Farm Program

Reporting Organic Crops

Producers who want to use the Noninsured Crop Disaster Assistance Program (NAP) organic price and selected the "organic" option on their NAP application must report their crops as organic.

When certifying organic acres, the buffer zone acreage must be included in the organic acreage.

Producers must also provide a current organic plan, organic certificate or documentation from a certifying agent indicating an organic plan is in effect. Documentation must include:

- name of certified individuals
- address
- telephone number
- effective date of certification
- certificate number
- list of commodities certified
- name and address of certifying agent
- a map showing the specific location of each field of certified organic, including the buffer zone acreage

Certification exemptions are available for producers whose annual gross agricultural income from organic sales totals \$5,000 or less. Although exempt growers are not required to provide a written certificate, they are still required to provide a map showing the

Tom Hockert

specific location of each field of certified organic, transitional and buffer zone acreage.

Farm Loans

Justin Teuton

For questions about reporting organic crops, contact your local FSA office. To find your local office, visit <http://offices.usda.gov>.

Please contact your local FSA Office for questions specific to your operation or county.

Farmers to Receive Documentation of USDA Services

Local Offices Issue Receipts for Services Provided

Farm Service Agency (FSA) reminds agricultural producers that FSA provides a receipt to customers who request or receive assistance or information on FSA programs.

As part of FSA's mission to provide enhanced customer service, producers who visit FSA will receive documentation of services requested and provided. From December through June, FSA issued more than 327,000 electronic receipts.

The 2014 Farm Bill requires a receipt to be issued for any agricultural program assistance requested from FSA, the Natural Resources Conservation Service (NRCS) and Rural Development (RD). Receipts include the date, summary of the visit and any agricultural information, program and/or loan assistance provided to an individual or entity.

In some cases, a form or document – such as a completed and signed program enrollment form – serve as the customer receipt instead of a printed or electronic receipt. A service is any information, program or loan assistance provided whether through a visit, email, fax or letter.

To learn more about FSA, visit www.fsa.usda.gov or to find your local USDA office, visit <http://offices.usda.gov>.

USDA Energy Biomass Retrieval Incentives Started June 30

Owners of Forestry and Farm Residues Can Apply for Biomass Crop Assistance Program

The USDA Farm Service Agency (FSA) began accepting applications on June 30, 2015, from foresters and farmers seeking financial assistance to harvest and deliver biomass to generate clean energy. The support comes through the Biomass Crop Assistance Program (BCAP), which was re-authorized by the 2014 Farm Bill.

Applications for BCAP Matching Payments will continue to be accepted through September 4, 2015 for Fiscal Year 2015. Eligible Material Owners are encouraged to visit their local FSA County Office to initiate the application for BCAP Matching Payments.

For 2015, USDA has reserved up to \$11.5 million to assist with the cost of removing woody or herbaceous residues from farm fields or national forests and woodlands for delivery to energy generation facilities. A majority of the funds are expected to support the removal of dead or diseased trees from National Forest and Bureau of Land Management public lands. Orchard wastes, and agriculture residues such as corn cobs and stalks, also qualify as energy-producing feedstock.

To be eligible for the retrieval incentives, the biomass must be delivered to FSA-approved biomass conversion facilities. For a list of approved facilities, visit www.fsa.usda.gov/bcap.

The Biomass Crop Assistance Program also provides financial assistance to farmers and ranchers who produce new sources of energy biomass by growing eligible crops on contract acres within

approved BCAP project areas. Funding for this portion of the program, known as Project Areas, will be announced later this summer. In addition, FSA is preparing an environmental review of BCAP and has proposed improvements to Project Area requirements, including crop eligibility, contract duration, and processes to offset the lack of biomass insurance. Interested stakeholders may attend the public education meetings at the locations listed below.

- July 14, 2015 - Sacramento, California
- July 15, 2015 - Honolulu, Hawaii
- August 3, 2015 - Raleigh, North Carolina
- August 4, 2015 - Orlando, Florida
- August 5, 2015 - Sioux City, Iowa

For more details on the environmental review, proposed changes to BCAP, and meeting locations, visit www.bcappeis.com, www.fsa.usda.gov/bcap or contact your local FSA county office. To find your local FSA county office, visit <http://offices.usda.gov>.

Enrollment for 2016 Dairy Margin Protection Program Started July 1

FSA today announced that as of July 1, 2015, dairy farmers can enroll in [Margin Protection Program for coverage in 2016](#). The voluntary program, established by the 2014 Farm Bill, provides financial assistance to participating dairy operations when the margin – the difference between the price of milk and feed costs – falls below the coverage level selected by the farmer.

The Margin Protection Program gives participating dairy producers the flexibility to select coverage levels best suited for their operation. Enrollment begins July 1 and ends on Sept. 30, 2015, for coverage in 2016. Participating farmers will remain in the program through 2018 and pay a \$100 administrative fee each year. Producers also have the option of selecting a different coverage level during open enrollment each year. Margin Protection Program payments are based on an operation's historical production. An operation's historical production will increase by 2.61 percent in 2016 if the operation participated in 2015, providing a stronger safety net.

USDA also has an online resource available to help dairy producers decide which level of coverage will provide them with the strongest safety net under a variety of conditions. The enhanced Web tool, available at www.fsa.usda.gov/mpptool, allows dairy farmers to quickly and easily combine their unique operation data and other key variables to calculate their coverage needs based on price projections. Producers can also review historical data or estimate future coverage based on data projections. The secure site can be accessed via computer, mobile phone, or tablet, 24 hours a day, seven days a week.

Dairy operations enrolling in the program must meet conservation compliance provisions. Producers participating in the Livestock Gross Margin insurance program may register for the Margin Protection Program, but this new margin program will only begin once their livestock dairy insurance coverage has ended. Producers must also submit form CCC-782 for 2016, confirming their Margin Protection Program coverage level selection, to the local Farm Service Agency (FSA) office. If electing higher coverage for 2016, dairy producers can either pay the premium in full at the time of enrollment or pay a minimum of 25 percent of the premium by Feb. 1, 2016.

For more information, visit FSA online at www.fsa.usda.gov/dairy for more information, or stop by a local FSA office to learn more about the Margin Protection Program. To find a local FSA office in your area, visit <http://offices.usda.gov>.

USDA Opens Enrollment Period for Agriculture Risk Coverage and Price Loss Coverage Safety-Net Programs

U.S. Department of Agriculture (USDA) announced that eligible producers may now formally enroll in the Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC) programs for 2014 and 2015. The enrollment period began June 17, 2015, and will end Sept. 30, 2015.

The new programs, established by the 2014 Farm Bill, trigger financial protections for agricultural producers when market forces cause substantial drops in crop prices or revenues. More than 1.76

million farmers have elected ARC or PLC. Previously, 1.7 million producers had enrolled to receive direct payments (the program replaced with ARC and PLC by the 2014 Farm Bill). This means more farms have elected ARC or PLC than previously enrolled under previously administered programs.

Nationwide, 96 percent of soybean farms, 91 percent of corn farms, and 66 percent of wheat farms elected ARC. 99 percent of long grain rice farms, 99 percent of peanut farms, and 94 percent of medium grain rice farms elected PLC. For data about other crops and state-by-state program election results go to www.fsa.usda.gov/arc-plc.

Covered commodities under ARC and PLC include barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium grain rice (which includes short grain and sweet rice), safflower seed, sesame, soybeans, sunflower seed and wheat. Upland cotton is no longer a covered commodity.

For more information please contact your local FSA office <https://offices.usda.gov>.

USDA Begins Accepting Applications from States for \$100 Million Biofuels Infrastructure Partnership

Following an announcement by the U.S. Department of Agriculture (USDA) Secretary Tom Vilsack on May 29, 2015, the Commodity Credit Corporation (CCC) announced that all 50 states, the Commonwealth of Puerto Rico and Washington, D.C. may now apply for up to \$100 million in grants under the [Biofuels Infrastructure Partnership](#) (BIP). The funding is to support the infrastructure needed to make more renewable fuel options available to American consumers. The Farm Service Agency will administer BIP.

USDA continues to aggressively pursue investments in American-grown renewable energy to create new markets for U.S. farmers and ranchers, help Americans save money on their energy bills, support America's clean energy economy, cut carbon pollution and reduce dependence on foreign oil and costly fossil fuels. A typical gas pump delivers fuel with 10 percent ethanol, which limits the amount of renewable energy most consumers can purchase at the pump.

Through BIP, USDA will award competitive grants, matched by states, to expand the infrastructure for distribution of higher blends of renewable fuel. These competitive grants are available to assist states, the Commonwealth of Puerto Rico and Washington, D.C. with infrastructure funding. States that offer funding equal to or greater than that provided by the federal government will receive higher consideration for grant funds. States may work with private entities to enhance their offer.

CCC funds must be used to pay a portion of the costs related to the installation of fuel pumps and related infrastructure dedicated to the distribution of higher ethanol blends, for example E15 and E85, at vehicle fueling locations. The matching contributions may be used for these items or for related costs such as additional infrastructure to support pumps, marketing, education, data collection, program evaluation and administrative costs.

This new investment seeks to double the number of fuel pumps capable of supplying higher blends of renewable fuel to consumers. This will expand markets for farmers, support rural economic growth and the jobs that come with it, and ultimately give consumers more choices at the pump.

Applications must be submitted by July 15, 2015, using www.grants.gov. To locate, search by funding opportunity number "USDA-FSA-2015-22."

2015 Acreage Reporting Dates

In order to comply with FSA program eligibility requirements, all producers are encouraged to visit their local FSA office to file an accurate crop certification report by the applicable deadline.

Acreage reporting dates vary by crop and by county so please contact your local FSA office for a list of county-specific deadlines.

The following exceptions apply to acreage reporting dates:

- If the crop has not been planted by the applicable acreage reporting date, then the acreage

must be reported no later than 15 calendar days after planting is completed.

- If a producer acquires additional acreage after the applicable acreage reporting date, then the acreage must be reported no later than 30 calendar days after purchase or acquiring the lease. Appropriate documentation must be provided to the county office.
- If a perennial forage crop is reported with the intended use of “cover only,” “green manure,” “left standing,” or “seed,” then the acreage must be reported by July 15th.

Noninsured Crop Disaster Assistance Program (NAP) policy holders should note that the acreage reporting date for NAP covered crops is the earlier of the applicable dates or 15 calendar days before grazing or harvesting of the crop begins.

For questions regarding crop certification and crop loss reports, please contact your local FSA office.

USDA Packages Disaster Protection with Loans to Benefit Specialty Crop and Diversified Producers

Free basic coverage and discounted premiums available for new and underserved loan applicants

U.S. Department of Agriculture (USDA) Farm Service Agency (FSA) announced that producers who apply for FSA farm loans also will be offered the opportunity to enroll in new disaster loss protections created by the 2014 Farm Bill. The new coverage, available from the Noninsured Crop Disaster Assistance Program (NAP), is available to FSA loan applicants who grow non-insurable crops, so this is especially important to fruit and vegetable producers and other specialty crop growers.

New, underserved and limited income specialty growers who apply for farm loans could qualify for basic loss coverage at no cost, or higher coverage for a discounted premium.

The basic disaster coverage protects at 55 percent of the market price for crop losses that exceed 50 percent of production. Covered crops include “specialty” crops, for instance, vegetables, fruits, mushrooms, floriculture, ornamental nursery, aquaculture, turf grass, ginseng, honey, syrup, hay, forage, grazing and energy crops. FSA allows beginning, underserved or limited income producers to obtain NAP coverage up to 90 days after the normal application closing date when they also apply for FSA credit.

In addition to free basic coverage, beginning, underserved or limited income producers are eligible for a 50 percent discount on premiums for the higher levels of coverage that protect up to 65 percent of expected production at 100 percent of the average market price. Producers also may work with FSA to protect value-added production, such as organic or direct market crops, at their fair market value in those markets. Targeted underserved groups eligible for free or discounted coverage are American Indians or Alaskan Natives, Asians, Blacks or African Americans, Native Hawaiians or other Pacific Islanders, Hispanics, and women.

FSA offers a variety of loan products, including farm ownership loans, operating loans and microloans that have a streamlined application process.

Growers need not apply for an FSA loan, nor be a beginning, limited resource, or underserved farmer, to be eligible for Noninsured Crop Disaster Assistance Program assistance. To learn more, visit www.fsa.usda.gov/nap or www.fsa.usda.gov/farmloans, or contact your local FSA office at <https://offices.usda.gov>.

Agricultural Producers in Florida Still Have Time to Apply for Direct Farm Ownership Loan Program

Low-Interest Loans Can Help Producers Start or Expand Farms

The U.S. Department of Agriculture (USDA) Florida Farm Service Agency (FSA) announced that farmers and ranchers still have time to apply for low interest loans available through the FSA direct farm ownership program. Applications must be approved by Sept. 30, 2015, to take advantage of

the funding available.

Eligible farmers and ranchers can borrow up to \$300,000 to buy farmland, construct or repair buildings, pay closing costs, or promote soil and water conservation. The interest rate can be as low as 1.5 percent with up to 40 years to repay.

New farmers and ranchers, military veterans, and underserved farmers and ranchers also are encouraged to apply. Each year Congress targets 80 percent of available loan funds to beginning and targeted underserved farmers and ranchers. Targeted underserved groups include American Indians or Alaskan Natives, Asians, Blacks or African Americans, Native Hawaiians, or other Pacific Islanders, Hispanics and women.

For more information about farm loan, visit www.fsa.usda.gov/farmloans, or contact your local FSA office. To find your local FSA county office, visit <https://offices.usda.gov>.
