CRP Signup Ends April 15

Farmers and ranchers have until April 15 to enroll eligible land into the Conservation Reserve Program (CRP) during the general sign-up period, which opened earlier this month.

Contracts awarded under this sign-up are scheduled to become effective Oct. 1, 2011. Additionally, current CRP participants with contracts expiring this fall may make new contract offers.

FSA will evaluate and rank eligible CRP offers using an Environmental Benefits Index (EBI) that shows the wildlife, water, soil, and air benefits of enrolling the land in CRP. Decisions on the EBI cutoff will be made after the sign-up ends and after analyzing the EBI data of all the offers.

In addition to the general sign-up, CRP's continuous sign-up program will be ongoing. Continuous acres represent the most environmentally desirable and sensitive land. More information can be found online at: <http://www.fsa.usda.gov/crp>

ACRE

The optional ACRE program provides a safety net based on state revenue losses and acts in place of the price-based safety net of counter-cyclical payments under DCP. The sign up deadline is June 1, 2011. USDA will not accept any late-filed applications.

A farm's payment is based on a revenue guarantee calculated using a five year average state yield and the most recent two year national price for each eligible commodity. An ACRE payment is issued when both the state and the farm have incurred a revenue loss. Total number of planted acres for which a producer may receive ACRE payments may not exceed the total base on the farm. For participating in ACRE, in addition to not receiving counter-cyclical payments, a farm's direct payment is reduced by 20 percent and marketing loan rates are reduced by 30 percent. The decision to enroll in the ACRE program is irrevocable. The owner of the farm and all

producers on the farm must agree to enroll in ACRE. Once enrolled, the farm will remain in ACRE through the 2012 crop year. Although past rates are no guarantee of the future, in Idaho the following crops triggered for ACRE payments in 2009: Irrigated and non-irrigated Barley, non-irrigated oats, all yield Dry Peas, irrigated and non-irrigated wheat.

Conservation Reserve Enhancement Program

 submitted by Chuck Pentzer, Idaho Soil and Water Commission

The Idaho Eastern Snake Plain Aquifer Conservation Reserve Enhancement Program (CREP) is a federal-state cooperative conservation program that targets reducing groundwater consumptive use from cropland and marginal pastureland. Participants receive cost-share assistance and rental payments for the 15 year contract period in exchange for converting the enrolled land to native grasses, forbs, and shrubs improving soil quality, water retention and wildlife habitat. The water savings each year helps to reduce the stress on the demands of the aquifer. We encourage anyone interested in the program to contact either the Soil & Water Conservation (SWC) staff or their local Farm Service Agency (FSA) office.

- Annual rental rates range from \$124 to \$134 per acre depending upon location and type of irrigation system that will be retired. An additional \$30 incentive is offered for ground enrolled within the Idaho Ground Water Appropriators (IGWA) areas.
- Cost for establishment of native grasses varies depending upon individual locations and weather related challenges. Ground preparation, the cost of seed, seeding, chemical, clipping are all cost shared at an estimated 50% by FSA.

New changes to the program this past year include:

- Farmland with Non-Highly Erodible soils is now eligible for enrollment in the program.
- Eligibility dates for the program in regards to cropping history have changed from 1996-2001 to 2002-2007.

(See CREP Page 2)

Cold Storage Facility Loans

The Farm Storage Facility Loan program allows producers to build cold storage facilities to store their fresh fruits and vegetables. To be eligible, cold storage facilities must have a useful life of 15 years and include:

- New structures suitable for a cold storage facility;
- New walk-in, prefabricated, permanently-installed coolers suitable for storing fresh fruits and vegetables;
- New permanently affixed cooling, circulating and monitoring equipment;
- Electrical equipment integral to the proper operation of a cold storage facility;
- An addition or modification to an existing storage facility.

USDA will not make cold storage facility loans for portable structures, portable handling and cooling equipment, used or pre-owned structures, cooling equipment or structures deemed unsuitable.

The maximum loan amount for a Farm Storage Facility loan is \$500,000 per loan, which requires a down payment of at least 15 percent. Applications must be approved before construction can begin. Loan terms of seven, 10 or 12 years are available depending on the amount of the loan.

For more information on this program or other FSA farm programs please contact the local FSA county office or visit <http://www.fsa.usda.gov>.

Beginning and Limited Resource Loans

FSA has a program to assist beginning farmers and or members of socially disadvantaged groups to finance agricultural enterprises. Under these designated farm loan programs, FSA can provide financing to eligible applicants through either direct or guaranteed loans. FSA defines a beginning farmer as a person who:

- Has operated a farm for not more that 10 years
- Will materially and substantially participate in the operation of the farm
- Agrees to participate in a loan assessment, borrower training and financial management program sponsored by FSA
- Does not own a farm in excess of 30 percent of the county's median size.

Each member of an entity must meet the eligibility requirements. Loan approval is not guaranteed.

Additional program information is available at the local USDA Service Center or visit www.fsa.usda.gov and www.nrcs.usda.gov .

Farm Safety

Flowing grain in a storage bin or gravity-flow wagon is like quicksand, it can kill quickly. It takes less than five seconds for a person caught in flowing grain to be trapped.

The mechanical aspects of grain handling equipment, also presents a real danger. Augers, power take offs, and other moving parts can grab people or clothing.

These hazards, along with pinch points and missing shields, are dangerous enough for adults; not to mention children. It is always advisable to keep children a safe distance from operating farm equipment. Always use extra caution when backing or maneuvering farm machinery. Ensure everyone is visibly clear and accounted for before machinery is engaged. FSA wants all farmers to have a productive crop year that begins with putting safety first.

Join USDA and FSA in celebrating Earth Day 2011

April 22 marks Earth Day 2011. In recognition of the power of millions of individual actions, Earth Day 2011 will be organized around A Billion Acts of Green®: Personal, organizational and corporate pledges to live and act sustainably. The first Earth Day was celebrated on April 22, 1970. The passage of the landmark Clean Air Act, Clean Water Act, Endangered Species Act and many other groundbreaking environmental laws soon followed. The Earth Day Network (EDN) works with over 22,000 partners in 192 countries and more than 1 billion people now participate in Earth Day activities each year, making it the largest civic observance in the world.

For more information about Earth Day, visit www.earthday.org

SURE

The Supplemental Revenue Assistance Program (SURE) provides benefits for farm revenue losses due to natural disaster through Sept. 30, 2011. To be eligible for SURE payments, a producer is required to obtain crop insurance on all crops in all counties or, if crop insurance is not available, to participate in the Non-Insured Assistance Program (NAP). Grazed acreage is not eligible for the NAP program. Crop insurance or NAP coverage is no longer required for crops that are not of economic significance or those where the administrative fee required to buy NAP coverage exceeds 10 percent of the value of the coverage. See the local FSA office for details.

Farm Record Changes

June 1, 2011 is the deadline to provide changes to your farm records at the local FSA office for the 2011 crop year. If you are changing your operation entity type, adding or dropping cropland or farms, or adding entities to your operation, contact the FSA county office by June 1.

Selected Interest Rates for April 2011	
90-Day Treasury Bill	0.125%
Farm Operating - Direct	2.750%
Farm Ownership - Direct	5.000%
Conservation Loans	5.000%
Farm Ownership - Direct Down Payment, Beginning Farmer or Rancher	1.500%
Emergency	3.750%
Farm Storage Facility	2.750%
Sugar Storage Facility	4.000%
Commodity Loans 1996-Present	1.250%

Dates to Remember	
April 8	Asparagus Signup Ends
April 15	CRP General Signup Ends
June 1	Deadline for Farm Record Changes
June 1	ACRE Signup Ends
June 1	2011 DCP Enrollment Ends

USDA is an equal opportunity provider, lender and employer.
