NONINSURED CROP DISASTER ASSISTANCE PROGRAM (NAP)

NAP covers losses to crops not covered by Federal Crop Insurance. Coverage is for rangeland, vegetables, hay crops, etc. To be eligible for NAP, you need to do the following:

Report crop acres to our office by no later than July 15.

Please be aware that State Committee Policy states that Notice of Loss (CCC-576) must be filed within 15 calendar days after disaster occurred or damage to crop becomes apparent. Failure to report timely will result in a loss of benefits.

Your crop loss must be greater than 50% of expected yield and you will be paid on 55% of the county price.

An appraisal must be completed prior to destroying the crop or putting the crop to another use. Contact this office for an appraisal.

The cost will be \$100 per crop unit not to exceed \$300 per county per producer. There is a \$900 maximum per producer.

Keep in mind, if you purchased NAP coverage, cattle must be kept out of hay fields from June 1 through September 30, to allow hay to grow and to be harvested.

Please review the **attached** page showing application closing dates for the various crops covered under the NAP.

IMPORTANT INFORMATION: If you applied for the Crop Disaster Program (CDP), and received payments, you are **REQUIRED** to purchase NAP coverage for the next two subsequent years for such crop(s).

Also, if you intend to have your cattle graze your hay field (s) instead of cutting the hay, before doing so, you will need to write a letter which will have to state that you are aware that you need to leave 8' by 8' representative samples **PER** field and an appraisal is required at the time of the normal final harvest date, unless sufficient representative samples are placed in each field that is to be grazed. Representative samples required need to be 8' by 8' **PER** field. The total amount of representative samples needed depend on the number of acres on each field.

ACRES IN FIELD OR SUBFIELD	MINIMUM NUMBER OF SAMPLES NEEDED
0.1 - 10.0 acres	3
10.1 - 40.0 acres	4

Add one additional sample for each additional 40.0 acres (or fraction thereof) in the field or subfield.

Please be sure to turn in your acceptable records of hay production, in writing, as soon as you finish harvesting your crops. Producers are responsible for reporting production on all NAP crops. If you do not report your production, your yields will be lowered and this will reflect on any applicable NAP payments. Continuity of records is required when calculating an approved yield. The records must be consecutive, without breaks.

If you are interested in applying for assistance, or would like more information, you may come by this office at 424F South Riverside Drive or contact this office by calling (505) 753-3508 Ext. 2, for an appointment.
