USDA Extends Application Deadline for Dairy Margin Protection Program to Dec. 19

Dairy producers urged to act now to protect their businesses against unpredictable market swings, take advantage of increased protections offered in first year of program

The application deadline for the dairy Margin Protection Program (MPP) will be extended until Dec. 19, 2014. The program, established by the 2014 Farm Bill, protects participating dairy producers when the margin – the difference between the price of milk and feed costs – falls below levels of protection selected by the applicant.

For just \$100, a farmer can cover 90 percent of production at \$4 margin swings, and with affordable incremental premiums, dairy farmers can cover up to \$8 margin swings. Those who

Please contact your local FSA Office for questions specific to your operation or county.

apply this year will receive a slight increase in production protection that will not be available in the future. Farmers who do not sign up for the Margin Protection Program for 2015 will forfeit the 1 percent base production increase.

Producers can use the online Web resource at www.fsa.usda.gov/mpptool to calculate the best levels of coverage for their dairy operation. They can type in specific operation data and explore price projections and market scenarios to determine what level of coverage is best for them. The online resource is on a secure website that can be accessed from computers, mobile phones or tablets, 24 hours a day, seven days a week.

Farmers also have a chance to share comments and help shape the Margin Protection Program for the future. Last month, the U.S. Department of Agriculture (USDA) announced the extension of the opportunity for public comments on both the Margin Protection Program and the Dairy Product Donation Program until Dec. 15, 2014. Comments can be submitted to USDA via the regulations.gov website at <http://go.usa.gov/GJSA> or send them by mail to: Danielle Cooke, Special Programs Manager, Price Support Division, FSA, USDA, STOP 0512, 1400 Independence Ave. SW, Washington, D.C., 20250-0512.

To learn more about the Margin Protection Program for dairy, contact your local USDA Farm Service Agency county office at offices.usda.gov or visit us on the Web at www.fsa.usda.gov.

USDA Disaster Assistance to Help Thousands of Honeybee, Livestock and Farm-Raised Fish Producers

2014 Farm Bill Program Offers Producers in Over 40 States Relief for 2012 and 2013 Losses

Nearly 2,500 applicants will receive disaster assistance through the Emergency Assistance for Livestock, Honeybees, and Farm-Raised Fish Program (ELAP) for losses suffered from Oct. 1, 2011, through Sept. 30, 2013. These payments are being issued for applications that were filed during the 2012 and 2013 ELAP sign-up period that ended last August.

The program, re-authorized by the 2014 Farm Bill, provides disaster relief to livestock, honeybee, and farm-raised fish producers not covered by other agricultural disaster assistance programs. Eligible losses may include excessive heat or winds, flooding, blizzards, hail, wildfires, lightning strikes, volcanic eruptions, and diseases, or in the case of honeybees, losses due to colony collapse disorder. Beekeepers, most of whom suffered honeybee colony losses, represent more than half of ELAP recipients.

The Farm Bill caps ELAP disaster funding at \$20 million per federal fiscal year. To accommodate

the number of requests, which exceeded funds available for each of the affected years, payments will be reduced to ensure that all eligible applicants receive a prorated share of assistance.

The following ELAP Fact Sheets (by topic) are available online:

- ELAP for Farm-Raised Fish Fact Sheet
- ELAP for Livestock Fact Sheet
- ELAP for Honeybees Fact Sheet

To view these and other FSA program fact sheets, visit the FSA fact sheet web page at www.fsa.usda.gov/factsheets.

Coverage Selection for New 2014 Farm Bill Safety Net Programs Began Nov. 17

Farm owners and producers are reminded that the opportunity to choose between the new 2014 Farm Bill established programs, Agriculture Risk Coverage (ARC) and Price Loss Coverage (PLC), began Nov. 17, 2014, and continues through March 31, 2015. The new programs, designed to help producers better manage risk, usher in one of the most significant reforms to U.S. farm programs in decades.

USDA helped create online tools to assist in the decision process, allowing farm owners and producers to enter information about their operation and see projections that show what ARC and/or PLC will mean for them under possible future scenarios. Farm owners and producers can access the online resources, available at www.fsa.usda.gov/arc-plc, from the convenience of their home computer or mobile device at any time.

Covered commodities include barley, canola, large and small chickpeas, corn, crambe, flaxseed, grain sorghum, lentils, mustard seed, oats, peanuts, dry peas, rapeseed, long grain rice, medium grain rice (which includes short grain rice), safflower seed, sesame, soybeans, sunflower seed and wheat. Upland cotton is no longer a covered commodity.

Dates associated with ARC and PLC that farm owners and producers need to know:

- Now through Feb. 27, 2015: Farm owners may visit their local Farm Service Agency office to update yield history and/or reallocate base acres.
- Nov. 17, 2014 to March 31, 2015: Producers make a one-time election between ARC and PLC for the 2014 through 2018 crop years.
- Mid-April 2015 through summer 2015: Producers sign contracts for 2014 and 2015 crop years.
- October 2015: Payments issued for 2014 crop year, if needed.

To learn more about which safety net options are most appropriate for specific farming operations, farmers can use new Web tools at www.fsa.usda.gov/arc-plc, which can be accessed from the convenience of a home computer or a mobile device at any time. To learn more about upcoming educational meetings, farmers can contact their local Farm Service Agency county office at

<http://offices.sc.egov.usda.gov/locator/app>.

USDA Reminds Farmers of 2014 Farm Bill Conservation Compliance Changes

The 2014 Farm Bill implements a change that requires farmers to have a Highly Erodible Land Conservation and Wetland Conservation Certification (AD-1026) on file.

For farmers to be eligible for premium support on their federal crop insurance, a completed and signed AD-1026 certification form must be on file with the FSA. The Risk Management Agency (RMA), through the Federal Crop Insurance Corporation (FCIC), manages the federal crop insurance program that provides the modern farm safety net for American farmers and ranchers.

Since enactment of the 1985 Farm Bill, eligibility for most commodity, disaster, and conservation programs has been linked to compliance with the highly erodible land conservation and wetland conservation provisions. The 2014 Farm Bill continues the requirement that producers adhere to conservation compliance guidelines to be eligible for most programs administered by FSA and NRCS. This includes most financial assistance such as the new price and revenue protection programs, the Conservation Reserve Program, the Livestock Disaster Assistance programs and Marketing Assistance Loans and most programs implemented by FSA. It also includes the Environmental Quality Incentives Program, the Conservation Stewardship Program, and other conservation programs implemented by NRCS.

Many FSA and Natural Resource Conservation (NRCS) programs already have implemented this requirement and therefore most producers should already have an AD-1026 form on file for their associated lands. If however an AD-1026 form has not been filed or is incomplete then farmers are reminded of the deadline of June 1, 2015.

When a farmer completes and submits the AD-1026 certification form, FSA and NRCS staff will review the associated farm records and outline any additional actions that may be required to meet the required compliance with the conservation compliance provisions.

FSA recently released a revised form AD-1026, which is available at USDA Service Centers and online at: www.fsa.usda.gov. USDA will publish a rule later this year that will provide details outlining the connection of conservation compliance with crop insurance premium support. Producers can also contact their local USDA Service Center for information. A listing of service center locations is available at www.nrcs.usda.gov/wps/portal/nrcs/main/national/contact/local/.

2015 ACREAGE REPORTING DATES

In order to comply with FSA program eligibility requirements, all producers are encouraged to visit their local County FSA office to file an accurate crop certification report by the applicable deadline.

The following acreage reporting dates are applicable for the entire state of Georgia:

January 2, 2015: Honey (for NAP coverage) and Honeybee colonies/hives (for ELAP)

January 15, 2015: Apples, Blueberries, Canola, Peaches, and ALL winter-seeded Small Grains

Crops reported after the reporting deadline for that crop will be assessed a “late fee.”

The following exceptions apply to the above acreage reporting dates:

- If a crop has not been planted by the above acreage reporting date, then the acreage must be reported no later than 15 calendar days after planting is completed.
- If a producer acquires additional acreage after the above acreage reporting date, then the acreage must be reported no later than 30 calendar days after purchase or acquiring the lease. Appropriate documentation must be provided to the county office.
- If a perennial forage crop is reported with the intended use of “cover only,” “green manure,” “left standing,” or “seed,” then the acreage must be reported by July 15th.

Noninsured Crop Disaster Assistance Program (NAP) policy holders should note that the acreage reporting date for NAP covered crops is the earlier of the dates listed above or 15 calendar days before grazing or harvesting of the crop begins.

For questions regarding crop certification and crop loss reports, please contact your local FSA office.

Making Decisions and Understanding the 2014 Farm Bill

A series of meetings to provide information and analysis to assist producers and landowners understanding what's required and make decisions. Meetings will be conducted by University of Georgia agricultural economists Nathan Smith and Don Schurley, the USDA Farm Farm Service Agency, and the USDA Risk Management Agency. Questions and answers and discussion will be included.

Topics to be covered include: (1) Decisions to be made, who makes them, and the timeline; multiple owner and producer issues. (2) Opportunity to update Payment Yields; how it's done (3) Crop History; opportunity to reallocate Base acres; how reallocation works (4) Choosing between PLC and ARC; how each works and how they compare (5) Generic Base; assigning "covered commodities" to Generic Base (6) STAX-the new safety net for cotton (7) Resources and decision-aids available to help make decisions.

Microloan Cap Grows to \$50,000

Farm Service Agency (FSA) reminds farmers and ranchers that the FSA borrowing limit for microloans increased from \$35,000 to \$50,000, effective Nov. 7. Microloans offer borrowers simplified lending with less paperwork.

The microloan change allows beginning, small and mid-sized farmers to access an additional \$15,000 in loans using a simplified application process with up to seven years to repay. Microloans are part of USDA's continued commitment to [small and midsized farming operations](#).

To complement the microloan program additional changes to FSA eligibility requirements will enhance beginning farmers and ranchers access to land, a key barrier to entry level producers. FSA policies related to farm experience have changed so that other types of skills may be considered to meet the direct farming experience required for farm ownership loan eligibility. Operation or management of non-farm businesses, leadership positions while serving in the military or advanced education in an agricultural field will now count towards the experience applicants need to show when applying for farm ownership loans.

Since 2010, FSA has made a record amount of farm loans — more than 165,000 loans totaling nearly \$23 billion. More than 50 percent of USDA's farm loans now go to beginning farmers. In addition, FSA has increased its lending to socially-disadvantaged producers by nearly 50 percent since 2010.

Please review the FSA [Microloan Program Fact Sheet](#) for program application, eligibility and related

information.

Sale of Land Under CRP Contract

This is a reminder for Conservation Reserve Program (CRP) participants who sell land under CRP contract to get a successor-in-interest to the contract. Failure to get the buyer to assume a contract will result in the original owner having to refund all CRP rental payments, cost share payments, incentive payments received on the contract, plus interest and liquidated damages. One way to prevent this from happening is to have a sales contract prepared that requires the new owner to assume the CRP contract.

Local county FSA committees have no authority but to terminate a CRP contract when the CRP participant loses control of the land and there is no successor-in-interest to the contract. Please call or visit your local County FSA Office before you sell land that is currently in a CRP contract.

Violations under CRP Contract Period

This is a reminder for Conservation Reserve Program (CRP) participants that land enrolled in the CRP program must follow the terms and conditions that were signed under the CRP-1 at the beginning of the contract period. Any violations such as harvesting trees, selling of land without county notification, enrolling into other Federal conservation programs, and so forth will result in termination of the CRP Contract and the owner having to refund all CRP rental payments, cost share payments, plus interest and liquidated damages.

If you have any issues with your CRP land, please call or visit your local FSA office first so that they are made aware of the situation and can act accordingly.

Boll Weevil Eradication Foundation Annual Meeting

The annual meeting of the Boll Weevil Eradication Foundation of Georgia, Inc. will be held on January 15, 2015 at 1:00 pm at the Holiday Inn Express, 1502 Sam Nunn Blvd., Perry, GA. The meeting is open to all cotton producers in Georgia. The purpose of the meeting will be to give an update on the program and assessment for the past 2014 season and the upcoming 2015 season. Please RSVP to 800-269-9926 or 229-469-4038.
