**I Eligible Loss Conditions for Livestock Death Losses**

Eligible loss conditions for livestock death losses are loss conditions determined eligible by DAFP and **not** related to an eligible adverse weather event under LIP.

\*--Blue tongue and EHD are considered eligible loss conditions for white-tailed deer death losses only.--\*

DAFP may add additional eligible cause of losses for livestock death losses based on a recommendation from STC.

DAFP may add additional eligible cause of losses for honeybee colony and hive losses based on a recommendation from STC.

**830 Livestock Eligibility (Continued)****I Normal Grazing Periods for ELAP**

The normal grazing periods established for all pasture or grazing crop types for ELAP shall be the normal grazing periods established for all pasture or grazing crop types established for LFP according to subparagraph 410 M.

**J Grazing Loss**

For ELAP purposes, a grazing loss is based on the number of lost grazing days. This is the number of days the livestock producer had to remove his livestock from the eligible pasture or had to feed additional livestock feed above normal quantities, because of an eligible adverse weather event or eligible loss condition.

For 2012, 2013, and 2014 program year losses, eligible livestock producers must certify to the number of days grazing was lost because of an eligible adverse weather event or eligible loss condition.

For 2015 and subsequent program year losses, eligible livestock producers must provide verifiable or reliable documentation of either of the following:

- additional livestock feed fed above normal quantities, required to maintain the livestock until additional feed is available
- proof of removing the livestock from the effected pasture.

Verifiable records include records provided by the producer who may be verified by COC through an independent source and are used to substantiate that additional feed fed or proof of removing the livestock from the effected pasture.

If verifiable records do not exist, then reliable records must be considered acceptable, as determined by COC according to subparagraph 888 A. If documentation is not available or provided, COC may accept a producer's certification if other similar producers have comparable losses, as determined by COC.

**Important:** COC must follow procedure established in subparagraph 888 A when acting on supporting documentation, such as verifiable and reliable records and producer's certification statements.

**830 Livestock Eligibility (Continued)****K Proof of Death**

Participants must provide verifiable documentation of livestock deaths, including livestock that the participant claims died because of normal mortality. Adequate documentation must be provided that proves the death of eligible livestock occurred as a direct result of an eligible loss condition in the program year for which benefits are being requested, including deaths because of normal mortality.

\*--To be eligible for deer death losses because of blue tongue or EHD, the producer **must** provide acceptable documentation that proves:

- the death of eligible deer occurred as a direct result of blue tongue or EHD in the program year for which benefits are being requested, including deaths because of normal mortality
- appropriate steps were taken to implement insect control and prevention measures before and during the disease outbreak, that may include destroying insect habitat, using insecticides, or moving animals into barns during the insect peak activity time (dusk until dawn).--\*

See subparagraph 73 E for types of acceptable verifiable evidence of livestock death losses under LIP that also applies to livestock death losses under ELAP.

If adequate verifiable proof of death documentation is **not** available, including proof of death for normal mortality, the participant may provide reliable records, along with verifiable beginning and ending inventory records, as proof of death.

See subparagraph 73 F and H for types of reliable records and proof and reasonableness of livestock inventory under LIP that also apply to livestock death losses under ELAP.

See subparagraph 888 A on determining acceptable verifiable and reliable records.

**L Water Transporting Eligibility**

ELAP will cover the cost of transporting water as an eligible livestock feed cost **beginning on October 1, 2013** (2014 ELAP program year). The cost of transporting water includes costs associated with water transport equipment fees, labor, and contracted water transporting fees. Eligible drought is the only eligible adverse weather event eligible for water transporting.

**830 Livestock Eligibility (Continued)****M Documentation of Water Transporting**

Producers will have to show documentation that water was transported during the eligible drought to eligible livestock that are on eligible grazing land. Documentation must include the method used to transport water (personal labor/equipment, hired labor/rented equipment, or contracted water transportation service), the number of gallons of water transported and the number of eligible livestock the water was transported to. Acceptable documentation will include verifiable or reliable documentation.

Verifiable records include records provided by the producer who may be verified by COC through an independent source and are used to substantiate the amount of water transported. Verifiable records include but are not limited to the following:

- water bills/invoices
- hired labor receipts for transporting water
- contract receipts for transporting water.

Reliable records may be considered acceptable, as determined by COC. Reliable records may include but are not limited to the following:

- contemporaneous records
- producer diaries
- calendars.

## 830 Livestock Eligibility (Continued)

## L Water Transporting Eligibility (Continued)

To be eligible to receive ELAP benefits for water transporting, the producer **must** meet all of the following:

- meet the definition of an eligible producer as defined in paragraph 816
- suffers losses resulting from additional cost of transporting water to eligible livestock:
  - as defined in subparagraph A, during the eligible drought
  - that were grazing eligible grazing lands:
    - defined in subparagraph F
    - \*--that had adequate livestock watering systems or facilities **before** the eligible adverse weather or eligible loss condition occurred
    - to which the producer is **not** normally required to transport water--\*
  - that were grazing eligible grazing types as defined in subparagraph E during the normal grazing period.
- transporting water to eligible livestock to fill tanks or troughs located in a county designated on the Drought Monitor as a D3 or greater in any area of the county on or after October 1, 2013.

**Note:** Transporting water to fill earthen structures is **not** eligible under ELAP.

**Important:** The National Office will notify State and County Offices of counties eligible for losses resulting from the additional cost of transporting water by posting a list of eligible counties, by State, by pasture type, every Thursday at <http://fsaintranet.sc.egov.usda.gov/ffas/farbill/ccc/> under “LFP Eligible Counties”, as provided in subparagraph 411 B. The column titled “D3 a Qualifying Date” on the LFP Eligible Counties Report provides the beginning dates of the D3 drought occurring at any time during the normal grazing period.

**830 Livestock Eligibility (Continued)****M Documentation of Water Transporting (Continued)**

If documentation is not available or provided, COC may accept producer's certification if other similar producers have comparable losses, as determined by COC.

COC shall document in the COC minutes:

- the total number of gallons of water transported to eligible livestock
- the number of livestock that water was transported to.

**Important:** COC must follow procedure established in subparagraph 888 A when acting on supporting documentation, such as verifiable and reliable records and producer's certification statements.

**N Cattle Tick Fever Eligibility**

ELAP covers the cost associated with gathering livestock for treatment of cattle tick fever.

To be eligible to receive ELAP benefits for cattle tick fever, the producer must meet all of the following:

- meet the definition of eligible producer as defined in paragraph 816
- suffer losses resulting from the additional cost associated with gathering eligible livestock, as defined in subparagraph A, to treat for cattle tick fever by APHIS
- certifies that losses were suffered because of additional cost related to gathering eligible livestock for cattle tick fever quarantine.

**830 Livestock Eligibility (Continued)****\*--O Grazing Losses Because of Hail**

To be considered an eligible livestock grazing loss because of hail, the following conditions **must** be met:

- producer **must** have removed eligible livestock from the hail-affected pasture or fed additional livestock feed above normal quantities, required to maintain the livestock until additional feed becomes available, as provided in subparagraph J
- grazing losses shall be claimed on a field-by-field basis; therefore, **only** the pasture type and acres affected by hail shall be claimed and entered on CCC-851.

When adjusting lost grazing days because of hail, COC shall:

- document the timeframe the producer normally grazes the hail-affected field
- ensure that the number of lost grazing days certified by the producer on CCC-851, item 21 or 28, as applicable:
  - does **not** exceed the number of days the producer intended to graze the pasture affected by hail
  - is reasonable considering the following:
    - intensity of the hail storm
    - hailstone size
    - growing conditions in the days after the hail storm--\*

## 830 Livestock Eligibility (Continued)

**\*--O Grazing Losses Because of Hail (Continued)**

- if needed, adjust eligible lost grazing days because of hail, on CCC-851, item 23 or 29, as applicable.

**Example:** Producer A has 100 acres of native pasture in field B that is damaged by a hail storm on July 15, 2013. Producer A moves his livestock from field B on July 15, 2013. The normal grazing period for the county is from May 1 through October 31. Producer A has a grazing plan to graze 100 acres of native pasture from June 1 through July 30, 2013. Therefore, the maximum number of lost grazing days that Producer A can claim is 15 calendar days (July 15 through 30). Producer A certifies on CCC-851, item 21, to 20 calendar days of lost grazing because of the hail storm.

COC shall adjust eligible lost grazing days to 15 calendar days in CCC-851, item 23.

Because grazing losses because of hail shall be claimed on a field-by-field basis, there may be situations where the normal carrying capacity established for a county needs to be adjusted to reflect the producer's normal grazing practices on the field affected by hail.

**Example:** Producer A has 100 acres of native pasture in field B that is damaged by a hail storm on July 15, 2013. The normal grazing period for the county is 6 months (May 1 through October 31). COC established a normal carrying capacity of 12 acres per AU for 6 months. However, producer A has a grazing plan to graze field B for 60 calendar days, from June 1 through July 30, 2013. Therefore, COC may adjust the carrying capacity for field B to reflect only 60 calendar days of normal grazing.

Accordingly, COC shall adjust the normal carrying capacity of 12 acres per AU for 6 months to 4 acres per AU for 2 months. A carrying capacity of 4 acres shall be entered in Producer A's CCC-851, item 22.--\*

## 845 Honeybee Eligibility (Continued)

**E Eligible Honeybee Physical Losses**

For honeybee colony and hive losses to be eligible, the honeybee producer must have:

- suffered:
  - a physical loss of honeybee colonies or hive loss because of an eligible adverse weather or eligible loss condition including but not limited to colony collapse disorder, earthquake, eligible extreme cold, eligible sustained cold, eligible winter storm, excessive wind, flood, hurricane, lightning, tornado, volcanic eruption and wildfire
  - to be an eligible colony loss, the loss must be in excess of the normal mortality rate of 17.5 percent and that the loss could not have been prevented through reasonable available measures as determined by COC
- incurred the loss in the county where the eligible adverse weather or eligible loss condition occurred.

**Notes:** Losses because of controllable conditions, such as varroa mites, is not an eligible loss condition.

Drought is not considered an eligible loss condition for honeybee colony or honeybee hive losses.

Loss of income from pollinator contracts because of CCD is not an eligible loss condition under ELAP.

For eligible honeybee colony and honeybee hive losses, the participant must provide:

- proof of beginning inventory for the program year and ending inventory immediately after the eligible adverse weather event or eligible loss condition of honeybee colonies and honeybee hives such as, but not limited to, any of the following:
  - a report of acreage (colonies reported) (see subparagraph F)
  - loan records
  - private insurance documents
  - property tax records
  - sales and purchase receipts
  - State colony registration documentation
  - chattel inspections

**Important:** If a subsequent eligible adverse weather or eligible loss condition affects the number of hives or colonies, County Offices shall update the inventory changes for the participant's second or subsequent adverse weather or loss condition, if applicable, according to subparagraph 890 A, items 12C through 12F.

If the subsequent event only affects feed needs, inventory updates are not required.

845 Honeybee Eligibility (Continued)

**E Eligible Honeybee Physical Losses (Continued)**

- proof that the participant is following best management practices as determined by COC, such as, but not limited to documentation to substantiate that the producer provided the following:
  - proper nutrition for honeybee colonies
  - preventative treatment for varroa mites and disease
  - proper maintenance and hygiene of hive equipment
  - proper colony management
- any additional documentation the producer may have, such as State health certifications for varroa mite or noseema levels reflecting the lack of mites or disease.

**\*--F Report of Colonies**

Honeybee producers **must** file FSA-578 by the dates established for NAP eligibility, according to 2-CP, subparagraph 18 B.

Honeybee producers **must** notify the recording County Office within 30 calendar days of changes in the:

- total number of colonies
- names of additional counties to which bees are moved.

Producers shall use a manual FSA-578 to report changes to the total number of colonies and/or counties to which bees are moved. Manual FSA-578's **must** include the following.

Item	Entry
1	FSA FSN where producer's headquarters is located.
7	Names and shares of all producers sharing in the colonies for producing honey, pollinating, and/or breeding.
12	Number of colonies.
13	Names of counties to which colonies of bees are moved.

The producer shall certify to the number of colonies reported in FSA-578 "Remarks" section.

**Notes:** The FSA-578 "Certification Statement" shall read as follows:

"I certify the number of colonies reported include all colonies for which producing honey, pollinating, and/or breeding is expected."

If the total number of colonies increases on a manual FSA-578 during the crop year after the initial automated FSA-578 is filed by January 2, the automated FSA-578 shall be revised with the highest number of colonies reported at any time in the crop year.--\*

**846 Honeybee Payment Calculations and Examples**

**A National Payment Factor for Honeybee Losses**

For an eligible honeybee producer, payments for **honeybee feed losses** will be based on a national payment factor of either of the following:

- 60 percent of the calculated payment
- 90 percent of the calculated payment, for producers who meet the definition of beginning farmer or rancher, SDA farmer or rancher, or limited resource farmer or rancher, as defined in paragraph 802.

For an eligible honeybee producer, payments for **honeybee colony and hive losses** will be based on a national payment factor of either of the following:

- 75 percent of the calculated payment
- 90 percent of the calculated payment, for producers who meet the definition of beginning farmer or rancher, SDA farmer or rancher, or limited resource farmer or rancher, as defined in paragraph 802.

**Note:** If at the end of the program year the \$20 million funding cap is not reached, the Deputy Administrator has the discretion to increase the national payment factor, up to 80 percent, for the program year.

**B Payment Rates**

The payment rates for honeybee colonies and hives are based on the average fair market values of honeybee colonies and/or hives in the program year in which the loss occurred. FSA has established the following average fair market values for 2012 through 2014 honeybee losses.

<b>Program Year</b>	<b>Honeybee Colonies</b>	<b>Honeybee Hives</b>
2012	\$75	\$210
2013	\$85	\$220
2014	\$80	\$230

## 846 Honeybee Payment Calculations and Examples (Continued)

### C Normal Mortality Rate for Honeybee Colony Losses

ELAP compensates eligible honeybee producers for eligible honeybee colony losses that occur in excess of normal mortality because of an eligible adverse weather or eligible loss condition during the program year. FSA has established a normal mortality rate for honeybee colony losses of 17.5 percent.

### D Payment Calculation for Honeybee Colony Losses

Payments for eligible honeybee producers for honeybee colony losses will be based on the national payment factor, as determined in subparagraph A, of the result of multiplying:

- the result of subtracting:
  - number of honeybee colonies lost during the program year because of an eligible adverse weather or eligible loss condition, minus
  - honeybee loss threshold (beginning inventory adjusted for sales and purchases \*-through the last loss event in the program year times 17.5 percent normal mortality-\* rate), times
- the average fair market value per honeybee colony.

**Example:** Producer A files CCC-934 for honeybees lost to CCD on April 2, 2012.

Beginning program year inventory was 100 colonies of bees. Producer provided a \*-receipt for the purchase of 20 additional colonies on March 15, 2012.-\*

Producer A's ending inventory was 70 colonies which equates to 50 colonies lost. Producer A did not file CCC-860, therefore compensation would be calculated at 75 percent of the 2012 average fair market value established for honeybee colonies, \$75, for the number of colonies lost in excess of normal mortality of 17.5 percent, calculated as follows.

- 120 colonies (100 beginning inventory, plus 20 additional colonies purchased) x 17.5 percent = 21 colonies (loss threshold)
- \*-50 colonies, lost on April 2, 2012, because of eligible adverse weather or-\* loss condition, minus 21 colonies, loss threshold = 29 colonies eligible for payment
- 29 colonies x \$75 (2012 average fair market value) x 75 percent payment factor = \$1,631 (calculated payment amount for lost honeybee colonies before applying payment reductions or national factor).
