance with the 2008 Farm Bill. The USDA Farm Service Agency (FSA) administers FSFL on behalf of the USDA Commodity Credit Corporation (CCC).

"This program helps to ensure that producers have adequate capacity to store their harvested production until they sell it on the open market," said Nelson. "USDA is committed to providing the necessary resources to keep producers financially solvent before, during and after each crop year."

The FSFL Program provides low-interest financing for producers of eligible commodities to build or upgrade farm storage and handling facilities. The maximum principal amount of a loan through FSFL is \$500,000. Participants are required to provide a down payment of 15 percent, with CCC providing a loan for the remaining 85 percent of the net cost of the eligible storage facility and permanent drying and handling equipment. Loan terms of seven, 10 or 12 years are available depending on the amount of the loan. Interest rates for each term may be different and are based on the rate which CCC borrows from the Treasury Department.

Partial funding can be made after a portion of the construction has been completed. The final fund disbursement will be made when all construction is completed. The maximum amount of the partial disbursement will be 50 percent of the projected and approved total loan amount.

Applications for FSFL must be submitted to the FSA county office that maintains the farm's records. An FSFL must be approved before any site preparation or construction can begin.
