Acreage and Compliance Determinations
2-CP (Revision 16)

Amendment 4

Approved by: Acting Deputy Administrator, Farm Programs

Amendment Transmittal

A Reasons for Amendment

Paragraph 103.5 has been added to provide procedure for CARS Data and Farm Records reconstitutions.

Subparagraph 104 A has been amended to add Fully Certified/Not Reported as a status indicator on the Crop Acreage Reports Screen.

Subparagraph 108 A has been amended to update procedure for setting the fully reported cropland indicator.

Subparagraph 161 F has been amended to add a note for updating 2019 CARS FSA-578 data recorded with intended use GS. Beginning in 2019, intended use GS will be removed.

Subparagraph 162 B has been amended to update the Report of Acreage Screen to include FSA Physical Location and Multi-Intended Use status.

Subparagraph 162 D has been amended to:

- clarify CARS procedure when a field number in Web Farm Records is deleted/changed due to a field split or merge prior to after a reconstitution
- remove duplicate data from the note for field number entry
- clarify that beginning with 2019, all AUM data elements will be required entry
- add Actual Land Use as a data element; this data will be available only when an actual use is recorded
- add FSA Physical Location as a data element; this data is auto populated
- add Multi-Intended Use as a data element; this status will be populated as “N”. The user will need to select “Y” if the producer is reporting a crop with more than one intended use.

Amendment Transmittal (Continued)

A Reasons for Amendment (Continued)

Paragraph 162.5 has been added to provide procedure for loading more than one intended use for a crop.

Subparagraph 164 G has been amended to update the Determined Quantity Screen to include the FSA Physical Location.

Subparagraph 216 B has been amended to update the Certify by Farm Screen to include the FSA Physical Location.

Subparagraph 216 H has been amended to update the Certify by Producer-Crop Selection Screen to include the FSA Physical Location.

Subparagraph 217 E has been amended to update the Certify by Farm Screen to include the FSA Physical Location.

Subparagraph 270 B has been amended to update the Crop Review Screen to include the FSA Physical Location.

Subparagraph 273 B has been amended to update the Revise Tract Screen to include the FSA Physical Location.

Subparagraph 274 C has been amended to add data elements:

- Actual Land Use
- FSA Physical Location
- Multi-Intended Use.

Subparagraph 275 B has been amended to update the Revise Shares Screen to include the FSA Physical Location.

Subparagraph 276 I has been amended to update the Delete Fields Screen to include the FSA Physical Location.

Part 1 General Information**1 Overview****A Handbook Purpose**

This handbook provides State and County Offices with guidance and procedure needed for acreage reporting and to perform acreage compliance activities for FSA programs.

B Compliance Activities

Procedure for compliance activities includes:

- acreage reports
- spot-check selection
- measurement services
- aerial photography
- field determinations
- aerial and ground compliance techniques
- measurement equipment.

C Handbook Withdrawal and Supplementation

Do not withdraw any procedures in this handbook.

This handbook may be supplemented if STC:

- directs SED to supplement this handbook to reflect STC policies that have received DAFP authorization
- determines appropriate standard deductions and service charge rates to be used in compliance activities.

2 Source of Authority and Related Handbooks

A Source of Authority

7 CFR Part 718 provides authority to establish procedures for acreage determinations and compliance activities.

B Related Handbooks

The handbooks in the following table relate to acreage determinations and compliance activities.

IF the material concerns...	THEN see...
aerial photography	1-AP.
program appeals	1-APP.
State and County Office records operations	32-AS.
common management and operating provisions; farm reconstitutions; farm, tract, crop data	1-CM, * * * or 3-CM.
digital photography	8-CM.
failure to fully comply; * * * HELC/WC provisions; finality rule	4-CP, 6-CP, or 7-CP.
resource conservation programs	1-CRP or 2-CRP.
--assistance programs	1-LDAP.--
CCC checks; receipts	1-FI.
information policies and procedures; information available to the public	1-INFO or 2-INFO.
* * *	* * *
loans and LDP's	applicable Price Support procedure.
noninsured crop disasters; LA and crop appraisal	1-NAP or 2-NAP.
--payment limitations	1-PL or 5-PL.--
NAP; LA and loss claims management; accepting complaints or documenting FSA observation	1-NAP, 2-NAP, * * * or 4-RM.
--ARCPLC	1-ARCPLC or 2-ARCPLC.--

3 Access to Information

A Access to Farm and Farm Records

Any authorized representative of the Secretary must have access to farm and farm records to make determinations on eligibility and compliance with:

- program provisions
- HELC and WC provisions.

4 Responsibilities

A Producer's Responsibilities

Each producer who expects to receive benefits under FSA programs is responsible for complying with every provision of that program, including:

- HELC and WC provisions
- accurate acreage reports and production evidence when required.

B CED's Responsibilities

CED's will:

- ensure that all compliance activities are completed in a timely manner and according to procedure
- recruit, train, and qualify County Office employees for compliance activities
- provide access to means for persons and legal entities to submit to FSA, reports of acreage
- monitor quality of producer-filed acreage reports by inspecting a statistically sound number of producers, employees, and committee members, as well as all late-filed acreage reports filed for crops
- develop plans for the following:
 - preparing materials needed for producer acreage and production reports
 - assembling documents and equipment for field and program assistants
 - ensuring efficient workflow in the office and the field
 - checking compliance work as directed by STC
- make farm and field inspections, using approved compliance method
- maintain a copy of the acreage reports register, if using an acreage report register was
--necessary according to subparagraph 24 F.--

4 Responsibilities (Continued)

C COC Responsibilities

COC will:

•*--ensure that:

- compliance activities are performed using techniques provided by STC
- measurement service requests are completed in a timely manner

- review:
 - all late-filed acreage reports
 - corrections according to paragraph 29
 - revised acreage reports according to paragraph 28.--*

D DD Responsibilities

DD will:

- serve as liaison between the State and County Office
- supervise all County Office compliance activities
- assist the State Office in supervising and reviewing all phases of compliance work
- assist CED in training employees involved in acreage and production determinations
- review certification registers and send a copy to the State Office
- *--review 10-day work list according to subparagraph 24 F.--*

E State Specialist Responsibilities

State Specialists will:

- distribute information from the National Office to the County Offices about directives policy and procedure on acreage reporting and compliance activities

- answer County Office questions

- carry out compliance activities as directed by SED

- provide guidance on DD's.

4 Responsibilities (Continued)

F SED Responsibilities

SED will maintain the State Compliance Plan of Operation and will include plans for the following:

- helping CED's train employees involved in acreage and production determination methods
- supervising County Office compliance operations
- requiring DD's and CED's to make an adequate check of employees' work and provide additional training when necessary
- establishing policy and providing guidance to DD's in the review of County Office compliance activities.

G STC Responsibilities

STC's will:

- establish the deadline by which County Offices must complete compliance activities
- obtain DAFP's approval before implementing deviations from measurement standards
- examine COC recommendations for using other than 3 percent standard deduction for ground measurement
- ensure that all County Offices offer a full range of services, such as:
 - measurement service
 - production determinations.

5-20 (Reserved)

Part 2 Acreage Report Procedures

Section 1 Responsibilities, Guidelines, and Reporting Dates

21 FSA-578 Purpose

A Introduction

County Offices will use FSA-578 to collect data relating to crops. The data collection is to:

- determine compliance with farm programs
- verify compliance with HELC and WC provisions
- collect data for FSA and other USDA agencies for program decisions
- determine producer eligibility for loans and LDP’s
- determine crop and producer eligibility for ARC/PLC, ELAP, Livestock Forage Disaster Program, NAP, * * * and TAP.

B Submitting Acreage Reports

The following describes the steps for submitting an acreage report to FSA.

Step	Action
1	Enter crops and acreage data on FSA-578 provided by a person or legal entity identified in subparagraph 22 E.
2	Review the data with the person reporting to ensure that: <ul style="list-style-type: none"> • all applicable crops, types, and intended uses are included • the farm is in compliance, if applicable.
3	Perform any measurement service that was requested.
4	Provide a copy of FSA-578 and aerial or digital photocopy.
5	Perform inspections and apply tolerance rules, when applicable.
6	Send operator FSA-468 or FSA-409, as applicable.
7	Process redetermination requests.
8	COC makes determinations according to Part 3, Section 4.
9	Process payment reduction reports and notification letters, if applicable.

***--Notes:** A manual FSA-578 may be accepted only when the automated FSA-578 is **not** available. All manual FSA-578’s must be loaded in the automated FSA-578 once the system becomes available.

A manual FSA-578 may be accepted for honey inventory reports according to 1-NAP (Rev. 2).--*

22 Required Acreage Reports

A Importance of Accurate and Timely Reporting

Filing an accurate and timely acreage report FSA-578 for all crops and land uses, including failed acreage and prevented planted acreage, can prevent loss of benefits including but not limited to programs listed in the following table. FSA-578 certifications must be filed for the farm by the applicable final reporting date in Exhibit 6.

For producers reporting NAP crops, see 1-NAP (Rev. 2) for additional acreage reporting requirements. Acreage reports and requests for disaster credit for:

- prevented planted acreage and credit must be submitted no later than 15 calendar days after the final planting date for the applicable crop

Notes: Beginning in 2007, the final planting date for each crop is based on final planting dates established by RMA for insurable crops and NCT planting dates for noninsurable crops.

If no date is established by RMA, COC may establish final planting dates for insurable and noninsurable crops in a county with approval from STC. When establishing final planting dates COC shall take into consideration the applicable dates established for surrounding counties.

- failed acreage credit must be sought by a producer before:
 - the crop acreage is destroyed
 - disposition of the crop.

Benefit	Acreage Reporting Requirement
MAL's and LDP's	All crops and cropland on the farm.
CRP annual rental payment	CRP acreage.
NAP	Crop acreage for which NAP coverage applies according to NAP's basic provisions.
LFP	All grazing land acreage for which a loss is being claimed.
TAP	Tree, bush, or vine acreage for which TAP benefits are being requested.
ELAP	All grazing land acres, honeybee colonies, and farm-raised fish pond acres.
ARC/PLC	All crops and cropland on the farm.

22 Required Acreage Reports (Continued)

B Informing Producers

Producers of crops for which FSA-578 must be filed will be informed of the following:

- responsibilities regarding HELC and WC provisions
- availability and advantages of measurement services
- requirements for filing an accurate crop and acreage report, including the following:
 - the requirement for reporting all cropland on the farm for ARC/PLC, marketing assistance loans, and LDP benefits
 - the importance of correctly reporting crop acreage
 - crops that should be reported
 - final crop reporting dates
 - loss of program benefits for noncompliance.

C Methods of Notification

State and/or County Offices will publicize acreage reporting requirements. Publication sources can include the following:

- posting in the USDA Service Center
- news releases
- newsletters
- radio and television
- meetings
- internet
- * * *
- e-mail
- GovDelivery.

22 Required Acreage Reports (Continued)

D Methods of Certifying FSA-578

Certification of FSA-578 is performed using FSA farm records which are maintained by administrative county.

--County Offices may mail FSA-578's for certification in situations that make the process more convenient to the producer. See the following conditions.--

- An extreme condition makes it impossible for the certifier to physically come into the County Office. These conditions include, but are not limited to:
 - illness of a certifier or certifier's family member
 - extreme distance between the certifier's operation and the County Office
 - other extreme conditions approved by COC.
- The extreme condition or conditions in this subparagraph must be approved by COC and documented in the COC minutes.

Note: The creation or use of forms for acreage reporting, other than those already established by the National Office, is not authorized.

E Who Can Certify

The following persons or legal entities can certify FSA-578:

- farm operator
- *--land owner, but only for crop acreage on land owned by to the landowner
- tenants and share-croppers, but only for crop acreage for which the producer has a share
- see 2-CRP for guidance on who may certify FSA-578's for CRP purposes when the producer is applying for CRP and no other FSA programs
- person authorized by power of attorney, according to 1-CM, by someone who can--* certify.

23 Submitting Acreage Reports and Tree Crop Acreage**A Processing Acreage Reports Submitted**

Program enrollment or application is not a requirement for acreage reporting. Persons or legal entities who may not be program participants or persons seeking benefits at the time the person or legal entity wants to submit the acreage report is being filed must be permitted to file FSA-578, to report their crop acreage. The reason a person or legal entity wants to submit an acreage report is irrelevant to FSA's processing of the report.

B BWEP

BWEP, which is administered by APHIS, has used cotton acreage reports that were provided by producers to local FSA offices since the first trial program in 1978.

Consistent with subparagraph A and to continue providing this service, County Offices that are in States designated for participation in BWEP will continue to process all acreage reports filed by producers.

C Tree Crop Acreage Certification

When the tree crop acreage is being reported, the tree crop information must include the following:

- acreage
- variety or type.

Tree crops will have a supplemental screen that requires the following additional information:

- number of trees
- row width (feet)
- tree spacing (feet)
- age of trees.

24 Reporting Dates

A Overview

The final date by which a timely filed acreage report can be submitted to FSA is the ARD. The ARD is the latest date by which a person or legal entity can submit timely-filed acreage reports.

This paragraph provides policy on where to find ARD's by State, exceptions to ARD's, appointment scheduling, and using the registers.

B ARD's

To be eligible for FSA benefits according to subparagraph 16 A, crops must be reported by the ARD in Exhibit 6.

FSA-578, whether timely filed for all crops is shown or not, is considered certified on the date the producer signs the report.

The following provides guidance on reporting crop acreage not specified in Exhibit 10.

- Where "Forage Seeding" is specified, the ARD applies to perennial forage crops for the year the crop is initially seeded.

Note: For subsequent years, the perennial forage must be reported by the perennial forage ARD.

- If a measurement service was requested by the ARD for a crop, but not performed by the ARD, then the acreage report for the measured crop must be filed within 5 workdays of the producer being notified of completion of the measurement service.
- If the crop is apiculture, use the crop code for "honey" with the applicable apiculture *--acreage reporting date as listed in Exhibit 6.--*

* * *

24 Reporting Dates (Continued)

B ARD's (Continued)

Example: California has multiple reporting dates for potatoes depending on when they were planted. The range of dates used to identify these reporting dates are not the same as the planting periods used for NAP.

- Acreage reports filed using the continuous acreage reporting provisions for selected perennial crops will be considered as meeting the ARD's as specified in Exhibit 6.
- Acreage reports filed using the continuous acreage reporting provisions for CRP, will ~~be~~ considered as meeting the ARD as specified in Exhibit 6.
- For the crops listed in Exhibit 10 that have a planting date range or a series of planting date ranges within a program year, and the crop is planted on a date that is **not** ~~included~~ within a date range, then the ARD is the earlier of:
 - 15 calendar days before the onset of harvest or grazing
 - the subsequent planting date range's acreage reporting date.
- Crops that have a date range or a series of date ranges within a program year, and the ~~reported~~ planting date is both after the ARD for "all other crops" for that State and **not** ~~within~~ the date range specified, must be reported within 15 calendar days before the onset of harvest.
- If the crop is a repeat crop and the crop reporting date has passed, then the subsequent planting must be reported 15 calendar days before the onset of harvest.

24 Reporting Dates (Continued)

C ARD's for NAP Eligibility

The final date for reporting any specific crop acreage for NAP eligibility is the earlier of the following:

- *--the established ARD for that crop/commodity in Exhibit 6, as applicable--*
- 15 calendar days before the onset of harvest or grazing of the specific crop acreage being reported
- the established normal harvest date for the end of the coverage period.

The established ARD for value loss and controlled environment crops is September 30 for the ensuing crop year.

Exceptions: The ARD for honey is:

- January 2 of the same crop year

Example: January 2, 2017, for the 2017 crop year.

Note: The crop year for honey production is the calendar year January 1 through December 31.

- within 30 calendar days of the date colonies of bees are acquired, brought into, or removed from the county.

Tropical Region provisions apply according to 1-NAP for Hawaii, Puerto Rico, American Samoa, Guam, the U.S. Virgin Islands, and the former Trust Territory of the Pacific Islands (the Commonwealth of Northern Mariana Islands, the Republic of the Marshall Islands, the Federated States of Micronesia, and the Republic of Palau).

24 Reporting Dates (Continued)

D Exceptions to Reporting Dates

*--Following are exceptions to ARD's in Exhibit 6.

IF...	THEN this acreage must be reported by...
the crop has not been planted by the ARD in Exhibit 6--*	15 calendar days after planting is completed.
the producer has purchased the acreage or acquired a lease for the acreage after the ARD for the crop, such as perennial forage	30 calendar days after purchasing the acreage or acquiring the lease. Appropriate documentation must be date-stamped and provided to the County Office to the County Office's satisfaction.
perennial forage crop is reported with an intended use of "green manure", "left standing", or "seed"	the ARD associated with "all other crops" in the State, unless otherwise specified.

E Reporting Acreage by Appointment

If appointments are used to accommodate acreage reporting, sufficient personnel must be assigned to ensure that all appointments can be scheduled by the ARD.

F Using Registers

An acreage report register will be used, according to 1-CM when a certification register is determined necessary. County Office will maintain a copy of the acreage report register for future reference.

--A separate register will be maintained for all automated FSA-578's with a certification signature from the farm operator, owner, or duly authorized representative dated more than 10 workdays after the final reporting date. Farms on the register will be listed by FSN,-- operator's name, and reason for accepting the report after the final reporting date. DD will review and initial this list and forward a copy to the State Office.

Notes: DAFP may request the State Office to provide a list of County Offices that needed to prepare a list of FSA-578's certified more than 10 workdays after the ARD.

A copy of the register or registers must be filed in the CP folder and remain on file according to 32-AS.

24 Reporting Dates (Continued)**G Requesting Changes to Crop ARD's**

Any request to change a crop's ARD must be made prospectively and well in advance of a crop year.

Use Exhibit 13 when requesting a change to ARD's. To validate the request, State Offices will:

- complete Exhibit 13, indicating the following:
 - crop/commodity name and crop/commodity type, if applicable, for the request
 - current crop/commodity reporting date
 - proposed crop/commodity reporting date
 - crop years to which the proposed reporting date apply
- prepare a written document to justify the change of crop/commodity reporting date(s).

The justification must address the following criteria:

- provide reasoning on how the change would reduce the burden on producers
 - whether the proposed ARD conflicts with requirements already established for farm programs or crop insurance associated with the crop/commodity
- Note:** Proposed ARD's that conflict with FSA, RMA, or other USDA requirements will still be considered for approval depending on the nature of the conflict.
- if other similar or closely related crops/commodities are associated with the proposed final ARD
 - the proposed ARD should not increase, and ideally would reduce the total number of crop ARD's established for the State

Note: If the proposed ARD increases the total number of dates for the State, explain the reasoning why it would further reduce the burden on producers.

- if the proposed reporting date for the crop/commodity significantly differs from the established reporting date for the crop/commodity in any neighboring State, provide the reasoning behind why the discrepancy does not pose a burden on producers, including multi-State producers.

24 Reporting Dates (Continued)**G Requesting Changes to Crop ARD's (Continued)**

State Offices will submit **both** of the following to **RA.FSA.DCWA2.ppb@wdc.usda.gov**, no later than 120 days before the earlier of either the current or proposed ARD:

- completed Exhibit 13
- written justification based on State Office research and analysis.

Notes: Requests for changes will **not** be considered for approval unless all required information is included.

Requests are **not** guaranteed approval and will be reviewed and approved or disapproved by a USDA ARD's review board consisting of members of multiple USDA Agencies, including NASS, NRCS, and RMA.

25 Processing Acreage Reports

A Overview

Producers on farms participating in certain FSA programs are required to complete an FSA-578 acreage report certifying all cropland on the farm to be eligible for program benefits.

The FSA-578 is considered certified when the report includes all required data fields as described in subparagraph D and is signed by the producer.

B Before FSA-578 Is Filed

County Offices will advise persons of the following before FSA-578 is filed:

- an accurate and timely report is required
- the map the producer is using must accurately represent current farm practices and matches the FSA farm records data including FSN, tract, CLU, and acres
- photography, official acreages, and past records are available to help in reporting acreage
- measurement services are available and recommended if there is any doubt about the accuracy of any data being reported
- a discrepancy exist in the same crop year between previously reported crop acreage and crop acreage being reported, if applicable.

Note: The person reporting crop acreage will be advised if the report is in conflict with previously reported crop acreage for the same crop year. The person will also be advised that FSA will accept the revisions and report; however, all acreage reports are subject to spot check. Determined acreage will be compared against the most recent report for the crop year submitted for the acreage regardless of previously filed reports in the crop year. No acreage report revisions are permitted after crop acreage is spot-checked. County Offices **must not**, in any way, advise any person on the quantity of acreage that should be reported.

25 Processing Acreage Reports (Continued)

C Calculating Acreage Measurements

County Offices will follow these steps when a producer provides specific data or acreage measurements and asks the County Office to estimate the acreage.

Step	Action
1	Producer delineates subdivisions on the hard copy acreage reporting map.
2	Compute acreage in subdivisions.
3	Remind the producer reporting that the acreage they provided: <ul style="list-style-type: none"> • is not official • cannot be guaranteed.
4	Emphasize the importance of providing an accurate acreage report on FSA-578.

County Offices will suggest a measurement service if the producer:

- is uncertain about the acreage being reported
- wants to guarantee that the farm acreage meets program requirements
- wants to establish or correct an official acreage for an area that cannot be delineated from features that are visible on the hard copy acreage reporting map.

Note: Producers are encouraged to report acreage based on the official acreage. If the producer does not report acreage according to the field boundaries, then these acres will not be considered official.

25 Processing Acreage Reports (Continued)

D General Steps for Accepting Acreage Reports

County Offices will follow these general steps when accepting acreage reports.

Step	Action
1	When possible use appointments to file FSA-578 acreage report.
2	Create FSA acreage reporting map that includes FSN, tract, CLU, and acres with data based on farm records.
3	Ensure the map the producer is using accurately represents current farm practices and matches FSA farm records data including FSN, tract, CLU, and acres.
4	Review the data completed on the acreage reporting map with the producer and ensure that all applicable crops, types, intended uses, and other required data fields are included.
5	Determine whether certification is possible from crop data entered on the map or if an acreage measurement is needed.
6	Ensure producer provides acreage of any deductions, skip row patterns, etc. Enter unusual patterns in FSA-578, remarks section.
7	Enter crops and acreage data into CARS using the acreage reporting map. If CARS is not available, the map with crop information must be loaded when CARS is available. The producer must sign completed automated or manual FSA-578 by final ARD to be considered timely filed.
8	Review completed FSA-578 with producer and have producer sign the certification. Ensure that the producer: <ul style="list-style-type: none"> • reads and understands the certification on FSA-578 • understands that by signing and dating FSA-578, the producer is agreeing with this certification.
9	Provide a copy of FSA-578 and acreage reporting map.

Note: For late filed acreage reports, FSA will load the acreage report into CARS and have *--the producer sign FSA-578. The certification date entered in CARS is the same date the producer signed FSA-578. Do not check the late filed field(s) as certified in CARS until the acreage report can be accepted. See paragraph 27 for guidance on--* accepting a late-filed FSA-578.

25 Processing Acreage Reports (Continued)

E Manual FSA-578's

A manual FSA-578 may be used only when CARS is **not** available, and to enable the producer to submit timely filed acreage reports. A completed acreage reporting map must be attached to the manual FSA-578.

County Office will follow these steps when taking a manual FSA-578.

Step	Action
1	Have all data required for CARS written on the acreage reporting map.
2	Review data on the acreage reporting map with the producer.
3	Complete manual FSA-578 per instructions on the forms web site.
4	Have producer sign and date manual FSA-578 and provide a copy of map and FSA-578 to producer.
5	When CARS is available load data off the acreage reporting map.
--6	Use the signature date from manual FSA-578 as the certification date in CARS.--
7	Provide a copy of the automated FSA-578 to the producer.

Note: The manual FSA-578 form can be obtained from the FSA Applications page.

F Review for HEL Noncompliance

Use the following table to review the acreage reporting maps to identify potential HELC or WC noncompliance if FSA-578 was completed and an agricultural commodity is planted on either of the following:

- a field with no HEL determination
- land designated as CW or other wetland determinations suspected of violation.

IF...	THEN...
no producer on the farm has an effective AD-1026 on file	<ul style="list-style-type: none"> • see 6-CP for processing FSA-569 • maintain a record of the potentially ineligible producer who is associated with land on which there is potential noncompliance.
any producer on the farm has an effective AD-1026 on file	*--prepare FSA-569 and refer to NRCS for a--* determination according to 6-CP.

26 Crop Data on Hard Copy Maps

A What to Include on Hard Copy Maps

The hard copy maps will be used to record the following information before data is entered on FSA-578:

- farm number
- tract number
- field/subfield number
- crop
- intended use
- number of acres
- approximate boundaries of the crop
- *--planting pattern, when applicable
- planting date, when applicable
- producer shares
- irrigation practice.

Note: For additional information on maps printed using the CARS Application Map, see paragraph 340.--*

B Review for HEL Noncompliance

Use the following table to review hard copy maps to identify potential HELC or WC noncompliance if FSA-578 was completed and an agricultural commodity is planted on either of the following:

- a field for which HEL determination is not made
- land designated as WC.

IF...	THEN...
any producer on the farm has filed AD-1026	prepare FSA-569 and refer to NRCS for a determination according to 6-CP.
no producer on the farm has filed AD-1026	<ul style="list-style-type: none"> • explain to the producer who certifies on FSA-578 that the report indicates a potential HELC or WC noncompliance, which will be verified if any producer on the farm requests USDA benefits • maintain a record of the potentially ineligible producer who is associated with land on which there is a potential noncompliance •*--prepare FSA-569 for the farm and refer to NRCS for a--* determination if any producer on the farm files AD-1026.

27 Late-Filed Report of Acreage

A Processing Late-Filed FSA-578

COC will process a late-filed FSA-578 when all of the following apply:

- the late-filed acreage report for a crop year is actually filed by the subsequent year's ARD

***--Note:** Any FSA-578, submitted **before** the subsequent year's ARD for the crops being reported, that satisfies all other requirements of this subparagraph, can be processed as a late-filed FSA-578 for the applicable year.

Example: 2018 corn has an ARD of July 15, 2018. If the corn is not reported by July 15, 2018, then it can be late-filed as long as it is filed before the subsequent year's ARD of July 15, 2019.

The late-filed FSA-578 can be loaded into CARS and can be certified if the producer has paid a measurement service fee and the acreage has been verified and determined.

If the acreage report was not late-filed by the subsequent year's ARD, the acreage shall be loaded into CARS but the certification date for the acreage **must not** be loaded into CARS.--*

- the producer filing the late-filed report pays the cost of a farm visit and the costs of verification and determination of crop acreage

Note: If payment of these costs is not remitted, do not process or take any action on the late filed FSA-578.

Exception: Long-term perennial crops may be verified for the current year by current year aerial image.

- physical existence of the late-filed crop or crop residue for the crop year being reported currently exists, to support the determination of acreage

***--Note:** A late filed FSA-578 **cannot** be accepted or revised after the field visit has--* been completed.

- the crop's use can be verified

27 Late-Filed Report of Acreage (Continued)

A Processing Late-Filed FSA-578 (Continued)

- the crop's acreage for the specific crop year can still be determined by FSA.

Example 1: A producer files FSA-578 for Field 1 on the farm by the reporting deadline. After the reporting date, the producer late-files FSA-578 for Field 2. This is considered a late-filed FSA-578.

Example 2: A producer reports corn as the initial crop on Field 1 of the farm by ARD. The producer then late-files FSA-578 reporting wheat in Field 1 as the initial crop. This is a late-filed FSA-578 resulting in a modification of an existing status code.

Example 3: A producer timely reports corn as the initial crop on Field 1 of a farm. The producer requests to revise the crop from corn to soybeans on Field 1 at a later date. This is considered a revision according to subparagraph 28.

B Accepting CIMS Data for Late-Filed FSA-578

RMA data will be used to satisfy the requirement for FSA-578 if the crop information was reported timely to RMA.

The crop reported to RMA must match the crop and crop type reported to FSA.

Notes: RMA data must be CIMS data and not crop insurance agent records. Crop insurance *--data in CIMS is considered reported timely to RMA. FSA data in CIMS is not acceptable, it must be RMA data in CIMS.--*

The acreage reported to RMA and FSA may differ for legitimate reasons, such as double crop, subsequent crop, and prevented planting provisions.

The following are examples of when CIMS data can be used to satisfy the requirement for acreage report as timely filed:

Example 1: Producer timely reports 100 acres of corn and 100 acres of soybeans to RMA and files an acreage report with FSA after the ARD reporting showing 100 acres of corn/YEL/GR and 100 acres of soybeans/COM/GR. FSA will accept the producer's acreage report as timely filed based on CIMS data.

Example 2: Producer timely reports 200 acres of corn to RMA and files an acreage report with FSA after the ARD reporting showing 100 acres of corn/YEL/GR and 100 acres of soybeans/COM/GR. Since the soybean acreage report is not supported by CIMS data, late-file provisions will apply to the soybeans. FSA will accept corn as timely filed based on CIMS data.

27 **Late-Filed Report of Acreage (Continued)**

B Accepting CIMS Data for Late-Filed FSA-578 (Continued)

Example 3: Producer timely reports 200 acres of corn to RMA and files an acreage report with FSA after the ARD reporting showing 215 acres of corn/YEL/GR. Since the acreage report is supported by CIMS data, FSA will accept corn as timely filed.

Example 4: Producer reports 215 acres of corn to RMA and files an acreage report with FSA after the ARD reporting showing 200 acres of corn/YEL/GR. Since the acreage report is supported by CIMS data, FSA will accept corn as timely filed.

Example 5: Producer reports 200 acres of corn to RMA and files an acreage report with FSA after the ARD reporting showing 200 acres of corn/YEL/GR and 15 acres of fallow. Since the fallow is not reported by the ARD, late-file provisions will apply to the fallow acreage. FSA will accept corn as timely filed based on CIMS data.

C Measurement Service Fee Refunds When CIMS Data is Accepted

The following table provides guidance on refunding measurement service fees when CIMS data is available.

IF...	THEN the fee will...
a producer late-files and pays a measurement service fee and FSA has performed the measurement service and CIMS data is available	not be refunded.
a producer late-files and pays a measurement service fee and FSA has not performed the measurement service and CIMS data is available	be refunded.

D Late-Filed FSA-578 for NAP APH, CRP Cropping History, and FSFL History

A late filed FSA-578 will be accepted for processing after physical existence of the crop or crop residue is gone if the producer:

- is reporting acreage for establishing an APH data base for NAP eligibility purposes, cropping history for CRP purposes, FSFL history, or ARC-IC data base.
- provides acceptable evidence, to COC’s satisfaction, to prove existence and disposition of the crop.

27 Late-Filed Report of Acreage (Continued)

D Late-Filed FSA-578 for NAP APH, CRP Cropping History, and FSFL History (Continued)

The following are examples of acceptable nonphysical evidence.

IF the evidence is to prove...	THEN COC may accept nonphysical evidence, such as...
existence of the crop	seed receipts showing the amount, variety, and date purchased.
	receipts for cleaning, treating, etc., for seed planted on the farm.
	documentation obtained and certified by another Governmental agency indicating the acreage, location, and crop year.
	acreage reported for any crop insurance policy or loss adjustment.
	a written contract or documentation of an oral contract to produce a specific crop.
	aerial or digital slides, if a positive determination can be made of the crop's identity and boundaries.
	evidence that was accepted and approved by RMA or another USDA agency.
Disposition of the crop	receipts showing number and units sold if the sale can be positively identified as sale of the crop for the farm for the year represented.
	a written contract or documentation of an oral contract to produce a specific crop.
	records showing the crop was fed to livestock.
	positive documentation of payment for custom harvesting indicating acreage, location, and crop year.
	evidence that was accepted and approved by RMA or another USDA agency.

Notes: If evidence accepted and approved by RMA or another USDA Agency is provided, proof of crop disposition is not required.

A Farm visit is not required.

E Late-Filed Fees and Acreage Verification

A late filed FSA-578 requires payment of a fee based on the rates of measurement service to verify and determine the crop acreage, type, use, and practice unless either of the following exceptions applies:

- reasons beyond the producer's control as specified in paragraph F
- for CRP cropping history or NAP APH for the first time.

27 Late-Filed Report of Acreage (Continued)

E Late-Filed Fees and Acreage Verification (Continued)

The late-filed acreage reporting fee is equal to the measurement service fee according to *--paragraph 928.

Note: FSA-409 is required to be completed according to paragraph 929.--*

When a producer pays for a measurement service the acreage that has been determined must be entered into CARS as both the reported acreage and the determined acreage.

Note: If CCC-576, Notice of Loss, is late filed in conjunction with a late-filed acreage report, a measurement service fee applies to both, but only 1 fee will be charged if both can be verified with 1 field visit.

F Policy for Considering a Late-Filed Report Timely Filed by Exception

The County Office can process a producer's late-filed acreage report and process it the same as if filed by ARD if all of the following apply:

- the producer's late filed acreage report is accompanied by a written statement explaining the reasons how or why the producer was prevented from filing the acreage report by ARD

Note: The reasons presented must detail circumstances that were beyond the producer's control and **cannot** include being unaware of the ARD or need to file the acreage report. Some example of reasons COC may consider as legitimately beyond the producer's control include:

- a serious health issue prevented the producer from visiting the Service Center during normal business hours of the reporting period to file the report
- an unforeseen event (farm or automobile accident or storm that closed roads) occurred which caused the producer to be unable to visit the Service Center in the reporting period to file the report by ARD
- COC determines, based on a review of the acreage report and accompanying written statement, that the producer was prevented from filing the acreage report by ARD because of a circumstance or circumstances beyond the producer's control.

Note: These types of situations and approvals of exceptions for reasons beyond a producer's control should be rare. COC's are expected to use appropriate discretion in granting these exceptions. A producer claiming the producer was unaware of the requirement to report acreage or the ARD is not justification.

28 Partial and Revised Reports

A Partial FSA-578's

A partial FSA-578 for a farm will exist when:

- at least 1 crop has been reported
- all acreage on the farm has not been reported.

B Revising Crop or Acres

A crop revision is deleting one crop and adding a new crop to that same acreage before or after the ARD.

An acreage revision is revising the acreage of a reported field or subfield before or after the ARD. FSA-578's may be revised for crop or acreage at any time before the ARD if the revision is reported:

- by the ARD for the crop being revised, a farm visit fee will not be assessed and field visit is optional to verify physical evidence of the change
- after the ARD for the crop being revised, a farm visit fee will be assessed and a field visit is required. RMA data shall not be accepted as verification for revising acreage information.

Note: The revised FSA-578 may not nullify the results of a spot check if the results of the spot check have been provided to the operator. Revisions are not permitted after the determined acres of the crop have been established.

FSA-578 cannot be revised for a crop after the subsequent year's ARD for the crop.

Even though a field visit is not required if the crop or acreage revision is made by the ARD for the crop, the COC may elect to conduct a field visit to substantiate the requested revision.

*--A fee will **not** be assessed in this instance.

If the crop or acreage revision is made after the ARD, a field visit is required and a fee will be assessed.--*

28 Partial and Revised Reports (Continued)

B Revising Crop or Acres (Continued)

The following examples explain when a late-file fee will be assessed for a revision.

- Example 1:** Producer A reports corn in fields 1 and 3 as the initial crop on a farm by the ARD. Producer A returns to the office by the ARD to report fields 2 and 3 to soybeans and discovers previously reported field 3 should be soybeans. Because this change was made by the ARD for corn, this is considered a revision, and Producer A will not be charged a late file fee.
- Example 2:** Producer A reports corn in fields 1 and 3 as the initial crop on a farm by the ARD. Producer A discovers an error on his crop report and returns to the office after the final ARD to revise field 3 to soybeans. Because this revision was made after the ARD a farm visit fee will be assessed and a field visit is required to verify physical evidence of the soybeans due to the change.
- Example 3:** Producer A reports field 1 to wheat, field 2 to oats, and field 3 to alfalfa by the ARD. Producer A returns to the office and reports field 4 to corn and discovers field 2 should have been wheat as well. Since the revision is taking place after the wheat ARD, a farm visit fee will be assessed and a field visit is required to verify physical evidence of the wheat due to the change.

C Revising Intended Use

For 2016 and subsequent years the intended use can be revised:

- any time by the ARD for the crop
- *--if there is a new operator on the farm and the revision is made within 30 calendar days--* of acquiring a new lease or 30 days from the date the land ownership transferred.

Note: Appropriate documentation must be provided to the COC's satisfaction to determine that a legitimate operator change occurred.

- Example 1:** Operator A reported perennial forage by the November 15 reporting deadline. In January, Operator A decided to discontinue the lease on that acreage. Operator B subsequently leases the acreage on February 1 and requests to revise the intended use of the perennial forage on February 20. Since the request has been made within 30 days of Operator B acquiring land, the revision will be approved.
- Example 2:** Operator A reported perennial forage by the November 15 reporting deadline. On December 15, Owner B transferred ownership of the acreage to Owner C. On January 10, Operator A requests to revise the intended use of the perennial forage. Even though there was no change in operator, the intended use of the perennial forage may be revised if filed by either Operator A or the new owner within 30 days of when ownership of land transferred.

28 Partial and Revised Reports (Continued)

C Revising Intended Use (Continued)

All elements of an acreage report can be revised through the crop's ARD. Except as provided in this paragraph, after the ARD, the intended use field previously certified must **not** be revised.

In situations where the actual use is different than the intended use, such as short-rated *--wheat, County Offices can record the actual use as indicated in paragraph 162.

Exception: If the cropland has been reported as cover only, and the crop was not terminated according to the guidelines in subparagraph 32 C, follow the guidelines in 32 E.

D Revising Shares

Shares may be revised at any time before or after the ARD for the crop if the revised--* shares can be verified by providing documentation to COC's satisfaction. For example, a lease showing the shares.

Note: Revisions to shares may have payment implications for programs that rely on FSA-578 shares.

E Revising Irrigation Practice

Once certified, the irrigation practice may be changed **only** if **both** of the following are met:

- requested by the operator, owner, or producer
- verified with acceptable RMA data, such as CIMS showing a timely filed report of acreage to RMA. If CIMS does not provide data to support the producer's irrigation practice, it is the producer's responsibility to provide proper evidence, if questioned.

Additional documentation is not required if irrigation or non-irrigation on the field is apparent to COC. For example, if a field was inadvertently reported as irrigated but no irrigation equipment is on the farm, COC can permit the revision to non-irrigated. In another example, if the field was inadvertently reported as non-irrigated but the field has a pivot with all surrounding fields being irrigated, COC can accept the inadvertent error and permit the revision.

F Revising Planting Date

For 2016 and subsequent years, a producer may revise the planting date for a crop any time through the crop's ARD.

28 Partial and Revised Reports (Continued)

G Revising Acreage Reports for Destruction of Crops Before Harvest

Acreage reports must be revised for crop acreage that has been destroyed because of a natural disaster, but before acres have been harvested.

Crops that have been destroyed for reasons other than a natural disaster:

- the acreage will not receive credit for any purpose
- a fee to verify destruction will be assessed if required by the program.

Important: A paid-for visit must be conducted for FAV's and wild rice destroyed without benefit before harvest. See 1-ARCPLC.

If a paid-for fee is required by a program and destruction is verified, the producer must revise the acreage report to reflect the change. A copy of FSA-409 will be attached to FSA-578 to document the destruction of acreage.

Example: Producer A reports 7 acres of peas and requests to destroy 3 acres on a farm without benefit. The producer must notify COC of intent to destroy and pay for a farm visit. Once COC verifies the destruction of the crop, the producer must return to the County Office and revise FSA-578 by changing the 7 acres reported as peas to 4 acres. Make a new entry for the acreage that was destroyed and report the acreage accordingly. If a subsequent or double crop is reported, an entry for the acreage destroyed is not required.

Note: If this producer had NAP coverage on peas, only the 4 acres remaining would be eligible for benefit in the event a natural disaster subsequently impacted the crop.

H Processing Revised Acreage Reports

Processing a revised acreage report does not guarantee program eligibility.

Note: See specific program procedure for guidelines for eligibility.

I Spot Checks

Partial and revised FSA-578's will be subject to the same compliance spot checks as other FSA-578's.

29 FSA-578 Corrections

A Correcting FSA-578 Information When Incorrect Information Was Entered by an FSA Representative

If at any time FSA determines that a producer provided the correct information on the originally submitted and contemporaneously filed acreage reporting map and an FSA representative entered incorrect information that was inconsistent with what was on the map on FSA-578, even though FSA-578 was signed by the producer, the FSA-578 information *--may be corrected if the information can be verified to COC's satisfaction. Producer is not required to sign the corrected FSA-578. However, a copy of the corrected FSA-578 along with a reason for the change must be mailed to the producer.--*

Note: This includes revisions to intended use.

COC minutes must be documented to identify the following:

- specific data to be corrected on FSA-578
- crop year the error occurred
- documentation used to verify the information
- error was committed by an FSA representative
- date the error was discovered.

This information will be available upon request by DAFP.

Accepting a corrected FSA-578 does **not** guarantee program or payment eligibility.

30 Determining Planted Acreage of Certain Commodities

A Planted Acreage

For each of the following named commodities, planted acreage includes the following:

- **corn** includes field corn in all stages of growth, including sterile high sugar field corn and hybrid seed corn

Note: Planted acreage of corn does not include popcorn, sweet corn, Zea Mays Amylacea (blue corn), cuzco gigantea (corn nuts), regardless of use, and any other corn varieties grown for decorative uses. However, acreage planted to popcorn in 1998 to 2001 is considered planted to corn for DCP base acres purposes.

- **grain sorghum**, acreage of grain or dual purpose variety, including crosses having grain or dual purpose variety characteristics during all stages of growth, and acreages of millage
- **ELS cotton**, including stub cotton, which is cotton acreage meeting all of the following conditions:
 - American-Pima, Sea Island, Sealand, all other varieties of the Barbandense species of cotton and any hybrid thereof, and any other variety of cotton in which 1 or more of these varieties is predominant
 - the acreage is grown in a county designated as an ELS county by the Secretary
 - the production from the acreage is ginned on a roller-type gin

Note: ELS cotton that does not meet these criteria is considered other cotton.

- **upland cotton**, including stub cotton, which is produced from other than pure strains of the Barbandense species, any hybrid thereof, or any other variety of cotton in which 1 or more of these varieties predominate, including colored lint

30 Planted Acreage for Program Purposes (Continued)**A Planted Acreage (Continued)**

- **rice**, including volunteer rice harvested
- **barley, oats, and wheat**, if the crop could have been harvested as grain, regardless of whether the crop is actually harvested as grain.

Note: This includes the following:

- planted and volunteered acreage not capable of reaching the hard dough stage solely because of a disaster, if CCC-576 was filed and approved by COC
- malting barley.

B Excluded From Planted Acreage

For any crop, planted acreage of the commodity referenced in paragraph A will not include acreage:

- of the crop that fails or are destroyed and that could have been replanted by the ending planting date set for the commodity but were not replanted
- of planted or volunteered small grain that COC determines was planted or volunteered so late that it would not reach the hard dough stage or is not economically feasible to be harvested because of yield
- of black or red rice.

31 WRP Acreage

A Introduction

Under certain conditions, NRCS will allow planting of a crop on acres that have been enrolled in WRP.

B Planting and Harvesting Crops on WRP Acreage

Under NRCS procedure, land enrolled in WRP is under the control of the landowner or operator until the WRP easement is recorded or the restoration agreement is approved. Any crops planted before the easement is recorded or the restoration agreement is approved can be harvested. Crops may also be planted and harvested during the crop year following the easement closing when the easement is recorded after October 1. Any subsequent cropping after the easement is closed is prohibited, unless specifically authorized by NRCS.

C Reporting Crops Planted on WRP Easement Acreage

There are different situations in which a producer may be granted permission by NRCS to plant crops on WRP easement land. The following examples are provided to clarify how the land **must** be reported on FSA-578.

Example 1: WRP easement is recorded on July 20, 2016. The producer is allowed to harvest crops planted before the easement was recorded. This acreage **must** be reported on FSA-578 as the crop that is planted on the WRP acreage.

Example 2: WRP easement is filed on October 4, 2016. The producer may harvest crops planted before the easement was recorded and plant crops before July 1, 2017, for crop year 2017. Crops planted in this example **must** be reported on FSA-578 as the crop planted on the WRP acreage.

The producer is prohibited from planting crops beginning July 1, 2017; any crop planted on or after July 1, 2017, **must** be reported as WRP.

31 WRP Acreage (Continued)

C Reporting Crops Planted on WRP Easement Acreage (Continued)

Example 3: For easement projects, in situations where there would be a substantial savings in restoration costs, the producer may be granted special temporary permission by NRCS to crop that portion of the WRP easement that, if left idle, would subsequently need special site preparation as a part of the restoration effort.

This NRCS policy authorizes special temporary permission to crop easement lands only when it is possible to initiate the restoration practice before costly site preparation occurs. Producers who use this cropping policy do so at their own risk. They are not entitled to any USDA benefits related to such cropping. This acreage planted to a crop according to this example **must** be reported on FSA-578 as WRP.

Producers are notified in writing by NRCS of cropping rights for WRP easement land. A copy of the notification is also provided to the producer's local FSA office.

32 Cover Crop Guidelines

A Introduction

Cover crops and the benefits of planting cover crops has gained strong interest among agricultural producers in recent years. Cover crops fulfill a variety of farming objectives when put into practice. Some examples of cover crop benefits may include: reduced soil erosion, preservation of soil moisture, reduction of crop inputs, weed control and improved soil health.

To ensure that USDA policies are coordinated and up to date with evolving cover crop practices, the Administrators of the Natural Resources Conservation Service (NRCS), Risk Management Agency (RMA) and Farm Service Agency (FSA) organized an interagency workgroup to develop consistent, simple and flexible policy across the three agencies.

National and local experts, along with multiple stakeholders, were involved in the process. Research literature, plant growth, soil hydrology models, and input from national/local experts in cover crop management provided the basis for developing cover crop guidelines that are applicable to all USDA programs

B Definition of Cover Crop

Cover crop means crops, including grasses, legumes, and forbs, for seasonal cover and other conservation purposes. Cover crops are primarily used for erosion control, soil health improvement, and water quality improvement. The cover crop may be terminated by natural causes, such as frost, or intentionally terminated through chemical application, crimping, rolling, tillage, or cutting.

Note: A cover crop managed and terminated according to NRCS Cover Crop Termination Guidelines is **not** considered a crop for crop insurance purposes.

These crops are used primarily for their conservation benefit and not for grain or forage harvest. They are typically annual, winter annual or biennial type plants used as temporary soil cover between cash crops as opposed to perennial plants that are planted for the purpose of establishing pasture, rangeland or other permanent vegetative cover.

For acreage reporting purposes, a cover crop is certified cover crop, 0319, COVRC, along with one of the 4 crop types in subparagraph D, and an intended use code of "CO". The cover crop may be grazed, hayed or foraged, provided the primary use is a conserving cover. It is critical that the producer, when reporting acreage to USDA distinguish whether the crop is being used primarily for cover, grain, grazing or forage.

Cover crops can be planted:

- before a subsequent crop
- after prevented planting acreage
- after a planted crop
- with no subsequent crop planted
- into a standing crop.

32 Cover Crop Guidelines (Continued)**C Termination Guidelines**

To be an acceptable cover crop, a cover crop must be properly terminated according to USDA Cover Crop Termination Guidelines. The cover crop may be terminated by natural causes, such as frost, or intentionally terminated through chemical application, crimping, rolling, tillage, or cutting.

The termination guidelines:

- provide the timeframe for terminating cover crops
- are based on zones
- apply to non-irrigated cropland
- can be accessed at <http://www.nrcs.usda.gov/wps/portal/nrcs/detail/national/climatechange/?cid=stelprd1077238>.

A copy of the map showing the Cover Crop Termination Zones and a list of counties is provided in Exhibit 14. Any questions about Cover Crop Termination Guidelines should be directed to NRCS.

32 Cover Crop Guidelines (Continued)

D Reporting Cover Crops

Beginning with the 2017 crop year, cover crops meeting the termination guidelines, as *--provided in paragraph 32 C, will be reported as Cover Crop, 0319, COVRC, with an--* intended use of “CO” and one of the following four crop types.

Crop Type	Definition
Cereals & other grasses	Includes any cover crop that is classified as a grass plant or cereal grain and would include but not be limited to the following cover crops - cereal rye, wheat, barley, oats, black oats, triticale, annual ryegrass, pearl millet, foxtail millet (also called German, Italian or Hungarian millet), sorghum sudangrass, sorghum and other millets and grasses.
Legumes	Includes any cover crop that is classified as a legume, including but not limited to clovers, vetches, peas, sun hemp, cowpeas, lentils and other legumes.
Brassicas & other broadleaves	This category includes any cover crop that is classified as a non-legume broadleaf, including but not limited to Brassicas such as radishes, turnips, canola, rapeseed, oilseed rape, and mustards, as well as other broadleaf plants such as phacelia, flax, sunflower, buckwheat, and safflower.
Mixtures	Includes fields where mixes of two or more cover crop species are planted at the same time, for example oats and radishes.

If crop acreage reported as a cover crop is harvested for any use other than forage or grazing and is not terminated according to subparagraph C, that crop will no longer be considered a *--cover crop. The acreage must be revised according to paragraph 28 C.--*

32 Cover Crop Guidelines (Continued)***--E Revising Acreage When Cover Crop Was Not Terminated--***

When crop acreage is reported as a cover crop, but is not terminated according to subparagraph C, the acreage report must be revised. The crop is not considered a cover crop unless it is terminated; therefore, * * * the crop that was initially reported as a cover crop must be revised. This is necessary as a cover crop is not considered as reported cropland. For example, rye was planted as a cover crop and recorded as such, but rye was not terminated according to subparagraph C. The rye was incorporated into the soil, so the crop needs to be revised to rye and the intended use needs to be revised to GM.

***--Example:** Wheat that was reported as a cover crop (crop code 0319) with a type of CEG, but the cover crop was not terminated according to subparagraph C. The crop needs to be revised to wheat (crop code 0011).--*

33 Reporting Organic Crops

A Reporting Organic

Crop acreage is not required to be reported as organic; however, a producer may choose to report organic. If a producer is participating in NAP and wants to use the NAP organic price, then the crop acreage must be reported as organic.

The buffer zone acreage must be included in the reported organic crop acreage of the unit that it buffers, either transitional or certified organic acreage, and reported on the same basis.

B Required Documentation

When an acreage report is filed according to paragraph 301 for an organic crop, the producer must provide a current organic plan, organic certificate (written certificate), or documentation from a certifying agent indicating an organic plan is in effect.

Notes: The National Organic Program (NOP) standards allow an exemption for a grower whose annual gross agricultural income from organic sales totals \$5,000 or less to be exempted from certification. Although a grower is not required to provide a written certificate, the producer is still required to provide a map showing the specific location of each field of certified organic, transitional, and buffer zone acreage.

If the producer **cannot** provide the required documentation, the acreage **cannot** be reported as organic.

C Certified Organic

For a certified organic acreage report the producer **must** provide a current organic plan and a recent written certification in effect from a certifying agent. The documentation **must** provide all of the following:

- name of the person(s) certified
- address
- telephone number
- effective date of certification (or certificate)

33 Reporting Organic Crops (Continued)**C Certified Organic (Continued)**

- certificate number
- list of commodities certified
- name and address of the certifying agent
- a map showing the specific location of each field of certified organic, including the buffer zone acreage.

Note: Because the organic certificate may not be issued every year, it is possible that the organic certificate may not list every crop the producer may plant.

Scenario: An organic certificate was issued in 2015 and lists: corn, oats, dry beans, and wheat. The next crop year, the insured plants canola, flax, and dry peas which are not listed on the organic certificate. The organic plan has not been updated for the current crop year to show these crops. In this case:

Example 1: The type of organic operation is still “crops,” and as long as the canola, flax, and dry peas were grown on ground that had previously been identified in the organic plan to be certified organic, the crops would be considered under the organic practice, as “certified organic”.

Example 2: Using the same scenario above, the “Certificate” lists livestock or the type of livestock, such as hogs, sheep, cattle, etc. In this case, the type of organic operation cannot be identified as “crops” because the written “Certificate” lists livestock or the type of livestock, such as hogs, sheep, cattle, etc. The commodity type is not be “crops”, but “livestock”. Therefore, the crops (e.g., canola, flax, and dry peas, etc.) cannot be considered certified organic under the written “Certificate”.

33 Reporting Organic Crops (Continued)

D Transitional Acreage

For a transitional (converting conventional acreage to certified organic acreage) organic acreage report, except as noted in subparagraph B, the producer must provide an organic plan and written documentation from a certifying agent indicating an organic plan is in effect.

The organic plan must:

- identify the acreage that is in transition for organic certification
- list crops grown on the acreage during the 36 month transitioning period
- include all other acreage, including conventional acreage, in the farming operation
- provide a map showing the specific location of each field of transitional, including the buffer zone acreage.

34 Hoop Houses or High Tunnels**A Introduction**

There has been a growing interest in the production and reporting of crops in High Tunnels. NRCS currently offers cost-share assistance for the building of what is referred to as High Tunnel or Hoop Houses. To be eligible for cost-share the structure must be built on cropland acreage.

B Definition of Hoop or High Tunnel

A Hoop House or High Tunnel is a structure which is considered a controlled environment. The purpose is for crop and plant production to be grown outside of recognized planting dates or zones for the State. Producers use this practice to expand their marketing outside normal planting dates for their region. Crops grown within these structures may be eligible for program benefits; however, any crop or plant loss will not be recognized outside the normal planting period recognized by the State.

High Tunnels where plants are being grown in pots or above ground are not considered cropland.

C Reporting High Tunnels on FSA-578

CARS currently allows for acreage reporting to .0001 acres; therefore, so eligible crops must be planted in contiguous patterns of approximately 4 square feet meeting recognized plant populations. Reporting of individual plants cannot be recorded in CARS.

35 Continuous Perennial Forage

A Certify Acreage

To streamline the acreage reporting process, a method to certify selected **perennial** crops on a continuous basis was developed as a pilot program starting in 2016. This process was developed to reduce:

- producer visits to the County Office
- CARS network congestion.

Continuous certification allows a producer to report the certified acreage so it will roll forward annually and does not require additional action on the part of the producer or FSA in subsequent years unless a change to the acreage report occurs.

B Continuous Certification Process

The continuous certification process for perennial crops requires an initial certification on FSA-578. The producer may select the continuous certification option at any time after the crop is certified.

The following table provides information on operator and producer enrollment into continuous certification.

IF the continuous certification option is selected by...	THEN the continuous certification is applicable to...
the operator	all fields on the farm for the specific crop/crop type/intended use.
any producer sharing in the crop	field(s) in which the producer has a share for the specific crop/crop type/intended use.

If the continuous certification option is selected by the applicable final reporting date in the subsequent year, the acreage report is considered timely filed for the current year and will remain in effect for subsequent years until any change is reported to FSA.

Example 1: Operator Smith reports Grass/NAG/GZ for 2017 by the applicable final reporting date and selects the continuous certification option. For 2017 and subsequent years, operator Smith’s FSA-578 for Grass/NAG/GZ is considered certified and no additional action is required by operator Smith or FSA until a change occurs.

***--Note:** The County Office will print FSA-578 every year of the enrollment period and notate that it is enrolled in continuous certification.--*

35 Continuous Perennial Forage (Continued)**B Continuous Certification Process**

Example 2: Operator Smith reports Grass/NAG/GZ for 2017 by the applicable final reporting date and does not select the continuous certification option. Operator Smith returns to the office 3 weeks after the final reporting date and selects the continuous certification option. For 2018 and subsequent years, operator Smith's FSA-578 for Grass/NAG/GZ is considered certified and no additional action is required by operator Smith or FSA until a change occurs.

Example 3: Operator Smith reports Grass/NAG/GZ for 2017 by the applicable final reporting date, but does not select the continuous certification option. In 2018, operator Smith comes to the office after the final acreage reporting date and wants to select the continuous certification option. For 2018, the Grass/NAG/GZ is considered late-filed and operator Smith must file a 2018 FSA-578 prior to submitting a FSA-578C to select the continuous certification option.

Crops reported under continuous certification are subject to the same compliance spot checks as other FSA-578's.

C Selecting Continuous Certification

Producers may select continuous certification for perennial forage crops using FSA-578C * * *. The producers enrolling in continuous certification must have a share of the perennial crop.

Enrollment will be at the farm level by crop, crop type, and intended use.

Note: The continuous certification process does not prevent any producer from filing an annual acreage report.

35 Continuous Perennial Forage (Continued)**D Terminating Continuous Certification**

The producer can terminate continuous certification for the farm at any time by crop, crop type, and intended use.

Note: This will terminate continuous certification for all fields of the crop, crop type, and intended use for the farm.

The continuous certification will automatically be terminated if any of the following changes occur:

- changes in farm records, including producer changes
- changes in CARS
- determined acres are different than reported
- acreage report is revised
- enrolled crop is no longer certified
- crop, crop type, and intended use is no longer an eligible perennial crop
- changes in the CLU greater than 1 acre for the field with continuous certification
- farm reconstitution.

Note: Deleting a field or fields of the enrolled crop, crop type, and intended use will not terminate the continuous certification.

Example 1: Operator A timely reports 5 fields of native grass (NAG) for grazing on the 2017 FSA-578 for FSN 10 and selects the continuous certification option. Operator A loses the grazing lease on FSN 10 for the 2018 crop year. The continuous certification on FSN 10 is terminated because the producer no longer has an interest in the crop.

Example 2: Producer A reports NAG for grazing on the 2017 FSA-578 for FSN 50 and elects to participate in the continuous certification option on this particular crop. The NAG for grazing on FSN 50 is reported by Producer A on field 1. Producer A also reports brome grass for forage on field 2 of FSN 50 and chooses not to participate in the continuous certification on FSN 50 for that crop. The County Office reduces 1.3 acres from a CLU (field 2) on FSN 50 due to construction of a home on the farm. The continuous certification is not terminated on FSN 50, because the CLU change was on field 2 and the crop certified on field 2 is not enrolled in continuous certification.

35 Continuous Perennial Forage (Continued)**D Terminating Continuous Certification**

Example 3: Producer A reports 5 fields of common bermuda grass (BCM) for grazing on the 2017 FSA-578 for FSN 100 and elects to participate in the continuous certification option. At the same time, Producer A also reported 2 fields (field 1 and 2) of BCM for forage and does not include these two fields in the continuous acreage certification enrollment. The producer informs the County Office prior to the 2018 final ARD for perennial grass that the intended use for fields 1 and 2 will be grazing for 2018 instead of forage. The continuous certification is not terminated because none of the fields with an existing continuous certification was revised. Field 1 and 2 will automatically be added to the continuous certification election and the producer does not need another FSA-578C completed.

Example 4: Producer A reports 10 fields of BCM for grazing on the 2017 FSA-578 for FSN 1 and elects to participate in the continuous certification option. The producer informs the County Office prior to the 2018 final ARD for perennial grass that the intended use will be forage instead of grazing for 2018 for 2 of the fields on this farm. The continuous certification is terminated and the producer must complete another.

36 Continuous Acreage Reporting for CRP

A CRP Acreage Data

The continuous certification process for CRP requires an initial certification on FSA-578. The one-time CRP certification uses the end date field to allow the certified acreage data to roll forward annually. The CRP acreage data is considered certified until the producer notifies the County Office of any change to the certification on file, the CRP contract expires, or the CRP contract is terminated. Continuous certification applies to all CRP acreage data beginning with CRP acreage reports filed for the 2016 crop.

Note: The continuous certification process does not prevent any producer from filing an annual acreage report.

37 **Prevented Planted Acreage Credit**

A Definition of Prevented Planting

Prevented planting is the inability to plant the intended crop acreage with proper equipment by the final planting date for the crop type because of a natural disaster.

The inability to plant a crop includes the following situations:

- irrigated crops were not planted because of a lack of water expected to be available by the final planting date

Note: See Exhibit 2 for definitions of adequate water supply or source, good irrigation practice, irrigation, and irrigation equipment and facilities.

- for non-irrigated crops that were not planted by the final planting date because of insufficient soil moisture

- *--for cropland that was under water at the time of the final planting date.--*

37 Prevented Planted Acreage Credit (Continued)

B Prevented Planting Acreage Credit

The eligible cause of loss that prevented the planting of a crop must be all of the following:

- occurred after a previous planting period for the crop
- occurred before the final planting date for the crop in the applicable crop year or, in the case of multiple plantings, the harvest date of the first planting in the applicable planting period
- similarly affected other producers in the area, as determined by FSA.

COC may approve acreage as “prevented planted acreage” if all other conditions for approval are met and provided, and all of the following conditions are met:

- producers report the acreage to FSA within 15 calendar days after the final planting date determined for the crop by FSA, or
- if the acreage reported is after the timeframe, a farm visit verifying eligible disaster conditions that prevented the specified crop or acreage from being planted is performed

Note: Under no circumstance may acreage reported after the 15 day period be approved unless a field visit to verify eligible disaster conditions is completed. State and County Committees do **not** have authority to waive this field visit and verification provisions.

- all determinations made during field inspections must be documented on each late-filed acreage report, with results recorded in COC minutes
- the acreage must have been prevented from being planted as the result of a natural disaster and not a management decision

Note: To receive prevented planting acreage credit, the producer must demonstrate an intent to plant the acreage by providing documentation of field preparation, seed purchase, and any other information necessary to prove intent.

37 Prevented Planted Acreage Credit (Continued)**C Prevented Planted Acreage Credit Because of Drought**

Prevented planted acreage credit will not be given where the prevented-planted acreage was affected by drought, unless all of the following apply:

- on the final planting date for non-irrigated acreage, the area that is prevented from being planted has insufficient soil moisture for germination of seed
- prolonged precipitation deficiencies exceeded the D2 level as determined by the U.S. Drought Monitor
- verifiable information must be collected from sources whose business or purpose is recording weather conditions as determined by FSA and the sources will include, but are **not** limited to:
 - U.S. National Weather Service
 - Bureau of Reclamation
 - U.S. Army Corps of Engineers
 - NIFA
 - NRCS
 - Local irrigation authorities responsible for water allocations
 - State Department of Water Resources
 - CES, or
 - other sources responsible for the collection of water data or regulation of water resources (water allocations).

Prevented planted acreage credit applies to irrigated crops where the acreage was prevented planted because of a lack of water of an irrigated supply resulting from drought conditions, or contamination from salt water intrusion of an irrigation supply resulting from drought conditions, if there was not a reasonable probability of having adequate water to carry out an irrigation practice.

37 Prevented Planted Acreage Credit (Continued)

D Ineligible Prevented Planting

Acreage ineligible for prevented planted credit includes, but is not limited to, acreage:

- not planted because of a management decision

Note: Failure to plant when other producers in the area were planting will result in the denial of the prevented planting claim.

- required to be left unharvested under the terms of the lease or any other agreement
- where any other person receives a prevented planted payment for any crop for the same crop year, unless double-cropping requirements have been met
- where pasture or another forage crop is in place on the acreage during the time that planting of the crop generally occurs in the area
- used for conservation purposes or intended to be or considered to have been left unplanted under any program administered by USDA, including CRP planting history or conservation plans indicated would remain fallow for crop rotation purposes
- affected by the containment or release of water by any governmental, public, or private dam or reservoir project, if an easement exists on the acreage affected for the containment or release of the water
- where any volunteer or cover crop is hayed, grazed, or otherwise harvested for the acreage for the same crop year
- where there is an inadequate supply of irrigation water beginning before the RMA sales closing date for the previous crop year or the NAP application closing date for the crop according to 1-NAP, paragraph 22 through the final planting date of the current year

Note: See subparagraphs D and E for exceptions for ineligible acreage when irrigation water is reduced, and Exhibit 2 for the definition of an adequate water supply or source.

37 Prevented Planted Acreage Credit (Continued)

D Ineligible Prevented Planting (Continued)

- where there is a failure or breakdown of irrigation equipment or facilities
- quarantined by a county, State, or Federal government agency
- affected by chemical and herbicide residue
- where the producer was unable to find a market for the crop
- for value loss crops, including, but not limited to, Christmas trees, aquaculture, or ornamental nursery, for which NAP assistance is provided under value loss procedure
- affected by wildlife damage
- for tree crops and other perennial, unless the producer can prove resources were available to plant, grow, and harvest the crop, as applicable
- where reduction in irrigation water supply is because of participation in an electricity buy-back program, the sale of water under a water buy-back is ineligible for prevented planted credit, or changes in water use because of legislation changes or any other cause which is not a natural disaster
- devoted to noncropland.

37 Prevented Planted Acreage Credit (Continued)**E Exceptions for Ineligible Prevented Planted Acreage When Ground Water Is Reduced**

If source information is not available to indicate the amount of irrigation water that would be provided from a snow pack, precipitation, and inflows beginning on the prior years' RMA or NAP normal harvest date for the crop, then for the current year, prevented planted credit will be restricted to the amount of crop acres irrigated in the previous year.

Example: Producer normally irrigates 1000 acres with ground water. In 2017, producer plants 750 acres and is prevented planting on 250 acres because of drought. For *--the 2017 crop year, there is no information available as to the amount of water that would be available to irrigate the acreage under normal snow pack, precipitation, and inflow conditions. Ultimately for 2017, the producer receives enough water to irrigate 650 acres. Only 100 acres would be eligible for prevented planted because eligibility is determined based on the 750 planted acres irrigated in 2016.--*

F Timely Reporting of Prevented Planting

To be considered timely, producers who request prevented planting acreage credit for a crop not covered by NAP must complete CCC-576, Part B within 15 calendar days after, but not before, the final planting date. CCC-576 can be completed before the acreage being reported on FSA-578, however FSA-578 must be completed for the prevented planted acreage by the final ARD for the crop.

Notes: County Offices must use established final planting dates according to *--subparagraph 22 A.--*

After CCC-576 is submitted, it **cannot** be withdrawn or revised.

CCC-576 cannot be filed for a crop before its final planting date.

37 Prevented Planted Acreage Credit (Continued)**F Timely Reporting of Prevented Planting (Continued)**

County Offices that accept a prevented planted claim (CCC-576), Part B more than 15 calendar days after the final planting date can consider CCC-576, Part B timely filed, regardless of when it is received, if the producer has crop insurance coverage for the crop and timely filed a prevented planted claim to the reinsurance company.

Acceptable RMA data used to accept a late-filed claim includes information in CIMS showing a timely filed prevented planting claim to RMA. If CIMS does not provide data to support the producer's certification or prevented planted acreage on FSA-578 and CCC-576, it is the producer's responsibility to provide proper evidence that the prevented planted claim was filed timely with the reinsurance company.

Notes: All other crops not covered by crop insurance must meet the 15 calendar-day requirement provided in this subparagraph or be subject to the late-filed provisions in *--paragraph 27.--*

All RMA data in CIMS is considered timely filed.

37 Prevented Planted Acreage Credit (Continued)

G Final Planting Notes

If prevented planting acreage is reported on FSA-578 and CCC-576, Part B is filed beyond the period identified in subparagraph F, COC will consider acceptable CCC-576's that are filed at such time to permit COC or their authorized representative the opportunity to:

- make a farm visit to verify the eligible disaster conditions which prevented the specific acreage or crop from being planted
- determine, based on information obtained by visual inspection of the specific acreage or crop, that eligible disaster conditions, such as damaging weather or other adverse natural occurrences, rather than other factors, prevented the acreage or crop from being planted.

Prevented planting **must be denied** in each case where CCC-576, Part B is submitted beyond the period specified in subparagraph F and at a time that would not permit COC or an authorized representative the opportunity to make a farm visit to inspect the specific acreage or crop to verify eligible disaster conditions that prevented the acreage or crop from being planted.

Exception: For CCC-576, Part B, submitted beyond the period specified in subparagraph F and at a time that would **not** allow verification of the specific acreage through farm inspection, RMA data may be used to accept a late-filed CCC-576 prevented planting request, if the prevented planted acreage was reported timely to RMA and supports the prevented planted information reported on FSA-578. All other prevented planted provisions shall be met. **This exception does not apply to NAP.** See

--subparagraph 27 A for guidance on accepting late-filed FSA-578's.--

Example 1: Producer late-filed CCC-576 on July 10 claiming prevented planted soybeans because of flooding. County Office employee makes a farm visit on July 17 and verifies flooding as the condition that prevented the producer from planting the intended crop. In this case, COC may accept the late-filed CCC-576, Part B, because flood condition can be verified by the farm visit.

Example 2: Producer late-filed CCC-576 on June 25 claiming prevented planted corn because of drought. Rain fell on June 30, before inspection was performed. In this case, COC cannot accept the late-filed CCC-576, Part B, because drought condition cannot be verified by the farm visit.

37 Prevented Planted Acreage Credit (Continued)

G Final Planting Notes (Continued)

Example 3: Producer late-filed CCC-576 on August 2 claiming prevented planted wheat because of excessive rain. When the field inspection was performed on August 10, the field was determined to be dry enough for planting. In this case, COC cannot accept the late-filed CCC-576, Part B, because wet condition was not verified by the farm visit.

Notes: Results of the farm visit must be documented on each filed CCC-576, and recorded in COC minutes, to support the documentation.

--Late-filed fees shall apply according to paragraph 27.--

H Processing Prevented Planting Claims

Producers must establish to the satisfaction of COC that:

- all cropland feasible to plant but prevented from being planted was directly affected by a natural disaster

Note: The unavailability of equipment, seed, or fertilizer, even if this unavailability is because of or related to the natural disaster, is **not** an eligible cause of prevented planting.

- preliminary efforts made by the producer to plant the crop are evident, such as disking the land, orders for purchase, delivery of seed and fertilizer, or financing documents.

I Late-Filed Fees for Late-Filed CCC-576's

A late-filed CCC-576 requires assessing a late-filed fee to verify and determine the crop, acreage, and use. The late-filed fee is equal to the measurement service fee according to *--paragraph 928.--*

J Verifying Prevented Planted Acreage Claim

Verify prevented planted acreage by 1 of the following methods:

- crop insurance data if the data supports FSA-578
- field visit
- COC knowledge.

Example: If COC has knowledge that an area is affected by a natural disaster, COC can approve the acreage without performing a field visit as long as the claim was timely filed according to subparagraph F.

37 Prevented Planted Acreage Credit (Continued)**K Processing Prevented Planting Acreage Claim**

CCC-576 will be processed according to this paragraph, but marked as “Not for NAP” if it is only for acreage that is not covered by NAP.

CCC-576, Part B will:

- be completed by the producer or farm operator
- provide sufficient information for COC to determine that the claimed prevented planting or damage to specific acreage or crop was the result of natural disaster and not a management decision
- be date-stamped when received by the County Office

Note: A photocopy of the date-stamped completed CCC-576 must be given to the producer as evidence of filing.

- be reviewed and acted on by COC or a representative.

Notes: County Office will publicize to all producers that prevented planting acreage claims will only be accepted on CCC-576.

For prevented planting acreage claims, see Exhibit 15 for instructions on how producer will complete CCC-576.

37 Prevented Planted Acreage Credit (Continued)

L Review Prevented Planting Acreage Claim

COC will review each CCC-576, Part B and determine whether:

- notice of loss has been filed according to subparagraph F or G
- the claimed disaster condition or period, in CCC-576, item 9, appears reasonable and meets the definition of “natural disaster”
- a field visit is required to verify information on CCC-576 according to subparagraph I.

M Prevented Planted History

Beginning with the 2009 crop year, using prior years’ planting history will no longer be considered when making determinations for prevented planted acreage claims. COC must determine that all other prevented planted requirements are met according to this paragraph.

37 Prevented Planted Acreage Credit (Continued)

N Approving Prevented Planted Acreage Claim

COC must make a determination of eligibility on each request for prevented planting acreage credit filed by a producer. COC may request the producer show there was intent to plant the acreage by providing documentation of field preparation, seed purchase, and other information that shows the acreage could have been planted and harvested under normal conditions. If COC is not satisfied with the supporting documentation provided, then the request will be denied.

If the County Office is notified that a case involving prevented planting is under review by other USDA agencies, such as OIG or RMA, or crop insurance companies, COC will not make a determination on the request for prevented planting until the claim has been resolved by the other agency or crop insurance companies.

COC will, before approving prevented planting, be satisfied that:

- the prevented planting acreage was reported according to subparagraph F or G
- the producer intended to plant the crop acreage for harvest
- other producers in the area were similarly affected

Note: Failure to plant the crop when other producers in the area were planting the crop should result in the disapproval of the prevented planting claim.

- the reason the crop acreage could not be planted was because of natural disaster and not a management decision
- for a crop type with a single planting in a crop year, the eligible cause of loss occurred:
 - after the final planting date for the same crop type in the previous crop year
 - before the final planting date for the same crop in the crop year the request for prevented planting credit is filed
- for a crop type with multiple plantings in a single crop year, the eligible cause of loss occurred:
 - after the final planting date of the final planting period for the same crop type in the previous crop year
 - before the final planting date of the same crop type for the planting period the request for prevented planting credit is filed

37 Prevented Planted Acreage Credit (Continued)**N Approving Prevented Planted Acreage Claim (Continued)**

- generate a letter to the producer or producers filing CCC-576, Part B according to instruction in 1-NAP.

Notes: Approved prevented planted acreage must be limited to the number of acres physically able for planting.

To ensure accuracy of the acreage being reported, land that is destroyed in a current crop year to the extent that the acreage cannot be restored or the acreage will no longer be tillable may need to be reclassified and unavailable for subsequent crop year acreage credit.

O Disapproving Prevented Planted Acreage Claim

Issue one single decision letter addressed or copied to all producers with an interest in the specific acreage or crop when COC:

- disapproves entire acreage claimed on CCC-576, Part B
- approves less than the entire acreage claimed on CCC-576, Part B.

Notification letter must include the determination along with a detailed explanation supporting the determination and a right of appeal or reconsideration to COC according to 1-APP.

P Recording Prevented Planted Acreage

Producers with claimed prevented planting acreage must report acreage on FSA-578. COC must make a determination of eligibility on each CCC-576, Part B request for prevented planting credit.

See paragraph 82 for recording prevented planted acreage claimed on CCC-576.

38 Failed Acreage

A Definition of Failed Acreage

Failed acreage is acreage that was timely planted with the intent to harvest, but because of disaster related conditions, the crop failed before it could be brought to harvest.

B Proof of Failed Acreage

Producers who are requesting failed acreage credit must prove to COC's satisfaction that:

- the crop was planted with an intent to harvest using farming practices consistent for the crop and area
- the acreage failed because of disaster-related conditions.

C Requesting Failed Acreage Credit

To request failed acreage credit, a CCC-576 must be processed according to 1-NAP (Rev. 2), paragraph 575, but marked as "Not for NAP" if it is only for a failed acreage determination that does not have a NAP policy.

To be approved as failed acreage, the acreage must have been reported as failed acreage before the disposition of the crop and the acreage must have been planted under normal conditions but failed as the result of a natural disaster and not a management decision.

Exception: RMA data may be used to approve CCC-576 for failed acreage, when reported after the disposition of the crop, if the failed acreage was reported timely to RMA and supports the failed acreage information reported on FSA-578. **This exception does not apply to crops covered by NAP.**

38 Failed Acreage (Continued)

D Verifying Failed Acreage

Verify failed acreage by 1 of the following methods:

- crop insurance data if the data supports FSA-578
- COC knowledge

Example: If COC has knowledge that an area is affected by a natural disaster, COC can approve the acreage without performing a field visit.

- field visit.

Note: Late-filed fees will not apply unless associated to a late-filed FSA-578 according to *--paragraph 27.--*

E Approving Failed Acreage

Failed acreage determinations must be made on a case-by-case basis. After CCC-576 has been submitted, it **cannot** be withdrawn or revised. If COC is not satisfied with the supporting documentation provided, the request must be denied. For adverse determinations, producer may request reconsideration according to subparagraph F.

If the County Office is notified that a case involving failed acreage is under review by other USDA Agencies, such as OIG or RMA, or crop insurance companies, COC must **not** make a determination on the request for failed acreage credit until the claim has been resolved by the other agency or crop insurance company.

Note: Action must be taken on CCC-576's **before** PLC or ARC payments are processed.

F Recording Failed Acreage

Producers with claimed failed acreage must first report acreage on FSA-578. The acreage will be recorded in the acreage reporting software as reported with a supplemental status of “failed”. See paragraph 82 for recording failed acreage claimed as “low yield” on CCC-576.

38 Failed Acreage (Continued)

G Reporting the Replanting of Failed Acreage

If the initial crop fails and the producer replants the same crop on the same land, the crop is only to be reported once. The crop is a replacement crop, **not** a subsequent or double-crop. County Offices may notate on FSA-578 that the crop was replanted.

Example 1: Producer replants a failed crop of corn and has **not** reported the first planting of the crop on FSA-578.

Failed crops that are replanted to the same crop and no acreage report has been filed, will report the acreage only once, with planting date the date the crop was replanted. Treat the second replanted corn crop acreage the same as if it were the first planting of the crop.

Example 2: Producer planted corn, the acreage failed, and the producer filed an acreage report with a status code of “F” (failed) and CCC-576.

If the producer subsequently notifies the County Office that the acreage was replanted to the same crop, the acreage report must be revised to remove the “F” (failed) and change the date to reflect the date of the replanting of the same crop. Treat the replanted corn the same crop as if it was the first planting.

Note: Producers who report the first planting of a crop as failed and then subsequently replant the acreage to the same crop without revising their acreage report to reflect that the acreage was replanted may **not** be eligible for LDP’s or price support loans on the acreage because the acreage report will reflect that there will be no harvested acreage of the crop from which production could possibly be obtained.

39 Volunteer Acreage

A Volunteer Crop

A crop is considered volunteer if planted in a previous crop year on the applicable acreage, or drifted from other acreage, successfully self-seeded, and is growing this crop year on the applicable acreage without being intentionally sown or managed.

B Use of Volunteer Crop Acreage

Program eligibility will be determined by specific program provisions.

40 Double-Cropping**A Approved Double-Cropping**

Approved double-cropping occurs when both of the following are met:

- both the 2 specific crops (excluding cover crop acreage) have the capability to be planted and carried to maturity for the intended use, as reported by the producer, on the same acreage within a crop year under normal growing conditions
- specific combination of crops recommended by COC is approved by STC.

Note: Crop acreage planted for cover are not considered a crop for double-cropping ~~purposes~~ because cover crops are terminated. See paragraph 32 for terminating ~~cover crops~~.

One or both crops could have been prevented from planting and/or failed as long as both of the crops had reasonable expectations and realistic possibilities of being carried to maturity for the intended use within the same crop year under normal growing conditions.

Notes: See 1-ARCPLC for the definition of double-cropping FAV's or wild rice with covered commodities or peanuts.

The inclusion of a county on the list in 7 CFR 1412 does not mean that every double-cropping combination in that county is automatically approved. Counties on the list in 7 CFR 1412 are listed **only** for using the double-cropped FAV exception. See 1-ARCPLC.

40 Double-Cropping (Continued)**B Establishing Double-Cropping Crops**

In advance of a crop year, COC will submit to STC recommendations of specific combinations of crops that can annually meet the approved definition of double-cropping. This applies to **all** combinations that are requested to be reported on FSA-578 as double-cropped.

COC supporting documentation must include the following:

- length of growing season and moisture requirements required to produce the recommended crops for the intended use
- documentation of rainfall amounts normally received in the county during the growing season for each crop
- irrigation requirements, if any
- established final planting date for each crop for the intended use according to *--subparagraph 24 A--*
- COC-established normal harvest date for each crop for the intended use.

The normal harvest dates, if applicable, and final planting dates are established based on normal growing single cropping conditions.

Notes: See 1-ARCPLC, for the definition of double-cropping FAV's or wild rice with covered commodities or peanuts.

The inclusion of a county on the list in 7 CFR 1412 does not mean that every double-cropping combination in that county is automatically approved. Counties on the list in 7 CFR 1412 are listed **only** for the purpose of using the double-cropped FAV exception. See 1-ARCPLC, paragraph 290.

STC has authority to establish double-cropping crops without COC input.

40 Double-Cropping (Continued)

C COC Action

COC will submit any changes or additions in double-cropping practices to STC for approval.

- If double-cropping recommendations are based on both crops reaching maturity, then all other intended uses are automatically included in the recommendation. No further action is required.

Example: A fall planted small grain intended for grain (GR) followed by spring planted peas intended for fresh (FH) is considered an acceptable double-cropping practice. All other double-cropping practices for small grain followed by peas, such as small grains intended for green manure (GM) followed by peas intended for fresh (FH), will automatically be considered acceptable with no further action.

- If double-cropping recommendations for both crops were not based on the crops reaching maturity, then each intended use for the recommended double-cropping practice must be listed separately for consideration by STC.

Example: A fall planted small grain intended for grain (GR) followed by spring planted peas intended for fresh (FH) is not an acceptable double-cropping practice. In such cases, COC must list each recommended double-cropping practice separately by intended use for consideration, such as fall planted small grain intended for green manure (GM) followed by spring planted peas intended for fresh (FH), fall planted small grain intended for grazing (GZ) followed by spring planted peas intended for fresh (FH).

D STC Action

STC will review and approve or disapprove COC-recommended changes or additions to specific combinations of crops based on the data submitted by COC.

STC must **not** approve any of the following:

- any specific combination of crops that were disapproved as a multiple-cropping practice under a particular program without first obtaining concurrence of DAFP
- a combination comprised of plantings of the same crop
- any specific combination of crops if both crops cannot be planted and carried to maturity for the intended use, as applicable, on the same acreage within the same crop year under normal growing conditions.

Note: A second planting of the same crop on the same acreage in the same crop year shall be considered a repeat planting, not double-cropping.

40 Double-Cropping (Continued)**E County Office Action**

County Offices will:

- annually publicize approved double-cropping combinations in the county by available means
- ensure approved double-cropping combinations are recorded on FSA-578, with applicable status codes, according to Exhibit 11.

F Exception

There may be some cases where a producer has a verifiable record of double-cropping a specific combination of crops that were either of the following:

- not recommended by COC
- not approved by STC.

At the request of the producer, these cases will be reviewed by STC on a case-by-case basis. STC may approve the specific combination of crops for that particular producer only if the following requirements are met:

- producer provides verifiable and documentable proof that the specific crops have been successfully planted and carried to maturity for the intended use on the same acreage in the same crop year in at least 2 of the previous 4 crop years
- for crops requiring irrigation, evidence must be provided to show that the specific DMLA crops planted and carried to maturity for the intended use were irrigated.

This exception does not apply nor will STC approve any combination of crops for a specific producer if any of the following are met:

- 1 or both of the crops:
 - involved in the sequence were prevented from being planted or failed
 - require irrigation and no verifiable evidence of irrigation is provided
 - involved in the sequence were not carried to maturity for the intended use, as applicable.

41-56 (Reserved)

Section 2 Creating Crop Default Records

57 Establishing Crop Characteristics

A Introduction

CVS is the database that maintains crop characteristics and serves as a central commodity lookup table for use by CARS, NCT, and other program software applications. Exhibit 19 contains select data fields from CVS; that is, all the valid current year's crops, types, intended uses, and FAV status (land use code).

All 2013 and subsequent years' CVS data is stored and maintained within CRM/Product Master.

Product Master includes all FSA commodities that are eligible for FSA transactions, such as acreage or inventory reporting. The term "product" refers to the combination of a crop and type.

Example: Lettuce, Bibb or Corn, Yellow are both products within Product Master.

FSA employees have the ability to view the full details about any product within CRM/Product Master/Search Products. Users will refer to the Product Master work instructions for additional instructions on searching for and reviewing products.

B Requesting Additional Crops, Types, and/or Intended Uses

If a producer reports a crop, type, or intended use that is **not** currently available in Exhibit 19 or Product Master, the County Office will use the "New Product Request" function in CRM/Product Master to request the addition. The automated New Product Request process will be initiated by the County Office, in most cases.

All FSA employee users will refer to the New Product Request work instructions (available in CRM) and CT-310 New Product Request training (available in AgLearn) for additional information.

57 Establishing Crop Characteristics (Continued)

B Requesting Additional Crops, Types, and/or Intended Uses (Continued)

County Offices will:

- perform a thorough review and analysis of all available data for the crop and its characteristics before submitting the request
- search “Requested Products” in CRM for pending requests of the same crop, type, or intended use

Note: If a pending request is located, follow instructions in subparagraph C.

- indicate either or both of the following in the New Product Request:
 - the request is for the addition to Product Master, for purposes of acreage or inventory reporting
 - the request is for determination of NAP crop eligibility

Note: Ensure that the request is handled according to 1-NAP.

- provide sufficient information in the request, justifying the addition of the crop, type, or intended use

Note: The justification documentation should, at a minimum, answer the following questions.

- Is the crop or type currently listed in Product Master under another name or synonym?
- What specific differences are there in the product being requested and the products already available in Product Master?
- What are the differences in the characteristics of the product being requested, such as prices and yields?
- How many producers are attempting to report the new product and how many acres is each producer reporting?
- select “County Office Completed by” in the “Partner Functions” transaction block, and verify that the name of the County Office employee completing the request is loaded
- e-mail or call the State Office notifying them of the new request pending State Office review.

Note: The New Product Request is **not** a workflow transaction and will **not** automatically be sent to another FSA employee to take action. An e-mail or telephone call is required to notify the next level to review the request.

57 Establishing Crop Characteristics (Continued)**B Requesting Additional Crops, Types, and/or Intended Uses (Continued)**

State Offices will:

- use the “Search Requested Products” query in CRM/Product Master to locate the pending New Product Request
- review the information provided by the County Office in the request
- enter the reason for the approval or rejection in the “Note” section, and attach additional supporting documentation as necessary
- edit the “Partner Functions” transaction block, select “State Action Completed by”, and load the name of the reviewing State Office employee
- edit the Interaction Log Details and change the status code to “State Approved” or “State Rejected”
- if the request is approved by the State Office, e-mail with attention to **RA.FSA.DCWA2.ppb@wdc.usda.gov** for National Office review
- if the request is rejected by the State Office, e-mail the requesting County Office to notify them of the decision.

Requests for additions will **not** be considered unless all required information is included.

Once the National Office reviews the request, an e-mail will be sent to all parties involved in the New Product Request (State and County Offices), notifying them of National Office approval or rejection.

The status of the New Product Request can be viewed at any time within CRM. In addition to the requesting County Office, all FSA employees can view all pending and completed New Product Requests throughout the United States, and the current status of each request.

57 Establishing Crop Characteristics (Continued)**C Supplementing an Existing/Pending New Product Request**

--As new products are added to Product Master and Exhibit 10, they are available for-- nationwide use in FSA transactions, and not limited for use by only the State or County Office that requested the new product.

State or County Offices may add regional supporting documentation to an existing New Product Request. Field Offices are encouraged to review the pending New Product Requests before submitting a new request.

Example: A producer in State A-County A has reported acreage on “Cinderella Pumpkins” and the County Office has determined that this is a unique product that is not currently listed in Product Master or available for acreage reporting. Before submitting a New Product Request, PT in State A-County A performs a search on the requested products in CRM and reviews the existing requests. PT finds a pending New Product Request for “Cinderella Pumpkins” that was submitted 3 workdays before by PT in State B-County B. Rather than submit a second New Product Request for the same product, PT from State A-County A may add additional notes and attachments to provide additional justification to add the product.

58-73 (Reserved)

Section 3 Entering Basic Field Data

74 Crop Status Codes

A Using Crop Status Code “D”, “E”, “F”, “G”, “H”, or “O”

Use crop status code “D”, “E”, “F”, “G”, “H”, or “O” in the first character field for double crop when a crop meets all of the following:

- is not the first crop in the field
- is not a repeat of the first crop in the field
- meets the double-cropping guidelines in paragraph 25.

This table defines the valid codes to be used in the first character field when entering double crop acres.

Code	Definition
D	Covered commodity followed by a different covered commodity - meets double-cropping definition.
E	Covered commodity followed by FAV or wild rice or vice versa - meets double-cropping definition.
F	FAV followed by a different FAV - meets double-cropping definition.
G	Noncovered commodity/non-FAV followed by covered commodity or vice versa - meets double-cropping definition.
H	Noncovered commodity/non-FAV followed by FAV or vice versa - meets double-cropping definition.
O	Noncovered commodity/non-FAV followed by a noncovered commodity/non-FAV meets double-cropping definition.

B Using Crop Status Code “J”, “K”, “L”, “M”, “N”, or “P”

Use crop status codes “J”, “K”, “L”, “M”, “N”, or “P” in the first character field for a subsequent crop when a crop meets all of the following:

- is not the first crop in the field
- is not a repeat of the first crop in the field
- does not meet the double-cropping guidelines in paragraph 25.

74 Crop Status Codes (Continued)

B Using Crop Status Code “J”, “K”, “L”, “M”, “N”, or “P” (Continued)

This table defines the valid codes to be used in the first character field when entering subsequent crop acres.

Code	Definition
J	Covered commodity followed by a different covered commodity – does not meet double-cropping definition.
K	Covered commodity followed by FAV or wild rice or vice versa – does not meet double-cropping definition.
L	FAV followed by a different FAV – does not meet double-cropping definition.
M	Noncovered commodity/non-FAV followed by covered commodity or vice versa – does not meet double-cropping definition.
N	Noncovered commodity/non-FAV followed by FAV or vice versa – does not meet double-cropping definition.
P	Noncovered commodity/non-FAV followed by a noncovered commodity/non-FAV does not meet double-cropping definition.

Note: A second or subsequent crop is the crop planted after the first crop on the same field or subdivision within a crop year that does not meet the definition of a double crop or a repeat crop.

C Using Crop Status Code “R”

Use crop status code “R” in the first character field when the crop is a repeat of the same initial crop planted.

Example: If the first crop planted on the field was “Carrots” with a type of “Mini” and an intended use of FH and the second planting has all of the same characteristics, use crop status code “R”.

The repeat status code “R”, along with the selected planting period, will indicate the sequential repeat plantings for the crop year. See subparagraph 162 D for planting period selection in CARS.

D Using Crop Status Code “X”

Use crop status code “X” in the first character field when a crop is considered experimental. A crop is considered experimental if it meets all of the following:

- crop is planted for experimental purposes conducted under the direct supervision of a State experiment station or commercial company
- production is destroyed before harvest or used for testing or other experimental purposes
- a representative of the State experiment station or the commercial company certifies that any production harvested from the experiment will not be marketed in any form

74 Crop Status Codes (Continued)

D Using Crop Status Code “X” (Continued)

- the farm operator certifies that no harvested production of the crop has been or will be received
- by the final reporting date, the farm operator reports the acreage to be excluded and identifies the acreage on a photocopy.

Note: In CRM/Product Master, the “Experimental” status is captured independently of the crop status codes. This will enable producers to report crops that are experimental, along with any other applicable crop status.

E Using Crop Status Code “F”, “P”, or “V”

Use crop status code:

- “F” in the second character field when the crop meets the definition of failed according to paragraph 38
- “P” in the second character field when the crop meets the definition of prevented planted according to paragraph 37
- “V” in the second character field when the crop is volunteer.

Note: In CRM/Product Master, the “Volunteer” status is captured independently of the failed and prevented planting status codes. This will enable producers to report crops that are volunteered and failed.

F Using Crop Status Code “M”

Use crop status code “M” in the third character field when either of the following apply:

- a field has multiple different crops planted at the same time, and a planting pattern cannot be determined
- a field has the same crop growing in different stages at the same time, and a planting pattern cannot be determined.

Example: Coffee, plantain, and bananas are planted in the same field at the same time. All 3 crops should be reported with crop status code “I” for initial in the first character field and “M” in the third character field.

75 Variety and Type Selection

A Selecting Crop Variety and Type

*--Select the proper crop variety and type from Exhibit 10 based on producer input for crop year 2003 and subsequent years.

Warning: Selection of the correct variety and type code for crops is crucial to identify type for correct program benefit. If the specific type or variety is **not** listed, use the New Product Request in CRM to request additional crops and/or types according to paragraph 57--*.

B Selecting Soybean Variety and Types

Selection of the correct variety and type code for soybeans is crucial to protect loan eligibility and identify type for correct potential NAP benefit rates.

Refer to the following:

- 2-LP Grains and Oilseeds for loan eligibility
- 1-NAP (Rev. 1) for NAP eligibility.

76 Intended Use Codes

A Determining Proper Codes

Intended use codes can affect program eligibility for various programs, including, but not limited to NAP, marketing assistance loans, CRP, ARC, PLC, etc.

Follow subparagraph B for CRP.

Note: The intended use code “CO” (Cover Only) must only be used to report cover crops according to paragraph 32. Intended use code “GM” (green manure) and “LS” (left standing) should no longer be used to report cover crops.

*--Follow Exhibits 10 and 11 to determine proper status and intended use codes for a current year’s crop.

Warning: Selection of the correct variety and type code for crops is crucial to identify intended use for correct program benefits. If the specific intended use is **not** listed, use the New Product Request in CRM to request additional crops intended uses according to paragraph 57.

Actual use is not captured in CARS. If an actual use is reported by the--* producer, the actual use shall be notated on the hardcopy FSA-578 and initialed by the producer.

76 Intended Use Codes (Continued)

A Determining Proper Codes (Continued)

In CRM/Product Master, each intended use for a product has a “valid from” and “valid to” date that defines the time period that product and intended use are applicable for FSA transactions, such as acreage or inventory reporting. These dates do **not** define program eligibility or ARD’s.

B CRP Intended Use Codes

CRP intended use codes are listed in this table. The numeric intended use codes are only used when reporting acreage for 2012 and prior years. For 2013 and subsequent years, there are no intended use codes for CRP. The CRP codes and description are included in the type *--code and type name. See Exhibit 10.--*

CRP Intended Use Code	CRP Practice Number	CRP Practice Description
1	CP1	Establishment of permanent introduced grasses and legumes
2	CP2	Establishment of permanent native grasses
3	CP3	Tree planting
4	CP4	Permanent wildlife habitat
5	CP5	Field windbreak establishment
6	CP6	Diversions
7	CP7	Erosion control structure
8	CP8	Grass waterways
9	CP9	Shallow water areas for wildlife
10	CP10	Vegetative cover, such as grass, that was already established
11	CP11	Vegetative cover, such as trees, that were already established
12	CP12	Wildlife food plot
13	CP13	Vegetative filter strips
14	CP14	Bottomland timber that was established on wetlands

76 Intended Use Codes (Continued)

B CRP Intended Use Codes (Continued)

CRP Intended Use Code	CRP Practice Number	CRP Practice Description
15	CP15	Establishment of permanent vegetative cover (contour grass strips)
16	CP16	Shelterbelt establishment
17	CP17	Living snow fence
18	CP18	Establishment of permanent vegetation to reduce salinity
19	CP19	Alley cropping
20	CP20	Alternate perennial
21	CP21	Filter strips
22	CP22	Riparian buffer
23	CP23	Wetland Restoration
24	CP24	Cross Wind Trap Strips

26	CP26	Sediment Retention Control Structure: MI CREP
27	CP27	Farmable Wetland Pilot Wetland
28	CP28	Farmable Wetland Pilot Buffer
30	CP3A	Hardwood tree planting
31	CP4A	Permanent wildlife habitat (corridors)
32	CP13A	Vegetative filter strips (grass)
33	CP18A	Establishment of permanent salt tolerant vegetative cover
34	CP13B	Vegetative filter strips (trees)
35	CP4B	Permanent wildlife (corridors), noneasement
37	CP5A	Field windbreak establishment, noneasement
38	CP8A	Grass waterways, noneasement
39	CP13C	Vegetative filter strips (grass), noneasement
40	CP13D	Vegetative filter strip (trees), noneasement
41	CP15A	Establishment of permanent vegetative cover (contour grass strips), noneasement
42	CP16A	Shelterbelt establishment, noneasement
43	CP17A	Living snow fences, noneasement
44	CP18B	Establishment of permanent vegetation to reduce salinity, noneasement
45	CP18C	Establishment of permanent salt tolerant vegetative cover, noneasement

76 Intended Use Codes (Continued)

B CRP Intended Use Codes (Continued)

CRP Intended Use Code	CRP Practice Number	CRP Practice Description
46	CP4D	Permanent wildlife habitat, noneasement
47	CP15B	Marginal pastureland (Contour Grass Strips) on Terraces
48	CP29	Marginal pastureland wildlife habitat buffer
49	CP30	Marginal wetland buffer
50	CP31	Bottomland timber established on wetland
51	CP23A	Wetland restoration, nonflood plain
52	CP32	Expired hardwood tree planting
53	CP33	Habitat for upland birds
54	CP34	Flood Control System
55	CP35A	Emergency Forestry – Longleaf Pine – New
56	CP35B	Emergency Forestry – Longleaf Pine – Existing
57	CP35C	Emergency Forestry – Bottomland Hardwood – New
58	CP35D	Emergency Forestry – Bottomland Hardwood – Existing
59	CP35E	Emergency Forestry – Softwood – New
60	CP35F	Emergency Forestry – Softwood – Existing
61	CP35G	Emergency Forestry – Upland Hardwood – New
62	CP35H	Emergency Forestry – Upland Hardwood – Existing
63	CP35I	Emergency Forestry – Mixed Trees – Existing
64	CP36	Longleaf Pine Initiative
65	CP37	Duck Nesting Habitat
66	CP38A	State Acres for Wildlife Enhancement – Buffers
67	CP38B	State Acres for Wildlife Enhancement – Wetlands
68	CP38C	State Acres for Wildlife Enhancement – Trees
69	CP38D	State Acres for Wildlife Enhancement – Longleaf Pine
70	CP38E	State Acres for Wildlife Enhancement – Grass
71	CP39	FWP Constructed Wetland
72	CP40	FWP Aquaculture Wetland Restoration
73	CP41	FWP Flooded Prairie Wetland
74	CP42	Pollinator Habitat

76 **Intended Use Codes (Continued)**

***--C Intended Use Code GS**

For crop year 2018 and prior years, County Offices were instructed to report small grain crops planted that have multi-uses with an intended use code GS to represent grazing and grain.

Beginning with the 2019 crop year, the intended use code GS will not be available in CARS. Crops that have multi-uses will be reported as two separate line items on FSA-578 according to paragraph 84.--*

77 **Land Use Codes**

A Required Entry

If the crop is a fruit or vegetable with an intended use of “Fh”, “Pr”, or “Ju”, enter “F” as the land use code.

Note: Leave the land use code as “blank” in all other situations.

B Determining FAV’s

Follow 4-CP for additional procedures for determining FAV’s.

78 Entering “M”, “O”, and “S” Codes**A Measured Farms Eligible for Spot Check**

All crops and land uses are subject to spot check and will not be by-passed because of the following codes:

- “M” flag was entered for every field of a crop or land use
- combination of “M” and “O” flags were entered for every field of a crop or land use.

B Critical Entries on Load, Revise, or Determined Screens

If the flag was entered on the:

- load or revise screen, **reported** acreage for the field will be subtracted before tolerance is calculated
- determined screen, **determined** acreage for the field will be subtracted before tolerance is calculated.

C “O” Flag Entries

An entry of “O” is not mandatory in the load process when a crop did not have total measurement after planting.

If an “O” was entered in the load process, remove “O” in the revise process, unless COC believes that the producer had reason to know that the actual acreage differed from the official acreage.

D “S” Flag Entries

An entry of “S” indicates that the field had staking and referencing. This code may be entered either in load process or in the revise or determined process according to the table in subparagraph E.

78 Entering “M”, “O”, and “S” Codes (Continued)

E When to Use “M”, “O”, and “S” Flags

Use the following table to decide when an “M”, “O”, or “S” flag must be entered.

Note: Always use “M” or “O”, as applicable, when the determined acreage is the same as reported and “M” or “O” was entered during the reported or revised process.

WHEN...	AND...	THEN for the field...
the crop had total measurement after planting	producer reports acreage equal to official acreage on the field	ENTER “O” on the Load Screen. Note: This is required.
	all of the following apply: <ul style="list-style-type: none"> • producer paid for total measurement after planting on the crop • field was measured because it was not an official field • producer reports acreage exactly as measured 	ENTER “M” on the Load Screen.
	producer reported acreage as measured, but a spot check finds acreage other than as reported, and “M” was not entered during the load process	ENTER “M” on the Revise Screen.
	producer reported acreage other than measured for a field and spot check finds acreage other than measured	leave blank.
	producer reported acreage other than measured and a spot check finds acreage as measured	ENTER “M” on the Determined Screen.
	producer reported acreage as measured and a spot check finds acreage as measured	ENTER “M” on the Determined Screen.
	producer reported acreage as measured and a spot check finds acreage as measured	ENTER “M” on the Determined Screen.

78 Entering “M”, “O”, and “S” Codes (Continued)

E When to Use “M”, “O”, and “S” Flags (Continued)

WHEN...	AND...	THEN for the field...
the crop had partial measurement after planting	producer reported acreage as measured, but a spot check finds acreage other than measured in the field	ENTER “M” on the Revise Screen.
	producer reported acreage as measured and a spot check finds acreage as measured in the field	ENTER “M” on the Determined Screen.
the crop had staking and referencing	producer reported acreage other than staked and referenced and a spot check finds acreage as staked and referenced in the field	ENTER “S” on the Determined Screen.
	producer reported acreage as staked and referenced, but a spot check finds acreage other than as staked and referenced in the field	ENTER “S” on the Revise Screen.
	producer reported acreage as staked and referenced and a spot check finds acreage as staked and referenced in the field	ENTER “M” on the Determined Screen.

78 Entering “M”, “O”, and “S” Codes (Continued)

E When to Use “M”, “O”, and “S” Flags (Continued)

WHEN...	AND...	THEN for the field...
the field has official acreage	producer reported official acreage, “O” was not entered during the load process, and a spot check finds acreage other than official	leave blank on all screens. Exception: See paragraph 77.
	producer reported official acreage, “O” was not entered during the load process, and a spot check finds official acreage equal to reported acreage	ENTER “O” on the Determined Screen.
	producer did not report official acreage, but a spot check finds official acreage	
specific instructions to enter the “O”, “M”, or “S” flag do not apply	Note: This includes cases where the flag was already entered for the field on the load or revise screen and determined acreage equaled the reported acreage.	leave blank on all screens.

79 Entering Dates**A Planting Date**

The planting date is a required entry. For each field, enter the actual planting date of the crop. If the crop was planted over several days, enter the average planting date.

Note: For crops that do not require a planting date, see subparagraph F.

B Reason End Year Date Is Important

The end year date must be greater than the present FSA-578 crop year to have fields, including CRP, rolled over to the next crop year.

Examples:End year date of “2003” was entered for a field in a previous year’s FSA-578 process. The field will then be rolled over to the current year’s FSA-578. It will not be rolled over to the 2004 FSA-578.

End year date was not entered for a field in a previous year’s FSA-578 process. The field will not be rolled over to the current year FSA-578.

C CRP and End Year Dates

County Offices must enter the appropriate end year date, from CRP-1, in all new CRP fields for the current year. Failure to enter the date will mean that the field will not be rolled over to future FSA-578’s.

D Other Crops and End Year Dates

Enter an end year date for a field only if that crop will maintain the exact same crop characteristics next year. This includes the same crop status, intended use, and type.

Example: A perennial crop that is entered with an end year date will prevent the producer from having to report the crop every year. The end year date will allow the crop to roll over each year.

79 Entering Dates (Continued)

E What End Year Date to Enter

Enter end year date according to the examples in the following table for CRP and other fields that meet the qualifications. End year date is optional.

IF field characteristics will stay the same through...	THEN ENTER...
2011, but may change for 2012	2011.
2012, but may change for 2013	2012.
Example: Producer has long-term agreement with perennial cover crop to remain through 2012.	
2017, but will change for 2018	2017.
Example: Producer has CRP-1 that expires in 2017.	

Note: Enter the year CRP-1 expires for CRP practices that have easements. Do not enter the year the easement expires.

End year date must be removed before deleting FSA-578 for purpose of processing a reconstitution.

F Crops Without a Planting Date

The following crops do not require a planting date. If an end date is entered, the crop characteristics will roll over to the next year.

Crop/Land Use	Crop Type	Crop Code
CRP		0099
Grass	NAG - Native Grass	0102
Fallow		0101
Herbs	NAT - Native Spearmint	5000
Honey		1190
Maple Sap		0100
Mixed Forage	NSG - Native Grass Interseed	0296
Pecans	NAT - Native Pecans	0146
Skip Rows/Sled Rows		0790
Turn Area/Terraces		0105

79 Entering Dates (Continued)

F Crops Without a Planting Date (Continued)

In addition to the crops/commodities listed in the previous table, the following crops/commodities and/or intended uses do **not** require a planting date to be entered in CARS, beginning with the 2013 crop year.

Crop/Land Use	Crop Type	Crop Code
Christmas Trees		7321
Crustacean		3002
Finfish		3000
Ginseng		0089
Grassland Reserve Program		1250
Mollusk		3001
Mushrooms		0403
Nursery		1010
Wetland Reserve Program		2006

Crops With the Intended Use of “RS” Root Stock		
Crop/Land Use	Crop Type	Crop Code
Apples		0054
Apricots		0326
Asparagus		0104
Chia		0840
Chicory		0511
Gailon		0953
Greens		4000
Peaches		0034
Pears		0144
Plumcots		0466
Plums		0254
Prunes		0086
Rambutan		7164
Rhubarb		0335
Strawberries		0154
Tangerines		0048
Tomatoes		0087
Yu Cha		0695

79 Entering Dates (Continued)

F Crops Without a Planting Date (Continued)

Crops With the Intended Use of "SE" Sets		
Crop/Land Use	Crop Abbreviation	Crop Code
Beets		0642
Cabbage		0116
Flowers		7501
Onion		0142
Peppers		0083
Potatoes, Sweet		0156
Strawberries		0154

Grass With the Intended Use of "SO" Sod		
Crop/Land Use	Crop Abbreviation	Crop Code
Grass		0102

Flowers With the Intended Use of "FH" Fresh		
Crop/Land Use	Crop Abbreviation	Crop Code
Flowers		7501

Note: Follow 1-NAP, Part 4, Section 2 for NAP Unit reporting requirements applicable to each kind of value loss crop.

G Entering Dates

Dates will be entered on FSA-578 as "MM-DD-YYYY".

80 Irrigation Practice Codes

A Practice Codes

Irrigation practice codes can affect eligibility for prevented planted credit. Use the following irrigation practice codes for a crop based on producer input:

- “I” for irrigated
- “N” for nonirrigated
- ”O” for other; honey and TAP **only**.

Note: Rice should be reported as irrigated.

81 Recording Shares

A Recording Shares on FSA-578

FSA requires all shareholders of a crop, on a field by field basis, to be reported along with their applicable share of the crop.

Shares submitted as a fraction, 1/4 for example, must be converted to a 4 decimal number (0.2500) using normal rounding rules.

Note: A field that only has one person, or legal entity sharing in the reported crop acreage is recorded as 1.0000. The recorded share must always have 4 decimals, including trailing zeroes if applicable. The total of all shares must equal 1.0000.

For example, if the share for producer A is 0.6667, the shares for the remaining producers must not exceed 0.3333.

Field No.	Shareholder	Share	Converted Share	Total	Adjusted Converted Share	Adjusted Total	Remarks
1	A	2/3	0.6667	1.0000	N/A	N/A	Rounding rules applied (.6666 automatically should be recorded as .6667)
	B	1/3	0.3333		N/A		
2	A	1/3	0.3333	0.9999	0.3333	1,000	Rounding rules applied However Producer B converted share was increased by filer so total would equal 1.0000.
	B	1/3	0.3333		0.3334		
	C	1/3	0.3333		0.3333		
3	A						Rounding rules applied However Producers A and B converted share was decreased by filer not to exceed 1.0000.
	B						
	C						
	D						
	E						
	F						
4	A	3/4	0.7500	1,0000	N/A	N/A	
	B	1/4	0.2500		N/A		

82 Recording Prevented Planted Acreage and Failed Acreage on FSA-578

A Recording Prevented Planted Acreage on FSA-578 When Entire Acreage Claimed on CCC-576 Is Approved and No Spot Check or Measurement Service Is Performed

*--Use the following to record prevented planted and failed acreage on FSA-578 when the entire acreage claimed on CCC-576 is approved and no spot check or measurement service is performed.

IF the producer has reported prevented planted or failed acreage and COC...	THEN...
approved entire acreage claimed on CCC-576	determined acres will not be entered unless the acreage is questionable.

Example 1: Entire acreage claimed is approved as prevented planted and no other crop is reported.

Field	Crop	Status Code	Reported Acreage	Determined Acreage
3	Wheat	IP	60	

Example 2: Entire acreage claimed is approved as failed and **another crop, not meeting double-cropping rules, is reported.**

Field	Crop	Status Code	Reported Acreage	Determined Acreage
3	Wheat	IF	60	
3	Soybeans	J	60	

Example 3: Entire acreage claimed is approved as prevented planted and **another crop, not meeting double-cropping rules, is reported on a portion of the acreage.**

Field	Crop	Status Code	Reported Acreage	Determined Acreage
3	Wheat	IP	60	
3A	Soybeans	J	30	

Example 4: Entire acreage claimed on CCC-576 is approved as failed and **2 other--*** crops, not meeting double-cropping, are reported.

Field	Crop	Status Code	Reported Acreage	Determined Acreage
3	Wheat	*--IF--*	60	
3A	Soybeans	J	40	
3B	Corn	J	20	

82 Recording Prevented Planted Acreage and Failed Acreage on FSA-578 (Continued)

--B Recording Prevented Planted or Failed Acreage on FSA-578 When Acreage Reported as Prevented Planted or Failed Is Determined by a Spot Check or Measurement Service--

Use the following to record failed acreage on FSA-578 when the reported failed acreage is determined.

--IF the producer has reported prevented planted or failed acreage and...--	THEN...
the reported acreage is determined	load the acreage determined in the determined acreage field on FSA-578.

Example 1: When less than the failed acreage as reported is determined and **no other crop is reported.**

Field	Crop	Status Code	Reported Acreage	Determined Acreage
3	Wheat	IF	60	50

***--Example 2:** When less than the prevented planted acreage as reported is determined and **2--* other crops, not meeting double cropping rules are reported.**

Field	Crop	Status Code	Reported Acreage	Determined Acreage
3	Wheat	*--IP--*	60	50
3A	Soybeans	J	30	
3B	Corn	J	20	

Example 3: When the failed acreage as reported is determined and **no other crop is reported.**

Field	Crop	Status Code	Reported Acreage	Determined Acreage
3	Wheat	IF	60	60

***--Example 4:** When the prevented planted acreage as reported is determined and **2 other crops, not meeting double cropping rules are reported.**

Field	Crop	Status Code	Reported Acreage	Determined Acreage
3	Wheat	IP	60	60
3A	Soybeans	J	30	
3B	Corn	J	30	

Note: In examples 2 and 4, the subsequent fields must be reported as subfields so the status code can be entered as initial.--*

82 Recording Prevented Planted Acreage and Failed Acreage on FSA-578 (Continued)

C Recording Failed Acreage on FSA-578 When Entire Acreage Claimed on CCC-576 is Disapproved and No Measurement Service or Spot Check Is Performed

Use the following to record failed acreage on FSA-578 when the entire failed acreage is disapproved and no measurement service or spot check is performed.

IF the producer has reported failed acreage and COC...	THEN...
disapproved the entire acreage claimed on CCC-576	Enter zero for the determined acres on FSA-578.

Example: When entire reported failed acreage is disapproved.

Field	Crop	Status Code	Reported Acreage	Determined Acreage
3	Wheat	IF	60	0

83 Data Loading FSA-578 Following a Reconstitution**A Effect of a Reconstitution on a Certified FSA-578**

When a reconstitution is approved for a farm that has been certified, FSA-578:

- is automatically deleted from CARS for the respective year
- must be re-entered into CARS after completion of the reconstitution
- for the resulting farm(s) must be recertified within 30 days following completion of the reconstitution.

B Action Required After Completion of a Reconstitution on a Previously Certified Farm

Following completion of the reconstitution, the FSA-578(s) must be reentered into CARS for the resulting farm(s). Applicable information from the previous FSA-578(s) for the parent farm(s) may be used as the source document for reentering the FSA-578 data for the child farm(s).

C Time Requirement for Reloading the FSA-578

FSA-578 for the child farm(s) must be reentered within 30 days following completion of the reconstitution.

Note: Any benefits for the parent farm(s) are no longer valid and the benefits for the child farm(s) **cannot** be computed until FSA-578 is entered.

83 Data Loading FSA-578 Following a Reconstitution (Continued)

D Signature Requirements for the Reloaded FSA-578

The following table provides guidance for when FSA-578 must be signed after a reconstitution.

If...	Then...
only the farm and tract number changed as a result of the reconstitution	the original FSA-578 may be attached to the resulting farm’s FSA-578 following data load and no new signature(s) is required.
anything other than the farm and tract number changes, including total reported acres of the crop on the treated farm, or share, shareholder, crop, crop type, intended use, etc.	signatures are required on a new FSA-578’s for the reconstituted farm.

For a new FSA-578 with changes, producers must sign and date FSA-578 by the later of:

- 30 days, or
- the ARD for the crop.

Example 1: Farm #1 has 100 acres of cropland. Farmer A reported that 50 acres of the farm was sold to Farmer B and subsequently requested a reconstitution. Farmer B was added to the farm as an OT before the reconstitution was completed. Farmer A reported 50 acres of corn on farm 1, tract 1, field 1. Farmer B reported 50 acres of soybeans on farm 1, tract, field 2. Signatures on each of the resulting two new farms FSA-578’s are not required since the only information that changed was the farm and tract numbers. The original FSA-578 shall be copied and attached to both resulting FSA-578’s.

Example 2: Farm #5 has 100 acres of cropland. The owner of Farm #5, Farmer A, certifies 100 acres of corn planted on two 50 acre fields (fields 1 and 2). Farmer A later reports that field 2 was sold to Farmer B and requests a reconstitution. Farm #5 is divided into Farm #1000 and Farm #1001. Farmer A is now the owner of Farm #1000. A new signature is not required on the resulting FSA-578 for Farm #1000. Farmer B, the new owner of Farm #1001, would be required to sign a FSA-578 for Farm #1001 since there is a change to shareholder and shares.

***--84 Multi-Use Crop**

A Reporting Crops With Multiple Intended Uses

Beginning with the 2019 crop year, crops that meet the definition of multi-use crop will be reported as two separate line items on FSA-578. Currently multi-use is limited to crops that are first grazed and then harvested as grain. Although this option is limited to the following crops, additional crops may be added later:

- barley
- oats
- rye
- triticale
- wheat.

By allowing the intended uses to be reported separately, it also allows certain other characteristics to be associated to the intended use. For, example, if there are two producers sharing on a crop, each one can be associated with a different intended use.

Example: Farm #1000 has two producers and two intended uses. Producer A has 100 percent share in the grazing of the wheat and Producer B has 100 percent of the grain.

Field	Crop/ Commodity	Variety/ Type	Irr Prac	Intended Use	Producer	Share
1	Wheat	Spring	NI	Grazing (GZ)	J. Smith	100.00
1	Wheat	Spring	NI	Grain (GR)	J. Doe	100.00

Notes: CARS software does limit this change to the 5 crops in this subparagraph, however, software does not limit the status codes that can be used.

The multi-use option associated with concurrent planting does not apply to the 5 crops.--*

85 - 99 (Reserved)

Part 3 Crop Acreage Reporting System (CARS)

Section 1 General Information

100 Overview

A Background

CARS is a web-based system that provides the capability to perform the following functions:

- load an acreage report
- record a zero acreage report
- review an acreage report
- revise an acreage report
- print an acreage report
- delete an acreage report
- certify acreage report data
- summarize acreage
- set the cropland comparison flag
- generate status reports.

B Accessing CARS

Users will access CARS through the Intranet using the eAuthentication log-in.

C Security Accessibility

The following table provides a list of the approved users that security will check before allowing access.

Group	User	Access Capability
	Administrative County Personnel	Update
	Nonadministrative County Personnel	View-Only
	Administrative and/or Nonadministrative State and County Personnel by Nationwide Customer Service	Update
	Specified State Office Personnel	View-Only
	Other State Office Personnel	View-Only
	Specified National Office Personnel	View-Only
	Other National Office Personnel	View-Only
	Specified Kansas City Computer Personnel	Update/Override
	Other Kansas City Computer Personnel	View-Only
Others	Specified Non-FSA Personnel	View-Only
All	Anyone not listed in this table	Denied

101 Accessing CARS and Other FSA Applications

A Accessing the CARS Home Page

To access the CARS Home Page, go to FSA's Applications Intranet web site at <http://fsaintranet.sc.egov.usda.gov/fsa/applications.asp>. From the FSA Intranet Screen, under "FSA Applications" "Applications Directory", CLICK "A-C". The FSA Intranet Screen will be redisplayed with applications with names started from A to C. Scroll down and CLICK "Crop Acreage Reporting System (CARS)".

The USDA eAuthentication Warning Screen will be displayed.

B USDA eAuthentication

On the USDA eAuthentication Warning Screen, CLICK "I Agree" to proceed or "Cancel" to end the process. When the user clicks "I Agree", the USDA eAuthentication Login Screen will be displayed.

On the USDA eAuthentication Login Screen, CLICK "Login with LincPass (PIV)" or enter user ID and password and CLICK "Login".

After the user successfully completes the eAuthentication login, the Crop Acreage Reporting System (CARS) Login Screen will be displayed.

C Crop Acreage Reporting System (CARS) Login Screen

On the Crop Acreage Reporting System (CARS) Login Screen, CLICK "Crop Acreage Reporting System Login" to continue.

The following is an example of the Crop Acreage Reporting System (CARS) Login Screen.

Crop Acreage Reporting System (CARS) Login

This Farm Service Agency website is provided for users to enter crop information tied to specific acreage on the farm to include prevented and failed acreage and will be used to conduct acreage reporting and compliance determination via the web. Acreage reporting is year specific.

[Crop Acreage Reporting System Login](#)

USDA is committed to making its web pages accessible to all individuals. If you are a person with a disability and have trouble accessing or using our web site, please contact the FSA National Help Desk at (800)-255-2434 or the Centralized Help Desk at 800-457-3642, option 1, option 2. Please provide us with the specific URL with which you have a problem or concern.

CARS100 - Last Modified: 5/14/10

[FOIA](#) | [Accessibility Statement](#) | [Privacy Policy](#) | [Non-Discrimination Statement](#) | [Information Quality](#) | [USAGov](#) | [White House](#)

The State and County Selection Screen will be displayed.

101 Accessing CARS and Other FSA Applications (Continued)

D Accessing FSA and NAP Application from CARS

Beginning in 2015, CARS will provide direct access to the FSA and NAP application home pages from the CARS Menu on the left navigation menu. The following is an example of the CARS Menu with the FSA and NAP application links.

Note: The CARS Menu will be available on every screen in CARS.

102 State, County, and Program Year Selection

A Overview

State and County Offices now have access to:

- view acreage reports for farms located in nonadministrative counties
- update acreage reports for farms located in an administrative county for which they have responsibility
- Nationwide Customer Service to update acreage reports for farms located in any State and/or county in the nation.

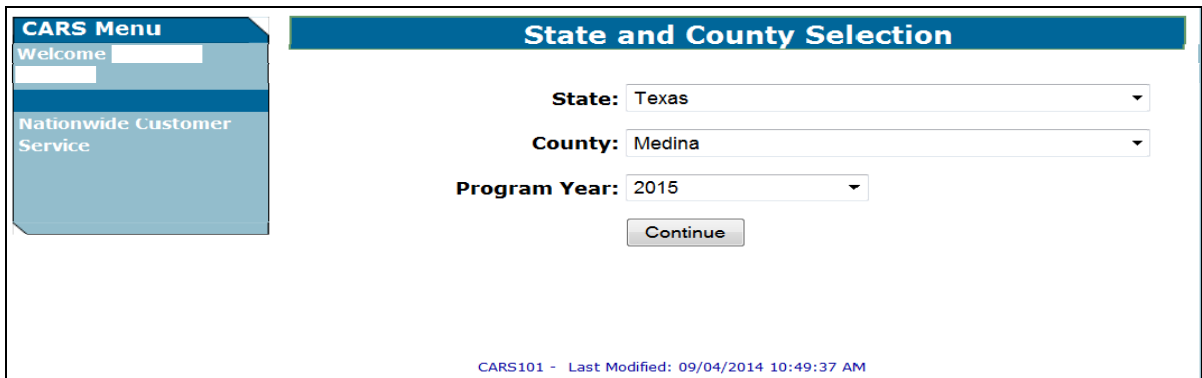

The State and county will be automatically set by default based on the user's role. The user will have capability to select a different State and/or county through the normal CARS process or by Nationwide Customer Service as needed.

Note: All updates/changes, entered by the user, are automatically tracked for view by the National Office.

102 State, County, and Program Year Selection

B State and County Selection Screen

The following is an example of the State and County Selection Screen.

C Action

The user will use the drop-down lists to select the applicable:

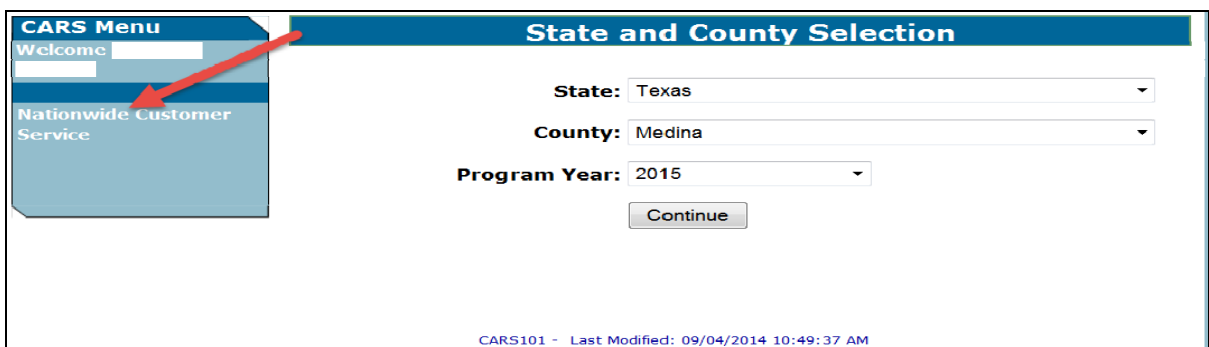

- State and county, if not previously set by default
- program year, if not previously set by default.

CLICK “Continue”. The Acreage Report Search Screen will be displayed.

D Nationwide Customer Service

To access Nationwide Customer Service to update acreage reports for farms located in any State and/or county in the nation, users will click the Nationwide Customer Service option on the left of the State and County Selection Screen. The Nationwide Customer Service option will be available on the left of every screen throughout CARS.

Following is an example of the Nationwide Customer Service option on the left of the State and County Selection Screen.

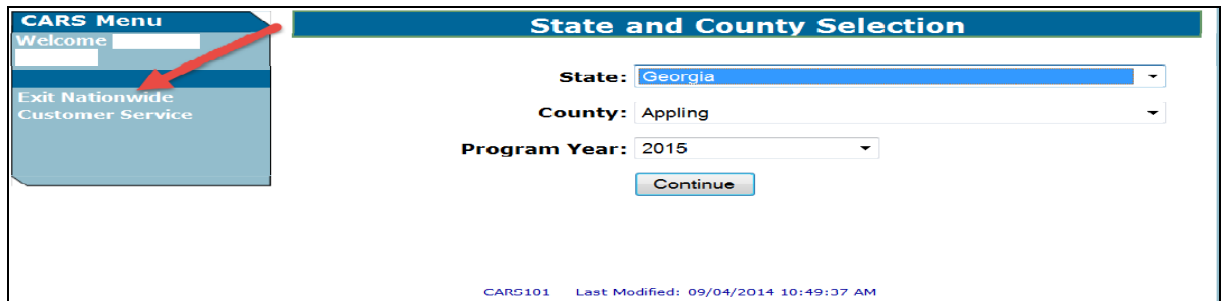

Once users click the Nationwide Customer Service option on the left, the State and County Selection Screen will be displayed for users to select and update acreage reports for farms located in any county in the nation.

102 State, County, and Program Year Selection (Continued)

D Nationwide Customer Service (Continued)

The Exit Nationwide Customer Service option will be displayed on the left to indicate users are in nationwide edit mode. To exit, users will click Exit Nationwide Customer Service.

Following is an example of the Exit Nationwide Customer Service option.

E State and County Office Action

State and County Offices that process nationwide customer service FSA-578's must:

- immediately FAX a copy of the signed FSA-578 and map to the administrative county of the farm for the producer
- mail the original signed FSA-578 and map to the administrative county for the farm
- maintain a copy of the signed FSA-578 and map.

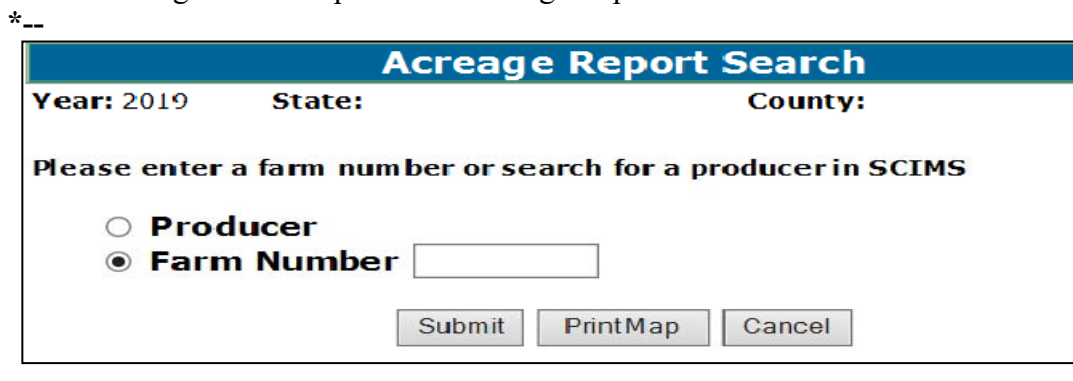

103 Farm Selection

A Overview

From the State and County Selection Screen, the Acreage Report Search Screen will be displayed. The Acreage Report Search Screen allows the user to enter a farm for acreage reporting through CARS by accessing a producer through SCIMS or by a specific farm number.

B Acreage Report Search Screen

The following is an example of the Acreage Report Search Screen.

103 Farm Selection (Continued)

C Action

*--To search for a farm by producer:

- CLICK the “**Producer**” radio button
- CLICK “**Submit**”
- select the producer from the SCIMS Customer Search Screen

Note: The Crop Acreage Reports Screen will be displayed to provide a list of farms for the selected producer.

- click the radio button next to the applicable farm number
- CLICK “**Cancel**” to return to the State and County Selection Screen.

To search a specific farm number:

- enter the farm number
- CLICK “**Submit**” to display the Crop Acreage Reports Screen
- CLICK “**Cancel**” to return to the State and County Selection Screen.

Note: See paragraph 340 for procedure on map printing.--*

D Validation Error Messages for the Acreage Report Search Screen

Beginning with 2017 upon clicking “Submit”, on the Acreage Report Search Screen, the following error messages may be displayed during the rollover validation process.

Note: Farms with the following validation errors will not be rolled over from the previous CARS program year until corrective action is taken.

Error Message	Description	Corrective Action
<p>There are no Field Numbers defined in Farm Records for Farm ‘----’. An Acreage Report cannot be entered until Field Numbers are populated in Farm Records.</p>	<p>This message will occur when the user accesses the farm in CARS and there are no field numbers available in Farm Records for the farm.</p>	<p>Take the following steps:</p> <ul style="list-style-type: none"> • update field numbers in Farm Records <p>Note: Field data exists in CRM Farm Records but hasn’t replicated to Web Farm because of an invalid data condition. The user shall correct the invalid data condition and save the farm in MIDAS CRM Farm Records before the field number(s) will replicate to Web Farm Records”.</p> <ul style="list-style-type: none"> • access the farm in the applicable CARS program year • CLICK “Refresh Farm Data” on the Crop Acreage Reports Screen • enter FSA-578 as needed. <p>Note: Field number entered in CARS must match the field numbers in Farm Records.</p>

103 Farm Selection (Continued)

D Validation Error Messages for the Acreage Report Search Screen (Continued)

Error Message	Description	Corrective Action
<p>“Fields with End Year or Continuous Certification cannot rollover because the field number(s) do not exist in Web Farm Records for 2017. Invalid fields are: ___” “Warning: Continuous Certification was terminated. Fields Do Not Exist in Farm Records: CROP/TYPE/INTENDED USE”.</p> <p>Notes: Only field level FSA-578 records with a valid field number in Web Farm Records will be rolled to the next CARS program year.</p> <p>Fields that are dropped during rollover due to invalid field numbers will not show on CARS status report “Farms with Deleted Field Due to Deleted Field Number in Farm Records”.</p>	<p>This message will occur when the user accesses the farm in CARS for rollover of crops/fields with an End Year and/or Continuous Certification and the field numbers being rolled from the previous program year to the next program year do not match the field numbers in Web Farm Records.</p>	<p>Due to the invalid field number, the user will need to reenter the FSA-578 data using the correct/current year field number in the current CARS program year. As needed.</p> <p>Important:</p> <p>The producer will also need to reelect continuous certification, if applicable.</p>
<p>Multiple browser tabs or windows for CARS have been detected. The application does not currently support this.</p> <p>Note: It is also possible that the user may have closed the browser window without logging out of CARS. The user may click the “Start Over” button and continue working.</p>	<p>This message will be displayed when the user has multiple CARS tabs or windows open.</p>	<p>The user will need to either close the current window/tab and return to the previous one, or CLICK “Start Over” to load the FSA-578 data all over.</p> <p>Note: If the user chooses to start over, all tabs will be invalidated and any saved changes will be lost.</p>

***--103.5 CARS Data and Farm Records Reconstitutions**

A Moving CARS FSA-578 Data From the Parent Farm to the Child Farm After a Farm Records Reconstitution

Beginning with 2019, when a farm is reconstituted in Farm Records, CARS will automatically move crop/field data from the parent farm and/or tract to the child farm and/or tract.

Note: A farm/tract reconstitution will not terminate the producer’s continuous certification.

B CARS Crop Certification After a Farm Records Reconstitution

When moving crop/field data from the parent farm/tract to the child farm/tract, crops previously certified on the parent farm/tract will remain certified once the crop information is moved to the child farm/tract. If the crop is **not** certified on the parent farm/tract, the crop will **not** be certified when CARS moves the data to the child farm/tract.

Important: If a Farm Records reconstitution results in a producer being removed from the farm/tract or in changes to producers and/or producer shares, see subparagraph C for required County Office action.

C Action

County Offices will use the following table for actions required on the FSA-578 in CARS after a reconstitution in Farm Records.

Note: When completing a **tract** combination, there may be duplicate field numbers, and MIDAS FR will renumber the affected field(s).

IF...	AND...	THEN...
a field number is renumbered during a tract combination	the affected field number for the parent tract(s) was not previously loaded in CARS	the fields and associated data from the parent tract(s) will automatically populate to the child tract in CARS, as applicable. Note: No user intervention is required.

--*

*--103.5 CARS Data and Farm Records Reconstitutions (Continued)

C Action (Continued)

IF...	AND...	THEN...
<p>a field number is renumbered during a tract combination</p>	<p>the affected field number from the parent tract(s) was previously loaded in CARS</p>	<p>the FSA-578 data associated with the affected field number from the parent tract(s) will be automatically deleted from CARS. All other fields for the farm will be automatically uncertified.</p> <p>Notes: Use report “Farms with Deleted Fields in CARS Due to Deleted Fields in Farm Records” to identify deleted fields.</p> <p>See paragraph 162 for information when a field number is deleted/changed due to a field split or merge prior to or after a reconstitution.</p>
<p>a reconstitution results in a producer being removed from the new farm in Farm Records</p>	<p>the producer was loaded in CARS as having a share of the crop</p>	<p>the County Office will do both of the following</p> <ul style="list-style-type: none"> • access the new farm and/or tract in CARS • update shares to the correct producer as applicable. <p>Note: CARS report “Farms with Deleted Producers with Active Shares” will be used to identify deleted producers with active shares.</p>
<p>a reconstitution results in changes to producers and/or producer shares</p>		

--*

104 Farm Information

A Overview

Based on the search method selected on the Acreage Report Search Screen, the Crop Acreage Reports Screen will display the following:

- farm numbers, associated with the producer, or a specific farm number
- status indicator to show if an acreage report is:
 - “Not Created”
 - “Not Certified / Not Reported”
 - “Not Certified / Fully Reported”
 - “Partially Certified / Partially Reported”
 - “Partially Certified / Fully Reported”
 - “Fully Certified / Partially Reported”
 - “Fully Certified / Fully Reported”
 - *--“Fully Certified / Not Reported”--*
- date the acreage report was last updated, if applicable.

Notes: If a selected producer is associated with multiple farms, **all** farms with which the producer is associated will be displayed for selection on the Crop Acreage Reports Screen.

Upon accessing the farm in the next CARS program year, the message “Crop Acreage Report has been rolled over from Program Year “**applicable year here**” will be displayed when rolling over continuous certification crops and/or other crops with an end year from the previous CARS program year. See paragraphs 103 and 105 for rollover errors.

104 Farm Information (Continued)

B Crop Acreage Reports Screen

The following is an example of the Crop Acreage Reports Screen.

*--

Crop Acreage Reports		
Year: 2019	State:	County:
Operator Information		
Operator Name: <u>Any Producer</u>		
Farm	Status ?	Last Updated
12	Fully Certified / Partially Reported	04/03/2018
Print Map	Refresh Farm Data	Continuous Certification
Record Acreage	Revise Shares	Determined Quantity
Certify by Farm	Certify by Producer	Delete
Farm Summary	Tract Summary	Cancel

--*

Notes: The “Continuous Certification” option will be available beginning with program year 2016.

The “Record Farm Zero Acreage” option will be available for 2012 and prior years only.

--See paragraph 340 for map printing procedures.--

C Options Available on the Crop Acreage Reports Screen

The following table provides a list of options available on the Crop Acreage Reports Screen.

Option/Button	Action/Result																		
Status	<p>CLICK “?” next to the status header to display a list of status descriptions. The following table provides a list of available statuses and the descriptions.</p> <table border="1"> <thead> <tr> <th>Status</th> <th>Description</th> </tr> </thead> <tbody> <tr> <td>Not Created</td> <td>No acreage report is created for this farm.</td> </tr> <tr> <td>Not Certified/ Not Reported</td> <td>No reported fields are certified and no cropland is reported and certified.</td> </tr> <tr> <td>Not Certified/ Fully Reported</td> <td>No reported fields are certified and the farm has no cropland. Note: In this case, the fully reported indicator is set automatically.</td> </tr> <tr> <td>Partially Certified/ Partially Reported</td> <td>Not all reported fields are certified and not all cropland is reported and certified.</td> </tr> <tr> <td>Partially Certified/ Fully Reported</td> <td>Not all reported fields are certified and all cropland is reported and certified.</td> </tr> <tr> <td>Fully Certified/ Partially Reported</td> <td>All reported fields are certified and not all cropland is reported and certified.</td> </tr> <tr> <td>Fully Certified/ Fully Reported</td> <td>All reported fields are certified and all cropland is reported and certified.</td> </tr> <tr> <td>*--Fully Certified/ Not Reported</td> <td>All reported fields are certified and no cropland is reported and certified.--*</td> </tr> </tbody> </table> <p>Important: To be considered reported, the reported cropland acreage must be certified.</p>	Status	Description	Not Created	No acreage report is created for this farm.	Not Certified/ Not Reported	No reported fields are certified and no cropland is reported and certified.	Not Certified/ Fully Reported	No reported fields are certified and the farm has no cropland. Note: In this case, the fully reported indicator is set automatically.	Partially Certified/ Partially Reported	Not all reported fields are certified and not all cropland is reported and certified.	Partially Certified/ Fully Reported	Not all reported fields are certified and all cropland is reported and certified.	Fully Certified/ Partially Reported	All reported fields are certified and not all cropland is reported and certified. Status	Description																		
Not Created	No acreage report is created for this farm.																		
Not Certified/ Not Reported	No reported fields are certified and no cropland is reported and certified.																		
Not Certified/ Fully Reported	No reported fields are certified and the farm has no cropland. Note: In this case, the fully reported indicator is set automatically.																		
Partially Certified/ Partially Reported	Not all reported fields are certified and not all cropland is reported and certified.																		
Partially Certified/ Fully Reported	Not all reported fields are certified and all cropland is reported and certified.																		
Fully Certified/ Partially Reported	All reported fields are certified and not all cropland is reported and certified.																		
Fully Certified/ Fully Reported	All reported fields are certified and all cropland is reported and certified.																		
--Fully Certified/ Not Reported	All reported fields are certified and no cropland is reported and certified.--																		

104 Farm Information (Continued)

C Options Available on the Crop Acreage Reports Screen (Continued)

Option/Button	Action/Result
Last Updated	This date is populated automatically when there is a change to the acreage report or a change to the farm in farm records.
--Print Map	Click this button to generate/print a map for the selected farm and tract. See paragraph 340 for additional information on CARS maps.--
Refresh Farm Data	Click this button to update farm records data in CARS. Example: A producer is added to farm records, but is not available in CARS. Notes: After users CLICK “Refresh Farm Data”, user must CLICK “Add Producer” to assign the share to the updated producer. The "Refresh Farm Data" option does not apply to farm/tract reconstitutions. See subparagraph 276 B for information on farm/tract reconstitutions.
Continuous Certification	Click this button when the producer wants to elect continuous certification for a certified/approved perennial crop. Note: See paragraph 217 for CARS continuous certification procedure.
Record Acreage	Click this button to record acreage and share information for the farm.
Revise Shares <u>1/</u>	Click this button to change shares for a single field or multiple fields recorded for the farm. The Revise Shares Screen will be displayed. Note: When using this option, shares must be the same across all selected fields.
Record Farm Zero Acreage	Click this button to record a farm zero acreage report for a specific crop. The option will be available for 2012 and prior years only.
Determined Quantity <u>1/</u>	Click this button to record determined acreage for a specific crop.
Certify by Farm <u>1/</u>	Click this button to certify crops or commodities reported for the selected farm.
Certify by Producer <u>1/</u>	Click this button to certify multiple farms, tracts, and fields associated with the selected producer as an owner, operator, or other tenant. <ul style="list-style-type: none"> • Owner – farms, tracts, and fields for which the producer is an owner will be displayed, regardless of shared interest in the crop. • Operator – farms, tracts, and fields for which the producer is an operator will be displayed, regardless of shared interest in the crop. • Other Tenant – farms, tracts, and fields for which they have a shared interest in the crop will be displayed.
Delete <u>1/</u>	Click this button to delete a farm that has been recorded in CARS.
Farm Summary <u>1/</u>	Click this button to display a summary of crops or commodities reported by farm.
Tract Summary <u>1/</u>	Click this button to display a summary of crops or commodities reported by tract.
Cancel	Click this button to return the user back to the Acreage Report Search Screen.

1/ These options are **not** present until a crop or commodity is loaded for the farm.

D Action

The user shall click the radio button next to the applicable farm number. Only 1 farm can be selected.

Note: If only 1 farm number is displayed, the user shall click the applicable button to begin the acreage reporting process.

105 Rollover Errors

A Overview

Upon accessing the farm, the Rollover Error Screen may be displayed if the data being rolled from a previous CARS program year does not meet the applicable validations for the next CARS program year.

B Rollover Error Screen

The following is an example of the Rollover Error Screen.

Rollover Error

Year: 2012 **State:** **County:**

- Crop/Commodity "" is not valid for Program Year 2012. Unable to rollover crop.

Farm Information

Farm Number: 586	Total Rpt Cropland: 23.00 of 137.30
Operator Name: Producer A	

Tract	Field	Crop	Rpt Qty	Rpt Unit	Prac	Crop Status	Int Use
9752	2		22.0	A	N	I	

105 Rollover Errors (Continued)

C Action

CLICK:

- “**Next Error**” and additional error messages for the farm will be displayed.

Note: This will allow the user to view invalid information for the farm. All crops and/or fields that pass validation will be rolled to the next CARS program year automatically.

- “**Cancel Rollover**” to cancel the rollover process.

Note: This will cancel the rollover for all crop and/or fields for the farm. The Acreage Report Search Screen will be displayed.

D Rollover Error Screen Messages

The following table provides error messages that may be displayed on the Rollover Error Screen.

Error Message	Description	Corrective Action
Producer(s) have been removed from a Tract(s). Unable to rollover crop.	This message will be displayed when an end year was entered in the previous CARS program year and the producer with a share of the crop and/or field is removed from the tract in Farm Records for the next CARS program year.	The user will need to load the acreage report in the current CARS program year and assign the shares accordingly.
Crop/Commodity “ ” is not valid for Program Year “ ”. Unable to rollover crop.	This message will be displayed when the crop and/or commodity entered in a previous CARS program year is removed from the CVS for the current CARS program year.	No action is required. Producer must report applicable crop information as needed.

105 Rollover Errors (Continued)

D Rollover Error Screen Messages (Continued)

Error Message	Description	Corrective Action
Crop Type “ ” is not valid for Program Year “ ”. Unable to rollover crop.	This message will be displayed when the crop type entered in a previous CARS program year is removed from the CVS for the next CARS program year.	No action is required. Producer will need to report applicable crop information as needed.
Intended Use “ ” is not valid for Program Year “ ”. Unable to rollover crop.	This message will be displayed when the intended use entered in a previous CARS program year is removed from the CVS for the next CARS program year.	No action is required. Producer will need to report applicable crop information as needed.
Multiple Planting Periods available. Please choose the correct value.	<p>This message will be displayed when the planting period entered in 2011 is not valid for 2012.</p> <p>Note: This message will display for 2012 CARS only.</p>	Correct the planting period as applicable.

106 Tract Selection

A Overview

The Tract Selection Screen will be displayed after the users CLICK “Record Acreage” on the Crop Acreage Reports Screen, if there are multiple tracts on the farm. If there is only 1 tract on the farm, the Report of Acreage Screen will be displayed.

B Tract Selection Screen

The following is an example of the Tract Selection Screen.

Tract Selection				
Year: 2017		State:		County:
Farm Information				
Farm Number: 1881			Total Rpt Cropland: 0.00 or 13589.81	
Operator Name: Producer A				
Please select a tract				
Tract	Description	Cropland Acres	Reported Cropland	
<input type="radio"/> 498	Not Applicable	2491.92	0.00	
<input type="radio"/> 527	Not Applicable	257.24	0.00	
<input type="radio"/> 617	Not Applicable	4423.43	0.00	
<input type="radio"/> 637	Not Applicable	2249.24	0.00	
<input type="radio"/> 671	Not Applicable	19.35	0.00	
<input type="radio"/> 672	Not Applicable	898.89	0.00	
<input type="radio"/> 846	Not Applicable	1106.51	0.00	
<input type="radio"/> 863	Not Applicable	2131.73	0.00	
<input type="radio"/> 1706	Not Applicable	11.50	0.00	
<input type="button" value="Continue"/>		<input type="button" value="Revise Tract"/>		<input type="button" value="Back"/>

Note: “Not Applicable” will be displayed under the description column when there is no legal description available in Farm Records for the tract.

C Options Available on the Tract Selection Screen

The following table provides a list of options available on the Tract Selection Screen.

Button	Results	
Continue	IF...	THEN the...
	no crops have previously been recorded for the tract	Report of Acreage Screen will be displayed.
	crops have previously been recorded for the tract	Crop Review Screen will be displayed.
Revise Tract	Revise Tract Screen will be displayed to allow user to move crop from 1 tract to another.	
Back	Returns the user back to the Crop Acreage Reports Screen.	

D Action

The user will select the applicable tract and CLICK “Continue”. The Report of Acreage Screen will be displayed.

107 **Producer Shares**

A Overview

From the Tract Selection Screen, the Report of Acreage Screen will be displayed that provides users the ability to enter crop share for producers associated with tract/field. The shares can be modified between the producers shown. After producer shares have been entered, the recorded shares will be automatically set by default to the next reported tract or field until changed by the user.

CARS is validating against producer information contained in Farm Records at the tract level. The producers must be associated to the specific tract in Farm Records to receive a share of the crop/field in CARS. If the producer **is not** associated to the tract in Farm Records, the producer **will not** be available in CARS. To ensure that producers are available on **all tracts** they are associated with in CARS, producers must be added to **all tracts** they are associated with in Farm Records according to 10-CM.

Note: See subparagraph 104 C for information on the “Refresh Farm Data” button.

B List of Tract Producers

The following is an example of the list of tract producers section on the Report of Acreage Screen.

List of Tract Producers		
Name	Role	Share %
Producer A	Operator	50.00
Producer B	Owner	50.00
Total %		100.00
<input type="button" value="Add Producers"/>		
NAP Unit <input type="text"/> <input type="checkbox"/> Override NAP Unit		
<input type="button" value="Submit and Add"/> <input type="button" value="Submit and Copy"/> <input type="button" value="Submit and Bulk Copy"/>		
<input type="button" value="Submit and Review"/> <input type="button" value="Submit and Certify"/> <input type="button" value="Review Crops"/>		

Note: See paragraph 162 for information on loading crop acreage and options available on the Report of Acreage Screen.

108 Total Reported Cropland

*--A Fully Reported Cropland Indicator

To ensure that all cropland has been reported, the software will compare total certified reported initial (I) and experimental (X) acreage to the total cropland on the farm. The fully reported indicator will be automatically set to “Y” once all cropland on the farm is certified or when the certified cropland meets the tolerance according to subparagraph B.

At any point thereafter, the total cropland acres for the farm in Farm Records becomes more than the total certified cropland acres for the farm in CARS or the total certified cropland acres for the farm does not meet tolerance according to subparagraph B, the cropland indicator will be automatically set to “N”.

IF...	AND...	THEN...
more than one initial crop is reported on the same field	the crop is associated with a different planting period	the planting period with the highest acreage will be used to calculate the total reported cropland acres for the farm. Note: If the acreage for each planting period is the same, the acreage for the first planting period will be used to calculate the total reported cropland acres.
	the crop is associated with concurrent planting status “Multiuse”	the intended use with the highest acreage will be used to calculate the total reported cropland acres for the farm. Notes: If the acreage for each intended use is the same, then only the acreage associated with the first intended use will be counted toward the total reported cropland acres. All acres reported with concurrent status “ Interplant and Alternated ” will be counted toward the total reported cropland acres.
an initial crop is reported on a field with more than one intended use according to paragraph 84		acreage will be counted only once when calculating the total reported cropland for the farm and will be based on the acres loaded for the first intended use for the crop.

--*

108 Total Reported Cropland (Continued)

B Cropland Comparison Variance

To account for minor acreage differences, software will:

- automatically calculate a variance between total cropland on the farm and reported cropland
- set the fully reported indicator accordingly.

If within the following variance, the fully reported indicator will be set to “Y”. The variance is the larger of the following:

- 1 percent of the cropland
- .5 acre.

The maximum variance is 10 acres.

Note: The variance will not run until all reported crops are certified.

C Cropland Comparison Override

If the farm has no cropland, CARS will provide an override process to set the fully reported indicator automatically to “Y” nightly. No user intervention will be allowed.

Note: At any point thereafter, if the cropland acres on the farm are greater than zero, the fully reported indicator will be set automatically to “N”.

109-160 (Reserved)

Section 2 Recording FSA-578 Data

161 Predominant Crops and Crop Characteristic Defaults

A Overview

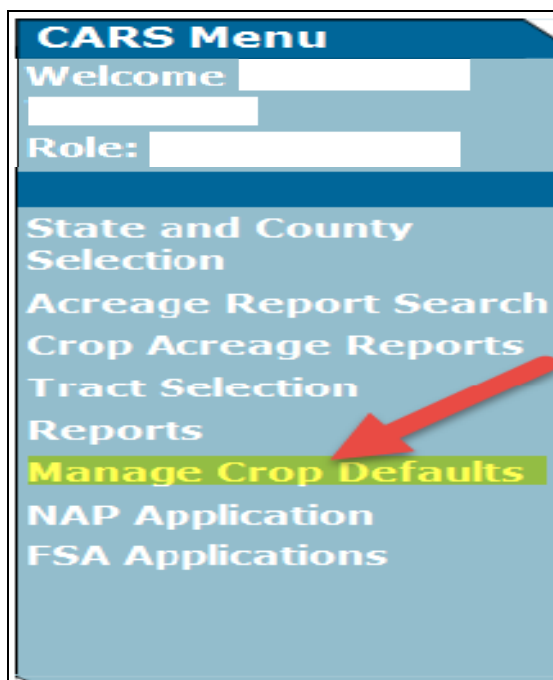

User will have the capability to create predominant crops and crop characteristic defaults specific to their county. Exhibit 10 contains the valid current year's crops and crop characteristics. The crops in Exhibit 10:

- are also known as CVS
- contain all crops for acreage reporting purposes.

Note: For a list of NAP-eligible crops, see 1-NAP.

B Accessing “Manage Crop Defaults” Option

The “Manage Crop Defaults” option is available under the CARS Menu on every screen throughout CARS beginning on the Acreage Report Search Screen. The following is an example of the “Manage Crop Defaults” option.

If no predominant crop and crop characteristic default is created, the Add Crop Default Screen will be displayed. If at least 1 predominant crop and crop characteristic default is created, the List Crop Defaults Screen will be displayed.

Note: Once crop defaults are created, users must click the “Manage Crop Defaults” option each program year for defaults to rollover from the previous program year to the next program year.

161 Predominant Crops and Crop Characteristic Defaults (Continued)

C Add Crop Default Screen

The following is an example of the Add Crop Default Screen. * * *

Add Crop Default

Year: 2019 **State:** **County:**

- * Predominant Code
- * Crop/Commodity ▼
- * Variety/Type ▼
- * Intended Use ▼
- * Irrigation Practice ▼
- * Organic Status ▼
- * Reporting Unit ▼
- * Crop Status ▼
- * Supplemental Status ▼
- Concurrent Planting ▼
- Land Use
- Planting Pattern ▼
- * Cropland Status ▼
- * Planting Period ▼
- * RMA Cropping Practice ▼

Note: For crop defaults to rollover from the previous year to the next year, the user must click the “Manage Crop Defaults” option on the left. Only defaults that pass validation will rollover to the next year. For information, the previous year’s defaults *--with invalid crop characteristics will be displayed to the user. Users will need to add/update the crop default list in the next program year as needed.--*

161 Predominant Crops and Crop Characteristic Defaults (Continued)

D Adding Crop Default Information

On the Add Crop Default Screen, enter field data according to the following table.

Field	Action
Predominant Code	Enter up to 4 characters to be assigned for the crop default information entered. Crop defaults can be numeric, alphabetic, or alphanumeric values.
Crop/Commodity	Select the crop from the drop-down list. The crops listed in the drop-down list are from CVS.
Variety/Type	Select the variety and type from the drop-down list. The drop-down list is populated based on the crop that was selected in the crop/commodity drop-down list.
Intended Use	Select the intended use from the drop-down list. The intended uses will be pulled from CVS for the crop selected.
Irrigation Practice	Select the irrigation practice from the drop-down list.
Organic Status	Select the organic status from the drop-down list, as needed. The organic status will default as “Conventional”.
Reporting Unit	<p>This field will:</p> <ul style="list-style-type: none"> • default as “colonies” for honey • default as “taps” for maple sap • display both “acres” and “AUM” for selection of eligible crops only • default as “acres” for all other crops that are not honey, maple sap, or eligible for selection of AUM. <p>Notes: When “AUM” is selected additional data elements will be *--displayed to record beginning month/day, ending--* month/day, and % public lands.</p> <p>Reporting unit “Hives” will be available for 2014 and prior years only and “Colonies” will be available for 2015 and subsequent years.</p> <p>Only reporting unit “acres” will be considered when calculating total reported cropland according to paragraph 108.</p>
Crop Status	Select the crop status from the drop-down list. The definition of the crop status is located in Exhibit 11.
Supplemental Status	<p>Select the supplemental status code from the drop-down list. The selection options are “Not Planted”, “Not Applicable”, “Planted”, “Prevented”, “Failed”, or “Volunteer”.</p> <p>Notes: The “Not Planted” option will be available for 2011 and 2012 only.</p> <p>The “Not Applicable” option will be available for 2015 and subsequent years.</p>

161 Predominant Crops and Crop Characteristic Defaults (Continued)

D Adding Crop Default Information

Field	Action
Concurrent Planting	This field is defaulted to “None”. Enter the applicable value from the drop-down list. Only crops with a concurrent planting value in CVS, will be available for selection in the drop-down list. The options are “Alternate”, “Interplant”, and “Multi-use”.
Land Use	This entry is prefilled based on data pulled from CVS.
Planting Pattern	Select the planting pattern from the drop-down list. Orchard crops and crops planted in skip/strip row patterns will need additional information loaded in data fields displayed at the bottom of the screen. See *--subparagraph 162 F for skip/strip row and subparagraph 162 G for orchard entries.
Cropland Status	Beginning in 2019, once the field number is selected, the cropland status will automatically populate to (Y) yes or (N) no based on the status of the field in Farm Records. Users cannot change the defaulted cropland status in CARS. If the defaulted cropland status is determined to be incorrect, it must be changed in Web Farm Records. Although AUM, colonies, and taps may have the cropland status populated to “Y” based on Farm Records, the reported quantity for these values will not be counted towards calculating the total reported cropland for the farm.--*
Planting Period	Select the planting period from the drop-down menu. If only 1 planting period is available on NCT, the planting period will automatically populate as “01”. More than one initial crop can be recorded for the same field on the farm when the planting period for any other initial crop(s) recorded for the field is different.
RMA Cropping Practice	The RMA cropping practice will be defaulted as “No Cropping Practice”. Select the applicable RMA cropping practice.

E Options Available on the Add Crop Default Screen

The following table provides a description of the options available on the Add Crop Default Screen.

Button	Result
Save	The crop defaults for the applicable predominant number will be saved. The List Crop Defaults Screen will be displayed.
Save and Add	The crop defaults for the applicable predominant number will be saved. The Add Crop Default Screen will continue to be displayed for another crop to be recorded.
Save and Copy	The Add Crop Default Screen will continue to be displayed with all previously saved crop characteristics with the exception of the predominant number.
Cancel	The List Crop Defaults Screen will be displayed.

161 Predominant Crops and Crop Characteristic Defaults (Continued)

F List Crop Defaults Screen

The following is an example of the List Crop Defaults Screen. This screen is displayed only after at least 1 predominant crop and crop characteristic default is created.

List Crop Defaults									
Year: 2019		State:			County:				
Sort By:		Predominant Code			Crop/Commodity				
	Predominant Code	Crop/Comm	Var/Type	Int Use	Irr Prc	Org Status	Rpt Unit	Crop Status	Planting Period
<input type="radio"/>	01	WHEAT	HRW	GS	N	C	A	I	01
<input type="radio"/>	2	BARLY	WTR	GS	N	C	A	I	01
<input type="radio"/>	4	PEAS	ENG	FH	N	C	A	I	-
<input type="radio"/>	5	OATS	WTR	GS	N	C	A	I	01
<input type="radio"/>	6	OATS	WTR	GZ	N	C	A	I	01
<input type="radio"/>	7	TRICL	-	GS	N	C	A	I	01
<input type="radio"/>	8	SORGH	GRS	GR	N	C	A	I	01
		Add		Edit		Delete		Print	

***--Note:** Beginning in 2019, intended use (Grain/Grazing “GS”) will be removed from the CVS and will not be available for reporting on FSA-578 in CARS according to paragraph 84. If the County Office has already accessed CARS program year 2019 and crop defaults have rolled over, any crop default with a “GS” intended use must be manually deleted or updated.--*

G Options Available on the List Crop Defaults Screen

The following table provides a description of the options available on the List Crop Defaults Screen.

Button	Result
Predominant Code	Sort default list by predominant number.
Crop/Commodity	Sort default list by crop/commodity.
Add	Add Crop Default Screen will be displayed.
Edit	Edit Crop Default Screen will be displayed.
Delete	Delete Crop Default Screen will be displayed.
Print	A PDF of crop defaults previously saved for the specific State, county, and program year will be displayed.

162 Loading Crop and Acreage Information

A Overview

Users have the capability to load crop acreage information in CARS within the farm’s administrative county. Loading options include Crop Defaults and Bulk Copy.

For 2015 and subsequent years, County Offices have the ability to update acreage reports for any farm record in any county in the nation by accessing the “Nationwide Customer Service” option on the left navigation menu.

B Report of Acreage Screen

The following is an example of the Report of Acreage Screen. The Report of Acreage Screen:

- will be displayed after a tract is selected or automatically if farm only has 1 tract
- is used to enter field and share data.

*--

162 Loading Crop and Acreage Information (Continued)

C Options Available on the Report of Acreage Screen

The following table provides a list of options available on the Report of Acreage Screen.

Button	Action	Results
Submit and Add	Click this button once all crop information has been entered for the field to save the crop data.	The Report of Acreage Screen will be displayed to allow the user to enter another crop.
Submit and Copy	Click this button to save the crop data entered and copy the same crop information to another field for the farm and tract.	The Report of Acreage Screen will be displayed and will be automatically populated with the same crop attribute as entered for the previous field. Exception: The field number, reported quantity and planting date will not be copied.
Submit and Bulk Copy	Click this button to save the crop data entered and copy the same crop information to other tracts and/or fields for the farm and tract.	The Bulk Copy Screen will be displayed to allow the same crop attributes as entered for the previous field to be copied across multiple tracts and fields. Note: From the Bulk Copy Screen, the user will be required to record the tract number, field number, subfield number, reporting quantity, planting date and field ID as applicable. See *--subparagraph 162 H for an--* example of the Bulk Copy Screen.
Submit and Certify	Click this button to save the crop data entered.	The Certification Screen will be displayed to allow the user to certify the crop information.
Review Crops	Click this button to review crop information entered on the acreage report.	The Crop Review Screen will be displayed.
Add Producer	Click this button to display all producers associated with the tract.	Hide Zero Shares button will be displayed. Note: See subparagraph 107 A for information on producer shares.
Hide Zero Shares	Click this button to hide all producers with zero shares in the crop. This button will be available upon clicking the "Add Producers" button.	The "Add Producer" button will be displayed.

D Entering Crop/Commodity Information

On the Report of Acreage Screen, enter field data according to the following table.

Field	Action				
Field Number	<p>Beginning with 2018, CARS will allow up to 7 digits to be entered for the field number. The field number in CARS must match the field number in Web *--Farm Records.--*</p> <p>Beginning with 2017, only field numbers available in Farm Records will be allowed to be entered in CARS. The user can enter up to 4 digits. The following table provides information for recording field numbers in CARS.</p>				
	<table border="1"> <thead> <tr> <th data-bbox="456 653 943 695">IF...</th> <th data-bbox="943 653 1485 695">THEN...</th> </tr> </thead> <tbody> <tr> <td data-bbox="456 695 943 1820">there are no field numbers in Web Farm Records</td> <td data-bbox="943 695 1485 1820"> <p>CARS will not allow the user to complete the acreage reporting process.</p> <p>Notes: When fields were entered in a previous CARS program year with an End Year or Continuous Coverage, and none of the fields are able to rollover to the next program year in CARS because there are no field numbers that match the current Web Farm Records.</p> <p>Message “There are no Field Numbers in Farm Records. Field Numbers must be entered in Farm Records to proceed” will be displayed on the Report of Acreage Screen.</p> <p>For farms with continuous certification crops and/or CRP with an End Year, an additional message will be displayed “Fields with End Year or Continuous Certification cannot rollover because the field number(s) do not exist in the current year Web Farm Records. Invalid fields are: _____”</p> </td> </tr> </tbody> </table>	IF...	THEN...	there are no field numbers in Web Farm Records	<p>CARS will not allow the user to complete the acreage reporting process.</p> <p>Notes: When fields were entered in a previous CARS program year with an End Year or Continuous Coverage, and none of the fields are able to rollover to the next program year in CARS because there are no field numbers that match the current Web Farm Records.</p> <p>Message “There are no Field Numbers in Farm Records. Field Numbers must be entered in Farm Records to proceed” will be displayed on the Report of Acreage Screen.</p> <p>For farms with continuous certification crops and/or CRP with an End Year, an additional message will be displayed “Fields with End Year or Continuous Certification cannot rollover because the field number(s) do not exist in the current year Web Farm Records. Invalid fields are: _____”</p>
IF...	THEN...				
there are no field numbers in Web Farm Records	<p>CARS will not allow the user to complete the acreage reporting process.</p> <p>Notes: When fields were entered in a previous CARS program year with an End Year or Continuous Coverage, and none of the fields are able to rollover to the next program year in CARS because there are no field numbers that match the current Web Farm Records.</p> <p>Message “There are no Field Numbers in Farm Records. Field	Action	
Field Number (cntd)	IF...	THEN...
	Web Farm Records has only 1 field number for the farm	that field number will be automatically populated in the field number data field on the Report of Acreage Screen.
	Web Farm Records has more than one field number for the farm	the user can either: <ul style="list-style-type: none"> • manually type in the field number • select the applicable field number from the dropdown option.
a field number in Web Farm *--Records is deleted/changed because of a field split or merge before or after a reconstitution--*	the field level FSA-578 record in CARS that is associated with the deleted field number will be automatically deleted. If there are other crops/fields reported for the farm, those crops/fields will be automatically uncertified, crops enrolled for continuous certification and CRP fields that are recorded with an End Year will remain certified. Important: This could have a significant impact on County Offices if CLU edits are done after the FSA-578 is loaded/certified in CARS. In these cases, County Offices will be required to reload the FSA-578 data with the new field numbers(s) and recertify all other crops/fields in CARS as needed.

Crop/Commodity	<p>Select the crop from the drop-down list. The crops listed in the drop-down list are from CVS.</p>						
Variety/Type	<p>Select the variety and type from the drop-down list. The drop-down list is populated based on the crop that was selected in the crop/commodity drop-down list.</p>						

162 Loading Crop and Acreage Information (Continued)

D Entering Crop/Commodity Information (Continued)

Field	Action
Intended Use	Select the intended use from the drop-down list. The intended uses displayed will be pulled from CVS for the crop selected.
Planting Pattern	Select the planting pattern from the drop-down list. Orchard crops and crops planted in skip/strip row patterns will need additional information loaded in data fields displayed at the bottom of the screen. See subparagraph F for skip/strip row and subparagraph G for orchard entries.
Actual Use	This is not a required entry. This field is used to document the actual use of the reported crop/commodity when the actual use is different than the intended use.
Irrigation Practice	Select the irrigation practice from the drop-down list.
Crop Status	Select the crop status from the drop-down list. Crop statuses for the crop are pulled from CVS. If the crop status is not available for the crop on CVS, the crop status will not be available for selection for the crop in CARS. Only acres associated with crop status “Initial” and “Experimental” will be counted when calculating total reported cropland for the farm. Reporting quantity associated with reporting unit AUM, colonies, and taps will not be counted when calculating total reported cropland for the farm. See Exhibit 11 for crop status definitions.
Supplemental Status	<p>Select the supplemental status from the drop-down list. The selection options are “Not Applicable”, “Not Planted”, “Planted”, “Prevented”, “Failed”, or “Volunteer”.</p> <p>Notes: The “Not Planted” option will be available for 2011 and 2012 only.</p> <p>The “Not Applicable” option will be available beginning with 2015 and will be selected when reporting idle, skip rows, water impoundment structures, etc. Supplemental status “Planted” will be automatically defaulted for cover crops.</p>

162 Loading Crop and Acreage Information (Continued)

D Entering Crop/Commodity Information (Continued)

Field	Action
Reporting Unit	<p>This field will:</p> <ul style="list-style-type: none"> • default as “colonies” for honey • default as “taps” for maple sap • display both “acres” and “animal unit month (AUM)” for selection for eligible crops only • default as “acres” for all other crops that are not honey, maple sap, or eligible for selection of AUM. <p>Notes: When “AUM” is selected additional data elements will be displayed to record *--beginning month/day, ending month/day, and % public lands. Beginning with 2019, all AUM data elements will be required entries.--*</p> <p>Reporting unit “hives” will be available for 2014 and prior years only. Colonies will be available for 2015 and subsequent years.</p> <p>Only reporting unit “acres” will be considered when calculating total reported cropland acres.</p>
Land Use	This entry is prefilled based on data pulled from CVS.
*--Actual Land Use	<p>This entry is populated based on data associated with the intended use in CVS.</p> <p>Note: This data will be populated only when associated with the reporting of an actual use.</p>
Cropland Status	<p>Beginning in 2019, once the field number is selected, the cropland status will automatically populate to (Y) yes or (N) no based on the status of the field in Farm Records. Users cannot change the defaulted cropland status in CARS. If the defaulted cropland status is determined to be incorrect, it must be changed in Web Farm Records.</p> <p>Although AUM, colonies, and taps may have the cropland status populated to “Y” based on Farm Records, the reported quantity for these values will not be counted towards calculating the total reported cropland for the farm.</p>
Planting Date	<p>Enter in “MMDDYYYY” format or choose the date by clicking “Calendar” icon.</p> <p>Note: See paragraph 79 for crops that do not require a planting date.</p>
Organic Status	<p>Automatically defaulted to “Conventional”. If the organic status is not “Conventional”, select the applicable status from the drop-down list. Available options are “Conventional”, “Transitional”, and “USDA Certified”.</p> <p>Notes: See paragraph 33 for reporting organic crops.</p> <p>“Organic” status will be available beginning with the 2015 crop year and displayed on applicable CARS screens, FSA-578, and FSA-578 (Producer Print) as “C” for conventional, “OT” for transitional, and “OC” for USDA Certified.</p>

162 Loading Crop and Acreage Information (Continued)

D Entering Crop/Commodity Information (Continued)

Field	Action	
Native Sod Conversion	<p>Check (✓) box only when a crop is planted on native pasture as defined by 1-NAP (Rev. 2).</p> <p>Note: The “Native Pasture Conversion” checkbox will be available for 2015 and subsequent years.</p>	
End Year	<p>*--This is not a required entry. The end year will allow a crop and all crop characteristics to roll over from year to year until the end year is reached.</p> <p>End year will be entered for the field when the crop will maintain the exact same crop characteristics from year to year.</p> <p>The end year cannot be the same as the current program year.</p> <p>If an end year is not entered the crop will not roll to the next program year.</p> <p>Notes: See paragraph 79 for policy on entering dates.</p> <p>See paragraph 218 for procedure on continuous certification for CRP.--*</p>	
Official/Measured	<p>This field is defaulted to “None”. Select “Official”, “Measured”, or “Staked” from the drop-down list, as applicable, according to procedure in paragraph 78.</p>	
Concurrent Planting	<p>This field is defaulted to “None”. Enter the applicable value from the drop-down list. Only crops with a concurrent planting value, in CVS, will be available for selection in the drop-down list. The options are “Alternate”, “Interplant”, and “Multi-use”.</p>	
Planting Period	<p>Beginning with 2017, CARS will allow the user to enter crop status “Initial” for the same field number when the planting period value is different. When there is more than one planting period for a field, CARS will use the acreage that is associated with the earliest planting period when setting the fully reported indicator.</p>	
	IF...	THEN...
	no planting period, carrying capacity is available on NCT for the crop	this field is defaulted to “01”.
	only 1 planting period, carrying capacity is available on NCT for the crop, type, practice, and intended use	this field is defaulted as the planting period carrying capacity listed on NCT.
	more than 1 planting period, carrying capacity is available on NCT for the crop, type, practice, and intended use	a drop down list with applicable NCT planting periods/carrying capacity will be available for selection.
Planting periods and/or carrying capacities are retrieved from NCT.

E Skip/Strip Row Information (Continued)

*--

IF user selects...	THEN...
options 21 through 82	manual entry of "Crop Row Width" data element is required.
other patterns	manual entry of the following data elements are required: <ul style="list-style-type: none"> • Number of Crop Rows – Number of rows planted to the crop – up to 6 digits • Number of Non Crop Rows – Number of rows not planted between the crop rows – up to 6 digits • Crop Row Width – Distance between the planted rows – 6 digits (in inches) • Skip/Strip Row Width – Skipped area between the rows planted to the crop – up to 6 digits (in inches) • Conversion Factor – Percentage of the acreage planted to the crop – up to 6 digits.

The following is an example of the skip/strip selection options available on the Report of Acreage Screen.

Skip/Strip Row Information

Note: The reported acres will be used to calculate the net acres planted to the crop

* Skip/Strip Pattern **Select**

* Number of Crop Rows 1 planted 1 skipped - 30 inch - 66.67%

 1 planted 1 skipped - 32 inch - 62.5%

* Number of Non-Crop Rows 1 planted 1 skipped - 36 inch - 55.56%

 1 planted 1 skipped - 40 inch - 50.0%

 2 planted 1 skipped - 30 to 40 inch - 66.67%

* Crop Row Width (in inches) 2 planted 2 skipped - 30 to 40 inch - 50.0%

 3 planted 1 skipped - 30 to 40 inch - 75.0%

* Skip Row Width (in inches) 3 planted 2 skipped - 30 to 40 inch - 60.0%

 4 planted 1 skipped - 30 to 40 inch - 80.0%

* Conversion Factor 4 planted 2 skipped - 30 to 40 inch - 66.67%

 4 planted 4 skipped - 30 to 40 inch - 50.0%

 5 planted 1 skipped - 30 to 40 inch - 83.33%

 5 planted 2 skipped - 30 to 40 inch - 71.43%

 6 planted 1 skipped - 30 to 40 inch - 85.71%

 6 planted 2 skipped - 30 to 40 inch - 75.0%

 7 planted 1 skipped - 30 to 40 inch - 87.5%

 7 planted 2 skipped - 30 to 40 inch - 77.77%

 8 planted 1 skipped - 30 to 40 inch - 88.89%

 8 planted 2 skipped - 30 to 40 inch - 80.0%

 Other patterns - FSA Rules - FSA Rules

Note: When skip/strip is selected as the planting pattern, the RMA Cropping Practice will automatically populate as "043 – Skip Row".--*

162 Loading Crop and Acreage Information (Continued)

***--F Calculating Planted Acreage for Skip/Strip Information**

Based on the selection of the skip/strip, CARS will automatically calculate the planted acres for the field. To calculate the planted crop acres, the system will multiply the acres entered for the reported quantity times the conversion factor percentage. The sum of the calculated acres will be considered the **planted acres**.

- The calculated planted acres will be automatically populated in the reported quantity data field:
 - the planted acres will override any value previously entered in the reported quantity data field
 - the user will **not** be allowed to change/override the calculated planted acres.
- A second line entry will be automatically created to capture the remaining balance of nonplanted acreage for the field. In these cases, the system will automatically generate subfields for both the new line entry for the nonplanted acres and the planted acres. **Producer is required to certify to the planted acres and the nonplanted acres.**

Data fields for the newly created line entry for the nonplanted acres will be populated according to the following table.

Data Field	Automatic Entry
Crop Name	Skip rows.
Variety/Type	None.
Intended Use	None.
Irrigation Practice	Populate based on the practice entered for the planted acres.
Planting Date	None.
Official/Measured	Populate based on official/measured entered for the planted acres.
Organic Status	Populate based on the organic status entered for the crop planted acres.
Planting Pattern	Skip/strip.
Cropland Status	Populate based on the cropland status entered for the crop planted acres.
Crop Status	Populate based on the crop status entered for the crop planted acres.

--*

The following table provides a description of the options available on the Bulk Copy Screen.

Button	Result
Submit and Add	Click this button to save acreage report information. The Report of Acreage Screen will be displayed.
Submit and Certify	Click this button to save acreage report information. The Certification Screen will be displayed.
Submit and Bulk Copy	Click this button to save acreage report information. The Bulk Copy Screen will continue to be displayed.
Review Crop	Click this button to review acreage report information. The Review Crop Screen will be displayed.

***--162.5 Loading More Than One Intended Use for a Crop**

A Overview

Beginning with program year 2019, CARS will allow more than one intended use to be loaded for specific crops according to paragraph 84.

Notes: For the initial software release, multiple intended uses will be restricted to Grazing (GZ) and Grain (GR) **only**.

Acreage associated with a crop loaded with multiple intended uses will be counted only once when calculating total reported cropland for the farm.

B Example of “Multi-Intended Use” Option

Following is an example of the “Multi-Intended Use” options. This option is available on the Report of Acreage Screen.

The screenshot shows the 'Report of Acreage' form for the year 2019. It includes sections for Farm Information (Farm Number: 257, Operator Name), Tract Information (Tract Number: 214, FSA Physical Location), and a section for entering crop information. The crop information section contains numerous dropdown menus and input fields, including FSA Physical Location (Field Number, Subfield, Reported Quantity, Planting Date), Predominant Code, Crop/Commodity, Variety/Type, Intended Use, Actual Use, Irrigation Practice, Planting Pattern, Crop Status, Supplemental Status, Organic Status, RMA Cropping Practice, Cropland Status (Native Sod Conversion, Reporting Unit, End Year), Land Use (Actual Land Use, Multi-Intended Use), Planting Period, Concurrent Planting, Official/Measured, and Field ID. The 'Multi-Intended Use' dropdown menu is highlighted with a red box and contains the value 'N'.

--*

*--162.5 Loading More Than One Intended Use for a Crop (Continued)

C Actions

Step	Action									
1	<p>Enter/Select applicable crop information for the field on the Report of Acreage. The “Multi-Intended Use” field will be automatically populated as “N”. *--162.5 Loading More Than One Intended Use for a Crop (Continued)

D Identifying A Crop Loaded With Multiple Intended Uses

To identify a crop that is loaded with more than one intended use, CARS will display a number identifier next to the intended use. The number identifier will indicate the order in which the intended use was loaded in CARS. County Office will follow policy rules when loading primary/predominant intended uses as applicable.

The following is an example of the Crop Review Screen with a crop loaded with more than one intended use.

Crop Review

Note: Crop status and supplemental status is determined by CVS. If the status is not available for the crop and crop type in CVS, the status will not be available for selection for the crop and crop type in CARS.--*

163 Farm Zero Acreage Report**A Overview**

Beginning with the 2013 crop year, a zero acreage report will not be required for NAP when a crop is not planted. The certification statement on FSA-578 was modified to support the NAP zero acreage report requirement as follows.

Certification: I certify to the best of my knowledge and belief that the acreage of crops/commodities and land uses listed herein are true and correct and that all required crops/commodities and land uses have been reported for the farm as applicable. Absent any different or contrary prior subsequent certification filed by any producer for any crop for which NAP coverage has been purchased, I certify that the applicable crop, type, planting period, practice, and intended use is not planted if it is not included on the Report of Commodities for this crop year. The signing of the form gives FSA representatives authorization to enter and inspect crops/commodities and land uses on the above identified land. A signature date (the date the producer signs FSA-578) will also be captured.

For 2012 and prior years, a zero acreage report may be required for certain programs when the crop is **not** planted. Multiple producers with a share interest may file a zero acreage report for the same crop, type, practice, and intended use.

Note: No tract, field, or planting period is required for this report; however, all zero acreage reports must contain a farm number.

163 Farm Zero Acreage Report (Continued)

B Farm Zero Acreage Crop Screen for 2012 and Prior Years

The following is an example of the Farm Zero Acreage Crop Screen for 2012 and prior years.

Farm Zero Acreage Crop

163 Farm Zero Acreage Report (Continued)

C Loading a Zero Acreage Report in CARS for 2012 and Prior Years

Load a zero acreage report in CARS as follows for 2012 and prior years.

Step	Action	Result
1	On the Acreage Report Search Screen, enter the applicable farm number or search for a producer in SCIMS. CLICK “Submit” .	The Crop Acreage Reports Screen will be displayed.
2	CLICK “Record Farm Zero Acreage” .	<p>The Default Producer Shares Screen will be displayed if status is “Not Created” on the Crop Acreage Reports Screen.</p> <p>Note: If status is other than “Not Created”, the Farm Zero Acreage Crop Screen will be displayed requiring the following entries:</p> <ul style="list-style-type: none"> • crop/commodity • variety/type • intended use • irrigation practice.
3	Record required crop information and shares on the Farm Zero Acreage Crop Screen, as applicable. CLICK “Submit” .	The message, “The farm zero acreage crop has been successfully saved”, will be displayed.

164 Determined Acreage

A Overview

Users will have the capability to record the determined acreage quantity for crops loaded in CARS. See paragraph 954 for information on acreage determination methods.

B “Determined Quantity” Button

The “Determined Quantity” button is available on the Crop Acreage Reports Screen. The following is an example of the Crop Acreage Reports Screen.

*--

Crop Acreage Reports		
Year: 2019	State:	County:
Operator Information		
Operator Name: Any Producer		
Farm	Status ?	Last Updated
12	Fully Certified / Partially Reported	04/03/2018

Farm Summary	Tract Summary	Cancel

--*

Note: The “Record Farm Zero Acreage” button will be available for 2012 and prior years.

164 Determined Acreage (Continued)

C Accessing the “Determined Quantity” Button

Access the “Determined Quantity” button on the Crop Acreage Reports Screen according to this table.

Step	Action	Result
1	On the Acreage Report Search, enter the applicable farm number or search for a producer in SCIMS. CLICK “Submit”.	The Crop Acreage Reports Screen will be displayed.
2	CLICK “Determined Quantity”.	The Determined Quantity – Crop Selection Screen will be displayed.
3	Select the radio button of the applicable crop to be determined.	
4	Click either of the following.	
	“Back”	The Crop Acreage Reports Screen will be displayed.
	“Continue”	The Determined Quantity Screen will be displayed.

*--Notes: See subparagraph 104 C for additional button options available on the Crop Acreage Reports Screen.

See paragraph 340 for map printing procedure.--*

E Information Available on the Determined Quantity – Crop Selection Screen

The following table provides a description of the information available on the Determined Quantity – Crop Selection Screen.

Information	Description
Crop Name	Crops reported for the farm.
Number of Entries	Number of entries recorded of the crop for the farm.
Number of Entries Determined	Number of entries with determined acreage loaded for the farm.
Total Reported Quantity	Total quantity of reported acreage by crop loaded for the farm. Note: This total can represent 1 entry or multiple entries. Including entries of zero acreage.
Total Determined Quantity	Total quantity of determined acreage by crop loaded for the farm. Note: This total can represent 1 entry or multiple entries. Including entries of zero acreage.

164 Determined Acreage (Continued)

I Determined Acreage for Unreported Crops

During routine spot checks, field or crop acreage may have been determined that were not reported on FSA-578. For these determined acres to be loaded into the determined acreage software, those fields or crops must be loaded as reported. Since FSA-578 is a report of acreage certified by the producer and the producer has not yet reported these fields or crops, the County Office must have a method for reporting these discrepancies.

The County Office shall create a field entry in CARS when a field or crop has been determined that was not reported according to the following table.

IF a spot check determines that the producer reported an incorrect...	THEN record findings on FSA-578 by...
zero acreage report for the farm in 2012 or prior years Note: A farm level zero acreage report is not available for 2013 and subsequent years.	<ul style="list-style-type: none"> • deleting the farm zero crop record from CARS • entering the determined field with: <ul style="list-style-type: none"> • tract • field number • crop • zero reported acreage • applicable crop characteristics as found in the field • acreage found during spot check, as determined acres for the new field.
crop in a field	entering: <ul style="list-style-type: none"> • zero for determined acreage in the original field • the new field with: <ul style="list-style-type: none"> • tract • unique field subdivision number • crop • zero reported acreage • applicable crop characteristics as found in the field • acreage found during spot check, as determined acres for the new field.

Note: Notate on FSA-578 the reason for modification. County Office employee must initial and date. The producer will not be required to sign.

165-215 (Reserved)

Section 3 Certifying FSA-578 Data

216 Certify by Farm or Producer

A Overview

Beginning with 2015, users will be able to certify by producer or by farm. The “Certify by Producer” option will allow users to certify multiple farms, tracts, and fields for the selected producer. The “Certify by Farm” option will allow users to certify any or all fields for the selected farm. The “Certify by Producer” and “Certify by Farm” options are available on the Crop Acreage Reports Screen. See subparagraph 104 B for an example of the Crop Acreage Reports Screen.

All crops reported in CARS are required to be certified by the applicable reporting deadline according to Exhibit 10, as applicable. County Offices shall review all crops and acreage information with producers before certifying the acreage report in CARS.

B Certify by Farm Screen

C Options Available on the Certify by Farm Screen

The following options are available on the Certify by Farm Screen.

Button	Result
Certify	Click this button to certify the selected crop acreage.
Certify and Print	Click this button to certify and print the selected crop acreage.
Print	Click this button to print the selected crop acreage.
Uncertify	Click this button to uncertify crop acreage previously certified.
--Continuous Certification	Click this button to display the Continuous Certification Election Screen. This button will always be displayed even when there is no eligible continuous certification crop reported for the farm.--
Back	Click this button to return to the Crop Acreage Reports Screen.

D Certifying Crops by Farm

Follow instructions in this table to certify crops by farm.

Step	Action	Result
1	On the Acreage Report Search Screen, enter the applicable farm number or search for a producer in SCIMS. CLICK “Submit” .	The Crop Acreage Reports Screen will be displayed.
2	CLICK “Certify” .	The Certification Screen will be displayed.
3	Enter the signature date from FSA-578 and provide the option to certify by either of the following methods: <ul style="list-style-type: none"> • select the radio button in the heading bar to certify all fields in the tract • select the fields individually if not certifying the entire tract. 	

216 Certify by Farm or Producer (Continued)

D Certifying Crops by Farm (Continued)

Step	Action	Result
4	CLICK "Certify".	<p>On the Crop Acreage Reports Screen, the user will receive the message, "The selected crops have been certified". The status will change from "Not Certified" to "Certified" after all crops and/or fields for the farm are certified. The date certified will be displayed under the "Certification Date" column.</p> <p>Notes: If the certified cropland acreage entered for the farm in CARS is greater than the acreage for the farm in Web Farm Records message "Warning: Farm " " is over reported. Certified Acres: " ", Farm Acres " ", will be is displayed on the Certification screen.</p> <p>This is a warning message only. The County Office user will review the difference and question the producer, if needed.</p>

I Options Available on the Certify by Producer Screen

The following options are available on the Certify by Producer – Crop Selection Screen.

Button	Results
Certify	Click this button to certify crop acreage for the selected producer.
Uncertify	Click this button to uncertify crop acreage for the selected producer.
Certify and Print	Click this button to certify crop acreage for the selected producer and generate the producer print.
Back	Click this button to return to the Certify by Producer – Producer Selection Screen.

J Certifying Crops by Producer

Follow instructions in this table to certify crops for the selected producer.

Step	Action	Result
1	On the Acreage Report Search Screen, enter the applicable farm number or search for a producer in SCIMS. CLICK “Submit”.	The Crop Acreage Reports screen will be displayed.
2	CLICK “Certify by Producer”.	The Certify by Producer - Producer Selection Screen will be displayed.
3	Select the applicable producer to certify. CLICK “Submit”.	The Certify by Producer – Crop Selection Screen will be displayed with all fields for all farms associated with the selected producer by tract.
4	Select the applicable field(s) to be certified. CLICK “Submit”.	The message “The selected crops have been certified” will be displayed on the Certify by Producer Screen.

217 Continuous Certification for Approved Perennial Crops

A Overview

Beginning with 2016, upon certifying an approved crop, crop type, and intended use, CARS will allow election of continuous certification.

Continuous certification elections are:

- saved at the farm level, by producer, crop, crop type and intended use
- available on the Continuous Certification Election Screen for the selected producer by crop, crop type and intended use.

Notes: Once a crop, crop type, and intended use is elected for continuous certification, all certified fields of that crop, crop type, and intended use associated with the producer will be automatically rolled to subsequent CARS program years as certified. See subparagraph 217 C for automatic termination of continuous certification.

If an approved perennial crop is recorded with an end year, upon election of continuous certification the end year will be **removed**.

B Producer Election for Continuous Certification

The following table provides guidance about how crops, crop types, and intended use are included for continuous certification based on the role of the producer making the election.

IF the...	THEN upon certification of any subsequent field(s) reported...
operator elects continuous certification for a specified crop, crop type, and intended use	and/or certified with the same crop, crop type, and intended use will be included for continuous certification, regardless of the operator having a share in the crop.
owner elects continuous certification for a specified crop, crop type, and intended use	with the same crop, crop type and intended use that the owner has a share will be automatically included for continuous certification.
other tenant elects continuous certification for a specified crop, crop type and intended use	with the same crop, crop type, and intended use that the other tenant has a share will be automatically included for continuous certification.

217 Continuous Certification for Approved Perennial Crops (Continued)

C Automatic Termination of Continuous Certification for Perennial Crops

The following table provides actions that will result in automatic termination of continuous certification.

IF...	THEN, the system terminates the continuous certification for...
the producer who made the election is removed from the farm in farm records	all crops, crop types and intended use elections made by the producer.
a farm records CLU change causes a cropland/noncropland change greater than 1 acre to CLU reported with a specified crop, crop type and intended use enrolled for continuous certification	all fields with the same crops, crop types, and intended uses for the producer who made the election.
there is a farm reconstitution	all crops, crop types, and intended uses for the farm, regardless of the producer who made the election. In this case the farm will automatically be deleted from CARS
determined acres are entered on a field for an elected crop, crop type and intended use that is different than reported acres	all fields with the same crops, crop types, and intended uses for the producer who made the election.
a field for an elected crop, crop type, and intended use is changed and/or revised Note: Includes using the “Revise Tract” option.	all fields with the same crops, crop types, and intended uses for the producer who made the election.
all fields of the elected crop, crop type, and intended use for the producer are deleted from FSA-578	the crop, crop type, and intended use for the producer who made the election.

Important: If continuous certification is automatically terminated in a prior CARS program year, then the continuous certification **election** for the current and any subsequent CARS program year will also be terminated. Termination of continuous certification election will **not** impact certification of the crop.

Example: Producer A elects continuous certification in 2016 CARS for field 1/GRASS/NAG/FG. Field 1/GRASS/NAG/FG is automatically rolled to CARS program year 2017 and 2018. Producer A later revise Field 1 from GRASS/NAG/FG to GRASS/NAG/GZ in 2016 CARS, which will automatically uncertify Field 1 in 2016 CARS and terminate continuous certification election for all fields of GRASS/NAG/FG on the farm for Producer A in 2016, 2017, and 2018. The FSA-578 for Field 1/GRASS/NAG/FG/in 2017 and 2018 CARS will remain certified. The FSA-578 for 2017 and 2018 will need to be revised as needed.

217 Continuous Certification for Approved Perennial Crops (Continued)

C Automatic Termination of Continuous Certification for Perennial Crops (Continued)

Notes: For information on status, see the Farms with Terminated Continuous Certification Report (subparagraph 339 B).

See subparagraph 277 G for information on CARS Continuous Certification Termination Letter.

D Rolling Over Perennial Crops Elected for Continuous Certification From Program Year to Program Year

The following table explains the process for rolling over continuous certification crops from 1 year to the next.

IF...	AND the...	THEN...
Rollover process before opening CARS software for the next program year.		
election for continuous certification is made in the previous CARS program year	next CARS program year has not been released	after CARS software is opened for the next program year, an automatic process will run to roll over all fields enrolled for continuous certification in the previous CARS program year to the next CARS program year on October 1.
Rollover process when CARS software is already available in the next program year.		
election is made in the previous CARS program year	<ul style="list-style-type: none"> • next CARS program year is available, and • user accesses the farm in the next CARS program year the same day that the election was made in the previous CARS program year 	upon accessing the farm, the fields that were enrolled for continuous certification in previous CARS will be automatically rolled to the next CARS program year real time.
election is made in the previous CARS program year	<ul style="list-style-type: none"> • next CARS program year is available, and • user does not access the farm in the next CARS program year the same day that the election was made in the previous CARS program year 	a nightly process will run to roll fields that were enrolled for continuous certification in previous CARS program year over to the next CARS program year.

Note: FSA-578 records that do not pass validation will not be rolled over from the previous CARS program year to the next CARS program year. See paragraph 103 and 105 for more information on validations and rollover error messages.

217 Continuous Certification for Approved Perennial Crops (Continued)

D Rolling Over Perennial Crops Elected for Continuous Certification From Program Year to Program Year (Continued)

IF...	AND the...	THEN...
election is not made in the previous CARS program year	FSA-578 for the farm already exists in the next CARS program year	the crop elected for continuous certification will rollover through the nightly rollover process as long as no field level FSA-578 record associated with the field being rolled from the previous CARS program years exists in the next CARS program year
the crop/field in the next CARS program year is not certified	users later elects continuous certification in the previous CARS program year for the eligible continuous certification crop that already exists in the next CARS program year	the certification date for that crop/field from the previous CARS program year will be automatically populated for the crop/field in the next CARS program year. Note: All data for the field in the previous CARS program year must be an exact match of the data in next CAARS program year.
the crop/field in the next CARS program year is certified		the certification date will not be changed; however, the crop/field will now be covered for continuous certification due to the election of continuous certification in the previous CARS program year.

Important: Once the continuous certification flag and FSA-578 record is rolled to the next program year, any action, in a previous CARS program year that terminates the continuous certification will also terminate continuous certification for the subsequent CARS program year(s).

217 Continuous Certification for Approved Perennial Crops (Continued)

D Rolling Over Perennial Crops Elected for Continuous Certification From Program Year to Program Year (Continued)

Note: If the farm has both continuous certification perennial crops and other crops certified with an end year in the previous CARS program year, the other crops will also be automatically rolled over each program year until the end year associated with the crop is reached. However, the certification and/or signature date will **not** rollover for crops that are not a continuous certification crops.

IF...	AND the...	THEN...
election is made in the previous CARS program year	field number is deleted from Web Farm Records due to a CLU edit	<ul style="list-style-type: none"> • the field level FSA-578 record associated with that deleted field number will be automatically deleted from CARS • continuous certification will be terminated • all other fields reported/certified for the farm will be automatically uncertified. <p>Note: CARS status report “Farms with Deleted Field Due to Deleted Field Number in Farm Records” will be available to identify fields that are automatically deleted.</p>
Election is made in the previous CARS program year for field with an eligible continuous certification crop	crop is rolled through the manual or nightly rollover process to the next CARS program year	<ul style="list-style-type: none"> • only field level FSA-578 records with a valid number in Web Farm Records will be rolled to the next CARS program year • any field level FSA-578 record with an invalid field number will not roll to the next CARS program year.

217 Continuous Certification for Approved Perennial Crops (Continued)

D Rolling Over Perennial Crops Elected for Continuous Certification From Program Year to Program Year (Continued)

IF...	AND the...	THEN...
election is made in the previous CARS program year for field with an eligible continuous certification crop	crop is rolled through the manual or nightly rollover process to the next CARS program year	<ul style="list-style-type: none"> continuous certification election will be automatically terminated when any field covered under continuous certification is not rolled over due to an invalid field number. These farms will be available on CARS status report "Farms with Terminated Continuous Certification".

Notes: For farms that are accessed for manual rollover, the following message will be displayed. "Fields with End Year or Continuous Certification cannot rollover because the field number(s) do not exist in Web Farm Records for 2017. Invalid fields are:___" "Warning: Continous Certification was terminated. Fields Do Not Exist in Farm Records: CROP/TYPE/INTENDED USE".

Fields that are dropped during rollover due to invalid field numbers will not show on CARS status report "Farms with Deleted Field Due to Deleted Field Number in Farm Records".

IF...	AND the...	THEN...
election is made in the previous CARS program year for field with an eligible continuous certification crop	farm has both eligible crop(s) elected for continuous certification and other crop(s) with an end year certified in the previous CARS program year	<p>upon rollover the crops elected for continuous certification and all other crops certified with an end year in the previous CARS program year will be rolled to the next CARS program year.</p> <p>Note: The certification/ signature date will not rollover for crops that are not eligible for continuous certification crops or CRP with End Year.</p>

217 Continuous Certification for Approved Perennial Crops (Continued)

D Rolling Over Perennial Crops Elected for Continuous Certification From Program Year to Program Year (Continued)

IF...	AND the...	THEN...
election is not made in the previous CARS program year	FSA-578 for the farm already exists in the next CARS program year	the crop elected for continuous certification will rollover through the nightly rollover process as long as no field level FSA-578 record associated with the field being rolled from the previous CARS program year exists in the next CARS program year.
	user later elects continuous certification in the previous CARS program year for the eligible continuous certification crop that already exists in the next CARS program year	<ul style="list-style-type: none"> • if the crop/field in the next CARS program year is not certified, the certification date for that crop/field from the previous CARS program year will be automatically populated for the crop/field in the next CARS program year. All data for the field in the previous CARS program year must be an exact match of the data in the next CARS program year • if the crop/field in the next CARS program year is certified, the certification date will not be changed; however the crop/field will now be covered for continuous certification due to the election of continuous certification of the crop in the previous CARS program year.

217 Continuous Certification for Approved Perennial Crops (Continued)

D Rolling Over Perennial Crops Elected for Continuous Certification From Program Year to Program Year (Continued)

Important: Once the continuous certification flag and FSA-578 record is rolled to the next program year, any action, in a previous CARS program year that terminates the continuous certification will also terminate continuous certification for the subsequent CARS program year(s).

Note: If the farm had both continuous certification perennial crops and other crops certified with an end year in the previous CARS program year until the end year associated with the crop is reached. However, the certification and/or signature date will not roll over for crops that are not a continuous certification crops.

IF...	AND the...	THEN...
election is made in the previous CARS program year for a field with an eligible continuous certification crop	farm has both eligible crop(s) elected for continuous certification and other crop(s) with an end year certified in the previous CARS program year	upon rollover the crops elected for continuous certification and all other crops certified with an end year in the previous CARS program year will be rolled to the next CARS program year. Note: The certification/ signature date will not roll over for crops that are not eligible for continuous certification crops or CRP with End Year.

217 Continuous Certification for Approved Perennial Crops (Continued)

217 Continuous Certification for Approved Perennial Crops (Continued)

F Field Descriptions and Actions

This table provides field descriptions and actions available on the Continuous Certification Election Screen.

Field/Button	Description	Action
Producer	The producer who is making the continuous certification election.	Using the dropdown, select the applicable producer.
Election Date (MM/DD/YYYY)	The date the producer signs the FSA-578C.	Select or enter the applicable election date.
Checkbox	Allows the user to select continuous certification for all crops, crop types and intended uses depending on the box that is checked.	Using the check box, select the applicable crop, crop type and intended use to be enrolled for continuous certification.
Enroll	Enrolls the crop, crop type and intended use for continuous certification.	CLICK “Enroll” .
UnEnroll	Terminates the continuous certification election.	CLICK “UnEnroll” . Note: To terminate continuous certification, the user will need to click the “UnEnroll” button in the program year where the most current FSA-578 is certified.
Print FSA-578C	Generate and/or print FSA-578C.	CLICK “Print FSA-578C” .
Back	Returns to the Crop Acreage Reports Screen.	CLICK “Back” .

218 Continuous Certification for CRP**A Overview**

Certified CRP fields that are recorded with an end year will be included for continuous certification effective in 2017:

- after the initial release of the new CARS program year software, CARS will automatically roll over CRP fields with an end year to the next CARS program year on *--October 1--*
- once the October 1 roll over is complete, a separate process will be available to roll over CRP fields with an end year nightly
- anytime the farm is accessed by the user in the next CARS program year, CRP fields with an end year will be automatically rolled over real time
- CRP fields with an end year will be rolled over to each new CARS program year until the end year is reached
- the certification and/or signature date will also be rolled each program year for continuous certification.

Note: If the farm has both CRP and other crops certified with an end year in the previous CARS program year, the other crops will also be automatically rolled over each program year until the end year associated with the crop is reached. However, the certification and/or signature date will **not** roll over for crops with an end year that is **not** a continuous CRP crop.

B Action

There is **no** action required by the user in CARS.

219-269 (Reserved)

Section 4 Reviewing, Revising, Deleting, Printing FSA-578 Data

270 Crop Review

A Overview

An option is available to allow users to view data already loaded in CARS. The data can be reviewed for a producer acreage report in any county where a report has already been loaded. The Crop Review Screen:

- is accessed by clicking the “Review Crops” button on the Report of Acreage Screen

Note: See subparagraph 162 B for an example of the Report of Acreage Screen.

- will be displayed when a farm and/or tract is selected to report additional crop/commodity data.

B Crop Review Screen

The following is an example of the Crop Review Screen.

*--

Crop Review												
Year: 2019			State:				County:					
Farm Information

C Options Available on the Crop Review Screen

The following table provides a description of the options available on the Crop Review Screen.

Button	Result
Add	<p>Click this button to add another field to the existing acreage report for the farm and tract selected.</p> <p>Note: This option is available when an acreage report has been loaded in CARS and an additional acreage report now needs to be loaded.</p>
Revise	<p>Click this button to revise the acreage report for the field selected.</p> <p>Note: See paragraph 274 for instructions to revise a previously loaded acreage report.</p>
Delete	<p>Click this button to delete a single field or multiple fields recorded for the farm. The Delete Fields Screen will be displayed”.</p> <p>Note: See paragraph 276 for instructions to delete a previously loaded acreage report.</p>
Copy	<p>Click this button to copy the pre-existing attributes of a selected field for entry to a new field on the Report of Acreage Screen. Only 1 field can be copied at a time.</p>
Certify	<p>Click this button to certify the acreage report for the field selected.</p>
Bulk Copy	<p>Click this button to copy the pre-existing crop and crop characteristics of a selected field for entry of that same crop information across multiple fields and/or tracts on the Bulk Copy Screen.</p>

271 Farm Summary Review

A Overview

Users have the capability to select a farm for viewing a complete summary of crop data attributes reported at the farm level. The summary will be displayed with a complete list of all crops or commodities associated with the farm and a farm level GIS map.

Users shall click the check box for cropland and/or non-cropland to view applicable cropland and/or non-cropland boundaries for tracts on the farm. Tract and field boundaries will be displayed as yellow.

Notes: Wetland points for the farm will be displayed when applicable.

Maps will be available beginning with the 2015 crop year. The message “Unable to retrieve GIS mapping data” will be displayed when a map is not available for the farm.

271 Farm Summary Review (Continued)

B Farm Summary Screen

The following is an example of the Farm Summary Screen.

Farm Summary

Year: 2016 **State:** Texas (48) **County:** Medina (325)

Farm Information

Farm Number: XXXX	Total Cropland: 197.92
Operator Name: Any 1 Producer	Reported Cropland Acreage: 133.87
	Difference: -64.05
	Reported Non-Cropland Acreage: 0.00

Crop/ Comm	Var/ Type	Int Use	Irr Prc	Rpt Unit	Rpt Qty	PP Qty	Expt Qty	Vol Qty	NA Qty	Det Qty
BARLY	HUL	FG	N	A	55.30	-	-	-	-	-

CARS118 - Last Modified: 2/2/2015 08:20:05 AM

271 Farm Summary Review (Continued)

C Information Displayed on the Farm Summary Screen

The Farm Summary screen will provide a summary of crop/acreage information entered as follows by crop, type, intended use, irrigation practice and reporting unit:

- Reported (Rpt Qty)
- Prevented Planted (PP Qty)
- Experimental (Expt Qty)
- Volunteer (Vol Qty)
- Not Applicable (NA Qty)
- Determined (Det Qty).

Note: Users have the capability to record Reported Quantity to 4 decimal places (ten thousandths). Acreage at the crop level will be displayed to 4 decimal places (ten thousandth) when entered by the user as such. However, the Total acreage for the farm will be rounded to 2 decimal places and displayed in hundredths.

Example: Field 1 was reported with 44.00 acres of BEANS MUN. Field 2 was reported with 10.0023 acres of BEANS MUN. The acreage at the crop level will be summarized and displayed as 54.0023. However, the total for all acres will be calculated and displayed as 133.87.

Crop/ Comm	Var/ Type	Int Use	Irr Prc	Rpt Unit	Rpt Qty	PP Qty	Expt Qty	Vol Qty	NA Qty	Det Qty
BARLY	HUL	FG	N	A	55.30	-	-	-	-	-

BEANS	MUN	DE	N	A	54.0023	-	-	-	-	-
RICE	MGR	-	N	A	23.40	-	-	-	-	-
Total:					133.87	-	-	-	-	-

271 Farm Summary Review (Continued)

D Accessing Farm Summary

Follow instructions in this table to access the farm summary.

Step	Action	Result
1	On the Acreage Report Search Screen, enter the applicable farm number or search for a producer in SCIMS. CLICK “Submit” .	The Crop Acreage Reports Screen will be displayed.
2	CLICK “Farm Summary” .	<p>The Farm Summary Screen will be displayed with data summarized by crop or commodity.</p> <p>Notes: If the reported cropland acreage entered for the farm in CARS is greater than the acreage for the farm in Web Farm Records message “Warning: Farm “ ” is over reported. Reported Acres: “ ”, Farm Acres “ ”, will be is displayed on the Farm Summary screen.</p> <p>This is a warning message only. The County Office should review the difference and question producer, if needed.</p>
3	CLICK “Back” to exit the Farm Summary Screen.	The Crop Acreage Reports Screen will be redisplayed.

272 Tract Summary Review

A Overview

Users have the capability to select a tract for purposes of viewing a complete summary of crop data attributes reported at the tract level. The summary will display a complete list of all crops or commodities associated with the tract and a tract level GIS map.

Users shall click the check box for cropland and/or non-cropland to view applicable cropland and/or non-cropland boundaries for the tract. Tract and field boundaries will be displayed as yellow.

Notes: Wetland points for the tract will be displayed when applicable.

Maps will be available beginning with the 2015 crop year. The message “Unable to retrieve GIS mapping data” will be displayed when a map is not available for the farm and/or tract.

272 Tract Summary Review (Continued)

B Tract Summary Screen

The following is an example of the Tract Summary Screen.

Tract Summary

Year: 2016
State: Texas (48)
County: Medina (325)

Farm Information

RICE	MGR	-	N	A	23.40	-	-	-	-	-	

272 Tract Summary Review (Continued)

E Accessing Tract Summary

Access the tract summary as follows.

Step	Action	Result
1	On the Acreage Report Search Screen, enter the applicable farm number or search for a producer in SCIMS. CLICK “Submit” .	The Crop Acreage Reports Screen will be displayed.
2	CLICK “Tract Summary” .	<p>The Tract Summary Screen will be displayed with data summarized by crop or commodity.</p> <p>Notes: If the reported cropland acreage entered for the tract in CARS is greater than the acreage for the tract in Web Farm Records message “Warning: Tract “ ” is over reported. Reported Acres: “ ”, Tract Acres “ ”, will be is displayed on the Tract Summary screen.</p> <p>This is a warning message only. The County Office should review the difference and question the producer, if needed.</p>
3	The user will be able to CLICK “Next Tract” or “Previous Tract” , as applicable, to review crop information by tract for multi-tract farms.	
4	CLICK “Back” to exit the Tract Summary Screen.	The Crop Acreage Reports Screen will be redisplayed.

273 Revising Tracts

A Overview

The Revise Tract Screen will be displayed after users CLICK “**Revise Tract**” on the Tract Selection Screen, if crop data has been entered for a tract on the farm. The Revise Tract Screen provides users the ability to move field/crop information from 1 tract to another. A reconciliation process will be available to ensure that only valid producers are moved. See paragraph 274 for revising crop/commodity and share information.

B Revised Tract Screen

The following is an example of the Revise Tract Screen.

--*

C Options Available on the Revised Tract Screen

The following table provides a list of options available on the Revise Tract Screen.

Button	Results
Update Tract	Selected crops will be updated/saved to the applicable tract.
Back	Return to the Tract Selection Screen.

274 **Revising Crop/Commodity and Share Information for the Field**

A Overview

Users have the capability to revise applicable data loaded in CARS within their administrative county, including zero acreage reports, as necessary.

Exception: Beginning with 2015, County Offices may access the Nationwide Customer Service option on the left navigation menu to update any county in the nation.

B Accessing the “Revise” Option on the Crop Review Screen

Follow this table to revise crop and/or commodity and share information for the field.

Step	Action	Result
1	On the Acreage Report Search Screen, enter the applicable farm number or search for a producer in SCIMS. CLICK “ Submit ”.	The Crop Acreage Reports Screen will be displayed.
2	CLICK “ Record Acreage ”.	The Crop Review Screen will be displayed.
3	Select the radio button of the applicable crop or field to be revised.	
4	CLICK “ Revise ”.	The Report of Acreage Screen will be displayed.
5	A revision may be made to any entry, as applicable.	
6	After the applicable revisions have been made, CLICK “ Submit ”.	The message, “The crop acreage report has been successfully updated”, will be displayed.

274 Revising Crop/Commodity and Share Information for the Field (Continued)

C Revising Specific Crop/Commodity Information for the Field

The crop/commodity information that was previously entered in CARS can be revised by clicking the “Revise” button on the Crop Review Screen.

To revise the applicable crop information on the Report of Acreage Screen, refer to the following table.

Field	Action
Field Number	Enter or select the correct field number. Notes: Only field numbers that are available in Farm Records can be entered in CARS. See paragraph 162 for more information on field number.
Subfield	Enter the correct subfield.
Predominant Number	If applicable, enter the crop default number for the crop/crop characteristics to be entered. Once the predominant number is entered, all applicable fields will be automatically pre-populated.
Crop/Commodity	Select the correct crop name from the drop-down list.
Variety/Type	Select the correct variety/type from the drop-down list.
Intended Use	Select the correct intended use from the drop-down list.
Planting Pattern	Select the correct planting pattern from the drop-down list.
Actual Use	This is not a required entry. Select the correct actual use from the drop-down list.
Irrigation Practice	Select the correct irrigation practice from the drop-down list.
Crop Status	Select the correct crop status from the drop-down list. Status code “C” will be automatically populated for crops with intended use of cover only (CO).
Supplemental Status	Select the correct supplemental status from the drop-down list. Supplemental status “Planted” will be automatically populated for crops with intended use of cover only (CO).

274 Revising Crop/Commodity and Share Information for the Field (Continued)

C Revising Specific Crop/Commodity Information for the Field (Continued)

Field	Action
Reporting Unit	<p>This field will:</p> <ul style="list-style-type: none"> • default as “colonies” for honey • default as taps for maple sap • display both “acres” and “AUM” for selection for eligible crops only • default as “acres” for all other crops that are not honey, maple sap, or eligible for selection of AUM. <p>Notes: When “AUM” is selected additional data elements will be displayed to record beginning month/day, ending month/day, and % public lands.</p> <p>Reporting unit “hives” will be available for 2014 and prior years only. Colonies will be available for 2015 and subsequent years. Only reporting unit “acres” will be considered when calculating total reported cropland acres.</p>
Land Use	This field cannot be revised as it is based on the crop/commodity selected.
--Actual Land Use	<p>This entry is prefilled based on data associated with the intended use in CVS.</p> <p>Note: This data will only be populated when an actual use is reported.--</p>
Reported Quantity	Enter the correct quantity in reporting units.
Cropland Status	For crops reported with reporting unit “Acres” the cropland status will be automatically populated as “Yes”. The cropland status will be automatically populated as “No” when the reporting unit is “Colonies”, “Taps”, or “AUM”. In this case, the users will not be allowed to change the cropland status.
Planting Date	This is a required entry. Enter the correct planting date in “MM/DD/YYYY” format or using the calendar provided.
End Year	This is not a required entry. Enter the correct end year.
Official/Measured	Enter the correct value from the drop-down list.
Concurrent Planting	Enter the correct value from the drop-down list.
Planting Date	<p>Enter in “MMDDYYYY” format or choose the date by clicking “Calendar” icon.</p> <p>Note: See paragraph 79 for crops that do not require a planting date.</p>

274 Revising Crop/Commodity and Share Information for the Field (Continued)

C Revising Specific Crop/Commodity Information for the Field (Continued)

Field	Action
Organic Status	<p>Automatically defaulted to “Conventional”. If the organic status is not “Conventional”, select the applicable status from the drop-down list. Available options are “Conventional”, “Transitional”, and “USDA Certified”.</p> <p>Note: Organic status will be available beginning with the 2015 crop year and displayed on applicable CARS screens, FSA-578, and FSA-578 (Producer Print) as “C” for conventional, “OT” for transitional, and OC” for USDA certified.</p>
Planting Period	<p>When applicable, select the correct planting period.</p> <p>Note: See subparagraph 162 D for more information on planting periods.</p>
Field ID	<p>This is not a required field. Enter up to 4 characters to record additional information about the crop acreage being reported, such as wetlands, etc.</p> <p>Note: This field is used for informational purposes only.</p>
NAP Unit	<p>After the user clicks “Submit” on the Report of Acreage Screen, this field will be automatically populated based on available NAP units from the NAP Unit Table.</p> <p>Notes: NAP units will be populated for all producers since NAP units are created using farming relationships as reported in CARS.</p> <p>To access the option to manually override the populated NAP unit, users must click “Revise” on the Crop Review Screen.</p> <p>The populated NAP unit number shall be manually overridden only when the relationship based on producer type documented on FSA-578 does not match the actual farming relationship.</p>
RMA Cropping Practice	<p>Select the applicable RMA cropping practice from the drop-down menu.</p> <p>Notes: See paragraph 397 for additional information on RMA cropping practice.</p> <p>See Part 4 for policy on using RMA cropping practice.</p>
Share %	<p>Enter the correct share percentages for each respective producer.</p> <p>Note: Shares must equal 100 percent. See paragraph 107 for additional information on producer shares.</p>
*--FSA Physical Location	<p>This data field is automatically populated and cannot be changed.</p>
Multi-Intended Use	<p>See paragraph 162.5 for information on revising a crop with multiple intended uses.--*</p>

275 Revising Shares Across Multiple Tracts and Fields for the Farm

A Overview

Beginning with 2015 the “Revise Shares” button will be available on the Crop Acreage Reports Screen to allow users to change shares across multiple tracts and/or fields for the selected farm.

B Revise Shares Screen

The following is an example of the Revise Shares Screen.

*--

Revise Shares													
Year: 2019			State: .				County:						
Farm Information

275 Revising Shares Across Multiple Tracts and Fields for the Farm (Continued)

C Options Available on the Revise Shares Screen

The following table provides a list of available options available on the Revise Shares Screen.

Button	Results
Update Shares	Click this button to update shares for all selected tracts and fields.
Back	Click this button to go back to the Crop Acreage Reports Screen.
Hide Zero Shares	Click this button for producers with zero share not to be displayed on the Revise Shares Screen. This option will only be displayed when there is a producer with zero share.

D Updating Shares on the Revise Shares Screen

Follow this table to update shares for multiple tracts and/or fields.

Step	Action	Results
1	On the Acreage Reports Search Screen, enter the applicable farm number or search for a producer in SCIMS. CLICK “Submit”.	The Crop Acreage Reports Screen will be displayed.
2	Click the “Revise Shares” button on the Crop Acreage Reports Screen.	The Revise Shares Screen will be displayed.
3	Select the check box next to the applicable tracts, fields, and crop to be updated.	
4	Enter applicable shares for producers listed on the farm. CLICK “Update Shares”. Note: Shares must equal 100 percent.	The message, “The shares on the selected crops have been revised” will be displayed.

276 Deleting FSA-578**A Overview**

Users have the capability to delete an acreage report record, including a zero acreage report, by farm or fields.

B Deleting Farms From CARS Because of Farm Records Reconstitutions

Beginning with 2013, a farm acreage report will be automatically deleted from CARS when a reconstitution is performed for the farm/tract in Farm Records.

Note: The farm acreage report will be deleted at the time the recon farm(s) are approved in CRM Farm Records.

C Deleting Acreage Report by Farm

The “Delete” option on the Crop Acreage Reports Screen will provide the user the capability to select a farm record to delete. Once that farm number is selected, the farm number, operator name, and report status will be displayed. The user will have the option to delete the farm record from CARS or cancel the delete process.

Farm deletion will result in the permanent elimination of all crop records from CARS for a specified farm.

276 Deleting FSA-578 (Continued)

D Delete Acreage Report Screen

The following is an example of the Delete Acreage Report Screen.

Delete Acreage Report

Year: 2017 **State:** **County:**

Farm Number: 233

Operator Name: ~~Producer~~ A

Report Status: Not Certified

Are you sure you want to delete the acreage report?

276 Deleting FSA-578 (Continued)

E Accessing the Farm Report “Delete” Option

Access the farm report “Delete” option on the Crop Acreage Reports Screen as follows.

Step	Action	Result
1	On the Acreage Report Search Screen, do either of the following and CLICK “Submit”: <ul style="list-style-type: none"> • select the farm to be deleted by entering the applicable farm number • select the farm by searching for the producer in SCIMS. 	The Crop Acreage Reports Screen will be displayed. If the user searched for the producer, the user will have to select the applicable farm by clicking the radio button to the left of the farm.
2	Once the farm has been selected by either method in step 1, the user shall CLICK “Delete”.	The Delete Acreage Report Screen will be displayed.
3	The user will be prompted to answer the question, “Are you sure you want to delete the acreage report?”	If: <ul style="list-style-type: none"> • “No” is selected, the user will be returned to the Crop Acreage Reports Screen • “Yes” is selected, the Delete Crop Screen will be displayed with the message, “The acreage report has been successfully deleted for farm number XX”.

F Deleting Acreage Report Records by Field

This “Delete” option on the Crop Review Screen will provide a complete list of all crop data associated with a farm and tract. Beginning with 2015, users will have the capability to select a single crop record or multiple records to delete. The user will have the option to delete the crop record or cancel the delete process. The crop record will display the farm number, tract number, field number, crop, crop type, practice, intended use, organic status, crop status, supplemental status, acreage and planting period.

Field deletion will result in the permanent elimination of all crop records for a specified field.

G Delete Crop Screen for 2014 and Prior Years

The following is an example of the Delete Crop Screen for 2014 and Prior Years.

Delete Crop		
Year: 2014	State:	County:
Farm Information		
Farm Number: 233	Total Rpt Cropland: 2.00 of 5.78	
Operator Name: Producer A		
Tract Information		
Tract Number: 3458	Tract Rpt Cropland: 2.00 of 5.78	
Tract Owner(s): Producer B		
Crop Information		
Field Number: 1		
Crop/Commodity: WHEAT		
Variety/Type: HRW		
Intended Use: Grain		
Irrigation Practice: Non-Irrigated		
Crop Status: I - Initial - first crop planted on acreage		
Supplemental Status: Planted		
Reported Quantity: 2.00		
Determined Quantity:		
Are you sure you want to delete the selected Crop(s)?		
<input type="button" value="Yes"/> <input type="button" value="No"/>		

276 Deleting FSA-578 (Continued)

H Accessing the Field Record “Delete” Option for 2014 and Prior Years

For 2014 and prior years, access the field record “Delete” option on the Crop Review Screen as follows.

Step	Action	Result
1	On the Acreage Report Search Screen, enter the applicable farm number or search for a producer in SCIMS. CLICK “ Submit ”.	The Crop Acreage Reports Screen will be displayed.
2	CLICK “ Record Acreage ”.	The Crop Review Screen will be displayed.
3	Select the radio button of the applicable crop or field to be deleted.	
4	CLICK “ Delete ”.	The Delete Crop Screen will be displayed.
5	The user will be prompted to answer the question, “Are you sure you want to delete the Crop?”.	If: <ul style="list-style-type: none"> • “No” is selected, the user will be returned to the Crop Review Screen • “Yes” is selected, the user will receive the message, “The crop has been successfully deleted”, on the Crop Review Screen.

J Accessing the Field Record “Delete” Option for 2015 and Subsequent Years

For 2015 and subsequent years, access the field record “Delete” option on the Crop Review Screen as follows.

Step	Action	Result
1	On the Acreage Report Search Screen, enter the applicable farm number or search for a producer in SCIMS. CLICK “Submit”.	The Crop Acreage Report Screen will be displayed.
2	CLICK “Record Acreage”.	The Crop Review Screen will be displayed.
3	CLICK “Delete”.	The Delete Fields Screen will be displayed.
4	Select the check box for the applicable crop(s)/field(s) to be deleted. CLICK “Delete”.	
5	The user will be prompted to answer the question, “Are you sure you want to delete the selected fields? CLICK “Ok” or “Cancel”.	If: <ul style="list-style-type: none"> • “Ok” is selected, the Delete Fields Screen will be displayed with the message “The fields have been successfully deleted. • “Cancel” is selected, the Crop Review Screen will be displayed.

277 **Printing FSA-578**

A Overview

The user has the option to print the following:

- FSA-578 Farm and Tract Detail Listing
- FSA-578 Summary
- FSA-578 (Producer Print)
- Map (beginning with the 2015 crop year)
- Continuous Certification Termination Letter
- FSA-578C.

Note: To ensure that all information is displayed on FSA-578, all FSA-578's will be printed in landscape mode.

277 Printing FSA-578 (Continued)

B Reports Screen

The following is an example of the CARS Reports Screen.

The screenshot shows a web interface for generating reports. At the top, there is a blue header with the word "Reports". Below this, there are input fields for "Year: 2017", "State:", and "County:". A second blue header contains "FSA-578". The main content area lists several report options, each with a radio button. The first group includes "FSA-578", "FSA-578C", "Map", "FSA-578 Summary", and "FSA - 578 (Producer Print)", with a "Farm Number" input field. The second group includes "Continuous Certification Termination Letter" and "Farm Number" with an input field. Below these is a "Report Format:" section with radio buttons for "PDF" (selected) and "Excel". A third group of report options follows, including "Crops with End Date", "Farms with a FSA-578 in CARS and Unreported Cropland", "Farms with Active Continuous Certification", "Farms with ARC/PLC Contract, Unreported Cropland", "Farms with Cropland Override", "Farms with CRP", "Farms with Deleted Field Due to Deleted Field Number in Farm Records", "Farms with Deleted Producers with Active Shares", "Farms with End Date", "Farms with Failed Acreage", "Farms with FAV Crops", "Farms with Fully Reported Cropland", "Farms with Incomplete Determined Acres", "Farms with Native Sod Conversion Acreage", "Farms with No FSA-578 in CARS", "Farms with No FSA-578 in CARS By Producer", "Farms with No NAP Unit", "Farms with Not Applicable Acres", "Farms with Prevented Planted Acres", "Farms with Reported Acres on Noncropland", "Farms with Subsequent Acreage", "Farms with Terminated Continuous Certification", "Farms with Uncertified Crops", and "Farms with Uncertified CRP". At the bottom center is a "Generate Report" button.

--Note: See paragraph 340 for map printing.--

277 Printing FSA-578 (Continued)

C Accessing FSA-578 Print Routine

Users have the capability to print FSA-578 after reported crop data has been saved. FSA-578 will print in landscape mode only.

Access the FSA-578 print routine from CARS as follows.

Step	Action	Result
1	On any screen, the user shall CLICK “ Reports ” under “CARS Menu” on the left side of the screen.	The Reports Screen will be displayed.
2	<p>The user has the option of printing by selecting the radio button beside 1 of the following:</p> <ul style="list-style-type: none"> • FSA-578 <p>Note: Includes both the Farm and Tract Detail Listing and Farm Summary.</p> <ul style="list-style-type: none"> • FSA-578C <p>Note: A farm number must be entered for FSA-578 and FSA-578C.</p> <ul style="list-style-type: none"> • Map • FSA-578 Summary <p>Note: A farm number must be entered for the FSA-578, FSA-578 Summary, and Map options.</p> <ul style="list-style-type: none"> • FSA-578 (Producer Print) • Continuous Certification Termination Letter. <p>Notes: A farm number must be entered for the Continuous Certification Termination Letter.</p> <p>See subparagraph 277 G for additional information on the Continuous Certification Termination Letter.</p>	The respective report will be generated.

*--D FSA-578 Farm Summary

Based on the user eAuth ID, the County Office employee’s initials will be automatically displayed on the “Original” or “Revision” line of the FSA-578 Report of Commodities Farm Summary, as applicable. The first time FSA-578 is printed for the farm will be considered the original. Anytime FSA-578 is printed after the first time will be considered a revision.--*

277 Printing FSA-578 (Continued)

***--E FSA-578 Farm and Tract Detail Listing**

Based on the user eAuth ID, the County Office employee’s initials will be automatically displayed on the “Original” or “Revision” line of the Report of Commodities Farm and Tract Detail Listing, as applicable. The first time FSA-578 is printed for the farm will be considered the original. Anytime FSA-578 is printed after the first time will be considered a revision.

The following messages will be printed on the FSA-578 Report of Commodity Farm and Tract Detail Listing to assist County Offices to determine whether cropland for the tract has been reported.--*

IF the farm has...	AND all cropland...	THEN the following message will be printed...
1 tract	for the tract has not been reported	<p>“All cropland has not been reported.”</p> <p>Note: Only acres reported on cropland with a crop status of (I)initial or (X)experimental and supplemental status of planted, failed, prevented, or volunteer will be considered.</p>
more than 1 tract	on all active tracts has not been reported	<p>“All cropland on all active tracts has not been reported.”</p> <p>Note: Only acres reported on cropland with a crop status of (I)initial and (X)experimental and supplemental status of planted, failed, prevented, or volunteer will be considered.</p>

F Conditions Resulting in Acreage Differences

The reported acreage and cropland acreage may not equal because of additional acreages of:

- double cropping
- subsequent crops
- repeat crops
- multiple crops reported on the same field
- crop reported on noncropland, such as grass, orchards, native pecans, etc.
- crop reported on noncropland that has been converted to cropland.

277 Printing FSA-578 (Continued)

G Printing Continuous Certification Termination Letter

Users will generate/print the Continuous Certification Termination Letter as needed. The Continuous Certification Termination Letter will include the following information:

- Farm
- Crop
- Crop Type
- Intended Use
- Continuous Certification Status
- Reason for the Termination.

278-338 (Reserved)

Section 5 Status Reports, Maps, and Supporting ACRSI**339 Status Reports****A Overview**

The following reports are available to provide a status of FSA-578 data recorded in CARS. County Offices shall use these reports as a management tool to assess the information collected on FSA-578 and assist with settling data discrepancies with producers:

- Crop with End Date (by Farm)
- Farms with ACRE Contract and Unreported Cropland (available for 2014 and prior years)
- Farms with Active Continuous Certification (available beginning with 2016)
- Farms with ARC/PLC Contract, Unreported Cropland (available beginning with 2014)
- Farms with Cropland Override
- Farms with CRP (available beginning with 2015)
- Farms with DCP Contract and Unreported Cropland (available for 2013 and prior years)
- Farms with Deleted Producers with Active Shares
- Farms with Terminated Continuous Certification (available beginning with 2016)
- Farms with End Date
- Farms with Failed Acreage (available beginning with 2015)
- Farms with FAV Crops (available beginning with 2015)
- Farms with Fully Reported Cropland
- Farms with Incomplete Determined Acres
- Farms with Native Sod Conversion Acreage (available beginning with 2015)
- Farms with Not Applicable Acres (available beginning with 2015)
- Farms with No FSA-578 in CARS
- Farms with No NAP Unit

339 Status Reports (Continued)

A Overview (Continued)

- Farms with Prevented Planted Acres (available beginning with 2015)
- Farms with Reported Acres on Noncropland
- Farms with Subsequent Acreage (available beginning with 2015)
- Farms with Terminated Continuous Certification (available beginning with 2016)
- Farms with Uncertified Crops
- Farms with Uncertified CRP (available beginning with 2015)
- Farms with a FSA-578 in CARS and Unreported Cropland
- Farms with Deleted Field Due to Deleted Field Number in Farm Records
- Farms with No FSA-578 in CARS by Producer.

Note: See paragraph 831 for information on accessing the web-based FSA-468 reports.

339 Status Reports (Continued)

B Status Report Descriptions

The following table provides the report and the description of the results that will be obtained when the report is run.

Report	Description
Crops with End Date	Provides a report of all crops with end dates for the farm number entered.
Farms with ACRE Contract and Unreported Cropland	Provides a list of farms with an active ACRE contract and unreported cropland. Note: Available for 2014 and prior years only.
Farms with ARC/PLC Contract and Unreported Cropland	Provides a list of farms with an active ARC/PLC contract and unreported cropland. Note: Available beginning with 2014 crop year.
Farms with Active Continuous Certification	Provides a list of farms with crops enrolled for continuous certification. The report will include the following: <ul style="list-style-type: none"> • farm • producer name • core customer id • crop • crop type • intended use • election date.
Farms with Cropland Override	Provides a list of farms with the cropland comparison flag set by the cropland override.
Farms with CRP	Provides a list of farms with CRP. The report will include the following: <ul style="list-style-type: none"> • operator • core customer id • farm number • tract number • acreage quantity • variety/type • irrigation practice • end date (when available).

339 Status Reports (Continued)

B Status Report Descriptions (Continued)

Report	Description
Farms with DCP Contract and Unreported Cropland	<p>Provides a list of farms with an active DCP contract and unreported cropland.</p> <p>Note: Available for 2014 and prior years only.</p>
Farms with Deleted Producers with Active Share	<p>Provides a list of farms when the producer is no longer associated with the farm in Farm Records, but an active share record for the producer exists in CARS. This could be the result of a:</p> <ul style="list-style-type: none"> • SCIMS merge • farm/tract reconstitution • producer being deleted from Farm Records. <p>County Office shall review other systems and adjust shares accordingly (such as SCIMS merge), or contact producers to ensure that shares are updated correctly.</p>

339 Status Reports (Continued)

B Status Report Descriptions (Continued)

Report	Description
Farms with End Date	Provides a list of farms with crops entered with an end date.
Farms with Failed Acreage	<p>Provides a list of farms with crops recorded with supplemental status “Failed”. The report will include the following:</p> <ul style="list-style-type: none"> • operator • core customer id • farm number • tract number • crop/commodity • acreage quantity • variety/type • intended use • irrigation practice • actual use (when available).
Farms with FAV Crops	<p>Provides a list of farms with FAV crops. The report will include the following:</p> <ul style="list-style-type: none"> • operator • core customer id • farm number • tract number • crop/commodity • acreage quantity • variety/type • intended use • irrigation practice • actual use (when available). <p>Note: The FAV status is determined for crops with land use “F” according to Exhibit 10.</p>

339 Status Reports (Continued)

B Status Report Descriptions (Continued)

Report	Description
Farms with Fully Reported Cropland	Provides a list of farms with all cropland reported and certified.
Farms with Incomplete Determined Acres	<p>Provides a list of farms where determined acreage is loaded for a specific crop and all acreage of that crop does not have determined acreage entered.</p> <p>County Office shall determine the remainder of the fields for the crop selected for spot check.</p>
Farm with Native Sod Conversion Acreage	<p>Provides a list of farms with “Native Sod Conversion Acreage” checkbox selected for a crop/field. The report will include the following:</p> <ul style="list-style-type: none"> • operator • core customer id • farm number • crop/commodity • acreage quantity • variety/type • intended use • irrigation practice • actual use (when available).
Farms with Not Applicable Acres	<p>Provides a list of farms with crops recorded with supplemental status “Not Applicable (N/A)”. The report will include the following:</p> <ul style="list-style-type: none"> • operator • core customer id • farm number • crop/commodity • acreage quantity • variety/type • intended use • irrigation practice • actual use (when available). <p>Note: When acreage is summarized, acreage recorded with supplemental status “Not Applicable” will be included with “Planted” acreage.</p>

339 Status Reports (Continued)

B Status Report Descriptions (Continued)

Report	Description
Farms with No FSA-578 in CARS	Provides a list of active farms in Web Farm Records with no FSA-578 in CARS.
Farms with No NAP Unit	Provides list of farms with 1 or more fields with no identified NAP unit.
Farms with Prevented Planted Acres	<p>Provides a list of farms with crops recorded with supplemental status “Prevented”. The report will include the following:</p> <ul style="list-style-type: none"> • operator • core customer id • farm number • tract number • crop/commodity • acreage quantity • variety/type • intended use • irrigation practice.
Farms with Reported Acres on Noncropland	Provides a list of farms with acres recorded on noncropland.
Farms with Subsequent Acreage	<p>Provides a list of farms with crops recorded with crop status “J”, “K”, “L”, “M”, and/or “P”. The report will include the following:</p> <ul style="list-style-type: none"> • operator • core customer id • farm number • tract number • crop/commodity • acreage quantity • variety/type • intended use • irrigation practice • actual use (when available).

339 Status Reports (Continued)

B Status Report Descriptions (Continued)

Report	Description
Farms with Terminated Continuous Certification	<p>Provides a list of farms with crops automatically terminated for continuous certification. The report will include the following:</p> <ul style="list-style-type: none"> • farm • producer name • core customer id • crop • crop type • intended use • reason for termination • termination date • termination letter (yes/no), as applicable.
Farms with Uncertified Crops	<p>Provides a list of farms that does not have the certification date entered for all crops.</p> <p>County Office shall contact producers on the report to inform them that a full acreage report is required to remain eligible for program benefits or certify crop, if already reported and/or certified by the producer and loaded in the automated system.</p>
Farms with Uncertified CRP	<p>Provides a list of farms with uncertified CRP. The report will include the following:</p> <ul style="list-style-type: none"> • operator • core customer id • farm number • tract number • acreage quantity • variety/type • irrigation practice • end date (when available).
Farms with FSA-578 in CARS and Unreported Cropland	<p>Provides a list of farms when the total cropland acres entered in CARS is less than the total cropland acres for the farm in Web Farm Records.</p> <p>County Office shall contact producers on the report to inform them that a full acreage report is required to remain eligible for program benefits, as applicable.</p>

339 Status Reports (Continued)

B Status Report Descriptions (Continued)

Report	Description
Farms with Deleted Field Due to Deleted Field Number in Farm Records	Provides a list of fields automatically deleted from CARS due to that field number being deleted from farm records. This report will include the following: <ul style="list-style-type: none"> • producer name • core customer id • farm number • tract number • field number • crop name • crop type • intended use • actual use • irrigation practice • reported acres. <p>Notes: This report is available beginning with 2017.</p> <p>Field level FSA-578 records that are dropped during rollover from the next CARS program year due to invalid field number will not show on the CARS status report “Farms with Deleted Field Due to Deleted Field Number in Farm Records”.</p>
Farms with no FSA-578 in CARS by Producer	Provides a list of farms in Web Farm Records with no FSA-578 in CARS for the selected producer.

C Action

CLICK “**Reports**” under “CARS Menu” on the left navigation.
 Select the button next to the status report to be printed.
 CLICK the button next to “**PDF**” or “**Excel**”.
 CLICK “**Generate Report**”.

***--340 Accessing Farm Map Print Options**

A Overview

Beginning in 2019, users will be able to access farm map printing options from the following CARS screens:

- Reports
- Acreage Report Search.

Maps are available to print for ad hoc purposes particularly in incidences when CITRIX is unavailable, or no other up-to-date hard copy maps exist.

Note: Regardless of the program year selected, because of software limitations, only the current year imagery and CLU for that specific year will be displayed.

B Accessing the Map Print Option From the Reports Screen

The following is an example of the Reports Screen.

Reports		
Year: 2018	State:	County:
FSA-578		
<input type="radio"/> FSA-578 <input type="radio"/> FSA-578C <input checked="" type="radio"/> Map <input type="radio"/> FSA-578 Summary Farm Number <input style="width: 100px;" type="text"/> <input type="radio"/> FSA - 578 (Producer Print)		

C Action for Printing a Map From the Reports Screen

To print a map for the farm from the Reports Screen:

- CLICK the “**Map**” radio button
- enter a farm number
- CLICK the “**Generate Report**” radio button
- CLICK “**File-Print**” at the top of the browser window.--*

*--340 Accessing Farm Map Print Options (Continued)

D Accessing the Map Print Option From the Acreage Report Search Screen

Users will be able to print a map for a specific farm by entering a farm number or searching a list of farms by producer from the Acreage Report Search Screen.

The following is an example of the Acreage Report Search Screen.

E Action for Printing a Map From the Reports Screen

To print a map using producer search:

- CLICK the “**Producer**” radio button
- CLICK “**Submit**”
- select the producer from the SCIMS Customer Search Screen

Note: The Crop Acreage Reports Screen will be displayed to provide a list of farms for the selected producer.

- click the radio button next to the farm number for the map to be printed
- CLICK “**Print Map**”
- CLICK “**File-Print**” at the top of the browser window.

To print a map using farm search:

- enter the farm number for the map to be printed
- CLICK “**Print Map**”
- CLICK “**File-Print**” at the top of the browser window.

Notes: See subparagraph F for information on printed map display.

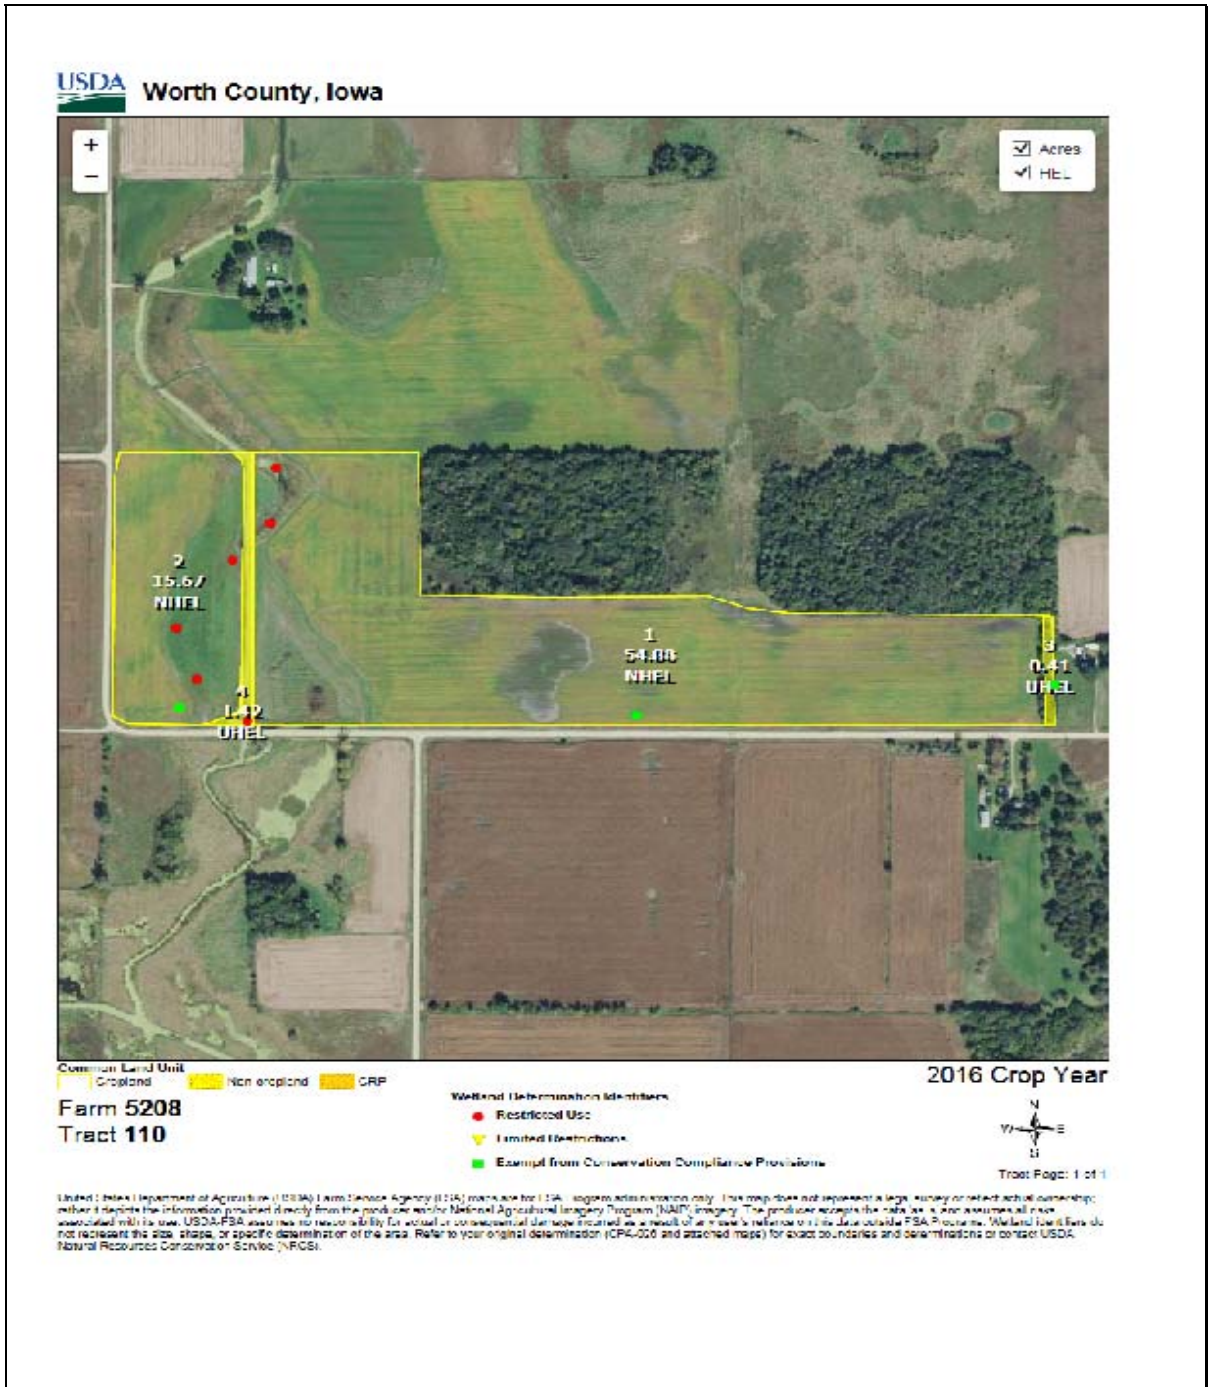

See paragraph 103 for farm selection on the Acreage Reporting Search Screen for acreage reporting.

See paragraph 104 for additional information and available options on the Crop Acreage Reports Screen.--*

--340 Accessing Farm Map Print Options (Continued)--

F Map Display

A map at the tract level will be displayed. If there are multiple tracts on the farm, users can use the scrollbar to scroll down and view each map. Maps are created in a portrait format.

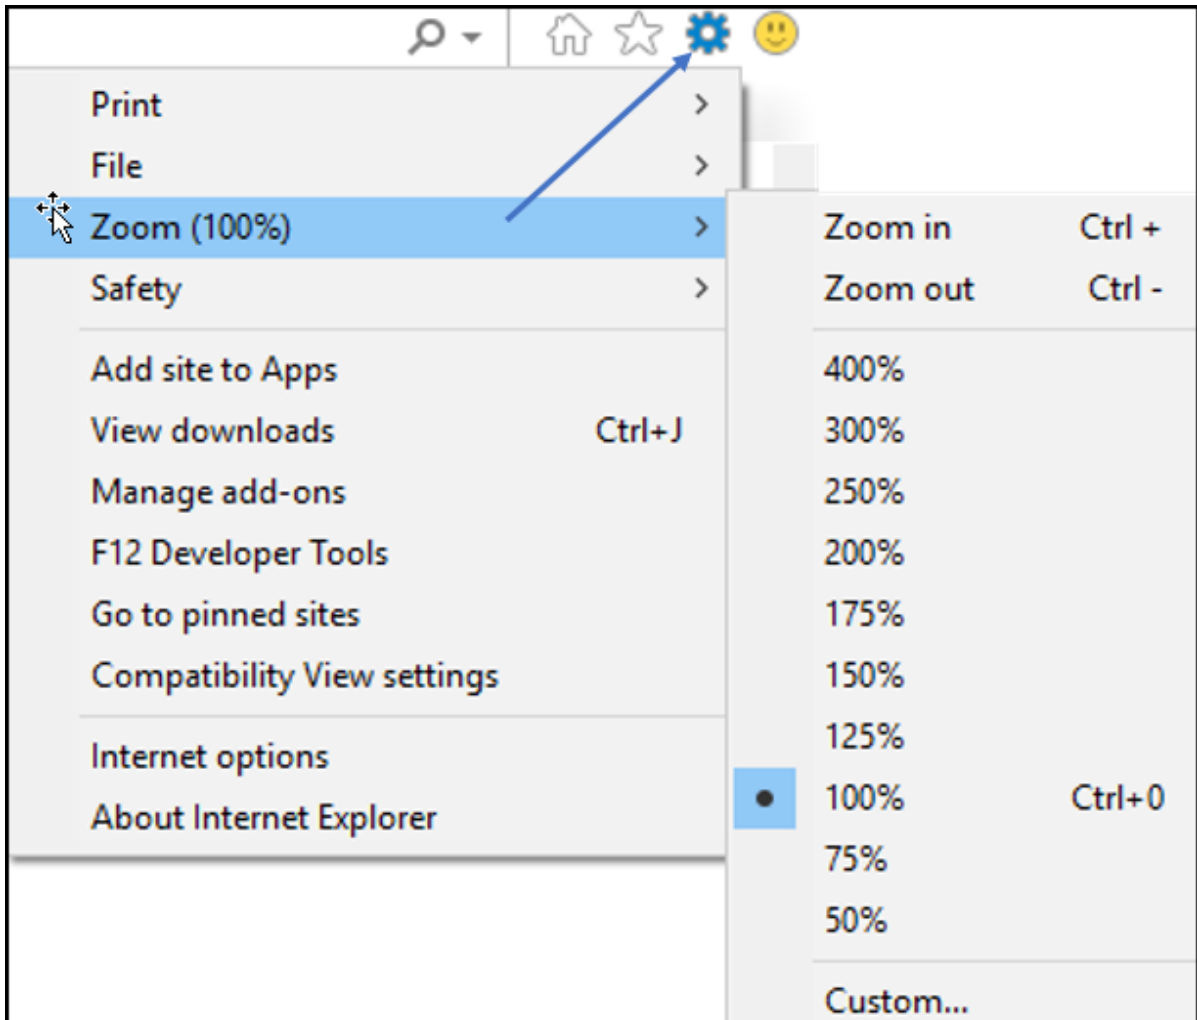

***--340 Accessing Farm Map Print Options (Continued)**

G Map Navigation Tools

To receive a closer look into a tract, use the Zoom In (+) and Zoom Out (-) buttons located in the upper left corner of the map.

By clicking on the “Tools” icon (cylinder-like feature) in the upper right corner of the window, users also have the option to select various map scales at a variety of increments in which to view the map as well.

Users also have the ability to use their cursor to move around (or pan) within the map as well.

Within the tract, users can select/deselect the non-cropland, Acres, and HEL Determination checkboxes to display on the map.

Users are not able to change the location of the labels. The items “Non-Cropland, Acres, and HEL Determination” can be checked to display or not display on the map.--*

--340 Accessing Farm Map Print Options (Continued)--

H Using Print Preview to Select/Print a Tract Map

For farms that have multiple tracts, the user has the option to select which tract to print through the Print Preview Screen on the File menu.

Users have the option to print a specific tract on a Farm or print all of the tracts within a Farm as displayed.

To print the map, users can specify the printer of their choice, select the number of copies, and CLICK "Print".

341 Supporting ACRSI in CARS

A Overview

To support ACRSI, CARS has added the following:

- RMA Cropping Practice Data Element
- RMA Crop Reconciliation Screen.

Note: See Part 4 for additional information for ACRSI and collecting RMA data.

The RMA Cropping Practice is available on the CARS Report of Acreage Screen.

To support the RMA and FSA crop crosswalk, the RMA Crop Reconciliation Screen will be displayed in CARS when an FSA crop/commodity, variety/type, and/or intended use does not automatically crosswalk to RMA.

When an acreage report is taken by an AIP and is automatically cross walked successfully, the RMA crop/commodity, variety/type and intended use will be displayed on the CARS Report of Acreage Screen directly below the FSA Crop/Commodity, Variety/Type and Intended Use option.

341 Supporting ACRSI in CARS (Continued)

B Example of the Report of Acreage Screen with RMA Cropping Practice

The following is an example of the RMA Cropping Practice that will be displayed on the Report of Acreage Screen.

The screenshot displays the 'Report of Acreage' form. At the top, it shows the year (2017), state, and county. Below this are sections for 'Farm Information' (Farm Number: 233, Operator Name: Producer A, Total Rpt Cropland: 2.00 of 5.78) and 'Tract Information' (Tract Number: 3458, Tract Owner(s): Producer B, Tract Rpt Cropland: 2.00 of 5.78). The main section is titled 'Please enter the crop information.' and includes several required fields marked with an asterisk: Field Number, Planting Parcel, Cropland Status (Y), Crop Status (None), Supplemental Status (None), Concurrent Planting (None), Reporting Unit (Acres), Land Use (None), Planting Period (None), and Field ID. A red arrow points to the 'Planting Period' dropdown. At the bottom, the 'RMA Cropping Practice' dropdown is highlighted with a red box and currently shows 'No Cropping Practice'.

C Action

Select the applicable RMA Cropping Practice from the drop-down menu according to Part 4.

341 Supporting ACRSI in CARS (Continued)

D Example of the RMA Crop Reconciliation Screen

The following is an example of the RMA Crop Reconciliation Screen.

E Action

User shall use the drop-down menus to select the applicable:

- RMA Variety/Type
- RMA Intended Use.

CLICK:

- “**Submit**”, and the message “The crop acreage report has been successfully saved” will be displayed on the Report of Acreage Screen
- “**Cancel**”, and the Report of Acreage Screen will be displayed.

342-392 (Reserved)

Part 4 ACRSI

Section 1 Responsibilities, Guidelines, and Reporting Requirements

393 Overview

A Background

This part provides procedure for ACRSI data sharing of acreage reporting information collected via the CARS application and reconciling acreage reporting data collected by participating AIP's and representing agents. This is in support of the 2014 Farm Bill, Section 1614(b)(1).

The vision of the USDA ACRSI is to have a common USDA framework for producer commodity reporting in support of USDA programs. This common framework will enable producers to report common data once. This capability will reduce producer burden by eliminating the need for producers to report the same information multiple times and support efficient data sharing within USDA for more accurate data collection.

B Data Sharing Services

Multiple data sharing services have been created to allow core common data to be shared with FSA and participating AIP's by RMA. Regardless of the reporting channel, data flows to and is housed in the RMA Clearing House and made available to FSA and AIP's in near real time.

FSA has created the following services.

- The CARS Event and Transformation Service, which transforms CARS data into valid transmission files and submits to the RMA Intake Service.
- The ACRSI Pilot Services, which pulls data from the ACRSI Clearing House, runs CARS validations and adds the data to a CARS ACRSI Work List for manual processing.

RMA has created the following services.

- The RMA Intake Service, which processes the transmission files by validating the proper file format is used, the State and County code combination is valid, and a farm number is included in the file. If Intake Service validations fail, the entire transmission file is rejected.
- The ACRSI Common Validation Service, which validates data contained in the transmission files passes core common data element requirements and associated business rules, including ensuring all mandatory data elements are contained in the file.
- The ACRSI Clearing House, which stores validated core common data from acreage reports created by both channels.

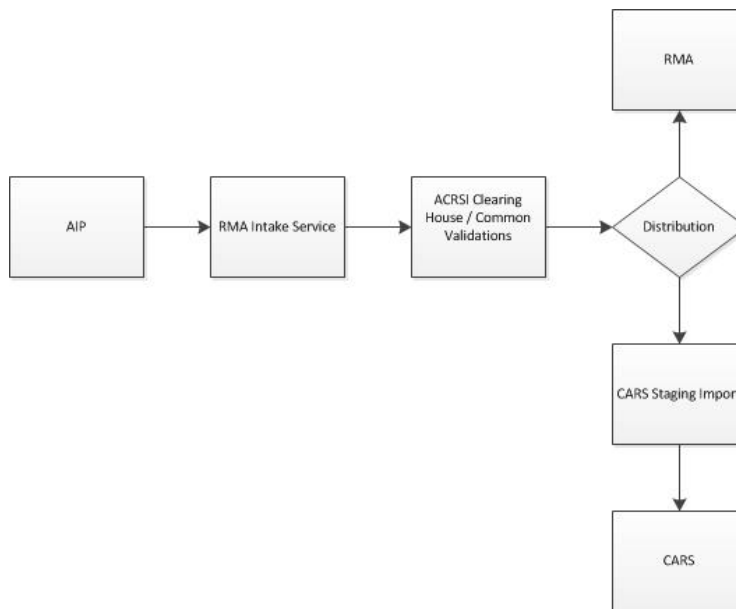

393 Overview (Continued)

C ACRSI Process Data Flow

The following is a process flow diagram of the data flow for the FSA Reporting Channel.

The following is a process flow diagram of the data flow for the AIP Reporting Channel.

D County Office Responsibilities

ACRSI data sharing will be implemented nationwide for 2016 crop acreage reports filed on or about May 6, 2016. County Offices shall inform producers that ACRSI approved crop information will be shared between:

- crop insurance agent representing a participating AIP (such as crop insurance company)
- FSA at a local Service Center.

Once a crop acreage report is filed through the selected channel, the ACRSI data is shared electronically between agencies in real time or near real time via the ACRSI Clearing House.

393 Overview (Continued)**D County Office Responsibilities (Continued)**

In addition, County Offices shall advise producers, **before** FSA-578 is filed, that:

- data sharing of acreage reporting information with participating AIP's happens automatically
- AIP's can only access data when a crop insurance policy is in force for the producer
- only ACRSI approved crops and associated core common data elements will be shared
- *--the requirement to report all cropland for specific programs according to paragraph 22 must be met
- a hard copy map notated with the mandatory data elements is required according to paragraph 20 regardless of the channel selected
- ACRSI approved crops must be reported by the final reporting dates in Exhibit 6, as--* applicable
- producers must still visit FSA and insurance agents to sign documents.

Note: Follow instructions in paragraph 27 for processing a late-filed FSA-578.

394 ACRSI Approved Crops**A Overview**

ACRSI is data sharing information for the following crops as part of the application:

- Alfalfa
- Barley
- Canola
- Corn
- Cotton
- CRP
- Fallow
- Grasses
- Oats
- Peanuts
- Rapeseed
- Rice
- Rye
- Sorghum
- Soybeans
- Sunflowers
- Wheat.

Note: Corn includes popcorn and sweet corn, Wheat includes Khorasan, and Sorghum includes Grain and Forage.

B ACRSI Approved Crop Restrictions

The following restrictions apply to crops included in ACRSI transmission files:

- Reporting unit of “acres”
- Planting period of “01”
- Planting pattern of “solid”
- Crop Status of “Initial”
- Supplemental Crop Status - Planted, Prevented, or Failed
- No dual use crops or “GS” intended use.

Crops that do not meet the restrictions in this subparagraph will still be reported in CARS as normal, but will not be transmitted to the ACRSI Clearing House.

395 RMA and FSA Crop Crosswalks

A Overview

FSA and RMA currently use separate crop tables for maintaining crops and associated attributes. FSA uses the Compliance Validation System (CVS) and RMA uses the Actuarial Data Master (ADM). As part of ACRSI implementation, a joint crop table (Commodity Validation Table (CVT), was created.

For each of the approved ACRSI crops, RMA and FSA completed a crosswalk to ensure crop acreage reports taken by 1 agency can properly translate for the other agency. Most ACRSI approved crops will automatically crosswalk between agencies without user intervention.

When an acreage report is taken by an AIP and is automatically cross walked successfully, the RMA Crop/Commodity, Variety/Type, and Intended Use will appear on the CARS Report of Acreage load screen immediately below the FSA Crop/Commodity, Variety/Type and Intended Use.

When a FSA Crop/Commodity, Variety/Type, and/or Intended Use does not automatically crosswalk to RMA, the RMA Crop Reconciliation Screen will be displayed.

B RMA Crop Reconciliation Screen

The following is an example of the RMA Crop Reconciliation Screen.

C County Office Action

Based on the producer’s certification, the County Office user should select the correct RMA Variety/Type and/or RMA Intended Use from the applicable drop-down menu. The drop-down menu will only display options applicable to the crop being reported.

396 ACRSI Common Data Elements**A Overview**

In addition to the crop year, the following core common data elements for approved ACRSI crops reported will be electronically shared:

- FSA Core Customer ID
- Tax ID
- Tax ID Type
- Business Name
- Last Name
- First Name
- Middle Name
- Name Suffix
- Administrative State
- Administrative County
- Farm Number
- Tract Number
- CLU (Field) Number
- Subfield (Alpha Character) Number
- State (American National Standards Institute) ANSI Code
- County ANSI Code
- Product (Crop) Code
- Product (Crop) Type
- Product (Crop) Intended Use
- Planted Date
- Irrigation Practice Code
- Organic Practice Code
- Planting Pattern Code
- RMA Cropping Practice Code
- Reported Acreage
- Producer Share Percentage.

396 ACRSI Common Data Elements (Continued)**B ACRSI Data Sharing Assumptions**

In addition to the crop and data element validations and business rules, the following restrictions will apply to shared data:

- one or more of the shareholders reported must have a valid SSN or employee ID number
- for FSA purposes, one or more of the :
 - shareholders must have a valid Core Customer ID
 - producers in the transmission file must be an operator, owner, or other tenant on an active 2016 farm
- insurance must be in force for AIP to access shared data.

Note: The CARS Event and Transformation Service will filter out reported acreage data that does not comply with all crop and data elements validations, business rules, and restrictions before transmitting the data.

C Data Transmission Files

The CARS core common data elements for certified fields/subfields on farms are automatically packaged approximately every 15 minutes into a single transmission file. Multiple farms can be included in a single transmission file. In addition, a single AIP transmission file can contain multiple farms.

Core common data element validations, including business rules validations, are run at the farm level; therefore, partial transmission files may be transmitted to the ACRSI Clearing House. Farms that pass the common validations will be transmitted to the Clearing House. Farms that fail the common validations will be rejected and not transmitted to the Clearing

--House. See paragraph 516 for information about the FSA ACRSI Inquiry Service which-- provides status information for transmission files.

397 ACRSI CARS Updates for RMA

A Overview

As part of the ACRSI Implementation, RMA and FSA agreed on crops and core common data elements that would be included in the ACRSI data sharing acreage reports. Due to Agency differences in data collection for acreage reports, each Agency agreed to collect additional information, as necessary, for the ACRSI approved crops.

B CARS Screens Updated for RMA

To meet ACRSI needs, CARS was updated to include the “RMA Cropping Practice” on the CARS Report of Acreage load screen. See Part 3 for CARS Report of Acreage load screens. The RMA Cropping Practice is applicable to the crop for the specific field or subfield being reported. RMA Cropping Practices are specifically defined by each crop policy including applicable special provisions.

In addition, CARS has been updated to include the “RMA Crop Reconciliation” Screen. See paragraph 162 for details about the RMA Crop Reconciliation Screen. This screen allows users to update the ACRSI approved crop with the applicable RMA Variety/Type and/or RMA Intended Use, when necessary.

C County Office Action

The following RMA Cropping Practices are available for selection based on the crop being reported.

RMA Cropping Practice	Definition	Applicable Crops
Continuous Cropping	This distinguishes land that is continuously cropped from land that lies fallow (idle) in the prior crop year. Any non-irrigated production practice that does not qualify as a summer fallow practice.	<ul style="list-style-type: none"> • Barley • Oats • Wheat.
Fall-Planted	A production practice applicable to acreage that is seeded during the fall.	<ul style="list-style-type: none"> • Sweet Corn • Peanuts.
Following Another Crop	Definitions vary by area, consult crop policy.	<ul style="list-style-type: none"> • Upland Cotton • Grain Sorghum • Soybeans • Peanuts.
No Cropping Practice Specified	No production practice is specified.	All Approved ACRSI crops.

397 ACRSI CARS Updates for RMA (Continued)

C County Office Action (Continued)

RMA Cropping Practice	Definition	Applicable Crops
Non-Conventional	Planted in a 2 step operation in which the seed is first broadcast by any method onto the surface of a seedbed which has been properly prepared for the planting method and production practice and is subsequently incorporated into the soil at the proper depth in a timely manner. Does not follow a standard planting practice for the crop.	Soybeans.
Not Following Another Crop	Definitions vary by area, consult crop policy.	<ul style="list-style-type: none"> • Upland Cotton • Grain Sorghum • Soybeans.
--Skip Row (Exhibit 25)--	<p>A planting pattern that:</p> <p>(1) consists of alternating rows of cotton and fallow land or land planted to another crop the previous fall; and</p> <p>(2) qualifies as a skip-row planting pattern as defined by FSA or a successor agency.</p>	<ul style="list-style-type: none"> • Upland Cotton • Extra Long Staple Cotton.
Spring-Planted	A production practice applicable to acreage that is seeded during the spring.	<ul style="list-style-type: none"> • Sweet Corn • Peanuts.

397 ACRSI CARS Updates for RMA (Continued)

C County Office Action (Continued)

RMA Cropping Practice	Definition	Applicable Crops
Sprinkler Irrigated	A method of crop irrigation in which the equipment applies water through nozzles operated under pressure to form a spray pattern to cover the acreage whereby the planted acreage is intentionally sprayed with water in non-ponding applications throughout the growing season.	Rice.
Summer fallow	Definitions vary by area, consult crop policy.	<ul style="list-style-type: none"> • Oats • Wheat.
Water Fallow	Production practice applicable to acreage that is flooded before seeding for the same crop year in which the crop is insurable, with no intent of using an irrigated practice as defined in the Basic Provisions.	<ul style="list-style-type: none"> • Oats • Wheat.
Winter Planted	A production practice applicable to acreage that is seeded during the winter.	Sweet Corn.

Note: The drop down will not be limited to those options available for the selected crop. All RMA Cropping Practices will be displayed, regardless of the crop being reported. County Office users should ensure a proper option is selected for the crop being reported.

When selecting the RMA Cropping Practice, County Office users shall inform producer and/or policyholders that:

- if unsure which RMA Cropping Practice applies to the crop and field and/or subfield being reported, then the crop insurance agent should be consulted
- leaving the default value of “No Cropping Practice Specified” has no negative effect for current farm programs
- the correct cropping practice must be validated on their crop insurance acreage report before certifying.

398-458 (Reserved)

Section 2 Processing ACRSI Work List

459 CARS ACRSI Work List

A Overview

The CARS ACRSI Work List stores individual farm core common acreage reporting data filed through an AIP. County Office users must take action to resolve data validation issues before accessing the CARS acreage report for the farm.

Exact duplicate AIP data is removed by the automated system. In addition, the automated system will remove any AIP data that has corresponding certified data in the CARS database. The system will compare the state, county, farm, tract, and field number contained in the AIP transmission file to CARS data and if the state, county, farm, tract, and field have an existing certified line item in CARS, the AIP data will not be placed on the ACRSI Work List for processing.

This part provides procedure for accessing the CARS ACRSI Work List, locating the farm/tract/field status message(s), and instructions for correcting or deleting shared data before importing to CARS.

B CARS ACRSI Work List

The following is an example for accessing the ACRSI Work List from the Acreage Report Search Screen.

Acreage Report Search

Year: 2016 **State:** **County:**

Please enter a farm number or search for a producer in SCIMS

Producer

Farm Number

ACRSI Work List

CARS102 - Last Modified: 02/17/2016 12:52:42 PM

Note: If the farm selected on the Acreage Report Search Screen has data on the ACRSI Work List, this message will appear; “The selected farm has ACRSI data that must be imported prior to proceeding. Select “ACRSI Work List” and import the data into CARS”.

459 CARS ACRSI Work List (Continued)

B CARS ACRSI Work List (Continued)

This is an example of the Acreage Report Search Screen with the message; “The selected farm has ACRSI data that must be imported prior to proceeding. Select “ACRSI Work List” and import the data into CARS”.

The screenshot shows the 'Acreage Report Search' interface. At the top, there is a blue header with the title. Below the header, the 'Year' is set to 2016, and 'State' and 'County' are represented by greyed-out dropdown menus. A red-bordered warning box contains a yellow triangle icon and the text: 'The selected farm has ACRSI data that must be imported before proceeding. Please select "ACRSI Work List" and import the data into CARS.' Below the warning, the instruction 'Please enter a farm number or search for a producer in SCIMS' is displayed. There are three radio button options: 'Producer', 'Farm Number' (with a text input field containing '2132'), and 'ACRSI Work List'. At the bottom of the options are 'Submit' and 'Cancel' buttons. The footer text reads 'CARS102 - Last Modified: 02/17/2016 12:52:42 PM'.

C County Office Action

Select the button next to “ACRSI Worklist” and CLICK “Submit”.

This screenshot is similar to the previous one, showing the 'Acreage Report Search' interface. The 'Year' is 2016, and 'State' and 'County' are greyed-out. The instruction 'Please enter a farm number or search for a producer in SCIMS' is present. In this view, the 'ACRSI Work List' radio button is selected. The 'Farm Number' text input field is empty. The 'Submit' and 'Cancel' buttons are visible at the bottom. The footer text reads 'CARS102 - Last Modified: 02/17/2016 12:52:42 PM'.

460 Reviewing CARS ACRSI Work List

A Overview

The ACRSI Work List contains the list of farms with acreage reporting data submitted through the AIP. ACRSI Work List farms must be imported to CARS or deleted before the acreage report for the farm can be edited or certified.

B ACRSI Work List Screen

The following is an example of the ACRSI Work List Screen. The ACRSI Work List Screen will be displayed with the following information:

- Farm Number
- Import Status
- Submission ID (Transmission ID)
- Submission Date.

The screenshot shows the 'ACRSI Work List' interface. At the top, there is a blue header with the title 'ACRSI Work List'. Below the header, there are filter fields: 'Year: 2016', 'State: [dropdown]', and 'County: [dropdown]'. A table with a blue header contains the following data:

Farm	Import Status	Submission ID	Submission Date
738	Not Processed	11118	03/14/2016

Below the table, there are three buttons: 'Import Data', 'Delete', and 'Back'. A blue link 'Back to Top^' is located at the bottom right of the main content area. At the very bottom, the text 'CARS132 - Last Modified: 11/16/2015 08:20:05 AM' is displayed.

460 Reviewing CARS ACRSI Work List (Continued)

C County Office Action

To select a farm to review, CLICK the button in front of the desired farm. The County Office user has the following options once the desired farm is selected:

- Review ACRSI Fields
- Delete
- Back.

Users should CLICK “Review ACRSI Fields” to access the ACRSI Staging Data for the selected farm. The ACRSI Staging Data includes tract, field and crop information, in addition to the status message.

Clicking “Delete” will delete the acreage reporting data received by the AIP channel for the selected farm without accessing the ACRSI Staging Data or Importing to CARS. Users should only select “Delete” when a fully certified FSA-578 already exists for the selected farm.

Note: If no farm is selected prior to clicking either “Review ACRSI Fields” or “Delete” the system will notify the user that a farm must be selected.

ACRSI Work List

Year: 2017 **State:** **County:**

• **Please select a farm number.**

Farm	Import Status	Submission ID	Submission Date
<input checked="" type="checkbox"/> 5838	Not Processed	<input type="text"/>	09/30/2016
<input type="checkbox"/> 6900	Not Processed	<input type="text"/>	09/28/2016
<input type="checkbox"/> 7195	Not Processed	<input type="text"/>	10/03/2016
<input type="checkbox"/> 7514	Not Processed	<input type="text"/>	09/30/2016
<input type="checkbox"/> 7611	Not Processed	<input type="text"/>	10/03/2016

CARS132 - Last Modified: 11/16/2015 08:20:05 AM

461 Reviewing ACRSI Staging Data

A Overview

The ACRSI Staging Data Screen provides an overview of each field that passed the Clearing House validations and may have failed 1 or more CARS validations, along with the error message(s) associated with the failed validation(s).

B ACRSI Staging Data Screen

The following is an example of the ACRSI Staging Data Screen. The ACRSI Staging Data Screen will contain the following information:

- Submission ID
- Tract Number
- Field Number
- Crop/Commodity
- Variety/Type
- Intended Use
- Irrigation Practice
- Reported Quantity
- Crop Status
- Error Message.

The screenshot shows the 'ACRSI Staging Data' interface. At the top, it displays 'Year: 2016', 'State: [dropdown]', and 'County: [dropdown]'. Below this is a 'Farm Information' section with 'Farm Number: 3474' and 'Operator Name: [dropdown]', and 'Total Rpt Cropland: 0.44 of 368.98'. The main part of the screen is a table with the following columns: Tract Num, Field Number, Crop/Comm, Var/Type, Int Use, Irr Prc, Rpt Qty, Crop Status, and Error. One row is visible with a radio button in the first column, and an error message: 'Share value threshold must be 100% : 50.0, ACRSI Duplicate'. At the bottom, there are buttons for 'Edit', 'Delete', and 'Return To Work List', along with a 'Back to Top' link and a footer 'CARS133 - Last Modified: 01/21/2016 08:20:05 AM'.

Tract Num	Field Number	Crop/Comm	Var/Type	Int Use	Irr Prc	Rpt Qty	Crop Status	Error
<input type="radio"/> 1241	1	CORN	BLU	GR	I	128.20	I	Share value threshold must be 100% : 50.0, ACRSI Duplicate

C County Office Action

To review the details for a specific field, CLICK the radio button by the applicable tract and CLICK Edit. The user will be taken to the standard CARS Report of Acreage load screen. All data submitted via the AIP channel will be automatically loaded for the selected field and the crop information will be available for editing.

County Office users should review any FSA-578's on file for the applicable farm to assist with determining if the reported information should be imported or deleted. Review all reported information with the applicable producer prior to making the decision to delete information submitted via an AIP channel.

462 ACRSI Work List Error Messages

A Overview

The ACRSI Staging Data Screen provides an overview of each field/subfield included in the transmission file for the farm selected and associated errors, if applicable.

If the message “No errors detected” is displayed, the data has passed the basic CARS validations. All other messages would indicate that data failed one or more of the basic CARS validations. County Offices should review the data submitted by the AIP’s with the producer before importing to CARS.

B Examples of “No Errors Detected”

Data may pass the basic CARS validations and still require processing before importing to CARS. Processing includes reviewing the data submitted or resubmitted by the AIP with the producer and updating or deleting, as necessary.

Examples of data that passes CARS validations but may need to be deleted or updated include, but are not limited to, the following.

- Crop type may be incorrect. Some AIP software does not allow the crop insurance agent to select the type of wheat when submitting a report and the type may default to an incorrect type.
- Shares may be incorrect. The crop insurance policy may be sold with an operator receiving 100 percent share, while the actual crop is shared with the operator receiving 50 percent and the owner receiving 50 percent.
- Reported acreage may exceed the CLU acreage. The producer reports using precision agriculture equipment and the calculated acreage for the field being reported exceeds the boundaries of the CLU.

462 ACRSI Work List Error Messages (Continued)**C Examples of Other Error Messages**

Examples of data that fails CARS validations and must be deleted or updated include, but are not limited, to the following:

- The difference between reported and total farmland is out of tolerance. The crop insurance agent may have reported at the insurance unit level rather than the field/subfield level, resulting in the reported acreage exceeding the farmland on the farm.
- The initial status “I” can only be reported once for field number X. The AIP may have reported subfields without including the subfield alpha-character. Crop Insurance acreage reports do not require subfields be designated.
- Field number is invalid. Field number must exist in Farm Records. The AIP may have used an old map when completing the acreage report.
- Invalid producer was assigned shares. The insured producer may not be in FSA’s records using the same name and/or identification number.
- ACRSI Comparison. The AIP may have submitted the same report multiple times with minor changes made between reports.
- CARS Comparison. The AIP may have resubmitted the acreage report initiated by FSA with minor changes.

When potential ACRSI duplicates or potential CARS duplicates exist, the user must resolve the duplicate before importing data to CARS. The user is provided a hyperlink to the Comparison Screen which allows the user to view the potential duplicate data side-by-side and select a record for deletion.

463 ACRSI Duplicate Comparison Screen

A Overview

When data is processed by the ACRSI Pilot Service it is compared to existing data in the ACRSI Work List and CARS to determine whether a report has previously been filed for the farm, tract, and field/subfield. If the data is an exact duplicate, it is deleted and not added to the staging table. If the data is not an exact duplicate, it is added to the staging table and available for process.

The ACRSI staging table error message will indicate that an ACRSI Duplicate exists when data is already present on the staging table for the farm, tract, and field/subfield submitted. The error message will indicate that a CARS Duplicate exists when uncertified data is already present in the CARS database for the farm, tract, and field/subfield submitted.

Tract Num	Field Number	Crop/Comm	Var/Type	Int Use	Irr Prc	Rpt Qty	Crop Status	Error
9759	9	SOYBN	COM	GR	N	411.70	I	Share value threshold must be 100% - 50.0, CARS Duplicate, ACRSI Duplicate

There are two possible duplicate Comparison Screens.

- ACRSI Comparison - allows the user to view AIP data submissions for the selected field/subfield side-by-side before deleting the incorrect field/subfield.
- CARS Comparison - allows the user to view AIP data submissions side-by-side with existing uncertified CARS data for the selected field/subfield before deleting the incorrect field/subfield.--*

463 ACRSI Duplicate Comparison Screen (Continued)

B Comparison Screen

The following is an example of the ACRSI Duplicate Comparison Screen.

ACRSI Duplicate		
Year: 2017	State: [REDACTED]	County: [REDACTED]
Farm Information		
Farm Number: 3551	Total Rpt Cropland: 0.00 of 39.91	
Operator Name: [REDACTED]		
Tract Information		
Tract Number: [REDACTED]	Tract Rpt Cropland: of 39.91	
Please review the below data that has been flagged as duplicate between the selected ACRSI data and other ACRSI data and select a record to delete.		
	<input checked="" type="radio"/> ACRSI Data Submission ID: 708005	<input type="radio"/> Other ACRSI Data Submission ID: 709005
Field Number	I	I

<input checked="" type="button" value="Delete"/> <input type="button" value="Review Fields"/>		

--*

463 ACRSI Duplicate Comparison Screen (Continued)**B Comparison Screen (continued)**

The system will return the user to the ACRSI Staging Data for the tract if additional fields must be processed for the tract. The system will return the user to the Worklist Screen and a message will be displayed indicating the deletion was successful if all fields have been processed.

C County Office Action

Review the details for the duplicate data and select the radio button for the incorrect data and click “Delete” to remove. The user will be returned to the ACRSI Staging Table Screen if there is additional data to be processed or errors to be resolved for the farm/tract. If there is no additional data to process or correct, the user will be returned to the ACRSI Work List Screen.

The user may return to the ACRSI Staging Table without deleting duplicate data by clicking the “Review Fields” button.

464 ACRSI Data Import Screen

A Overview

The ACRSI Data Import load screen will be completed with all validated crop data for the selected farm, tract, and field. In addition, the RMA crop/commodity, variety/type, and intended use will be displayed and the RMA Cropping Practice will be provided, when applicable.

B ACRSI Data Import Load Screen

The following is an example of the ACRSI Data Import load screen that will be displayed with valid data submitted by the AIP channel.

The screenshot displays the 'ACRSI Data Import' web interface. At the top, it shows the selected 'Year: 2016', 'State: Illinois (17)', and 'County: Christian (021)'. Below this are sections for 'Farm Information' (Farm Number, Operator Name, Total Rpt Cropland: 0.44 of 368.98) and 'Tract Information' (Tract Number, Tract Owner(s), Tract Rpt Cropland: 0.00 of 128.22). A central section prompts the user to 'Please enter the crop information' and lists various fields with asterisks indicating required data. Fields include Field Number (1), Subfield, Reported Quantity (128.20), Planting Date (11/12/2015), Official/Measured (None), End Year, Predominant Number, Crop/Commodity (CORN), Variety/Type (BLUE), Intended Use (Grain), RMA Crop/Commodity (Corn, Field), RMA Variety/Type (Flour, Blue), RMA Intended Use (Grain), Actual Use (None), Irrigation Practice (Irrigated), Organic Status (Conventional), and Planting Pattern (Solid). A 'Native Sod Conversion' checkbox is also present. To the right, a separate section contains 'Cropland Status', 'Crop Status' (Planted), 'Supplemental Status' (None), 'Concurrent Planting' (None), 'RMA Cropping Practice' (No Cropping Practice), 'Reporting Unit' (Acres), 'Land Use' (None), 'Planting Period' (01), and 'Field ID'. Below these is a 'List of Tract Producers' table with columns for Name, Role, RMA Unit, and Share %. The table shows one producer as 'Owner' with an RMA Unit of 50.00 and a Share % of 50.00. The 'Total %' is also 50.00. At the bottom, there are buttons for 'Submit', 'Review Fields', and 'Add Producers', along with a 'NAP Unit' field and an 'Override NAP Unit' checkbox. A 'Back to Top' link is located in the bottom right corner.

C County Office Action

Complete loading crop acreage information for the selected farm, tract, and field/subfield according to paragraph 162. All crop data elements denoted as required on the CARS Report of Acreage load screen must be completed before clicking submit to finalize importing the acreage data submitted by an AIP channel.

465 ACRSI Farm Bulk Delete Screen

A Overview

ACRSI acreage reports submitted by the AIP channel can be deleted instead of imported when necessary. The farm delete option is available on the ACRSI Work List Screen. County Office users should review the ACRSI Staging Data before determining to delete farm acreage reports submitted by the AIP reporting channel.

B ACRSI Work List Farm Bulk Delete Screen

The following is an example of the Bulk Delete ACRSI Farms Screen.

Bulk Delete Acrsi Farms

Year: 2016 **State:** **County:**

Farm	Import Status	Submission ID	Submission Date
<input checked="" type="checkbox"/>	2132	In Process	6064
<input checked="" type="checkbox"/>	2132	In Process	6067
<input checked="" type="checkbox"/>	2132	Not Processed	6070
<input checked="" type="checkbox"/>	2132	Not Processed	6071
<input checked="" type="checkbox"/>	2132	Not Processed	6072
<input type="checkbox"/>	2132	In Process	6075

[Back to Top^](#)

CARS141 - Last Modified: 1/21/2016 2:13:45 PM

C County Office Action

Users may select 1 or more farms from the ACRSI Farm Bulk Delete Screen. CLICK “Delete” to delete acreage reports submitted by the AIP channel for the selected farm(s).

CLICK “OK” to the popup question “Are you sure you want to delete the Acreage Report(s) from the Work List”? The user will be returned to the ACRSI Work List Screen and message “The Staging Acreage Report(s) have been successfully deleted”, will be displayed.

466 ACRSI Field Bulk Delete Screen (Continued)

C County Office Action

Users may select 1 or more fields from the ACRSI Field Bulk Delete Screen. CLICK “Delete” to delete field level crop report data submitted by the AIP channel for the selected farm.

CLICK “OK” to the popup question “Are you sure you want to delete the selected Crop(s)?” The user will be returned to the Acreage Report screen and message, “The Staging Acreage Report(s) have been successfully deleted”, will be displayed.

467-515 (Reserved)

Section 3 Using ACRSI Inquiry Service**516 ACRSI Inquiry Service****A Overview**

The ACRSI Inquiry Service is provided to National, State and County Offices, along with the ACRSI Help Desk and used to assist users in determining why acreage reporting data that was shared is not available to FSA or the applicable AIP.

This part provides procedure for accessing the FSA ACRSI Inquiry Service web application. The ACRSI Inquiry Service allows users to determine where a transmission file is in the data sharing process and provides messaging about the transmission file status.

B Accessing FSA ACRSI Inquiry

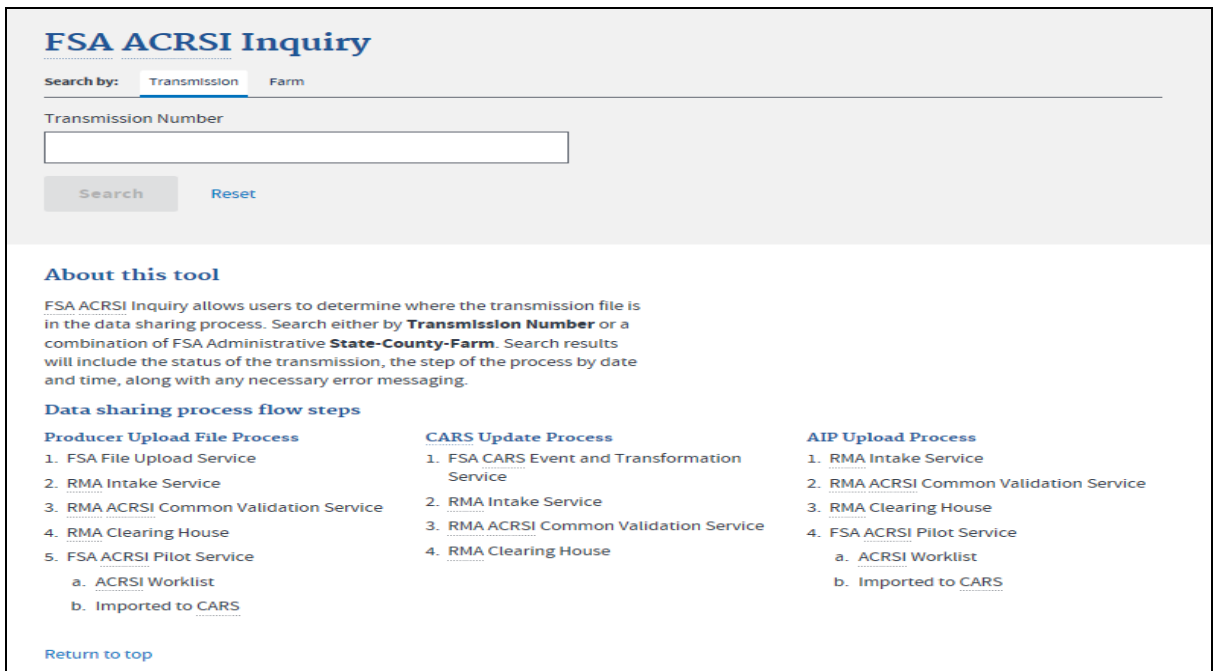

National, State, and County Office employees can enter the ACRSI Inquiry application at https://intranet-apps.fsa.usda.gov/usda_scc_gateway/acrsi-error-console/. The USDA eAuthentication Login Screen will be displayed.

On the USDA Login Screen, CLICK “Login with LincPass (PIV)” or enter user ID and password and CLICK “Login”. After the user successfully completes the eAuthentication login, the FSA ACRSI Inquiry Screen will be displayed.

516 ACRSI Inquiry Service (Continued)

C ACRSI Inquiry Search Screen

The following is an example of the FSA ACRSI Inquiry Screen.

D Instructions for Determining Status of ACRSI Transmission

ACRSI Transmissions can be searched by Transmission Number or Program Year, Administrative State, County and Farm Number. To search by farm, CLICK “Farm”. Enter the Administrative State, Administrative County, and Farm Number and CLICK “Search” to determine where the farm is in the data flow process and the status of the transmission file.

517 ACRSI Inquiry Search Results

A Overview

The selected farm and associated transmission file(s) will be displayed on the FSA ACRSI Inquiry Screen.

B ACRSI Inquiry Search Results Screen

The following is an example of the FSA ACRSI Inquiry Screen.

The screenshot displays the 'FSA ACRSI Inquiry' interface. At the top, there are search filters for 'Transmission' and 'Farm'. Below these are dropdown menus for 'State' (set to Illinois) and 'County' (set to DeWitt), and a text input field for 'Farm number'. A 'Search' button and a 'Reset' link are located below the filters. The results section shows '2 Results' with a refresh icon and a 'Filter: All' dropdown. A table lists the results with columns for Status, Step, Message, ID, County, State, Farm, Channel, and Date.

Status	Step	Message	ID	County	State	Farm	Channel	Date
Failure	RMA ACRSI Common Validation Service	Combination of...	10156	DeWitt	IL		Data Upload	Jan 25, 2016 14:14:18
Processing	FSA File Upload Service	transmitted file...	0	DeWitt	IL		Data Upload	Jan 25, 2016 14:14:09

517 ACRSI Inquiry Search Results (Continued)

B ACRSI Inquiry Search Results Screen (Continued)

The results will be displayed with:

- transmission file status,
- process step, message,
- transmission ID number,
- county,
- state,
- farm number,
- reporting channel, and
- transmission file date/time.

Transmission ID search results will include all farms associated with the transmission ID. Farm search results will include all transmissions associated with the selected farm. In the search results, the “**ID**” and “**Farm**” are hyperlinks. Clicking on the “**ID**” hyperlink will display search results for that single transmission. Clicking on the “**Farm**” hyperlink will display search results for all transmissions containing data for that farm.

C Filtering ACRSI Inquiry Search Results

Users have the option to filter the FSA ACRSI Inquiry search results based on transmission file status. The available transmission file statuses are:

- All
- Complete
- Processing
- Failure
- Skipped.

In addition users can sort data by clicking on the search results headers. For example, clicking on the “Date” header will place data in ascending or descending order by date.

Note: Skipped indicates there are no approved ACRSI crops and/or no joint agency producers on the report; therefore, the report was not transmitted.

517 ACRSI Inquiry Search Results (Continued)**D Process Flow Steps for ACRSI Transmissions**

The **Step** in the search results is the process flow step where the transmission file is currently being validated.

The data sharing process flow steps for acreage reports accepted through the FSA reporting channel are as follows:

CARS Update Process Flow Steps:

- FSA CARS Event and Transformation Service
- RMA Intake Service
- RMA ACRSI Common Validation Service
- RMA Clearing House.

The data sharing process flow steps for acreage reports accepted through the AIP reporting channel are as follows:

AIP Upload Process Flow Steps:

- RMA Intake Service
- RMA ACRSI Common Validation Service
- RMA Clearing House
- FSA ACRSI Pilot Service
- ACRSI Worklist
- Imported to CARS.

518 ACRSI Inquiry Status Messages

A Overview

The **Message** in the ACRSI Inquiry search results explains the current status of the transmission file. For a transmission file status of “Failure”, details about the reason the transmission was rejected are contained in the message. Reasons that transmission files fail can be related to missing mandatory data, incomplete data, invalid data or data business rules not being met.

B ACRSI Inquiry Status Messages Screen

The following is an example of the FSA ACRSI Inquiry Messages:

Status	Step	Message	ID	County	State	Farm	Channel	Date
Failure	RMA ACRSI Common Validation Service	originalReportedAcreage; ReportedAcreageModifiedIndicator is N so originalReportedAcreage must equal finalReportedAcreage; originalReportedAcreage; ReportedAcreageModifiedIndicator is N so originalReportedAcreage must equal finalReportedAcreage.	4614	La Salle	IL	919	Data Upload	Feb 09, 2016 09:45:43
Failure	RMA ACRSI Common Validation Service	originalReportedAcre...	4621	La Salle	IL	919	Data Upload	Feb 10, 2016 11:18:22

CLICK on the applicable **Message** to expand for further details.

The FSA ACRSI Pilot Service – Worklist messages are as follows.

- CARS Import Process Complete.
- All fields in the Acreage Report were duplicates and will not be processed.
- Acreage Report not completely imported. Please review errors on ACRSI Work List.
- Error Retrieving/Rolling Over Acreage Report for Import. Error ID: XXX.

The following is an example of FSA ACRSI Pilot Service – Worklist messages.

Processing	FSA ACRSI Pilot Service - Imported to CARS	Acreage Report not completely imported. Please review errors on ACRSI Work List.	10339	La Salle	IL	919	Data Upload	Feb 02, 2016 13:42:58
Processing	FSA ACRSI Pilot Service - Imported to CARS	All fields in the Acreage Report were duplicates and will not be processed.	10371	La Salle	IL	919	AIP Service	Feb 05, 2016 13:28:18

518 ACRSI Inquiry Status Messages (Continued)

C County Office Action (Continued)

If the user is unable to determine the cause of the transmission file failure based on the message provided and the Status is “Failure”, the user should create a Remedy Ticket. Select ACRSI as the application having the issue and include either the transmission number or the State/County/Farm along with the status of the transmission, the step of the process, and any applicable error messaging received in the inquiry search results. Also include any information provided by the producer when reporting a transmission failure.

When the message states “Please review errors on ACRSI Work List”, the user should access the farm by the CARS ACRSI Work List according to subparagraph 459 to review and edit the acreage reporting data submitted by the AIP channel to resolve any outstanding data issues and import the corrected data to CARS.

519-571 (Reserved)

Part 5 CIMS**Section 1 General Information****572 Overview****A Background**

The Farm Security and Rural Investment Act of 2002 authorized the development of CIMS to support programs administered by RMA and FSA.

Historically, producers provided both RMA and FSA the same basic information to participate in the crop insurance program and farm programs. Legislation instructed RMA and FSA to combine, reconcile, redefine, and reformat data to allow both agencies to use CIMS as a single source for obtaining this common information.

CIMS maintains data in a centralized database. RMA and FSA sources update data on the CIMS system on a weekly basis.

All CIMS functions:

- are within the web-based software
- can be viewed by FSA employees with Level II eAuthentication only.

B Security Roles

The following are security roles:

- State FSA employees with Level II eAuthentication will be able to view CIMS data
- County FSA employees with Level II eAuthentication will be able to view CIMS data.

C Reporting Problems

Report problems with accessing the applications (such as password problems) or applications errors by the CIMS Support Team at cimssupport@rma.usda.gov.

573 Accessing CIMS

A CIMS

Access CIMS from the FSA Intranet Application Page at <http://fsaintranet.sc.egov.usda.gov/fsa/applications.asp>.

Note: Internet Explorer shall be used when accessing CIMS.

B Action

From the FSA Intranet Application Page:

- CLICK “A-C”
- CLICK “Comprehensive Information Management System (CIMS)”
- CLICK “**Logon**” to display the eAuthentication Login Screen
- enter user ID and password or login using LincPass
- CLICK “**Login**” to display the CIMS Rules of Behavior
- CLICK “**Accept**” to display the CIMS Management Reports Menu.

573 Accessing CIMS (Continued)

C Example of CIMS Main Menu Screen

Following is an example of the CIMS Home Page.

USDA United States Department of Agriculture

Management Reports

- Participation Summary
- Producer Crop/Acreage
- Producer Crop/Acreage by Crop
- Producer Crop/Acreage by Crop Status
- Producer Conservation Compliance Status
- CIMS Report of FSA Commodities
- 2008 SUREMA Data
- RMA Ineligible Listing
- RMA and FSA Prevented Planting List

CIMS Geospatial Reports

- Summary of Business
- County CLU Inquiry
- RMA and FSA Prevented Planting
- CLU Crop Status Inquiry
- Cause of Loss By County
- Notice of Loss By County

Discovery Reports

- Insurable Acreage Diff by CLU
- Insurable Acreage Diff
- Insured Crop Acres Reported to FSA, not Reported to RMA
- FSA Business/RMA Entity Diff
- Spot Check List

What's New in CIMS

New Report - Producer Conservation Compliance Status - September 2015
 The "Producer Conservation Compliance Status" Management Report allows users to find and export a given producer's eligibility for crop insurance subsidy, based on the Conservation Compliance status determined by FSA, according to a nine-digit Tax ID number or producer name.

Load Processing General Timelines - October, 2013
 The CIMS Load Date reflects the most recent successful processing of RMA and FSA data loads, which takes place each weekend starting on Saturday. Normally by the end of the week, the Load Date will change to reflect the availability of updated data such as FSA Acreage on the CIMS Web Application. Difficulties or delays resulting from RMA or FSA data loading may cause retention of previous week data and thus the previous week's CIMS Load Date. For RMA AIP users Type 5 process normally completes by Tuesday. The Discovery Reports are generally available on the IP Server for the respective AIFs by Thursday.

CIMS Hosts 2013 RCO Spring Spot Check List for FSA State Offices - April 2013
 The joint FSA/RMA 4-RM Handbook contains the procedures to follow for the selected producers.

CIMS Updates Commodities Report - January, 2013
 CIMS has released an update to the Commodities report to reflect the current version of FSA 578.

CIMS Releases New Report - September, 2012
 Based on requests from FSA users, CIMS has released a new report: RMA and FSA Prevented Planting List. This report allows users to search within a state and county to display a list of producers and the details for all producers who reported prevented planting to either RMA or FSA or both.

CIMS Hosts 2012 RCO Fall Spot Check List for FSA State Offices - September 2012
 CIMS is providing the CY2012 compliance spot checks as authorized by the Agricultural Risk Protection Act of 2000 (ARPA) to FSA State Offices. Previously the spot checklist was provided to the State Offices in a hard copy report. FSA State Office CIMS users have access to 2012 Fall Spot Check List on the CIMS menu. The joint FSA/RMA 4-RM Handbook contains the procedures FSA State Office compliance directors are to follow for the selected producers.

574-614 (Reserved)

Section 2 Producer Crop/Acreage Management Report

615 Producer Crop/Acreage Report

A Overview

The “Producer Crop/Acreage” option appears under Management Reports on the left navigation. The Producer Crop/Acreage report works on a drill down concept to access detailed information on individual producers and their RMA and/or FSA reported crop acreage.

B Example of CIMS Management Report “Producer Crop/Acreage”

The following is an example of Management Report “Producer Crop/Acreage.”

C Action

CLICK “Producer Crop/Acreage” under management reports on the left navigation.

616 Entering Search Criteria

A Overview

After the user selects the Producer Crop/Acreage report option, the Producer Crop/Acreage search criteria screen will be displayed.

B Example of Search Criteria for the Producer Crop/Acreage Report

The following is an example of search criteria screen for the Producer Crop/Acreage report.

Producer Crop/Acreage Export

Required Criteria

Year:

Physical/Location State/Territory: Physical/Location County:

Name Tax ID

Tax ID:

C Action

User shall use the drop-down menu to select the applicable:

- Year
- Physical/Location State/Territory
- Physical/Location County.

CLICK:

- the button next to “**Name**”, to search by Last Name and First Name or Business Name and a list of available RMA and/or FSA producers will be displayed, as applicable
- the button next to “**Tax ID**” and a list of producer associated with the Tax ID will be displayed
- “**Submit**” and a list of RMA and FSA producers will be displayed
- “**Reset**” to clear the search criteria.

617 RMA and FSA Producers

A Overview

Based on the information entered on the search criteria screen, a list of RMA and FSA Producers for the Producer Crop/Acreage report will be displayed. Producers will be listed only if their crop information has been reported to RMA and/or FSA. If a producer reports crop information to one agency only, then the RMA and FSA Producer list will display producer name/information next to the agency where the crop information was reported.

From the RMA and FSA producer list, users can:

- export the producer list to excel
- access RMA and FSA details
- access crop and crop summary information reported to RMA and/or FSA as applicable.

B Example of RMA and FSA Producers List for the Producer Crop/Acreage Report

The following is an example of search criteria for Producer Crop/Acreage report.

Producer Crop/Acreage [Export](#)

Required Criteria

Year:

Physical Location State/Territory: Physical Location County:

Name Tax ID

Tax ID:

RMA & FSA Producers (initial list sorted by TaxID) Record Count: 1

Agency	Name	Tax ID	ID Type	Business/Entity Type	GIMS Commodities
FSA RMA	Producer A	Producer A Tax ID	EIN	LLC	

618 Exporting RMA and FSA Producers to Excel

A Overview

Once the RMA and FSA producer list is displayed, users can export the producer list to excel.

B Example of the Export and Producer List Options and Excel Format

The following is an example of the **export** and **producer list** options for the Producer Crop/Acreage report.

Warning this document contains Personal Identifiable Information (PII)

Producer Crop/Acreage

Tax ID	FSA Name	FSA Type	FSA Business Type	RMA Name	RMA Type	RMA Entity Type
Producer A Tax ID				Producer A	EIN	LLC

C Action

CLICK “**Export**” then “**Producer List**” in the upper right corner to export the producer list to excel.

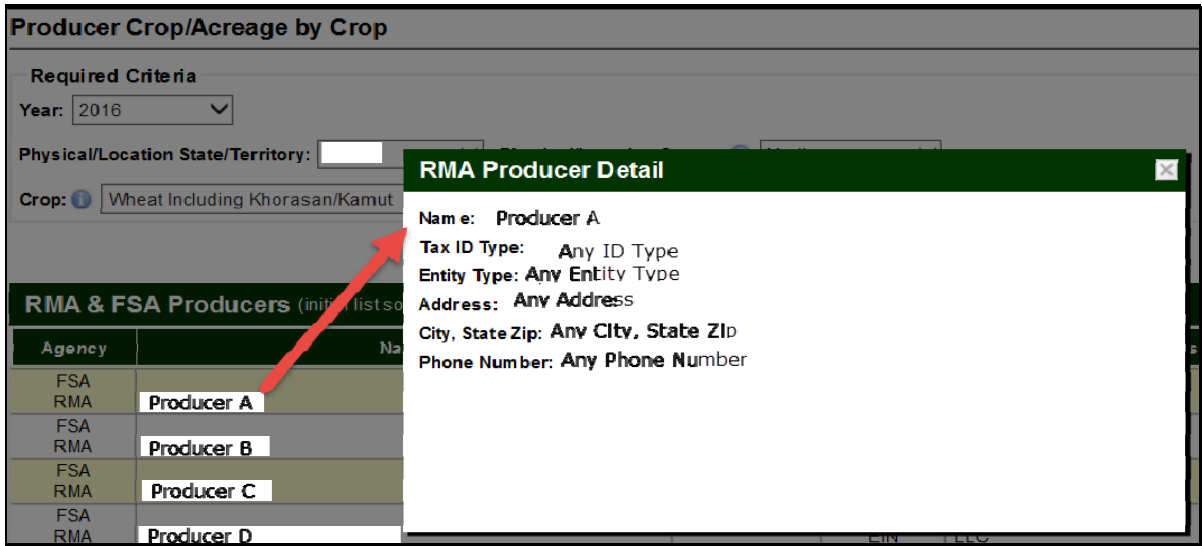

619 Displaying RMA Producer Detail and FSA Customer Detail

A Retrieving Producer/Customer Detail Information

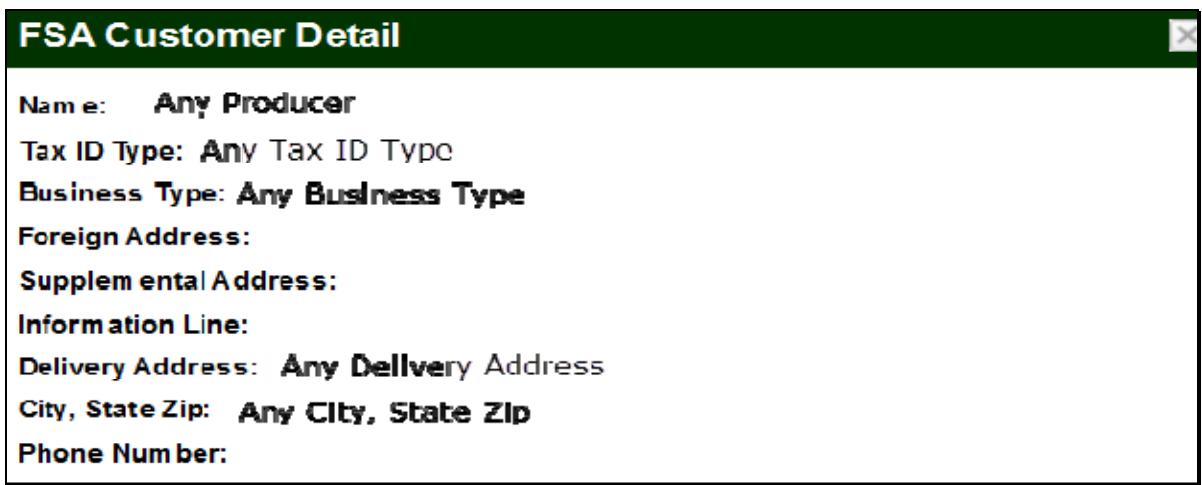

From the RMA and FSA Producer list, users can retrieve RMA producer detail or FSA customer detail information for the selected producer.

B Example of the RMA Producer Detail

The following is an example of the RMA Producer Detail information.

The following is an example of the FSA Customer Detail information.

C Action

CLICK the producer name from the producer list and the RMA producer detail or FSA customer detail will be displayed.

620 Displaying RMA and FSA Level 1 Crops Reported

A Overview

From the RMA and FSA producer list users, will have access to level 1 crops reported to RMA and/or FSA for the selected producer.

B Example of RMA and FSA Level 1 Crops Reported for the Producer Crop/Acreage Report

The following is an example of crops reported to RMA and FSA for the selected producer.

Producer Crop/Acreage [Export](#)

Required Criteria

Year: ▼

<div style="display: flex; justify-content: space-between;"> <div style="width: 20%;"> <p>▶ Corn</p> <p>▶ Soybeans</p> </div> <div style="width: 40%;"> <p>Admin State:</p> <p>Physical/Location State:</p> <p>Admin State:</p> <p>Physical/Location State:</p> </div> <div style="width: 40%;"> <p>Admin County:</p> <p>Physical/Location County:</p> <p>Admin County:</p> <p>Physical/Location County:</p> </div> </div>					

C Action

CLICK “Tax ID” to display level 1 crops reported to RMA and/or FSA as applicable.

621 **Displaying RMA and FSA Level 2 Crop Summary Information Reported**

The Producer Crop/Acreage report level 2 drill down will allow users to access crop summary information on individual producers and their RMA and/or FSA reported crop acreage.

B Example of Level 2 RMA and FSA Crop Summary for the Producer Crop/Acreage Report

The following is an example of level 2 RMA crop summary information for the Producer Crop/Acreage report.

<input checked="" type="checkbox"/> Corn	Admin State:	Admin County:	
	Physical/Location State:	Physical/Location County:	
<input type="checkbox"/> RMA	Total Acres: 324.10	Insurable: 324.10	Non-Insurable: 0.00
	Rate State:	Rate County:	
<input checked="" type="checkbox"/> Soybeans	Admin State:	Admin County:	
	Physical/Location State:	Physical/Location County:	
<input type="checkbox"/> RMA	Total Acres: 99.50	Insurable: 99.50	Non-Insurable: 0.00
	Rate State:	Rate County:	

The following is an example of level 2 FSA crop summary information for the Producer Crop/Acreage report.

<input checked="" type="checkbox"/> Wheat Including	Admin State:	Admin County:	
Khorasan/Kamut			
	Physical/Location State:	Physical/Location County:	
<input type="checkbox"/> FSA	Total Acres: 422.50	Insurable: 422.50	Non-Insurable: 0.00

C Action

CLICK the drop-down arrow to the left of each level 1 crop name to display the level 2 summary of insurable **and/or** non-insurable acreage reported to RMA and/or FSA as applicable.

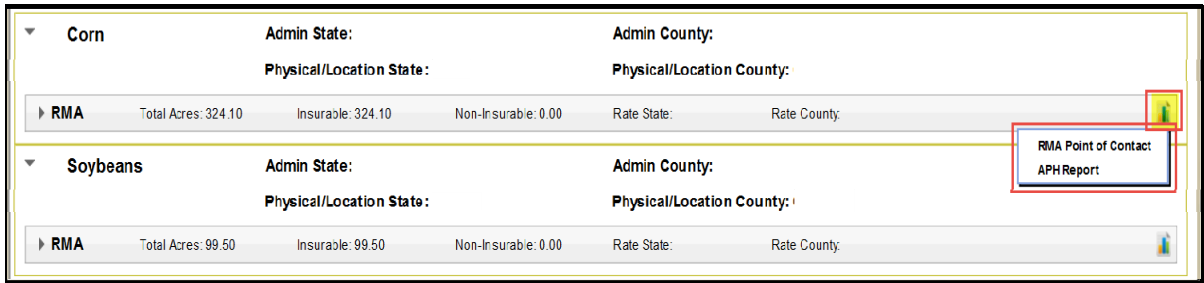

622 Displaying RMA Point of Contact and APH Report

A Overview

From the level 2 RMA name, users will have access to RMA Point of Contact and APH report.

B Example of the RMA Point of Contact and APH Report Options

The following is an example of the RMA Point of Contact and APH Report options.

C Action

CLICK the icon in the right corner of the level 2 RMA name, then CLICK:

- “RMA Point of Contact” and RMA point of contact information will be displayed
- “APH Report” and an APH report for the producer will be displayed.

623 Displaying FSA Point of Contact for the Producer Crop/Acreage Report

A Overview

From the level 2 FSA name, users will have access to FSA State point of contact.

B Example of the FSA Point of Contact Options

The following is an example of the FSA Point of Contact option.

The screenshot displays a user interface for FSA Point of Contact. It features a dropdown menu with 'Wheat Including Khorasan/Kamut' selected. Below this, there are four input fields: 'Admin State:', 'Admin County:', 'Physical/Location State:', and 'Physical/Location County:'. A summary bar shows 'FSA' with 'Total Acres: 422.50', 'Insurable: 422.50', and 'Non-Insurable: 0.00'. A yellow icon in the top right corner is highlighted with a red box, and a callout box labeled 'FSA Point of Contact' points to it.

C Action

CLICK the icon in the right corner of the level 2 FSA name, then CLICK “**FSA Point of Contact**” and the FSA State point of contact information will be displayed.

624 Displaying RMA and FSA Level 3 Crop Summary Information

A Overview

The level 3 drill down provides a summary of information by:

- crop (insurable/noninsurable)
- type
- practice
- insurance plan
- total acres.

B Example of RMA Level 3 Crop Summary Information for the Producer Crop/Acreage Report

The following is an example of RMA level 3 crop summary information for the Producer Crop/Acreage Report.

▼ Corn	Admin State:	Admin County:			
	Physical/Location State:	Physical/Location County:			
▼ RMA	Total Acres: 324.10	Insurable: 324.10	Non-Insurable: 0.00	Rate State:	Rate County:

▶ Soybeans, Insurable	Type: Commodity	Practice: Non-irrigated	Ins Plan: Revenue	Total Acres: 99.50	

624 Displaying RMA and FSA Level 3 Crop Summary Information (Continued)

B Example of RMA Level 3 Crop Summary Information for the Producer Crop/Acreage Report (Continued)

The following is an example of the FSA level 3 crop summary information for the Producer Crop/Acreage report.

▼ Wheat Including		Admin State:	Admin County:	
Khorasan/Kamut				
		Physical/Location State:	Physical/Location County:	
▼ FSA	Total Acres: 422.50	Insurable: 422.50	Non-Insurable: 0.00	
▶ Wheat, Insurable	Type: Hard Red Winter	Practice: Irrigated	Int Use: Grain	Total Acres: 324.00
▶ Wheat, Insurable	Type: Hard Red Winter	Practice: Non-irrigated	Int Use: Grain	Total Acres: 98.50

C Action

CLICK the drop-down arrow to the left of the level 2 RMA and/or FSA name, and the level 3 crop summary information for RMA and/or FSA will be displayed, as applicable.

625 Displaying RMA and FSA Level 4 Acreage, Location and Policy Details

A Overview

The level 4 drill down will provide information for the acreage and location for FSA and/or RMA as applicable. Policy details will be available for RMA selection **only**.

B Example of RMA and FSA Level 4 Acreage, Location and Policy Detail Options for the Producer Crop/Acreage Report

The following is an example of RMA and FSA level 4 acreage, location, and policy detail option for the Producer Crop/Acreage report.

▼ Wheat Including Khorasan/Kamut		Admin State:	Admin County:
		Physical/Location State:	Physical/Location County:
▼ FSA	Total Acres: 422.50	Insurable: 422.50	Non-Insurable: 0.00
<input type="checkbox"/> Wheat, Insurable	Type: Hard Red Winter	Practice: Irrigated	Int Use: Grain
Total Acres: 324.00			
Acres Location			
▼ RMA	Total Acres: 86.50	Insurable: 0.00	Non-Insurable: 86.50
		Rate State:	Rate County:
<input type="checkbox"/> Wheat, Khorasan/K...	Type:	Practice:	Ins Plan: Yield Protection
Total Acres: 86.50			
Acres Location Policy Details			

Note: The Policy Details option will **not** be displayed for FSA selections.

C Action

CLICK the drop-down arrow to the left of the level 3 crop summary and the level 4 acreage, location, and policy details for RMA and/or FSA will be displayed, as applicable.

626 Displaying RMA and FSA Level 4 Acres

A Overview

The level 4 acres provides specific acreage information reported for RMA and/or FSA.

B Example of RMA and FSA Level 4 Acres for Producer Crop/Acreage Report

The following is an example of RMA and FSA level 4 acres for the Producer Crop/Acreage report.

FSA Total Acres: 422.50 Insurable: 422.50 Non-Insurable: 0.00

Wheat, Insurable Type: Hard Red Winter Practice: Irrigated Int Use: Grain Total Acres: 324.00

C Action

CLICK “Acres” and level 4 acreage information for RMA and/or FSA will be displayed as applicable.

626 Displaying RMA and FSA Level 4 Acres (Continued)

D RMA and FSA Level 4 Acre Data and Data Descriptions

The following table provides data and data descriptions for RMA level 4 acres.

RMA Data	RMA Data Description
Crop Unit	Insurable acreage of the insured crop in the county.
Total Acres	The insured's share of all acreage of an insured crop in the county whether insurable, not insurable, or uninsured.
Planted	Land in which seed, plants, or trees have been placed as appropriate for the insured crop.
Uninsured	Acreage that does not meet the insurability requirements as defined by the policy.
Prevented	Failure to plant the insured crop.
Short Rate	Acreage that will be destroyed before harvest.
Unit of Measure	Unit of measure for the crop.
Approved Yield	The yield, calculated and approved by the verifier.
Zero Acreage Flag	An acreage report filed by an insured that certifies the insured does not have a share in insurable acres of the crop for that crop year.
AIP	A legal entity, including the company, which has entered into a Standard Reinsurance Agreement with FCIC for the applicable reinsurance year.
Policy Number	The agreement between the insured and the AIP to insure an agricultural commodity.

626 Displaying RMA and FSA Level 4 Acres (Continued)

D RMA and FSA Level 4 Acre Data and Data Descriptions (Continued)

The following table provides data and data descriptions for FSA level 4 acres.

FSA Data	FSA Data Description
Acres Type	The acres type will specify if the acres is recorded as reported or determined in CARS.
Total Acres	Total acres will include acres reported in CARS with crop status of initial, subsequent, double, repeat, prevented, failed, volunteer, experimental, and cover.
Initial Acres	Initial acres will include acres reported in CARS with an initial crop status only.
Double Acres	Double acres will include acres reported in CARS with a double crop status of "D", "E", "F", "G", "H", or "O".
Subsequent Acres	Subsequent acres will include acres reported in CARS with a subsequent crop status of "J", "K", "L", "M", "N", or "P".
Repeat Acres	Repeat acres will include acres reported in CARS with a repeat crop status only.
Failed Acres	Failed acres will include acres reported in CARS with supplemental status failed.
Prevented Acres	Prevented acres will include acres reported in CARS with supplemental status prevented.
Volunteer Acres	Volunteer acres will include acres reported in CARS with supplemental status volunteer.
Experimental Acres	Experimental acres will include acres reported in CARS with supplemental status experimental.

627 Displaying RMA and FSA Level 4 Location

A Overview

Level 4 location provides specific information on the location of the crop reported for RMA or FSA as applicable.

B Example of RMA and FSA Level 4 Location for Producer Crop/Acreage Report

The following is an example of RMA and FSA level 4 location detail for the Producer Crop/Acreage report.

FSA Total Acres: 202.03 Insurable: 202.03 Non-Insurable: 0.00

▼ **Wheat, Insurable** Type: Hard Red Winter Practice: Non-irrigated Int Use: Grain Total Acres: 202.03

Policy Details

C Action

CLICK “Location” to display the level 4 location for RMA and/or FSA as applicable.

627 Displaying RMA and FSA Level 4 Location (Continued)

D RMA and FSA Level 4 Location Data and Data Descriptions

The following table provides data and data descriptions for RMA level 4 location details.

RMA Data	RMA Data Description
Unit	Insurable acreage of the insured crop in the county.
Grid ID	Grid ID from map for Pasture Rangeland and Forage Products and Apiculture.
Land ID Type	Identifies the type of Land ID.
Land ID	A code identifying a section of land within a farm.
Farm	An identification number assigned to a farm by the FSA county committee.
Tract	Unit of contiguous land under one ownership, which is operated as a farm, or part of a farm.
Field	Part of a farm which is separated from the balance of the farm by permanent boundaries.
Subfield	A field division used by FSA.
Reported Acres	The number of acres or tons reported by the insured before adjustment for share.
Date Planted	Latest date acreage was planted for the acreage reported on the record.
Date Reported	Most recent date RMA has received data from the AIP for the policy.

627 Displaying RMA and FSA Level 4 Location (Continued)

D RMA and FSA Level 4 Location Data and Data Descriptions (Continued)

FSA Data	FSA Data Description
Farm	The farm number entered in CARS, based on farm records.
Tract	The tract number entered in CARS, based on farm records.
Field	The field number entered in CARS, based on farm records.
Subfield	The subfield number entered in CARS.
Acreage Type	The acreage type will specify if the acreage is recorded as reported or determined in CARS.
Total Acres	Total acres will include acreage reported in CARS with crop status of initial, subsequent, double, repeat, prevented, failed, volunteer, experimental and cover.
Share	The shares entered in CARS for the crop and producer.
Date Planted	The planting date entered in CARS for the crop.
Date Reported	The last date information in CIMS is updated.
Erodible Land Type Code	An FSA GIS code indicating the highly erodible land status of the CLU.
Notes	FSA GIS comments data.
Last Change	FSA GIS date when the CLU spatial data was last updated by FSA.
CLU Date	Date GIS data was received from FSA.
GIS Status	FSA code representing the type of land contained in the CLU.

628 Displaying RMA Level 4 Policy Details

A Overview

The level 4 policy option provides specific information on the RMA policy.

Note: Policy details do **not** apply to FSA.

B Example of RMA and FSA Level 4 Policy Details for the Producer Crop/Acreage Report

The following is an example of RMA level 4 policy details for the Producer Crop/Acreage report.

RMA	Total Acres: 86.50	Insurable: 0.00	Non-Insurable: 86.50	Rate State:	Rate County:				
Wheat, Khorasan/K...	Type:	Practice:	Ins Plan: Yield Protection	Total Acres: 86.50					
Acres									
Location									
Policy Details									
Policy Number: Any Policy Number									
Coverage	Crop Unit	Premium	Liability	Indemnity	CRP Indemnity	Harvested Indemnity	Prevented Indemnity	Unharvested Indemnity	Replanted Indemnity
A		0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00

C Action

CLICK “Policy Details” and RMA level 4 policy information will be displayed.

628 Displaying RMA Level 4 Policy Details (Continued)

D RMA Level 4 Policy Details Data and Data Descriptions

The following table provides data and data descriptions for RMA level 4 policy details.

RMA Data	RMA Data Description
Coverage	The amount of insurance protection against insured loss of production or value.
Crop Unit	Insurable acreage of the insured crop in the county.
Premium	The amount of money the insured pays for risk protection.
Liability	The total amount of insurance, value of the insured's production guarantee, or revenue protection guarantee for the unit
Indemnity	The dollar amount paid in the event of an insured loss.
GRP Indemnity	Indemnity paid in the event of an insured loss insured under Group Risk Plan (GRP) coverage.
Harvested Indemnity	Indemnity paid resulting from harvested acres calculation.
Prevented Indemnity	Indemnity paid resulting from prevented planting acres calculation.
Unharvested Indemnity	Indemnity paid resulting from unharvested acres calculation.

629 Accessing RMA Policy Holder Report and AIP Point of Contact

A Overview

From the level 4 policy details option, user will have access to the RMA policy holder report and the AIP point of contact.

B Example of the RMA Policy Holder Report and AIP Point of Contact Options

The following is an example of the RMA policy holder report and AIP point of contact for the Producer Crop/Acreage Report.

Policy Details								
Policy Number:	Any Policy Number							
	Liability	Indemnity	GRP Indemnity	Harvested Indemnity	Prevented Indemnity	Unharvested Indemnity	Replanted Indemnity	
Policy Holder Report								
AIP Point of Contact	0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00

C Action

CLICK the “Policy Number” to see the Policy Holder Report and the AIP Point of Contact option, and then CLICK:

- “**Policy Holder Report**” and the RMA policy holder report will be displayed
- “**AIP Point of Contact**” and the AIP point of contact will be displayed.

630-670 (Reserved)

Section 3 Producer Crop/Acreage by Crop Management Report

671 Producer Crop/Acreage by Crop

A Overview

The “Producer Crop/Acreage by Crop” option appears under Management Reports on the left navigation. Like the Producer Crop/Acreage report, the Producer Crop/Acreage by Crop report works on a drill down concept to access detailed information on individual producers and their RMA and/or FSA reported crops and acreage.

B Example of CIMS Management Report “Producer Crop/Acreage by Crop”

The following is an example of Management Report “Producer Crop/Acreage by Crop”.

C Action

CLICK the “Producer Crop/Acreage by Crop” option under management reports on the left navigation.

672 Entering Search Criteria

A Overview

After the user selects the “Producer Crop/Acreage by Crop” option, the Producer Crop/Acreage by Crop search criteria screen will be displayed.

B Example of Search Criteria Screen for the Producer Crop/Acreage by Crop

The following is an example of the Search Criteria Screen for the Producer Crop/Acreage by Crop.

The screenshot shows a web form titled "Producer Crop/Acreage by Crop" with an "Export" link in the top right corner. The form is divided into a "Required Criteria" section. It contains three dropdown menus: "Year" (currently set to 2015), "Physical/Location State/Territory", and "Physical/Location County". Below these is a "Crop" dropdown menu set to "Wheat Including Khorasan/Kamut". At the bottom right of the form are two buttons: "Submit" and "Reset".

C Action

Use the drop-down menu to select the applicable:

- year
- physical/location State/territory
- physical/location county
- crop.

CLICK:

- “**Submit**” and a list of RMA and FSA producers will be displayed
- “**Reset**” to clear the search criteria.

673 RMA and FSA Producers

A Overview

Based on the information entered on the search criteria screen, a list of RMA and FSA Producers for the Producer Crop/Acreage by Crop report will be displayed. The Producer Crop/Acreage Producers will be listed only if crop information has been reported to RMA and/or FSA. If a producer reports crop information to one agency only, then the RMA and FSA Producer list will display producer name/information next to the agency where the crop information was reported.

From the RMA and FSA producer list, users can:

- export producer list to excel
- access RMA and FSA details
- access crops and crop summary information reported to RMA or FSA when available.

B Example of RMA and FSA Producers List for the Report Producer Crop/Acreage by Crop Report

The following is an example of RMA and FSA Producers for the Producer Crop/Acreage by Crop report.

The screenshot shows a web application interface for searching RMA and FSA producers. At the top, there is a search criteria section with fields for Year (2016), Physical Location State/Territory, Physical Location County, and Crop (Wheat Including Khorasan/Kamut). Below this is a table titled 'RMA & FSA Producers' with 221 records. The table has columns for Agency, Name, Tax ID, ID Type, Business/Entity Type, and CMS Commodities. The table lists 10 producers (A through J) with their respective agency (FSA or RMA), name, tax ID, ID type (EIN or SSN), and business/entity type (Joint Venture Partnership, Limited Partnership, Joint Operations, General Partnership, Irrevocable Trusts, LLC, Partnership, or Unknown/Individual for the FSA business type). A 'CMS Commodities' link is provided for each producer.

Agency	Name	Tax ID	ID Type	Business/Entity Type	CMS Commodities
FSA	Producer A		EIN	Joint Venture Partnership	CMS Commodities
RMA	Producer A		EIN	Partnership	
FSA	Producer B		EIN	Limited Partnership	CMS Commodities
RMA	Producer B		EIN	Joint Operations	
FSA	Producer C		EIN	General Partnership	CMS Commodities
RMA	Producer C				
FSA	Producer D		EIN	Irrevocable Trusts	
RMA	Producer D				
FSA	Producer E		EIN	LLC	
RMA	Producer E				
FSA	Producer F		EIN	Limited Partnership	CMS Commodities
RMA	Producer F		EIN	Partnership	
FSA	Producer G		SSN	Unknown/Individual for the FSA business type	CMS Commodities
RMA	Producer G				
FSA	Producer H		EIN	Irrevocable Trusts	
RMA	Producer H				
FSA	Producer I		EIN	Partnership	
RMA	Producer I				
FSA	Producer J		EIN	General Partnership	CMS Commodities
RMA	Producer J				

674 **Exporting RMA and FSA Producer List to Excel for the Producer Crop/Acreage by Crop Report**

A Overview

Once the RMA and FSA producer list is displayed, users can export the producer list to excel.

B Example of the Export and Producer List Options, and Excel Format for the Producer Crop/Acreage by Crop Report

The following is an example of the **export** and **producer list** options for the Producer Crop/Acreage by Crop report.

C Action

CLICK “**Export**” then “**Producer List**” in the upper right corner to export the producer list in excel format.

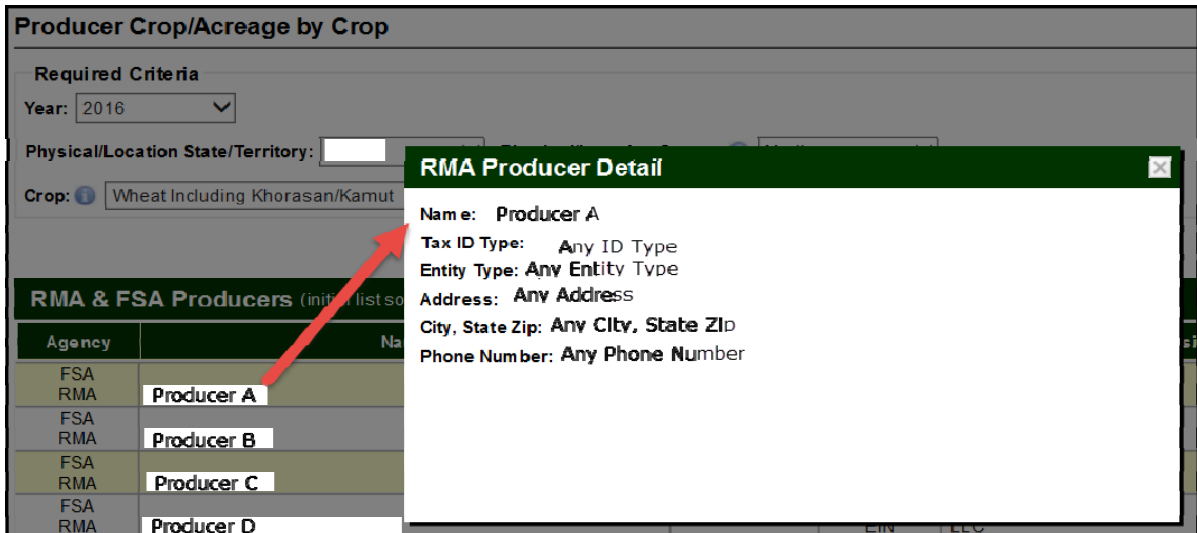

675 Displaying RMA Producer Detail and FSA Customer Detail

A Overview

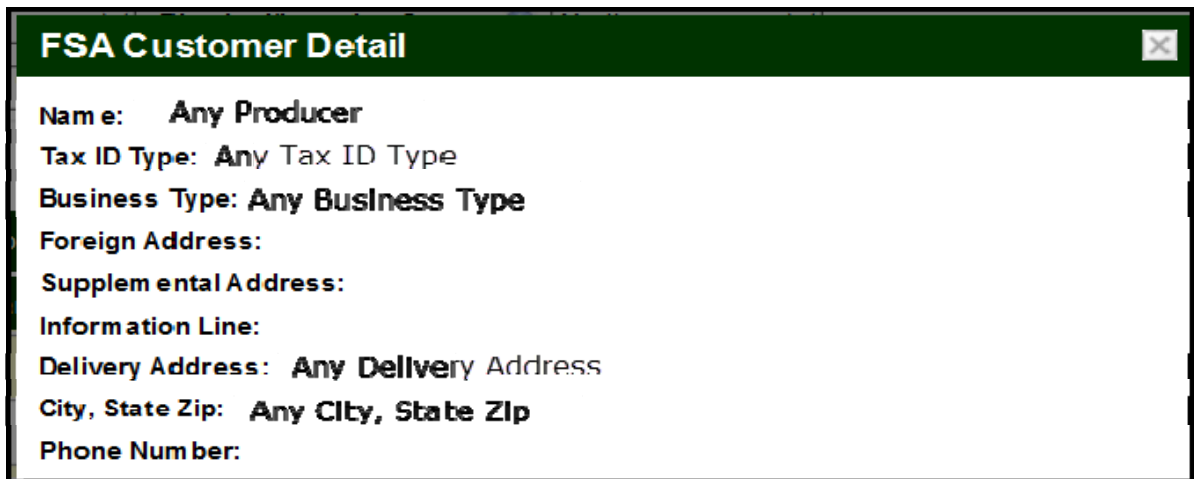

From the RMA and FSA Producer list, users can retrieve RMA producer detail or FSA customer detail information for the selected producer.

B Example of the RMA Producer Detail

The following is an example of the RMA Producer Detail.

The following is an example of the FSA Customer Detail.

C Action

CLICK on the producer name from the producer list and RMA Producer Detail or FSA Customer Detail will be displayed, as applicable.

676 Displaying RMA and FSA Level 1 Crops Reported

A Overview

From the RMA and FSA producer list, users will have access to crops reported to RMA and/or FSA for the selected crop.

Note: Although the Crop/Acreage by Crop report allows users to search for a specific crop, all crops associated with the selected tax id will be displayed for the level 1 crops reported to RMA and/or FSA.

B Example of RMA and FSA Level 1 Crops Reported for the Producer Crop/Acreage by Crop Report

The following is an example of level 1 crops reported to RMA and FSA for the selected crop/producer.

Producer Crop/Acreage by Crop Export

Required Criteria

Year: 2015

Physical/Location State/Territory: Physical/Location County:

Crop: Wheat Including Khorasan/Kamut

Submit Reset

RMA & FSA Producers (Initial list sorted by TaxID) Record Count: 221						
Agency	Name	Tax ID	ID Type	Business Entity Type		CIMS Commodities
FSA RMA	Producer A Producer A	Producer A Tax ID	EIN EIN	Joint Venture Partnership		CIMS Commodities

Wheat Including Khorasan/Kamut

Admin State: Admin County:

Physical/Location State: Physical/Location County:

C Action

CLICK “Tax ID” and crops reported for the producer will be displayed.

677 Displaying RMA and FSA Level 2 Crop Summary Information Reported

A Overview

Like the Producer Crop/Acreage report level 2 drill down, the Producer Crop/Acreage by Crop report level 2 drill down will also allow users to access crop summary information on individual producers and their RMA and/or FSA reported crop acreage.

B Example of RMA and FSA Level 2 Crop Summary Information for the Producer Crop/Acreage by Crop Report

The following is an example of RMA and FSA level 2 crop summary information for the Producer Crop/Acreage by Crop report.

Producer Crop/Acreage by Crop Export

Required Criteria

Year: 2018

Physical/Location State/Territory: Physical/Location County:

Crop: Wheat Including Khorasan/Kamut

Submit Reset

Agency	Name	Tax ID	ID Type	Business/Entity Type	DMS Commodities												
FSA RMA	Producer A Producer A	Producer A Tax ID	EIN EIN	Joint Venture Partnership	DMS Commodities												
<div style="border: 1px solid red; padding: 5px;"> <p>Wheat Including Khorasan/Kamut</p> <p>Admin State: Admin County:</p> <p>Physical/Location State: TEXAS Physical/Location County:</p> <table border="0" style="width: 100%;"> <tr> <td style="border: 1px solid red;">▶ FSA</td> <td>Total Acres: 202.03</td> <td>Insurable: 202.03</td> <td>Non-Insurable: 0.00</td> <td></td> <td></td> </tr> <tr> <td style="border: 1px solid red;">▶ RMA</td> <td>Total Acres: 0.00</td> <td>Insurable: 0.00</td> <td>Non-Insurable: 0.00</td> <td>Rate State:</td> <td>Rate County:</td> </tr> </table> </div>						▶ FSA	Total Acres: 202.03	Insurable: 202.03	Non-Insurable: 0.00			▶ RMA	Total Acres: 0.00	Insurable: 0.00	Non-Insurable: 0.00	Rate State:	Rate County:

C Action

CLICK the drop-down arrow to the left of the level 1 crop name to display a level 2 summary of insurable **and/or** non-insurable acreage reported to RMA and/or FSA as applicable.

678 **Displaying RMA Point of Contact and APH Report**

A Overview

From the level 2 RMA name, user will have access to RMA Point of Contact and the APH report.

B Example of the RMA Point of Contact and APH Report Options for the Producer Crop/Acreage by Crop Report

The following is an example of the RMA Point of Contact and APH Report options.

▼ Wheat Including Khorasan/Kamut		Admin State:	Admin County:		
		Physical/Location State:	Physical/Location County:		
▶ FSA	Total Acres: 202.03	Insurable: 202.03	Non-Insurable: 0.00		
▶ RMA	Total Acres: 0.00	Insurable: 0.00	Non-Insurable: 0.00	Rate State:	Rate County:

RMA Point of Contact
 APH Report

C Action

CLICK the icon to the right of the level 1 RMA name, then CLICK:

- “**RMA Point of Contact**” to display RMA point of contact information
- “**APH Report**” and an APH report for the producer will be displayed.

679 Displaying FSA Point of Contact

A Overview

From the level 2 FSA name, user will have access to FSA State point of contact for the Producer Crop/Acreage by Crop report.

B Example of the FSA Point of Contact Options for the Producer Crop/Acreage by Crop Report

The following is an example of the FSA Point of Contact options for the Producer Crop/Acreage by Crop report.

▼ Wheat Including		Admin State:	Admin County:	
Khorasan/Kamut				
		Physical/Location State:	Physical/Location County:	
▶ FSA	Total Acres: 202.03	Insurable: 202.03	Non-Insurable: 0.00

C Action

CLICK:

- the icon in the right corner of the level 2 FSA name, then
- “**FSA Point of Contact**” and FSA State point of contact information will be displayed.

680 Displaying RMA and FSA Level 3 Crop Summary

A Overview

The level 3 drill down will provide a summary of information by:

- Crop (insurable/noninsurable)
- Type
- Practice
- Insurance Plan
- Total Acres.

B Example of RMA and FSA Level 3 Crop Summary Information for the Producer Crop/Acreage by Crop Report

The following is an example of RMA and FSA level 3 crop summary information for the Producer Crop/Acreage by Crop report.

▼ Wheat Including		Admin State:	Admin County:	
Khorasan/Kamut		Physical/Location State:	Physical/Location County:	
▼ FSA	Total Acres: 202.03	Insurable: 202.03	Non-Insurable: 0.00	
▶ Wheat, Insurable	Type: Hard Red Winter	Practice: Non-irrigated	Int Use: Grain	Total Acres: 202.03

C Action

CLICK “Acres” and display level 4 acreage information for RMA and/or FSA will be displayed as applicable.

682 Displaying RMA and FSA Level 4 Acres (Continued)

D RMA and FSA Level 4 Acres Data and Data Descriptions

The following table provides data and data descriptions for RMA level 4 acres.

RMA Data	RMA Data Description
Crop Unit	Insurable acreage of the insured crop in the county.
Total Acres	The insured's share of all acreage of an insured crop in the county whether insurable, not insurable, or uninsured.
Planted	Land in which seed, plants, or trees have been placed as appropriate for the insured crop.
Uninsured	Acreage that does not meet the insurability requirements as defined by the policy.
Prevented	Failure to plant the insured crop.
Short Rate	Acreage that will be destroyed before to harvest.
Unit of Measure	Unit of measure for the crop.
Approved Yield	The yield, calculated and approved by the verifier.
Zero Acreage Flag	An acreage report filed by an insured that certifies the insured does not have a share in insurable acres of the crop for that crop year.
AIP	A legal entity, including the Company, which has entered into a Standard Reinsurance Agreement with FCIC for the applicable reinsurance year.
Policy Number	The agreement between the insured and the AIP to insure an agricultural commodity.

682 Displaying RMA and FSA Level 4 Acres (Continued)

D RMA and FSA Level 4 Acres Data and Data Descriptions (Continued)

The following table provides data and data descriptions for FSA level 4 acres.

FSA Data	FSA Data Description
Acres Type	The acres type will specify if the acres is recorded as reported or determined in CARS.
Total Acres	Total acres will include acres reported in CARS with crop status of initial, subsequent, double, repeat, prevented, failed, volunteer, experimental and cover.
Initial Acres	Initial acres will include acres reported in CARS with an initial crop status only.
Double Acres	Double acres will include acres reported in CARS with a double crop status of "D", "E", "F", "G", "H", or "O".
Subsequent Acres	Subsequent acres will include acres reported in CARS with a subsequent crop status of "J", "K", "L", "M", "N", or "P".
Repeat Acres	Repeat acres will include acres reported in CARS with a repeat crop status only.
Failed Acres	Failed acres will include acres reported in CARS with supplemental status failed.
Prevented Acres	Prevented acres will include acres reported in CARS with supplemental status prevented.
Volunteer Acres	Volunteer acres will include acres reported in CARS with supplemental status volunteer.
Experimental Acres	Experimental acres will include acres reported in CARS with supplemental status experimental.

683 Displaying RMA and FSA Level 4 Location

A Overview

The level 4 location option provides specific information on the location of the crop/crops reported for RMA and/or FSA as applicable.

B Example of RMA and FSA Level 4 Location for Producer Crop/Acreage by Crop Report

The following is an example of RMA and FSA level 4 location for the Producer Crop/Acreage by Crop report.

FSA Total Acres: 202.03 Insurable: 202.03 Non-Insurable: 0.00

C Action

CLICK “Location” and level 4 location information for RMA and/or FSA will be displayed, as applicable.

683 Displaying RMA and FSA Level 4 Location (Continued)

D RMA and FSA Level 4 Location Data and Data Descriptions

The following table provides data and data descriptions for RMA level 4 location.

RMA Data	RMA Data Description
Unit	Insurable acreage of the insured crop in the county.
Grid ID	Grid ID from map for Pasture Rangeland and Forage Products and Apiculture.
Land ID Type	Identifies the type of Land ID.
Land ID	A code identifying a section of land within a farm.
Farm	An identification number assigned to a farm by the FSA county committee.
Tract	Unit of contiguous land under one ownership, which is operated as a farm, or part of a farm.
Field	Part of a farm which is separated from the balance of the farm by permanent boundaries.
Subfield	A field division used by FSA.
Reported Acres	The number of acres or tons reported by the insured before adjustment for share.
Date Planted	Latest date acreage was planted for the acreage reported on the record.
Date Reported	Most recent date RMA has received data from the AIP for the policy.

683 Displaying RMA and FSA Level 4 Location (Continued)

D RMA and FSA Level 4 Location Data and Data Descriptions (Continued)

The following table provides data and data descriptions for FSA level 4 location details.

FSA Data	FSA Data Description
Farm	The farm number entered in CARS, based on farm records.
Tract	The tract number entered in CARS, based on farm records.
Field	The field number entered in CARS, based on farm records.
Subfield	The subfield number entered in CARS.
Acreage Type	The acreage type will specify if the acreage is recorded as reported or determined in CARS.
Total Acres	Total acres will include acreage reported in CARS with crop status of initial, subsequent, double, repeat, prevented, failed, volunteer, experimental and cover.
Share	The shares entered in CARS for the crop and producer.
Date Planted	The planting date entered in CARS for the crop.
Date Reported	The last date information in CIMS is updated.
Erodible Land Type Code	An FSA GIS code indicating the highly erodible land status of the CLU.
Notes	FSA GIS comments data.
Last Change	FSA GIS date when the CLU spatial data was last updated by FSA.
CLU Date	Date GIS data was received from FSA.
GIS Status	FSA code representing the type of land contained in the CLU.

684 Displaying RMA Level 4 Policy Details for the Producer Crop/Acreage by Crop Report

A Overview

The level 4 policy details option provides specific information for the RMA policy.

Note: Policy details do **not** apply to FSA.

B Example of RMA Level 4 Policy Details for Producer Crop/Acreage by Crop Report

The following is an example of RMA level 4 policy details for the Producer Crop/Acreage by Crop report.

Policy Details									
Policy Number: Any Policy Number									
Coverage	Crop Unit	Premium	Liability	Indemnity	GRP Indemnity	Harvested Indemnity	Prevented Indemnity	Unharvested Indemnity	Replanted Indemnity
C		0.00	0.00	0.00	0.00	0.00	0.00	0.00	0.00

C Action

CLICK “Policy Details” and RMA level 4 policy information will be displayed.

D RMA Level 4 Policy Details Data and Data Descriptions

The following table provides data and data descriptions for RMA policy details.

RMA Data	RMA Data Description
Coverage	The amount of insurance protection against insured loss of production or value.
Crop Unit	Insurable acreage of the insured crop in the county.
Premium	The amount of money the insured pays for risk protection.
Liability	The total amount of insurance, value of the insured’s production guarantee, or revenue protection guarantee for the unit.
Indemnity	The dollar amount paid in the event of an insured loss.
GRP Indemnity	Indemnity paid in the event of an insured loss insured under Group Risk Plan (GRP) coverage.
Harvested Indemnity	Indemnity paid resulting from harvested acres calculation.
Prevented Indemnity	Indemnity paid resulting from prevented planting acres calculation.
Unharvested Indemnity	Indemnity paid resulting from unharvested acres calculation.

685 Accessing RMA Policy Holder Report and AIP Point of Contact

A Overview

From the policy details option user will have access to the RMA policy holder report and the AIP point of contact for the Producer Crop/Acreage by Crop report.

B Example of the RMA Policy Holder Report and AIP Point of Contact Options for the Producer Crop/Acreage by Crop Report

The following is an example of the RMA policy holder report and AIP point of contact for the Producer Crop/Acreage by Crop report.

The screenshot shows a table with the following data:

Coverage	Contract	Premium	Liability	Indemnity	GRP Indemnity	Harvested Indemnity	Prevented Indemnity	Unharvested Indemnity	Replanted Indemnity
A	XXXXXXXX	13,028.00	212,937.00	6,076.00	0.00	6,076.00	0.00	0.00	0.00

The screenshot shows a table with the following data:

	um	Liability	Indemnity	GRP Indemnity	Harvested Indemnity	Prevented Indemnity	Unharvested Indemnity	Replanted Indemnity
Policy Holder Report								
AIP Point of Contact	.00	212,937.00	6,076.00	0.00	6,076.00	0.00	0.00	0.00

C Action

CLICK:

- “Policy Holder Report” and the RMA policy holder report will be displayed
- “AIP Point of Contact” and the AIP point of contact will be displayed.

686-726 (Reserved)

Part 6 Compliance Reviews and Spot Checks

Section 1 General Guidelines, Applicable Programs, and Selection Process

727 Introduction

A Purpose

County Offices are required to conduct farm inspections to ensure that producers comply with FSA program requirements.

Producers are selected for compliance reviews and spot check through a national selection process. Producers selected will be spot checked and reviewed for all of the following programs/activities:

- ARCPLC
- BCAP
- CRP maintenance and practice check
- ECP
- EFRP
- ELAP
- FSA-578's and HELC/WC compliance
- FSFL
- LDP's/MAL's
- LFP
- LIP
- MPP
- NAP
- RTCP
- TAP.

B Time of Inspection

County Offices will conduct inspections on producers selected through the national selection process at times applicable for the specific program/activity involved. County Offices will follow applicable program procedure for timing of inspections. All spot checks must be completed and results must be recorded in the National Compliance Review database before the survey end date according to paragraph 794.

728 National Compliance Review and Spot Check Selections

A National Producer Selection Process

Rather than selecting individual farms, loans, contracts, etc., for compliance reviews, a nationwide selection of producers will be made annually by the National Office using a statistical sampling method. Producers will be selected based on their participation in various programs. FSA employees, committee members, and other required producers are included in the national selection.

Note: Because FSA employees, STC, and COC members and other “required producers” are included in the national selection, County Offices will no longer conduct separate spot checks on required producers based solely on the person’s employment status. However, FSA may at any time choose to spot check employee’s participation under any program at any time.

Early each calendar year, the National Office will post the listing of producers selected for annual compliance reviews on the Intranet at

<http://fsaintranet.sc.egov.usda.gov/ffas/farmbill/ccc/default.htm>.

The national producer selection list will be broken down by State and county. Under each county, the list will be displayed with the following:

- producer first and last name and/or business name
- tax ID type (“E”ntity or “S”ocial).

Notes: In some cases, there may be multiple producers in the county with the same name. If County Offices have concerns about which producer has been selected for spot check and review, the County Office shall contact the State Office. The State Office shall contact the National Office for TIN for the selected producer.

Producers may operate as an individual and an entity. The national producer selection list will identify the tax ID type associated with the selected producer. County Offices shall only review farms, loans, contracts, etc., associated with the tax ID type listed.

Example: Joe Farmer farms as an individual and also farms as a member of a partnership. Joe Farmer was selected for 2007 compliance reviews. The national producer selection list included his first and last name and the tax ID type S. In this example Joe Farmer was selected as an individual (based on his tax ID type). Therefore, County Offices shall only check/review farms, loans, and contacts he is associated with as an individual.

Producers will be listed for each State/county they are associated; thus, compliance reviews and spot checks may be performed for a producer in multiple States/counties depending on the scope of the operation.

County Offices will print and maintain the list of producers selected in their county. The National Office will **not** make another selection of producers for the year.

Note: Not all States and counties will have producers selected for spot check and review.

728 National Compliance Review and Spot Check Selections (Continued)**B Concurrence for Nonparticipating Selected Producers**

Because the national selection process is based in part on prior years' payments and program participation, some producers selected may not be farming or participating in FSA programs for the current year.

If a County Office determines a producer is not farming for the current year, the County Office will:

- notate "N/A" by the producer's name on the national producer selection list to indicate that the producer is not participating in FSA programs for the year
- forward the list to DD for review and concurrence.

DD's will review, initial, and date the list indicating their agreement that the producer is not farming or participating in FSA programs for the year.

C Adding Additional Producers for Spot Check/Review

Only the producers identified on the national producer selection list are required to be spot checked and reviewed for the programs listed in subparagraph A. However, State and County Offices may spot check any producer not identified on the national producer selection list if there is reason to question the producer's compliance with any program provisions.

728 National Compliance Review and Spot Check Selections (Continued)**D County Office Responsibilities**

For all producers selected under the National Selection process, County Offices will:

- perform compliance reviews throughout the year for all programs in subparagraph 727 A

Note: County Offices will follow Section 2 when performing compliance reviews/spot checks.

- when conducting compliance reviews and spot checks for:
 - FSA-578 spot checks, the current year FSA-578, as well as any prior year FSA-578 that has been revised since the last spot check list
- Note:** When reviewing prior year FSA-578's, County Offices shall ensure that the revisions are correct according to paragraph 28, and documentation is on file, if applicable.
- all other programs, any application/contract that has been approved for payment since the last spot check list
 - use compliance review questions for applicable program/activity to document and record review results in the National Compliance Review Database according to paragraphs 794 and 795.

728 National Compliance Review and Spot Check Selections (Continued)**E Available Resources**

County Offices may use the following resources as tools to assist them in identifying the specific programs selected producers are participating in:

- web-based FSA application reports
- farm records to identify active farms for selected producers
- NPS to identify program payments selected producers received
- Financial Web Application Data Mart to identify program payments received for a specific date range by selected producers
- CLPS and eLDP to identify MAL and LDP producers received in a specific county
- SORS to identify outstanding MAL's for a selected producer
- CCMS contains numerous reports identifying producers with active CRP contracts
- COC meeting minutes to identify applications/contracts approved for various programs.

729 Refusals to Permit Farm Entry**A Producer Refuses Entry**

If a producer refuses to permit an FSA representative to enter the farm, the representative will:

- immediately notify CED
- document the following on FSA-578, remarks section:
 - refusal date
 - reason for refusal
 - acreage estimate, if obtainable
- sign and date FSA-578, remarks section.

B County Office Action

When advised of a refusal to permit entry, the County Office will immediately notify the farm operator, in writing, of the following:

- refusal date
- person who made the refusal
- person who was refused entry
- consequences of refusal to permit entry (subparagraph C).

After notifying the farm operator of the situation and the options available, the FSA representative will make no further effort to enter the farm.

If the operator does not respond to the letter, or there is continued refused entry, CED will determine all producers on the farm ineligible for program benefits. Notify the operator of the farm with a single letter, with copies sent to all producers on the farm, advising them of ineligibility on this farm. Include the reasons for the decision and the opportunity to appeal the determination to the COC.

729 Refusals to Permit Farm Entry (Continued)

C Consequences of Refusing to Permit Entry

The following summarizes consequences for refusing to permit entry.

IF farm entry will...	THEN the...
not be permitted	farm producers are ineligible for FSA programs that require crop and acreage reports. Follow subparagraph B.
be permitted after receiving notification	<ul style="list-style-type: none"> <li data-bbox="594 478 1461 552">• operator must notify County Office within 15 calendar days of the notification date <li data-bbox="594 583 1461 623">• producer must pay the cost of the visit to determine the acreage.

730 Employee and Loss Adjuster Reviews

A Purpose

The purpose of employee reviews is to ensure that each employee involved in compliance activities is following procedures and that the compliance determinations are accurate.

An annual review of FSA-577's will be conducted by a State Office representative.

B Rule

Do **not** assign a farm for inspection to an FSA representative who has, or whose immediate family has, an interest in the farm.

C Spot-Checking Employees

Select farms for checking from the employee's most recent work to determine the quality of the employee's work and knowledge of program requirements. The selection shall represent the different phases and levels of difficulty on all aspects of compliance determinations required for program participation and determinations necessary for other programs.

Note: Do not remeasure all fields or bins or appraise all fields on the farm unless it is determined that the work must be redone.

730 Employee and Loss Adjuster Reviews (Continued)**D Spot Checking Loss Adjuster**

CED's are responsible for ensuring that adjusters are reviewed annually.

Note: Only LA's or certified employees are qualified to perform LA reviews. A designated State Office representative may perform LA reviews when there is an insufficient number of qualified personnel.

For experienced LA's, review the larger of the following:

- at least 2 inspections
- 2 percent of all completed CCC-576-1's.

For new LA's, review the larger of the following:

- at least 4 inspections
- 2 percent of all completed CCC-576-1's.

Activities to be reviewed will include:

- all applicable loss documents and reports of acreage and production
- crop appraisals
- acreage determinations
- farm photocopies including unit, FSN, tract number, field number, crop, and crop year
- ensure that losses submitted are consistent with other losses in the area.

County Offices will follow guidance in subparagraph D when errors are discovered.

Note: If LA's are working claims in multiple counties, coordinate between counties to ensure that the required number of reviews are performed.

730 Employee and Loss Adjuster Reviews (Continued)

E When Errors Are Discovered

Use procedure in this table when employee errors are discovered.

IF...	THEN...
an employee error is discovered	check at least 2 additional farms with the same level of difficulty of work.
further errors are	rate the work unacceptable.
work has been rated unacceptable	<ul style="list-style-type: none"> • recall or check all work assigned • assign additional training in deficient areas • do not assign further work until additional training has been completed and the deficiencies have been corrected • spot-check a sample of newly assigned work after advance training.
additional training has been assigned	State Offices will: <ul style="list-style-type: none"> • review FSA-577 for each employee • verify that additional training was completed and deficiencies have been corrected for employees rated unacceptable.

730 Employee and Loss Adjuster Reviews (Continued)

F Completing FSA-577

Document employee and loss adjuster spot-checks on FSA-577 according to this procedure. See subparagraph G for an example of FSA-577.

Item	Instructions
1 through 5	Enter county, name of employee or loss adjuster, kind of check, farm number, and crop.
6 and 7	Check applicable items for which errors, omissions, or inadequacies are noted, and provide an explanation.
8	Explain any recommended training and make additional comments as necessary.
9 A and 9 B	The designated employee shall rate the employee or loss adjuster as acceptable or not acceptable, sign, and date.
9 C and 9 D	The employee or loss adjuster shall review FSA-577 with the supervisor and sign and date.
10	The designated employee or loss adjuster shall sign and date after completing the necessary training, and recommendations.
11	<p>The State Office representative will:</p> <ul style="list-style-type: none"> • ensure that recommended action is appropriate and has been carried out • ensure that FSA-577 was reviewed with employee or loss adjuster who is being checked • sign and date.

730 Employee and Loss Adjuster Reviews (Continued)

730 Employee and Loss Adjuster Reviews (Continued)

H Distributing FSA-577

Distribute FSA-577 as follows:

- original to CP 3-3 folder for County Office spot checks according to 32-AS, Exhibit 30
- 1 copy to the employee or LA who was spot-checked
- 1 copy to DD when required by either of the following:
 - State Office review requires County Office action
 - County Office finds deficiencies that may result in an adverse action.

731-752 (Reserved)

Section 2 Performing Compliance Reviews and Spot Checks

753 ARCPLC Compliance Reviews

A Introduction

The ARCPLC spot check process is State, county, and farm specific. Reviews will be completed on all producers participating in ARCPLC and selected for spot check according to national producer selection process in paragraph 728. County Offices will ensure that the spot check process is completed for each farm associated with the selected producer.

Note: ARCPLC is applicable to compliance reviews and spot checks for 2015 and subsequent years only.

753 ARCPLC Compliance Reviews (Continued)

B ARCPLC Compliance Review Questions

Document the following during ACRPLC compliance reviews and record findings in the National Compliance Review Database. Findings must be recorded by FSN.

County Offices must first enter the farm number for the applicable farm being spot-checked. County Office users shall take extra caution when entering the farm number in the National Compliance Review Database because there is **not** a validation to the farm records maintenance system.

Question	
Yield Certification	
1	Was CCC-859 completed for one or more covered commodities on the farm? Yes, No, or N/A
2	If yes, was an actual or substitute yield entered for each year the covered commodity was planted during the 2008 – 2012 crop years? Yes, No, or N/A
3	Does the production evidence support the yields certified on the CCC-859? Yes, No, or N/A Important: If records other than RMA yield data were used to support yield certification, require the producer on the farm to furnish production evidence to support the yields certified on the CCC-859.
4	Are the covered commodity yields, as calculated using yield data from CCC-859, correctly calculated and listed on CCC-858? Yes, No, or N/A
5	Was CCC-858 signed by one or more of the farm’s current owners? Yes, No, or N/A
Base Reallocation	
1	Was acreage history for the 2009 – 2012 updated correctly? Yes, No, or N/A
2	If a late-filed acreage report was filed for one or more years 2009 – 2012, was policy in 2-CP met? Yes, No, or N/A
3	Are the correct covered commodity crop base acres listed on the CCC-858? Yes, No, or N/A
4	Was CCC-858 signed by one or more of the current farm owners? Yes, No, or N/A

753 ARCPLC Compliance Reviews (Continued)

B ARCPLC Compliance Review Questions (Continued)

Question (Continued)	
Election of Program	
1	Was the CCC-857 for the farm filed timely? Yes, No, or N/A
2	If no; were all covered commodity crop base acres on the farm defaulted into the PLC program election with no PLC payments issued in 2014? Yes, No, or N/A
Enrollment: CCC-861 for Farms in ARC-CO and/or PLC	
THE review shall be conducted on... FOR the...	
	<ul style="list-style-type: none"> • 2014 and 2015 contracts • 2016 contracts
	<ul style="list-style-type: none"> • 2015 compliance review period • 2016 compliance review period.
1	Does each producer sharing in base acres, including attributed generic base acres, have control of enough effective DCP cropland to support their share of the base acreage on CCC-861? Yes, No, or N/A
2	Did the producer accurately report all FAV's planted on payment acres of the farm? Yes, No, or N/A
3	If FAV were planted on payment acres of the farm, was the acre for acre reduction properly assessed? Yes, No, or N/A
4	Were wind and water erosion and weeds (including noxious weeds) controlled on the farm? Yes, No, or N/A
5	If no; did the producer correct the maintenance default on the farm? Yes, No, or N/A
6	Were zero share signatures of landowner provisions provided in 1-ARCPLC, subparagraph 204 C, met if the lease agreement is in the second or later year? Yes, No, or N/A
7	If the farm had a prior year CRP contract that expired, did the County Office properly restore base acres that were reduced from when the CRP contract was originally enrolled? Yes, No, or N/A
8	Were base acre reductions properly completed for CRP, GRP, or WRP enrollment before completing CCC-861 or CCC-862 for the applicable year? Yes, No, or N/A
Enrollment: CCC-862 for Farms in ARC-CO and/or PLC	
THE review shall be conducted on... FOR the...	
	<ul style="list-style-type: none"> • 2014 and 2015 contracts • 2016 contracts
	<ul style="list-style-type: none"> • 2015 compliance review period • 2016 compliance review period.
1	Did each producer sharing in covered commodities as reported on FSA-578, also sign CCC-862? Yes, No, or N/A
2	Did the producer accurately report all FAV's planted on payment acres of the farm? Yes, No, or N/A
3	If FAV were planted on payment acres of the farm, was the acre for acre reduction properly assessed? Yes, No, or N/A

753 ARCPLC Compliance Reviews (Continued)

B ARCPLC Compliance Review Questions (Continued)

Question (Continued)	
Enrollment: CCC-862 for Farms in ARC-CO and/or PLC	
4	Were wind and water erosion and weeds (including noxious weeds) controlled on the farm? Yes, No, or N/A
5	If no; did the producer correct the maintenance default on the farm? Yes, No, or N/A
6	Were zero Share signatures of landowner provisions provided in 1-ARCPLC subparagraph 204 C met if the lease agreement is in the second or later year? Yes, No, or N/A
7	If the farm had a prior year CRP contract that expired, did the County Office properly restore base acres that were reduced from when the CRP contract was originally enrolled? Yes, No, or N/A
8	Were base acre reductions properly completed for CRP, GRP or WRP enrollment before completing CCC-861 or CCC-862 for the applicable year? Yes, No, or N/A

754 CRP Compliance Reviews

A CRP Maintenance Reviews

The national producer selection process for compliance described in subparagraph 728 A must be used for CRP compliance. CRP spot checks will be performed on all contracts where selected producers have a share. When completing spot checks, County Offices will collect information sufficient to answer the National Compliance Review Database questions and document that information on FSA-578. This information must be recorded in the National Compliance Review Database according to paragraphs 794 and 795.

The questions included in the National Compliance Review Database are as follows.

Questions	
Enter the CRP Contract Number for the Applicable Contract Being Spot Checked	
1	Has an approved cover been maintained according to the conservation plan? Yes or No. If no, select all of the following that apply.
	A Did COC determine that the participant made a good faith effort to comply with the terms and conditions of CRP-1?
	B Is the finding currently in the process of being appealed?
	C Was a violation found on all or a portion of the contract?
2	Has the producer(s) performed required management activities according to the conservation plan? Yes or No. If no, select all of the following that apply.
	A Did COC determine that the participant made a good faith effort to comply with the terms and conditions of CRP-1?
	B Is the finding currently in the process of being appealed?
	C Was a violation found on all or a portion of CRP-1?
3	Has the approved cover been harvested or grazed without authorization or has other commercial use been made of the forage (exception: emergency haying or grazing)? Yes or No. If yes, select all of the following that apply.
	A Did COC determine that the participant made a good faith effort to comply with the terms and conditions of CRP-1?
	B Is the finding currently in the process of being appealed?
	C Was a violation found on all or a portion of CRP-1?
4	Has an unauthorized crop such as an agricultural commodity been planted on acreage under CRP-1? Yes or No. If yes, select all of the following that apply.
	A Did COC determine that the participant made a good faith effort to comply with the terms and conditions of CRP-1?
	B Is the finding is currently in the process of being appealed?
	C Was a violation found on all or a portion of CRP-1?
5	Has the producer(s) conducted an activity on CRP acres without authorization, including unauthorized treatment, such as mowing, spraying, or burning of CRP under the primary nesting or brood rearing season? Yes or No. If yes, select all the following that apply.
	A Did COC determine that the participant made a good faith effort to comply with the terms and conditions of CRP-1?
	B Is the finding currently in the process of being appealed?
	C Was a violation found on all or a portion of CRP-1?

754 CRP Compliance Reviews (Continued)

A CRP Maintenance Reviews (Continued)

Questions	
Enter the CRP Contract Number for the Applicable Contract Being Spot Checked	
6	Have trees been harvested or sold, or other commercial use been made of trees, including the shearing or shaping of trees for Christmas trees or removal of pine straw? Yes or No. If yes, select all of the following that apply.
A	Did COC determine that the participant made a good faith effort to comply with the terms and conditions of CRP-1?
B	Is the finding currently in the process of being appealed?
C	Was a violation found on all or a portion of CRP-1?
7	Have undesirable weeds, plants, insects, or pests, as determined by COC, not been controlled on the designated acreage? Yes or No. If yes, select all of the following that apply.
A	Did COC determine that the participant made a good faith effort to comply with the terms and conditions of CRP-1?
B	Is the finding currently in the process of being appealed?
C	Was a violation found on all or a portion of CRP-1?
8	Has a satisfactory cover or required practice been established or re-established within the time prescribed? Yes or No. If no, has an extension of time to complete the practice been authorized? If no to both, select all of the following that apply.
A	Did COC determine that the participant made a good faith effort to comply with the terms and conditions of CRP-1?
B	Is the finding currently in the process of being appealed?
C	Was a violation found on all or a portion of CRP-1?
Note: The reverse side of FSA-578 may be used as an additional remarks section.	

754 CRP Compliance Reviews (Continued)

B CRP Acreage/Practice Reviews

Perform spot-check inspections on CRP acres as follows.

- CRP acres are not subject to spot check until NRCS has completed the final status review.

Exception: Spot-check before the final status review if emergency use is authorized.

- After final NRCS status review has been received, perform spot-checks through on-site inspections for participating producers selected according to subparagraph 728 B to verify that CRP acreage and practices are being maintained according to 2-CRP.

755 ECP Compliance Reviews**A ECP Practice Lifespan Reviews**

The national producer selection process for compliance described in subparagraph 728 A will be used for ECP compliance. ECP spot checks shall be performed on all contracts with an active lifespan and the selected producer received C/S. The lifespan of a practice is a period of time for which the practice is subject to spot checks to verify that it is being maintained and used for the purpose designed. Lifespans begin January 1 after the calendar year the practice is installed.

ECP participants must maintain practices according to 1-ECP for the practice lifespan specified in the ECP practice description (for example, EC1, 1-year lifespan, EC2; EC3; EC4; EC6, 10-year lifespan).

The ECP participant must refund all or part of the C/S assistance paid, as determined by COC, if before the expiration of the practice lifespan specified on the ECP agreement, the practice is destroyed or not properly maintained. If the participant voluntarily relinquishes control or title to the land on which the ECP practice has been established, the original participant is responsible for the C/S refund if a written statement has not been obtained from the new owner, operator, or both, agreeing to properly maintain the practice for the remainder of its specified lifespan.

755 ECP Compliance Reviews (Continued)

B ECP Compliance Review Questions

When completing spot checks, County Offices will collect information sufficient to answer the National Compliance Review Database questions and document that information on FSA-276. This information must be recorded in the National Compliance Review Database according to paragraphs 794 and 795. The questions included in the National Compliance Review Database are as follows.

Question	
1	Has the producer(s) received ECP C/S for a practice which has an active practice maintenance lifespan? Yes or No. If no, no further action is needed.
2	Is the land on which the ECP practice was performed in agricultural production or has an agricultural productive capacity? Yes or No
3	Has the applicable ECP practice been maintained and is serving its intended purpose? Yes or No, if "Yes", skip to question 5.
4	If the applicable ECP practice has NOT been maintained or is not serving its intended purpose, has the COC made the applicable determination? Yes, violation; Yes, no violation; or No, no determination made.
5	Was the FSA-848B signed by participant and, if applicable, TA provider before the payment was issued? Yes or No
6	Is the FSA-850, NRCS-CPA-052 or State equivalent timely filed, when required? Yes, No, or N/A
7	Are expenses used to calculate C/S eligible? Yes or No
8	Is the payment equal to or less than 75% of the participant's cost (90% for limited resource participants)? Yes or No
9	Does the participant meet all eligibility requirements? Yes or No
10	Does the land meet eligibility requirements? Yes or No
11	Is the payment equal to or less than 50 percent of the agricultural market value of the land? Yes or No

756 EFRP Compliance Reviews**A EFRP Practice Lifespan Reviews**

The national producer selection process for compliance described in subparagraph 728 A will be used for EFRP compliance. EFRP spot checks shall be performed on all contracts with an active lifespan and the selected producer received C/S. The lifespan of a practice is a period of time for which the practice is subject to spot checks to verify that it is being maintained and used for the purpose designed. Lifespans begin January 1 after the calendar year the practice is installed.

EFRP participant must maintain practices for at least 10 years following the calendar year of installation, according to 1-EFRP.

The EFRP participant must refund all or part of the C/S assistance paid, as determined by COC, if before the expiration of the practice lifespan specified on the EFRP agreement, the practice is destroyed or not properly maintained. If the participant voluntarily relinquishes control or title to the land on which the EFRP practice has been established, the original participant is responsible for the C/S refund if a written statement has not been obtained from the new owner agreeing to properly maintain the practice for the remainder of its specified lifespan.

756 EFRP Compliance Reviews (Continued)

B EFRP Compliance Review Questions

When completing spot checks, County Offices shall collect information sufficient to answer the National Compliance Review Database questions and document that information on FSA-276. This information will be recorded in the National Compliance Review Database according to paragraphs 794 and 795. The questions included in the National Compliance Review Database are as follows.

Question	
1	Has the producer(s) received EFRP C/S for a practice which has an active practice maintenance lifespan? Yes or No. If no, no further action is needed.
2	Is the land on which the EFRP practice was performed non-industrial private forest? Yes or No
3	Has the applicable EFRP practice been maintained and is serving its intended purpose? Yes or No, if "Yes", skip to question 5.
4	If the applicable EFRP practice has NOT been maintained or is not serving its intended purpose, has the COC made the applicable determination? Yes, violation; Yes, no violation; or No, no determination made.
5	Was the FSA-848B signed by participant and TA provider before the payment was issued? Yes or No
6	Is the FSA-850, NRCS-CPA-052 or State equivalent timely filed, when required? Yes, No, or N/A
7	Are expenses used to calculate C/S eligible? Yes or No
8	Is the payment equal to or less than 75% of the participant's cost? Yes or No
9	Does the participant meet all eligibility requirements? Yes or No

757 FSA-578/Crop Acreage Compliance Reviews**A Introduction**

County Offices will:

- perform acreage spot checks to ensure the accuracy of reported acreage
- conduct acreage spot checks on all:
 - producers selected in the county through the national compliance review/spot check selection process in subparagraph 728 A
 - late-filed acreage reports filed for crops according to paragraph 27.

B Time of Inspection

County Offices will inspect farms before evidence of the crop is destroyed.

C When to Use Ground Compliance

County Offices will use ground compliance to determine acreage when digital imagery is not received or is not received timely.

County Office may use NAIP imagery from the current (spot check) year in lieu of a ground compliance if the NAIP imagery is available and can be used to verify the existence and acreage of the reported crop. The County Office must conduct ground compliance if the NAIP imagery does not allow for clear identification of the reported crop and acreage.

In addition, the County Office may use NAIP imagery from the prior year if the acreage being reviewed is a perennial crop and was reported in the prior year or is a crop rolled to the current year acreage report using the continuous certification provisions. The prior year NAIP imagery must clearly show the existence and acreage of the crop. The County Office must conduct ground compliance if the prior year NAIP imagery does not allow for clear identification of the reported crop and acreage.

D Performing Reviews

The entire acreage for the crop reported on FSA-578 must be spot checked.

If a selected producer is a field rent tenant on a farm that has several tenants and landowners, County Offices must check the entire crop acreage of the crop that the selected producer has an interest in, not all crops on the farm.

Example: Producer A is a tenant on the farm and only has control of 10 acres on which he has planted corn. Producer A is selected for spot check. In this case, the County Office must check all of the corn on the farm. The County Office does not have to check any other crops on the farm unless Producer A plants another crop.

757 FSA-578/Crop Acreage Compliance Reviews (Continued)

D Performing Reviews (Continued)

The following table provides guidance for conducting acreage compliance reviews when more than 10 farms are associated with the selected producer and/or when more than 2500 acres are associated with the selected farm(s).

IF the producer selected for review is associated with...	THEN the County Office must complete FSA-578/Crop Acreage Compliance review, including ground compliance visits for...			
10 or less farms	all farms.			
more than 10 farms	a random selection of a minimum of 10 farms.			
	IF, for all the farms randomly selected, there are...	THEN...		
	no crops out of tolerance and no COC determinations of noncompliance	no further farms must be reviewed.		
	One or more crops are out of tolerance or the COC determines noncompliance	randomly select and complete review on 1 additional farm for every 10 farms remaining on the list of associated farms.		
		IF, for the additional farms randomly selected, there are...	THEN...	
		no crops out of tolerance and no COC determinations of noncompliance	no further farms must be reviewed.	
One or more crops out of tolerance or the COC determines noncompliance	review all farms.			

Example: Producer A selected for spot check and has 32 associated farms administered by County Office X. County Office X randomly selects 10 farms for review. The COC determined the producer is in noncompliance due to unreported FAV. County Office X must randomly select an additional 2 farms for review. No additional issues are discovered, therefore, no additional farms must be reviewed for the producer for County Office X.

757 FSA-578/Crop Acreage Compliance Reviews (Continued)

D Performing Reviews (Continued)

IF a farm chosen for spot check for the selected producer has...	THEN, the County Office must complete ground compliance reviews on...		
less than 2500 acres certified on the FSA-578,	all acreage on the chosen farm(s).		
more than 2500 acres certified on the FSA-578,	a randomly selected 50% of the acres certified on the FSA-578, beginning with the annually planted crops and CRP acreage.		
	IF, for the first 50% of the acres selected, there are...	THEN...	
	no crops out of tolerance and no COC determinations of noncompliance	no further acreage for the chosen farm must be reviewed.	
	one or more crops out of tolerance or the COC determines noncompliance	complete ground compliance on a randomly selected additional 25% of the remaining acres or all acreage if less than 1500 acres remain.	
	IF, for the additional chosen acreage, there are...	THEN...	
	no crops out of tolerance and no COC determinations of noncompliance	no further acreage must be reviewed.	
one or more crops out of tolerance or the COC determines noncompliance	review all acreage for the chosen farm.		

Example: Farm 100 selected for spot check has 2800 certified acres (1000 acres annually planted crops/CRP and 1800 haying/grazing acres). County Office X reviews all 1000 acres of the annually planted/CRP certified acreage and randomly selects 400 acres of the haying/grazing land to review. The producer is determined out of tolerance on CRP acres. County Office X must review the balance of the acreage on the farm, as less than 1500 acres remain to be reviewed.

757 FSA-578/Crop Acreage Compliance Reviews (Continued)**E Recording Determined Acreage Results**

County Offices will:

- *--enter acreage determinations in the FSA-578 software according to paragraph 164--*
- use FSA-468 software to notify producers of spot check results.

F Data Entered into the National Compliance Review Database

For all producers selected for compliance review and spot check according to the national compliance selection process in subparagraph 728 A, the following data shall be recorded for entry into the National Compliance Review Database. See paragraphs 794 and 795 for instructions on accessing and entering data in the National Compliance Review Database.

- How many farms does the selected producer have an interest in? Enter the number of farms. For each farm and crop, enter “Yes” or “No” to the following.
- Is producer out of tolerance on acreage?
- If yes, did COC determine producer knowingly and willfully submitted an inaccurate FSA-578?

758 HELC and WC Compliance Reviews**A Introduction**

This paragraph describes the processes and responsibilities of FSA and NRCS in performing HELC and WC inspections and determinations.

County Offices will conduct HELC and WC inspections at the same time as regular compliance inspections and be on the alert for potential violations of conservation compliance provisions.

NRCS is responsible for conducting spot checks to ensure that producers are actively applying their conservation plan.

B Who Makes HELC Inspections

FSA will check for potential noncompliance with HELC provisions while conducting regular compliance spot checks.

NRCS will make HELC spot-check determinations for:

- potential noncompliance referred by FSA on FSA-569
- a random selection of conservation plans.

758 HELC and WC Compliance Reviews (Continued)

C Spot-Checking HELC

FSA will review farms for producers selected for spot check to identify potential HELC noncompliance. A potential noncompliance on spot-checked farms may be identified by:

- current year imagery, if available, or field observations with the CLU layer
- reviewing past FSA records
- County Office knowledge of farming practices in the area.

D Land Uses for HELC Review

The land planted to an agricultural commodity shall be reviewed for HELC compliance.

E Potential HELC Noncompliance

Potential HELC noncompliance exists on fields planted to agricultural commodities if any of the following conditions are observed or reported:

- a HEL determination is not recorded on the CLU layer
- a field has been designated HEL and it does not appear to have been cropped in prior years but is currently being cropped

Example: Land classified as HEL appeared to have been permanent pasture. This was confirmed by reviewing past records. The pasture was plowed and planted to soybeans.

- appears that conservation practices that may be required under a conservation system or plan may have been destroyed.

Example: Contour strips that are visible on the digital imagery are plowed in a field classified as HEL, and the entire field is planted to cotton.

F Verify Filing AD-1026

Determine whether any producers associated with land are required to comply with HELC provisions if a potential HELC noncompliance is discovered during the spot-check procedure according to subparagraph E, and take action according to the following.

Note: The following does not apply if NRCS requests FSA-569. If NRCS requests FSA-569, prepare FSA-569 according to 6-CP.

IF a potential HELC noncompliance is discovered during a spot check and...	THEN...
a producer filed AD-1026 certifying HELC compliance on the land	prepare FSA-569 according to 6-CP for referral to NRCS for a determination.
no producers have filed AD-1026 to certify HELC compliance on the land	do not refer to NRCS for a determination.

758 HELC and WC Compliance Reviews (Continued)

G WC Inspections

Use the following to determine when FSA-569 is referred to NRCS for WC compliance determinations on farms selected for spot check.

Note: The following does not apply if NRCS requests FSA-569. If NRCS requests FSA-569, prepare FSA-569 according to 6-CP, paragraph 501.

Prepare FSA-569 if the land is...	AND...
classified as CW or CWXX	both of the following apply: <ul style="list-style-type: none"> • producer is a program participant • CW or CWXX was planted to an agricultural commodity.
classified as W	the land appears to have been manipulated in a way that would alter the W classification.
either of the following: <ul style="list-style-type: none"> • classified as FW • does not have W determinations made by NRCS 	the land appears to have been manipulated in any way that would alter W characteristics. <p>Example 1: FW that is normally planted only in extremely dry years is planted in a year with average or above average rainfall.</p> <p>Example 2: An area that is planted to an agricultural commodity:</p> <ul style="list-style-type: none"> • appears on aerial photography as a wet area in a year with average or above average rainfall • does not have a W determination by NRCS. <p>Example 3: There appears to be a new ditch through a wet area.</p>

758 HELC and WC Compliance Reviews (Continued)

H Recording Inspections

Record results of inspections on FSA-578, remarks section, according to the following.

IF...	THEN...
there is no apparent HELC or WC noncompliance	on FSA-578, enter “no apparent noncompliance noted”.
a suspected HELC noncompliance is discovered	<ul style="list-style-type: none"> • prepare FSA-569 according to 6-CP, paragraph 501 • on FSA-578, enter “Potential HELC noncompliance on field no. _____ and tract no. _____. FSA-569 referred to NRCS on (enter date referred).”
a suspected WC noncompliance is discovered	<ul style="list-style-type: none"> • prepare FSA-569 according to 6-CP, paragraph 501 • on FSA-578, enter “Potential WC noncompliance on field no. _____ and tract no. _____. FSA-569 referred to NRCS on (enter date referred).”

The following results must be recorded in the National Compliance Review Database. See paragraphs 794 and 795 for accessing and entering data in the National Compliance Review Database. The following information shall be recorded by farm for each producer selected for spot check according to paragraph 728.

- Were there potential HEL violations on the farm? If yes, where potential violations referred to NRCS?
- Were there potential WC violations on the farm? If yes, where potential violations referred to NRCS?

I Following 6-CP for Ineligibility Determinations

When FSA-569 is returned from NRCS to confirm that an HELC or WC noncompliance has occurred, follow 6-CP for:

- determining ineligible producers
- notifying ineligible producers.

759 LDP's/MAL Compliance Reviews

A Performing Reviews

Spot checks of MAL and LDP activity, for producer eligibility with producers selected through the national selection process according to subparagraph 728 A, will be conducted in the same manner as previous crop years as provided in 8-LP. Details of the spot check findings for LDP's or MAL's will be recorded in the National Compliance Review Database by answering the following questions, if applicable.

Note: Violations and shortages that are discovered as a result of the spot check must be recorded in the applicable system according to program directives.

For LDP's:

- State Code: _____
- County Code: _____
- Crop Code: _____
- LDP No.: _____
- LDP Quantity: _____
- LDP Amount: _____

Questions	
1	Was the LDP amount entered into the Interim Process for Attributing LDP's to check producer eligibility and record/control payment limitation? Yes or No.
a	If No , explain why.
2	Did the Interim Process indicate that the LDP amount was to be reduced? Yes or No
a	If Yes , was the LDP amount reduced according to procedure? Yes or No
3	Type of production evidence provided for this LDP: LS – Load Summary Sheets; MS – Paid Measurement Service; WR – Warehouse Receipts; Other _____ (For acceptable production evidence, see 8-LP)
4	Did the acceptable production evidence indicate a quantity equal to or greater than the LDP quantity requested and disbursed? Yes or No
a	If No , indicate whether the acceptable production evidence resulted in a shortage or violation. Shortage or Violation
5	Has the producer violated the LDP terms and conditions? Yes or No.
a	If Yes , explain and indicate the actions taken.

759 LDP's/MAL Compliance Reviews (Continued)

A Performing Reviews (Continued)

For MAL's:

- State Code: _____
- County Code: _____
- Crop Code: _____
- Loan No.: _____
- Original Loan Quantity: _____
- Original Loan Amount: _____
- Outstanding Loan Quantity: _____
- Outstanding Loan Amount: _____

Questions	
1	Was a farm-visit conducted to complete the spot check? Yes or No.
a	If No , please explain.
b	If Yes , was the loan quantity measured equal to or greater than the total loan quantity pledged as collateral or outstanding on the loan? Yes or No
c	If No , did the measured loan quantity result in a shortage or violation? Shortage or Violation
2	Was any quantity of this loan repaid with a market loan gain? Yes or No
a	If Yes , indicate the type of production evidence provided: LS – Load Summary Sheets; MS - Paid Measurement Service; WR – Warehouse Receipts; Other _____ (For acceptable production evidence, see 8-LP)
3	Did the acceptable production evidence indicate a quantity equal to or greater than the total loan quantity repaid with a market loan gain? Yes or No
a	If No , indicate whether the acceptable production evidence resulted in a shortage or violation. Shortage or Violation
4	Has the producer violated the terms and conditions of the Loan Note and Security Agreement? Yes or No.
a	If Yes , explain and indicate the actions taken.

760 MPP Compliance Reviews

A Performing Reviews

County Offices will conduct MPP compliance reviews for producers selected for spot-check and review under the national spot-check selection process.

B MPP Compliance Review Questions

Document the following during MPP reviews and record the findings in the National Compliance Review Database.

Question	
1	Name of dairy operation spot checked. Enter name.
2	Is the dairy operation still commercially marketing milk? Yes or No If yes, was all documentation validated? Yes or No
3	Was a valid signature obtained on the CCC-781 timely? Yes or No
4	Was a valid signature obtained on the CCC-782 timely? Yes or No
5	Does the dairy operation meet the definition of an eligible dairy operation according to the State’s interpretation of a dairy operation? Yes or No
6	Is the dairy operation currently enrolled in the LGM Dairy Program? Yes or No
7	Did the COC verify dairy operation active policy under LGM Dairy Program? Yes or No If yes, was the LGM Dairy listing checked to determine if any producer on the list is a part of a registering dairy operation? Yes or No Did the COC require proof of the completion of target marketing months under LGM Dairy for any producer found on the LGM Dairy listing and indicated on CCC-782? Yes or No
8	If any payment was issued, did the dairy operation meet all eligibility requirements (AD-1026, foreign person rules)? Yes or No
9	If the dairy operation was determined to be an existing operation, was the production history calculated correctly by using the highest of 2011, 2012 or 2013 milk marketings? Yes or No
10	If the dairy operation was determined to be a new operation, was the production history calculated correctly by using the extrapolation method or National Rolling Herd Average? Yes or No
11	For 2017 and future years was the affiliation rule applied correctly? Yes, No, or N/A
12	Is there production evidence on file to support the establishment of the production history? Yes or No

760 MPP Compliance Reviews (Continued)

B MPP Compliance Review Questions (Continued)

Question (Continued)	
13	Was the bump calculated correctly for the dairy operation for the 2017 coverage year? Yes or No
14	Did the dairy operation pay the \$100 administrative fee for the 2017 coverage year? Yes or No
15	If the administrative fee for coverage year 2016 was paid after October 31, 2017, was the CCC-782 for 2017 coverage disapproved? Yes, No, or N/A
16	If the dairy operation selected buy-up coverage was the premium calculated correctly for the 2017 coverage year? Yes, No, or N/A
17	If the dairy operation selected buy-up coverage for the 2017 coverage year was the total premium paid in full by September 1? Yes, No, or N/A
18	Has the dairy operation completed any relocation, mergers, succession-in-interest, or intergenerational transfers of production history? Yes or No If yes, did the dairy operation complete CCC-781? Yes or No
19	Did the dairy operation update their coverage elections during the most recent annual coverage election period? Yes or No If yes, did the dairy operation complete form CCC-782 and was it signed by all producers in the dairy operation? Yes or No

761 NAP Compliance Reviews

A NAP Approved Yield Reviews

County Offices will conduct NAP approved yield reviews on all producers participating in NAP that have been selected through the National selection process according to subparagraph 728 A. NAP approved yield reviews shall be performed according to 1-NAP (Rev. 2).

After completing CCC-579 according to 1-NAP (Rev. 2), subparagraph 775 D, record the findings in the National Compliance Review Database.

Note: Findings shall be recorded by unit, crop, type, intended use, practice, planting period, organic status, and native sod status.

- Does production evidence support certified production for the most recent three APH years?
- Was the current approved yield changed as a result of a spot check?
- Will a correction be made to the approved yield for the following year?

B NAP General Review Questions

County Offices will conduct general NAP reviews for any producer participating in NAP that has been selected for review and spot check through the National selection process according to subparagraph 728 A.

Document general NAP reviews and enter the following in the National Compliance Review Database. Findings will be recorded by unit, crop, crop type, intended use, practice, planting period, organic status, and native sod status.

Question	
1	Was the CCC-471 Application for Coverage timely filed and accompanied by the applicable service fee or CCC-860? Yes or No
2	Was the transfer of NAP coverage initiated after the application closing date and before the earlier of the disaster event or end of coverage? Yes, No, or N/A
3	For yield based crops , did the producer exceed acreage and/or production variance limitation according to 1-NAP (Rev. 2) when reporting acreage and/or production? Yes, No, or N/A. If yes, did COC determine the producer eligible or ineligible? Eligible or Ineligible

761 NAP Compliance Reviews (Continued)

B NAP General Review Questions (Continued)

Question	
4	For value loss crops , did the field market value A (FMVA) and field market value B (FMVB) accurately reflect the producer's inventory records and valuation used to calculate loss? Yes, No, or N/A . If no, what was the overpayment or underpayment ? \$_____
5	Did the producer provide evidence showing a valid commodity ownership share interest and control of the crop acreage at the time of disaster? Yes, No, or N/A
6	Did the producer plant the crop(s) by the STC established final planting date? Yes, No, or N/A . If no, were late planting provisions properly applied? Yes or No
7	Was the CCC-576 Notice of Loss timely filed? Yes or No . If no, is inspection on file for late-filed Notice of Loss? Yes, No, or N/A
8	Did the producer request a Historical Marketing Percentage option on the CCC-471 (applicable only to crops with Buy-up coverage), and provide acceptable marketing records showing actual final use? Yes or No
9	Did the producer request a Direct Marketing Percentage option on the CCC-471 (applicable only to crops with Buy-up coverage), and provide acceptable marketing records showing actual final use? Yes or No
10	Did the producer accurately and timely certify unit acreage on FSA-578? Yes or No . If no, was physical existence of the crop verified?
11	Was the CCC-576 Application for Payment timely filed and accompanied by production evidence? Yes, No, or N/A
12	For hand harvested crops , did the producer notify the county office within 15 days after hand harvest was complete and before deterioration or destruction of the crop? Yes, No, or N/A
13	Did the producer provide verifiable or reliable production records for determining payment? Yes, No, or N/A . If no, was a CCC-576-1 Appraisal/Production Report completed for the unharvested crop(s)? Yes or No
14	For hand harvested crops, did a producer with a share in the unit notify FSA of the damage or loss through the administrative county office for the unit within 72 hours of the date damage or loss first became apparent? Yes or No
15	If a quality adjustment was applied, was the State, County and Crop combination approved by DAFP for quality loss implementation <i>before</i> the application closing date? Yes, No, or N/A

761 NAP Compliance Reviews (Continued)

C NAP Reports

Quality control reviews for NAP are required to ensure that NAP is administered according to applicable regulations.

See 3-NAP for printing the NAP Review Register Report.

D Second Party Reviews

Second party reviews are required to ensure that the payment was properly calculated and reviewed by a second party according to 1-NAP (Rev. 2).

762 TAP Compliance Reviews

A Performing Reviews

County Offices will perform TAP compliance reviews for any producer that participated in TAP that was selected for spot check and review through the national producer selection process in subparagraph 728 A.

TAP Compliance Review Questions

During reviews, record answers to the following questions into the National Compliance Review Database. Record data by stand, applicant’s share, and crop.

Question	
1	Was a valid signature obtained on the TAP application in the administrative County Office? Yes or No
2	Were mortality losses the result of an eligible natural disaster? Yes or No
3	Did the stand sustain a mortality loss in excess of 15 percent after adjustment for normal mortality? Yes or No
4	Was a field visit performed by a certified LA to verify and determine tree, bush, and vine losses? Yes or No
5	Did the applicant complete all practices for the stand as indicated on the TAP application? Yes or No
6	Did the applicant’s receipts accurately reflect actual costs incurred for all components of the completed practices? Yes or No <ul style="list-style-type: none"> • If yes, no further action is needed. • If no, what was the overpayment or underpayment? \$_____

763 ELAP Compliance Reviews

A Performing Reviews

County Offices will document the following questions during ELAP reviews. Findings shall be loaded in the National Compliance Review Database.

B ELAP Compliance Review Questions

Document ELAP compliance reviews and enter the following in the National Compliance Review Database.

Question	
Livestock, Honeybees, and Farm-Raised Fish Losses	
1	Was a valid signature obtained on ELAP application? Yes or No
2	Did the participant timely file a notice of loss? Yes or No
3	Did the participant suffer livestock, honeybees, and/or farm-raised fish losses because of an eligible adverse weather event or loss condition that occurred in the program year for which assistance is being requested? Yes or No
4	For discrepancies, did any discrepancy result in a refund of ELAP benefits? Yes or No If yes, enter requested refund amount \$_____
Livestock Losses	
5	If participant is applying for livestock losses, does participant’s current inventory of applicable livestock match the number and/or kind/type/weight range of livestock claimed on the ELAP application? Yes or No
6	If participant is applying for livestock losses, did the participant, during the 60 calendar days before the beginning of the eligible adverse weather event or loss condition, own, lease, purchase, enter into a contract to purchase, or was a contract grower of the livestock claimed on the ELAP application? Yes or No
7	If the participant is applying for livestock losses, did all livestock entered on the ELAP application meet all eligibility criteria, including being maintained for commercial use as part of the participant’s farming operation? Yes or No
8	If the participant is applying for livestock death losses, did the participant provide verifiable documentation of livestock deaths claimed on CCC-851, including livestock that the participant claims died because of normal mortality? Yes or No
9	If the participant is applying for livestock grazing losses, did the participant suffer a grazing loss on eligible grazing lands physically located in the county where the eligible adverse weather or loss condition occurred because of an eligible adverse weather event or loss condition? Yes or No
10	For purchased livestock feed losses, did the participant provide original receipts for forage or feed stuffs purchased? Yes or No

763 ELAP Compliance Reviews (Continued)

B ELAP Compliance Review Questions (Continued)

Question	
Livestock Losses (Continued)	
11	If the participant is applying for livestock feed losses resulting from the purchase of additional livestock feed, above normal quantities, did the participant provide original receipts or summary purchase receipts for forage or feed stuffs that was purchased by the participant for the time of the eligible adverse weather event or loss condition for the year immediately preceding the program year for which additional feed costs are being claimed? Yes or No
12	If the participant is applying for livestock feed losses resulting from the purchase of additional livestock feed, above normal quantities, did the participant provide original receipts or summary purchase receipts for forage or feed stuffs that was purchased by the participant for the timeframe of the eligible adverse weather event or loss condition for the program year for which additional costs are being claimed to feed the participant’s eligible livestock? Yes or No
Honeybee Losses	
13	If the participant is applying for honeybee losses, did the participant have a risk in the honey production, pollination, or honeybee breeding operation for producing honey, pollinating, or breeding honeybees for commercial use as part of a farming operation on the beginning date of the eligible adverse weather event or loss condition? Yes or No
14	If the participant is applying for honeybee colony and/or hive losses, did the participant provide acceptable proof of beginning and ending inventory of honeybee colonies and/or hives? Yes or No
15	If the participant is applying for honeybee colony and/or hive losses, did the participant provide proof of good management practices as established by COC? Yes or No

763 ELAP Compliance Reviews (Continued)

B ELAP Compliance Review Questions (Continued)

Question	
Honeybee Losses (Continued)	
16	If the participant is applying for honeybee feed losses, did the participant provide verifiable documentation of purchased feed intended as feed for honeybees that was lost or additional feed purchased above normal quantities to sustain honeybees for a short period of time until additional feed becomes available because of an eligible adverse weather event or loss condition? Yes or No
Farm-Raised Fish Losses	
17	If the participant is applying for farm-raised fish losses, was the participant a producer of an aquatic species that is propagated and reared in a controlled environment, that is being maintained for commercial use as part of the producer’s farming operation? Yes or No
18	If the participant is applying for farm-raised fish feed losses, did the participant provide documentation of the date feed was purchased, type and quantity of feed purchased, and the cost of feed purchased? Yes or No
19	If the participant is applying for farm-raised fish death losses, did the participant suffer from the physical loss of game fish (stockers) or bait fish (not raised as food for food fish)? Yes or No
20	If the participant is applying for farm-raised fish death losses, did the participant provide acceptable documentation verifying the type and amount of game fish or sport fish that was lost? Yes or No

764 LIP Compliance Reviews

A Performing Reviews

County Offices will conduct LIP compliance reviews for all producers selected for compliance review and spot check that participated in LIP. County Offices will document the following questions during LIP reviews. Load findings in the National Compliance Review Database.

Notes: FSA-914 and FSA-926 are applicable to compliance reviews and spot checks for 2013 and prior years only.

CCC-852, CCC-854, and CCC-856 are applicable to compliance reviews and spot checks beginning with 2014. County Offices should only review CCC-852's, CCC-854's, CCC-856's, and supporting documentation for eligible livestock death losses that occurred on or after October 1, 2011.

Question	
1	Was a valid signature obtained on FSA-914 or CCC-852? Yes or No
2	Did the participant timely file a notice of loss? Yes or No
3	Did the participant provide verifiable and/or reliable documentation of livestock deaths claimed on FSA-914 or CCC-852? Yes, No, or N/A If no or N/A , go to question 7.
4	Did the sources of the documents verify all of the following: Yes or No <ul style="list-style-type: none"> • documents were authentic • participant was a customer or party to the transaction • accuracy of the number and kind/type/weight range of animals listed?
5	Does the proof of death document support the number and kind/type/weight range of animals claimed on FSA-914 or CCC-852? Yes or No If no , go to question 17.
6	Was FSA-914 or CCC-852 approved based on third party certification? Yes or No
7	Did the participant provide FSA-926 or CCC-854 certifying to all of the following: Yes or No <ul style="list-style-type: none"> • no other form of proof of death is available • number of livestock, by category, in inventory when the deaths occurred <ul style="list-style-type: none"> • physical location of livestock by category, in inventory when the deaths occurred.
8	Did the participant provide verifiable documentation to support the reasonableness of the number of livestock inventory when the deaths occurred? Yes or No

764 LIP Compliance Reviews (Continued)

A Performing Reviews (Continued)

Question	
9	<p>Did the third party who is providing certification provide FSA-926 or CCC-854 that included all of the following: Yes or No</p> <ul style="list-style-type: none"> • specific details about how the third party has knowledge of the animal deaths • the affiliation of third party to the participant • telephone number and address of third party • number and kind/type/weight range of participants livestock that died because of the applicable adverse weather events • other details necessary for COC and DD to determine whether certification is acceptable?
10	<p>Did the number and kind/type/weight range of animals certified as dead by the third party match the number and kind/type/weight range of animals certified by the participant on FSA-914 or CCC-854? Yes or No</p>
11	<p>Did the interview of the third party reveal that the individual is a reliable source who was in a position to have knowledge of the number and kind/type/weight range of dead livestock? Yes or No</p>
12	<p>Is this a calf and lamb open range livestock operation that provided proof of death by using the livestock beginning inventory history for reporting losses? Yes or No</p> <p>If no, go to question 15.</p> <p>Note: This question is applicable to LIP compliance reviews and spot checks beginning with 2014.</p>
13	<p>Did the livestock producer provide 4 or more years of actual inventory records for open range calves or lambs? Yes or No</p> <p>Note: This question is applicable to LIP compliance reviews and spot checks beginning with 2014.</p>
14	<p>If less than 4 years of actual inventory records for the open range calves or lambs are provided, did the County Office calculate the approved calendar year livestock beginning inventory history in item 18 of CCC-856? Yes or No</p> <p>Note: This question is applicable to LIP compliance reviews and spot checks beginning with 2014.</p>
15	<p>Was the death of claimed livestock the result of an eligible adverse weather event? Yes or No</p>
16	<p>For contract growers only, is the amount of monetary compensation the contractor provided the participant for the loss of income from death of the claimed livestock different from the amount certified by the participant on FSA-914 or CCC-852? Yes, No, or N/A</p>
17	<p>For discrepancies, did any discrepancy result in a refund of LIP benefits? Yes or No</p> <p>If yes, enter requested refund amount \$_____</p>

765 LFP Compliance Reviews

A Performing Reviews

County Offices will conduct LFP compliance reviews for producers who participated in the program and who were selected for compliance review and spot check. Document the following questions and load findings in the National Compliance Review Database.

Question	
1	Was a valid signature obtained on FSA-925 or CCC-853? Yes or No
2	Does participant's current inventory of applicable livestock match the number and/or kind/type/weight range of livestock claimed on the LFP application? Yes or No
3	Did the participant, during the 60 calendar days before the beginning of the qualifying drought or fire condition, own, lease, purchase, enter into a contract to purchase, or was a contract grower of the livestock claimed on the LFP application? Yes or No
4	Did all livestock, entered on the LFP application, meet all eligibility criteria including being maintained for commercial use as part of the participant's farming operation? Yes or No
5	Was the number and kind/type/weight range of claimed livestock on the LFP application accurate? Yes, No, or N/A
6	<p>If the livestock producer was not the owner of the pastureland or grazing land, did the livestock producer provide a copy of a written lease by the applicable deadline to show that their contribution is at risk in the grazing land and pastureland for which benefits are being requested under LFP? Yes, No, or N/A</p> <p>If yes or N/A, go to question 9. If no, go to question 7.</p> <p>Note: This question is applicable to LFP compliance reviews and spot checks beginning with 2014. Only applicable to CCC-853's and supporting documentation filed for eligible grazing losses that occurred on or after October 1, 2011.</p>
7	<p>Was a written lease entered into between the livestock producer and the owner of the pastureland and/or grazing land? Yes or No</p> <p>If yes, go to question 12. If no, go to question 8.</p> <p>Note: This question is applicable to LFP compliance reviews and spot checks beginning with 2014. Only applicable to CCC-853's and supporting documentation filed for eligible grazing losses that occurred on or after October 1, 2011.</p>
8	<p>Did the owner of the grazing land or pastureland complete CCC-855 on behalf of the livestock producer? Yes or No</p> <p>If yes, go to question 9. If no, go to question 12.</p> <p>Note: This question is applicable to LFP compliance reviews and spot checks beginning with 2014. Only applicable to CCC-853's and supporting documentation filed for eligible grazing losses that occurred on or after October 1, 2011.</p>
9	<p>Did all forage information entered on the LFP application meet all eligibility criteria, including the livestock producer having risk in the grazing land and pastureland for which benefits are being requested? Yes or No</p> <p>If no, go to question 12.</p>

765 LFP Compliance Reviews (Continued)

A Performing Reviews (Continued)

Question	
10	Did the participant suffer an eligible grazing loss on rangeland managed by a Federal agency for which the Federal agency prohibited the producer from grazing the normal permitted livestock because of fire? Yes, No, or N/A
11	Did the participant meet RMPR on all the grazing land, pasture land, or rangeland entered on the LFP application or been approved for a waiver to meet RMPR's? Yes or No Note: This question is applicable to LFP compliance reviews and spot checks for 2013 and prior years only.
12	Did any discrepancy result in a refund of LFP benefits? Yes or No If yes , enter requested refund amount \$_____.

766 BCAP Compliance Reviews

A Performing Project Area Reviews

County Offices shall conduct BCAP project area reviews for all participating producers selected during the National Compliance Review selection process.

B BCAP Project Area Compliance Review Questions

Document the following during BCAP project area reviews and record findings in the National Compliance Review Database.

Question	
1	Fiscal Year? Enter applicable FY.
2	Was a valid signature obtained on BCAP-24? Yes or No
3	Was BCAP-24 received during the applicable application period? Yes or No
4	Was BCAP-24 approved by COC or designee? Yes or No
5	Was each eligible tract of land entered with the appropriate weighted soil rental rate on BCAP-23? Yes or No
6	Was a conservation plan completed before the BCAP-24 contract anniversary date, which is the effective date? Yes or No
7	In the case of perennial crops, was FSA-848A for request for cost-share or establishment payments, reviewed and signed by participant and COC or designee? Yes or No If yes: <ul style="list-style-type: none"> • has an FSA-848B been processed for cost-share performance certification and reimbursement? Yes or No • in the case where FSA-848B has been processed for cost-share performance certification and reimbursement, was the reimbursement calculated at a rate of up to 50 percent of the establishment costs or the established not-to-exceed rate for the project area? Yes or No
8	Did applicant meet the definition of a producer according to 7 CFR Part 1450, Section 1450.2, Definitions? Yes or No If yes, was the producer’s land within the applicable geographic boundary of a BCAP project area? Yes or No
9	Did the enrolled land meet all land eligibility criteria according to 7 CFR Part 1450, Section 1450.204, <i>Land Eligibility</i> ? If yes, was AD-1026 form completed, if applicable? Yes or No

766 BCAP Compliance Reviews (Continued)

B BCAP Project Area Compliance Review Questions (Continued)

Question (Continued)	
10	<p>Did the applicant file FSA-578 for reported acreage? Yes or No</p> <p>If:</p> <ul style="list-style-type: none"> • “Yes”, did contract acreage reported on the BCAP-24 contract match the reported acreage on FSA-578? Yes or No • “No”, is the BCAP-24 contract still active? Yes or No
11	<p>Was an eligible crop established for the applicable project area? Yes or No</p> <p>If:</p> <ul style="list-style-type: none"> • “Yes”: <ul style="list-style-type: none"> • was the crop an annual crop? Yes or No • was the crop an herbaceous perennial crop? Yes or No • was the crop a woody perennial crop? Yes or No • “No”: <ul style="list-style-type: none"> • was the crop establishment delayed with approval by COC? Yes or No • was the reported crop established or not established as a preventive planting, meaning the crop was or was not established instead of the eligible crop because the environmental conditions were not considered able to support the eligible crop? Yes or No

766 BCAP Compliance Reviews (Continued)

B BCAP Project Area Compliance Review Questions (Continued)

Question (Continued)	
12	<p>Did the applicant file documentation reporting a harvest and collection? Yes or No</p> <p>If yes:</p> <ul style="list-style-type: none"> • was a payment reduction applied to the annual rental payment? Yes or No • was the applied payment reduction the appropriate percentage value of the revenue generated from the collection/harvest according to 7 CFR Part 1450, Section 1450.214, <i>Annual Payments</i>? Yes or No • Did documentation provide a value for the eligible material that was harvested or collected? Yes or No • Did the value for the harvested/collected eligible material include storage and transportation costs incurred by the producer? Yes or No • Was there a crop failure because of reasons beyond the producer's control? Yes or No
13	<p>Did any discrepancy result in a refund of BCAP benefits? Yes or No</p> <p>If yes, enter requested refund amount. Enter dollar (\$) amount.</p>

766 BCAP Compliance Reviews (Continued)

C Performing BCAP Matching Payment Reviews

County Offices will conduct BCAP matching payment reviews for all participating producers selected during the National Compliance Review selection process.

D BCAP Matching Payment Reviews Questions

Document the following during BCAP matching payment reviews and record findings in the National Compliance Review Database.

Question	
1	Fiscal Year? Enter applicable FY.
2	Was a valid signature obtained on BCAP-10? Yes or No
3	Was BCAP-10 received during the applicable application period? Yes or No
4	Was BCAP-10 approved by COC or designee? Yes or No
5	Was each eligible tract of land entered with the appropriate dry ton harvest/collection and in concurrence with the applicable conservation or forest stewardship plan or evaluation sheet on BCAP-23? Yes or No
6	Was a conservation plan or forest stewardship plan, equivalent plan or evaluation sheet completed before the BCAP-10 contract approval date? Yes or No
7	Did applicant meet the definition of a producer according to 7 CFR Part 1450, Section 1450.2, Definitions? Yes or No If yes, was the producer’s land within the applicable geographic boundary of a BCAP project area? Yes or No
8	Was the eligible material the targeted material for the applicable eligible material owner signup or as Noticed? Yes or No If: <ul style="list-style-type: none"> • “Yes”, was the material: <ul style="list-style-type: none"> • private forest land residues? Yes or No • an herbaceous agricultural residue? Yes or No • a woody agricultural residue? Yes or No • federal forest residue? Yes or No • “No”, was the: <ul style="list-style-type: none"> • federal forest residue material not a by-product of a preventative treatment or met the extra haul distance requirements? Yes or No • material not collected in accordance with a conservation plan, forest stewardship plan or equivalent plan? Yes or No
9	Did any discrepancy result in a refund of BCAP benefits? Yes or No If yes, enter requested refund amount. Enter dollar (\$) amount.

767 RTCP Compliance Reviews

A Performing Reviews

County Offices will conduct RTCP reviews for all participating producers selected during the National Compliance Review selection process. Document the following during the RTCP reviews and record findings in the National Compliance Review Database.

Question	
1	Fiscal Year. Enter applicable FY.
2	Was a valid signature obtained on FSA-218? Yes or No
3	Was FSA-218 received during the applicable application period? Yes or No
4	Did applicant meet the definition of a geographically disadvantaged farmer or rancher? Yes or No
5	Did the applicant meet all eligibility criteria and submit required forms? Yes or No
6	Did the applicants' verifiable records support applicable actual, fixed, and/or set transportation costs claimed on FSA-218? Yes or No
7	Was each eligible commodity and/or input entered under the appropriate transportation cost category (that is, actual rate, fixed rate, set rate) on FSA-218? Yes or No
8	Did the applicant submit all supporting documentation by the appropriate deadline? Yes or No
9	Was FSA-218, reviewed and signed by a second-party? Yes or No
10	Was FSA-218 approved by COC or designee? Yes or No
11	Was each eligible commodity and/or input entered with the appropriate rate (that is, actual, fixed, set) on FSA-218-1? Yes or No
12	Was FSA-218-1 reviewed and signed by a second party? Yes or No
13	Did any discrepancy result in a refund of RTCP benefits? Yes or No
	If yes, enter requested refund amount. Enter dollar (\$) amount.

768 FSFL's

A Performing FSFL Reviews

For producers with outstanding FSFL's who have been selected for spot check through the *--national selection process according to subparagraph 728 A:--*

- check their **producer eligibility** according to questions in this paragraph
- record spot check results in the National Compliance Review Database.

B Basic FSFL Information

- State Code: _____
- County Code: _____
- Loan No: _____
- Original Loan Amount: _____
- Outstanding Loan Amount: _____

C Specific Spot Check Questions

If FSFL for review is one with a partial and final disbursement, both FSFL's must be reviewed. Questions relative to the spot check:

Questions	
1	Was a farm-visit conducted to complete the spot check? Yes or No.
a	If No , please explain.
2	Is FSFL current? Yes or No
a	If No , what action has the COF taken to resolve the delinquency?
3	Is FSFL collateral being used for commercial purposes? Yes or No
a	If Yes , what action has COF take to call the loan?
4	Is UCC-1 still effective? Yes or No.
a	If No , when will UCC-3 be properly filed?
5	Is producer current with FSFL insurance and real estate taxes, if applicable? Yes or No.
a	If No , indicate actions taken to resolve these requirements.
6	Is FSFL collateral in good condition? Yes or No.
a	If No , explain in detail the condition and location of the collateral.
7	Has producer violated terms and conditions of CCC-186, Promissory Note and Security Agreement? Yes or No.
a	If Yes , explain and indicate actions taken.
8	Are there other concerns with FSFL? Yes or No.
a	If Yes , explain and indicate what actions need to be taken to resolve concerns.

769-792 (Reserved)

Section 3 National Compliance Review Database**793 General Information****A Purpose**

The National Compliance Review Database is used to collect data and generate reports from compliance review and spot check findings. At the County Office level, access to the database is restricted to data entry only. Reports will be generated at the National Office level. State Offices will be notified of reporting results and any necessary corrective action.

In addition to sharing compliance results with State Offices, PECD will also share reports with other FSA divisions. The reports will consist of an analysis that identifies any discrepancies, noncompliance trends, and common problems, including errors resulting in improper payments, and steps taken to reduce them. This information will assist FSA in:

- identifying noncompliance trends
- directing limited resources to known problem areas
- improving the integrity of FSA programs.

B Time of Data Entry

Enter data as soon as compliance reviews and spot checks have been completed. Data for all programs is **not** required to be entered at the same time.

Note: If software is **not** available, County Offices will hold spot check results in a manual pending file until advised that software is available.

794 Accessing the National Compliance Review Database

A Instructions for Accessing the National Compliance Review Database

Access the National Compliance Review Database according to the following.

Step	Action
1	<p>Access the National Agricultural Statistics Service web site at https://www.nass.usda.gov/Surveys/. “If you have received a NASS survey, click “arrow” to the right to respond online”, will be displayed. On the Fill Out NASS Surveys Online Screen, CLICK “Continue”. Access the Online Survey Screen will be displayed. CLICK the arrow to complete the survey according to the following.</p> 

794 Accessing the National Compliance Review Database (Continued)

A Instructions for Accessing the National Compliance Review Database (Continued)

Step	Action
2	<p>Each producer selected for spot check and review will have a unique survey code. The survey code for a producer must be entered to load compliance review data. The survey codes for all producers selected for spot check and review will be added and displayed on the national producer selection list posted on the Intranet at http://fsaintranet.sc.egov.usda.gov/ffas/farmbill/cc/default.htm.</p> <p>Producers who participate in FSA programs in multiple States and/or counties will have a different survey code for each administrative State and/or county. County Offices shall ensure that the survey code is used for the applicable administrative State/county when recording compliance review and spot check results.</p> <p>Survey codes for producers shall consist of 2 digit number-9 digit number-sequence of 6 characters consisting of both letters and numbers.</p> <p>Example: 01-556677889-ABC123</p> <p>On the NASS Survey Code Data Entry Screen, enter the appropriate survey code for the selected producer. CLICK “Continue”.</p> <p>Note: If the survey code is entered incorrectly, then an error message will be displayed. Re-enter the survey code and CLICK “Continue”.</p> <div data-bbox="396 1129 1474 1850" style="border: 1px solid black; padding: 10px;"> <p>Completing your survey online saves you time by allowing you to skip over questions that do not apply to you, by calculating totals automatically, and by providing drop-down menus for common answers. It also saves taxpayer dollars that would otherwise be spent on return postage and data entry.</p> </div>

794 Accessing the National Compliance Review Database (Continued)

6	<p>The following screen will be displayed notifying the user that the survey has been successfully completed and providing the option to select a new survey for the selected producer or to select another producer.</p> <p>County Office users shall CLICK:</p> <ul style="list-style-type: none"> • “New Producer” to enter compliance review/spot check results for a different producer • “New Survey” to enter compliance review/spot check results for the same producer but for a different program survey • “Previous” to return to the selected survey questions. <p>Note: The “Submit” button will be grayed out and will not be available for selection. No further action is required. County Office will not complete the “Reported by” information.</p> 

795 Data Entry and Navigation Instructions for the National Compliance Review Database

A Entering Data

County Offices will enter compliance review and spot check findings in the National Compliance Review Database throughout the year as reviews and spot checks are completed. All program surveys do not have to be completed at the same time.

If a user has to exit a survey before all data has been entered, CLICK **“Save and Return Later”** located at the top of each survey screen. This will save the data entered and provide County Office users the ability to re-access the survey at a later date and finish entering data.

The “N/A” button is available in the upper left hand corner of each program survey. County Offices shall use the “N/A” button to indicate that the selected producer did not participate in the program for the year.

Example: If a producer selected for spot check only filed FSA-578’s and participated in DCP, County Offices must document all questions for the FSA-578 survey and the DCP survey. Even though the producer did not participate in any other programs, County Offices shall still access each program survey and CLICK “N/A”. This will indicate in the system that the producer did not participate in the program for the year.

County Offices will follow the steps in the following when using the “N/A” button.

Step	Action	Result
1	Access the applicable program survey.	Screen will be displayed with all survey questions.
2	CLICK “N/A” in the upper left hand corner of each survey screen.	Check (✓) will be displayed in the box.
3	Scroll down to the last question of the survey and select “No” to the final question.	
4	CLICK “Next”.	A screen will be displayed notifying the user the survey has been successfully completed.
5	CLICK “New Survey” to access a new survey for the producer. CLICK “New Producer” to enter compliance review and spot check results for a different producer.	Available Survey Screen will be displayed allowing user to select another program survey to enter compliance review results. NASS Welcome Screen will be displayed allowing user the option to enter a survey code for a different producer.

**795 Data Entry and Navigation Instructions for the National Compliance Review Database
(Continued)****B Navigating Through the Screens**

Use the mouse or tab key to move from question to question on a page. Use the scroll bar on the right side of the screen as necessary. CLICK “Next” to move to the next screen.

C Exiting the Database

The survey can be exited at any time, however, CLICK “Save & Return Later” to save the data entered on the current page. To return to a saved survey, go to **<http://www.agcounts.usda.gov>** and enter the survey code for the applicable producer when prompted. When returning to an individual’s survey, the data previously entered will be displayed. Enter additional data or make changes to the existing data.

D Contact Information

County Offices will contact their State Office if they are experiencing problems or have questions on entering data into the National Compliance Review Database. State Offices can e-mail questions or concerns to Gwen Uecker at **gwen.uecker@nd.usda.gov**.

796-828 (Reserved)

Section 4 Notice of Determined Acreage by Spot Check

829 Purpose of FSA-468

A Introduction

FSA-468 is the official notification to the producer of the results of a spot check. Footnotes included on FSA-468 inform the producer of the effect, if any, that the results of the spot check may have on the program eligibility of a crop or land use.

B Timely Processing of FSA-468

Process FSA-468 in a timely manner after acreage has been determined to ensure that, if the producer requests a remeasurement, evidence of the crop is still available.

C Information on FSA-468

The following information is printed on FSA-468 for crops with determined acreage.

Producer Data	Mailing Information	Program Data
<ul style="list-style-type: none"> • farm number • operator’s name and address • farm ID 	<ul style="list-style-type: none"> • mailing date • county name, address, and telephone number • form number and revision date 	<ul style="list-style-type: none"> • reported acreage • determined acreage • applicable footnotes • program year • general information

Note: FSA-468 compares reported and determined acreage and prints only for farms selected for spot check. For the FSA-468 to print, determined acreage must be entered for at least 1 field on the farm.

D FSA-468 Footnotes

Footnotes:

- identify discrepancies in reported and determined acreage for the crop
- are printed on FSA-468 in line with the applicable crop
- are explained in the bottom section of FSA-468.

E Web-Based FSA-468

For the 2011 program year, the FSA-468 process was incorporated into CARS. Follow procedure in paragraphs 831 through 833 for accessing the FSA-468 web-based process for 2011 and future years.

830 Tolerance

A Acreage Tolerance

If the determined acreage or production for a crop is:

- within the prescribed tolerance for the crop, the report is considered in compliance without either of the following:
 - the total loss of benefits
 - the overall accuracy of the acreage report being questioned
- not within the prescribed tolerance, follow paragraph 835.

Rule: Acreage tolerance is the larger of 1 acre or 5 percent of the reported acreage, not to exceed 50 acres for all crops, except wild rice and FAV’s.

Exceptions: For specific programs, tolerance does not apply to:

- total cropland certification
- CRP
- FAV’s or wild rice planting violations acre for acre reduction unless a FAV/WR planting exception applies according 1-ARC/PLC.

B Tolerance Calculation

Calculate tolerance according to the following.

Step	Calculation
1	Add reported irrigated and nonirrigated crop acreage together before calculating tolerance.
2	Subtract official and measured acreage from the total reported acreage.
3	Multiply the result of step 2 times 5 percent to determine the acreage of tolerance. See tolerance rule in subparagraph A.

831 Web-Based FSA-468 Process for 2011 and Future Years

A Introduction

The FSA-468 process for 2011 and future years will be accessible as a report option through CARS.

B Accessing the Web-Based FSA-468 Process in CARS

To access the web-based FSA-468 process:

- access the CARS Application according to paragraph 101

Note: The State and County Selection Screen will be displayed.

The screenshot shows a web application interface. On the left is a sidebar with a blue header 'CARS Menu' and a 'Welcome' message. The main content area has a blue header 'State and County Selection'. Below the header are three dropdown menus: 'State' with 'Texas' selected, 'County' with 'Medina' selected, and 'Program Year' with '2016' selected. A 'Continue' button is positioned below the dropdowns. At the bottom of the page, the text 'CARS101 - Last Modified: 09/04/2014 10:49:37 AM' is visible.

831 Web-Based FSA-468 Process for 2011 and Future Years (Continued)

B Accessing the Web-Based FSA-468 Process in CARS (Continued)

- from the State and County Selection Screen, select the applicable State, county, and program year.

Note: CLICK “Continue”. The Acreage Report Search Screen will be displayed.

The screenshot displays the 'Acreage Report Search' interface. On the left, the 'CARS Menu' sidebar lists options: Welcome, Role, State and County Selection, Reports (highlighted with a red arrow), Manage Crop Defaults, NAP Application, and FSA Applications. The main search area has a blue header and displays the following information: Year: 2016, State: Texas (48), and County: Medina (325). Below this, it prompts the user to 'Please enter a farm number or search for a producer in SCIMS'. There are two radio button options: 'Producer' (selected) and 'Farm Number'. A text input field is provided for the Farm Number. At the bottom right of the search area are 'Submit' and 'Cancel' buttons. The footer of the page reads 'CARS102 - Last Modified: 02/18/2015 12:52:42 PM'.

831 Web-Based FSA-468 Process for 2011 and Future Years (Continued)

B Accessing the Web-Based FSA-468 Process in CARS (Continued)

- in the CARS Menu on the left of the Acreage Report Search Screen, CLICK “Reports” for a list of FSA-468 reports.

Note: The Reports Screen will be displayed.

Reports

FSA-578

- FSA-578
- FSA-578C
- Map
- FSA-578 Summary

Farm Number

- FSA - 578 (Producer Print)

- Continuous Certification Termination Letter

Farm Number

Report Format: PDF Excel

- Crops with End Date Farm Number
- Farms with a FSA-578 in CARS and Unreported Cropland
- Farms with Active Continuous Certification
- Farms with ARC/PLC Contract, Unreported Cropland
- Farms with Cropland Override
- Farms with CRP
- Farms with Deleted Field Due to Deleted Field Number in Farm Records
- Farms with Deleted Producers with Active Shares
- Farms with End Date
- Farms with Failed Acreage
- Farms with FAV Crops
- Farms with Fully Reported Cropland
- Farms with Incomplete Determined Acres
- Farms with Native Sod Conversion Acreage
- Farms with No FSA-578 in CARS
- Farms with No FSA-578 in CARS By Producer
- Farms with No NAP Unit
- Farms with Not Applicable Acres
- Farms with Prevented Planted Acres
- Farms with Reported Acres on Noncropland
- Farms with Subsequent Acreage
- Farms with Terminated Continuous Certification
- Farms with Uncertified Crops
- Farms with Uncertified CRP

FSA-468

- Initial Beginning Farm Number
- Re-Print Ending Farm Number

or

Number of Farms to Print:

- Covered Commodity out of Tolerance
- Missing Determined Acreage
- FAV's with Determined Acres Greater than Reported
- FAV's not Reported and/or Certified

Note: The FSA-468 report option is located under the FSA-578 report option.

832 Processing Web-Based FSA-468’s Through CARS

A Selecting Farms for FSA-468

Generate and print FSA-468’s for either a single farm or for a range of farms. Use the following table when selecting farms to generate FSA-468.

When generating FSA-468 for...	THEN enter...
specific farm	the same FSN in the “Beginning Farm Number” and “Ending Farm Number” fields.
range of farms	<ul style="list-style-type: none"> • FSN in the “Beginning Farm Number” field • greater FSN in the “Ending Farm Number” field.
specific number of farms	<ul style="list-style-type: none"> • FSN in the “Beginning Farm Number” field • the number of farms in the “Number of Farms to Print” field.

B Selecting Print Mode

Users must select a print mode for the selected farms. The following 2 print modes are available to print FSA-468:

- initial
- reprint.

Use the following table when selecting the applicable print mode.

When the selected print mode is...	THEN FSA-468’s shall only print crops that...
initial	<ul style="list-style-type: none"> • have not been printed on a previous FSA-468 • were printed on a previous FSA-468 but a revision changed the footnote. <p>Note: Crops that have a change of footnote since the last printing are indicated with an asterisk (*) and the statement, “The footnote for this crop has changed since the last FSA-468 printing for this farm.”, will be printed before the footnotes.</p>
reprint	were printed on a previous FSA-468 and there have been no changes since the last printing.

832 Processing Web-Based FSA-468's Through CARS (Continued)

D County Office Action Before Mailing

FSA-468's shall be reviewed according to paragraph 835 before mailing.

After the review, County Offices will mail the original FSA-468 to the operator and file a copy with FSA-578. Do **not** add any additional information or comments to FSA-468.

County Offices will include a letter explaining the status of program benefits along with a copy of each FSA-468 that has a footnote 9.

E Fields on FSA-468

FSA-468's shall be prefilled with the following data elements.

Field	Description
County Office Name/Address	Name and address of County Office generating FSA-468.
Farm Number	FSN for the selected farms.
Date of Mailing	Date FSA-468 is generated.
Operator Name and Address	Name and address of operator for the selected farm.
Important Notice	<p>This section provides notifications to the farm operator that the:</p> <ul style="list-style-type: none"> • determination is applicable only to crop acreage determined by the County Office • remeasurement of acreage may be requested within 15 calendar days from the date of the notice • information specific to the crops is provided in the footnotes.
Crop	<p>For each crop with determined acreage on the farm, FSA-468 will display the following:</p> <ul style="list-style-type: none"> • crop name • reported acreage • determined acreage • difference • footnote, if applicable.

832 Processing Web-Based FSA-468's Through CARS (Continued)

E Fields on FSA-468 (Continued)

Field	Description
Footnotes	<p>Footnotes are displayed in line with the crop listed on FSA-468. Footnotes identify the discrepancies in reported and determined acreage and the effect, if any, that the results of the spot check may have on program eligibility of a crop or land use.</p> <p>CRP acreage will have footnotes printed on FSA-468. Footnotes will not be printed on FSA-468 for any other crops.</p> <p>The following footnotes will be printed on FSA-468, when applicable.</p> <ul style="list-style-type: none"> • 1 - The report is considered acceptable. • 9 - The determined acreage is less than the acreage on the contract. See attached letter.
Footnote Section	The Footnote Section on FSA-468 will provide the narrative of the applicable footnote.

832 Processing Web-Based FSA-468's Through CARS (Continued)

F Example of FSA-468

The following is an example of FSA-468.

833 Web-Based FSA-468 Reports

A Web-Based FSA-468 Reports

The following reports are available under the FSA-468 process:

- Covered Commodity Out of Tolerance
- Missing Determined Acreage
- FAV's With Determined Acreage Greater Than Reported
- FAV's Not Reported and/or Certified.

B Report Access

To access the reports, select the applicable report from the Reports Screen and CLICK "Generate Report". The selected report will open up in a new window. All farms that meet the criteria for the selected report for the State and county selected will be displayed on the reports.

FSA-468

Initial **Beginning Farm Number**
Ending Farm Number

Re-Print or
Number of Farms to Print

Covered Commodity out of Tolerance
 Missing Determined Acreage
 FAV's with Determined Acres Greater than Reported
 FAV's not Reported and/or Certified

833 Web-Based FSA-468 Reports (Continued)

C Covered Commodity Out of Tolerance Report

Farms that have covered commodities that are out of tolerance will be listed on the Covered Commodity Out of Tolerance Report.

Note: Covered commodities are printed on FSA-468 but do **not** have corresponding footnotes.

County Offices will use the Covered Commodity Out of Tolerance Report to assist in ascertaining “good faith” status according to paragraphs 834 and 835. The following is an example of the Covered Commodity Out of Tolerance Report.

State:		United States Department of Agriculture			Prepared Date: 01/18/2017	
County:		Farm Service Agency			Page: 1 of 1	
FSA-468 2017 Notice of Determined Acreage by Spot Check					Farms: 1	
Covered Commodity out of Tolerance						
Farm Number	Operator	CCID	Crop/Commodity	Reported Acreage	Determined Acreage	Difference
1621	Any (1) Producer		WHEAT	20.00	12.30	7.70

Important: Tolerance is not calculated for crops reported with measured or official status and those crops will not be listed on the Covered Commodity Out of Tolerance Report. For acreage discrepancies, “good faith” shall be determined according to paragraphs 834 and 835.

D Missing Determined Acreage Report

The Missing Determined Acreage Report displays a list of farms that have crops that do not have determined acreage for all reported acreage of the crop, such as farms with crops that have acreage determined for 1 or more fields but not all fields of a crop. These crops will **not** print on FSA-468 for the farm, however, will be indicated on this report. The following is an example of the Missing Determined Acreage Report.

State:		United States Department of Agriculture			Prepared Date: 01/18/2017	
County:		Farm Service Agency			Page: 1 of 1	
FSA-468 2017 Notice of Determined Acreage by Spot Check					Farms: 1	
Missing Determined Acreage						
Farm Number	Operator	CCID	Crop/Commodity	Variety/Type		
1621	Any (1) Producer		WHEAT	HRW		

833 Web-Based FSA-468 Reports (Continued)

E Farms Having FAV’s With Determined Acres Greater Than Reported Report

The Farms Having FAV’s With Determined Acres Greater Than Reported Report will include a list of all farms that have crops with a land use code of “F” with determined acres greater than reported. The following is an example of Farms Having FAV’s With Determined Acres Greater Than Reported Report.

State:		United States Department of Agriculture			Prepared Date:01/18/2017		
County:		Farm Service Agency			Page:1 of 1		
FSA-468 2017 Notice of Determined Acreage by Spot Check					Farms:1		
Farms Having FAV's with Determined Acres Greater than Reported							
Farm Number	Operator	CCID	Crop/Commodity	Variety/Type	Reported Acreage	Determined Acreage	Difference
1621	Any:1.Producer		CORN	SWH	5.00	8.50	3.50

F Farms Having FAV’s Not Reported and/or Certified Report

The Farms Having FAV’s Not Reported and/or Certified Report lists farms that have crops with a land use code of “F” where reported acreage for the crop is zero “0” and determined acreage for the crop is greater than zero “0”. The following is an example of the Farms Having FAV’s Not Reported and/or Certified Report.

State:		United States Department of Agriculture			Prepared Date:01/18/2017		
County:		Farm Service Agency			Page:1 of 1		
FSA-468 2017 Notice of Determined Acreage by Spot Check					Farms:1		
Farms Having FAV's not Reported and/or Certified							
Farm Number	Operator	CCID	Crop/Commodity	Variety/Type	Reported Acreage	Determined Acreage	Difference
1621	Any:1.Producer		CORN	SWH	0.00	2.00	2.00

834 Crop Acreage Discrepancies

A Discrepancies

For discrepancies, COC will:

- determine what program benefits have been based on the specific crop acreage
- see to the specific program procedure to determine whether:
 - program requirements have been met
 - producers remain eligible for all or a portion of the program payments or benefits.

835 Total Cropland Results of Acreage Reporting Determinations

A General Rule

County Offices will consider all acreage reports for total cropland as filed in good faith by the producer unless COC determines that a good faith effort to accurately report the acreage was not made because the report was knowingly and willfully falsified.

B County Office Action

After spot checks are complete, County Offices will follow this table.

Step	Action
1	<p>CED will determine questionable cases to be forwarded to COC for review to determine whether the producer filed an acreage report for all cropland on the farm in good faith as required for ARCPLC, loans, and LDP's.</p> <p>Note: Questionable cases include cases in which CED believes the producer knowingly and willfully filed a false acreage report or failed to comply with the requirements to file an acreage report.</p>
2	<p>COC will:</p> <ul style="list-style-type: none"> • review all questionable cases referred by CED • make “no good faith” determinations when COC determines the producer knowingly and willfully failed to submit or falsified the acreage report.
3	<p>In cases where “no good faith” determinations are made, according to step 2, the County Office shall notify producer that he or she is ineligible for all payments or benefits for ARCPLC, marketing loans, and LDP's, and provide the producer an opportunity to request reconsideration of COC's determination.</p>

835 Total Cropland Results of Acreage Reporting Determinations (Continued)**C Considerations When Making Determination**

When making good faith/not good faith determinations, COC will consider:

- all crops on the farm
- the facts that created the inaccurate acreage report.

COC will consider the following guidelines, as applicable, when determining whether or not the producer made a good faith effort to file an accurate acreage report for all cropland on the farm.

- Should the producer have been reasonably expected to know the subject acreage was in error?
- Was a reasonable effort made to accurately report all cropland acreage?
- Did the producer measure the acreage or employ others to measure the acreage?
- Was there reliance on photocopies or acreage of past determinations?
- Did the producer control or could have controlled the factors contributing to the situation?
- Was lack of compliance because of:
 - carelessness by the producer
 - part of a scheme or device to avoid compliance?
- Would the producer have benefited from the situation if the crop was not selected for spot check?
- Were there extenuating circumstances, such as:
 - inclement weather
 - changes in the farming operation after planting?

836-858 (Reserved)

Part 7 Computing Acreages

Section 1 General Guidelines

859 Acreage Determination Methods

A Introduction

Calculate acreage using either or both of the following methods:

- ground compliance
- office compliance.

B Ground Compliance

Ground compliance is done by going to the field and measuring the acreage using tapes, measuring wheels, GPS, and other equipment that can determine the acreage.

C Aerial Compliance

Office compliance is done in the County Office by using digital imagery.

860 Standard and Authorized Deductions**A Deductions**

Acreage not devoted to a crop being measured must be deducted from the field's gross acreage. The acreage to be deducted can be measured by ground or aerial methods or calculated by applying a standard deduction percentage to the gross acreage.

See paragraph 862 for strip-crop, skip-row, and sled-row patterns.

B Standard Deductions

Standard deduction is an acreage allowance determined for the turn area by applying a percent of the area planted to the crop, instead of measuring the turn areas.

- The standard deduction is 3 percent of the gross acreage of the field devoted to the crop and must be approved by STC before using in any county.
- Deviations from the standard must be reasonable and justifiable for the crop area affected.

C Deductions by Measurement Service

The farm operator may request measurement service to measure deductions instead of accepting the standard deduction.

The request must be made for the entire crop acreage before filing FSA-578.

Note: If the deduction is measured, the standard deduction will not be used for any of the fields of the crop.

860 Standard and Authorized Deductions (Continued)

D Authorized Deductions

Any area of a field not devoted to the crop must be deducted from the fields gross acreage. Deductions are authorized according to this table.

IF the area is...	THEN...
located on the perimeter of a field or subdivision	allow deduction if the standard deduction is not used.
located within the planted area	<ul style="list-style-type: none"> consider the part of any perimeter area that is more than 33 links in width to be an internal deduction if the standard deduction is used use approved width if a different deduction percentage is justified and approved by STC. See approved width in subparagraphs E and F.
either of the following: <ul style="list-style-type: none"> part of a skip-row pattern less than 30-inches wide 	no deductions apply.
greater than or equal to: <ul style="list-style-type: none"> acre for crops other than tobacco 0.03 acre for tobacco 	deduct acreage. Note: If terraces, turn areas, sod waterways, noncropland, ditches within a field, or subdivision boundaries are contiguous, they may be combined to meet the minimum.

E Deviations From Standard and Authorized Deductions

If the normal cultural practices of a county, such as the width of turn areas or the size of fields, are different than the minimums in subparagraph D, the following recommendations may be submitted to DAFP:

- an increase in the minimum row width
- an increase in the minimum area.

Exhibit 24 lists State deviations from standards approved by DAFP.

860 Standard and Authorized Deductions (Continued)

F Requesting Deviations

COC must submit a recommendation for any proposed deduction deviation with appropriate justification to STC.

IF recommendation is for deviation in...	THEN it may be approved by...
standard deduction percentage	STC, if both of the following apply: <ul style="list-style-type: none"> • COC justification is adequate • COC recommendation is reasonable for the crop and area affected.
authorized deduction for: <ul style="list-style-type: none"> • row width • minimum area 	DAFP, if STC has submitted recommendation with adequate justification to Director, PECD by November 1 for the ensuring crop year. Note: Deviations remain in effect until DAFP withdraws approval or approves STC request for change.

861 Applying Deductions**A Rule for Standard Deductions**

If the standard deduction is applied to a field, the standard deduction must be applied to all compliance determinations made for that field including:

- staking and referencing
- measurement after planting
- acreage adjustments
- GIS-calculated acreage.

B Example of Standard Deduction in a Field

Following is an example of a standard deduction in a field.

Turn areas are in the north and south ends of a field. County Office determined 3 percent for average turn areas. 3 percent applies to total acreage for both ends of the field.

30.0 acres x 3 percent = .9 deduction

30.0 - .9 deduction = 29.1 acres remaining after applying deduction

C Rule for Authorized Deductions

If the authorized deduction is applied to a field, any area inside a cropped acre that is not devoted to the crop shall be deducted from the field. Following are examples of required deductions:

- sod waterways
- rocks and boulders
- barns and buildings
- permanent structures
- permanent water.

861 Applying Deductions (Continued)

D Example of Authorized Deduction

Following is an example of an authorized deduction in a field showing a sod waterway in the middle of a 40-acre field. The County Office used aerial photography to measure 4.2 acres in the sod waterway resulting in 35.8 acres devoted to the crop.

40.0 acres - 4.2 deduction = 35.8 total acres

862 Solid Plant, Strip-Crop, Skip-Row, and Sled-Row Patterns**A Introduction**

[7CFR.107] Methods of determining acreage differ with planting patterns. This paragraph discusses methods of determining acreage for the cultural practice of alternating strips of rows of the crop area with strips of idle land or another crop and solid plant when row width exceeds 40 inches. For these planting patterns the net acreage for all crops should be reported on FSA-578.

B Definitions

See Exhibit 2 for definitions of the following planting patterns:

- solid plant
- strip-crop
- skip-row
- sled-row.

C Strip-Crop

When 1 crop is planted in strips, rows, or areas alternating with another crop, whether or not both crops have the same growing season, only the acreage that is planted to each specific crop will be considered to be acreage devoted to the specified crop.

D Additional Single-Width Row Procedure

If single rows are planted in a skip-row pattern with 2 or more rows having less than 40-inch spacing, consider the distance in inches devoted to the crop in the single rows the same as the distance between 2 or more rows with less than a 40-inch spacing. See Exhibit 25, subparagraph 2 G.

Note: Cotton planted in an alternating 30/50-inch row planting pattern may be considered a solid planting pattern for both irrigated and nonirrigated rows, where the irrigated acreage has 80-inch irrigation centers with a drip-tape or drop-hose system. This provision assumes the 30/50-inch row planting pattern has a comparable number of rows, plant population, and yield potential in a normal year as a 40-inch row solid planting pattern.

E Exception Request to 40-Inch Width Rule for Single Rows

For this purpose, a normal row width is defined as row crops of 30 to 40 inches. STC's may request DAFP approval to deviate from this formula for crops that are normally grown in widths more than 40 inches, for example, vine crops, tobacco more than 48 inches, etc. The request must provide the formula and supporting information.

862 Solid Plant, Strip-Crop, Skip-Row, and Sled-Row Patterns (Continued)

F Strip-Crop and Sled-Row Patterns

The following table provides procedure for determining the acreage when a crop is planted in alternating strips of crops or idle land.

Exception: Normal planting patterns for tobacco that range between 36-inch and 48-inch rows do not require DAFP approval.

IF the strip of crops are...	AND the planting pattern of crops are...	AND the distance from plant to plant in the strip is...	THEN...
the same width and the width is uniform for the entire length of the strips	single rows alternating with idle land	40 inches or less	consider the entire area devoted to the crop.
		more than 40 inches	<ul style="list-style-type: none"> • consider 40 inches devoted to the crop • calculate the net crop acreage according to subparagraph I. See Exhibit 25, subparagraph C.
	2 or more rows of less than 40 inches planted in a pattern of single rows alternating with idle land	more than 40 inches	<ul style="list-style-type: none"> • consider half a row width, but no less than 15 inches devoted to the crop • calculate the net crop acreage according to subparagraph I • cotton planted in an alternating 30/50-inch row planting pattern may be considered a solid planting pattern for both irrigated and nonirrigated rows, where the irrigated acreage has 80-inch irrigation centers with a drip-tape or drop-hose system. This provision assumes the 30/50-inch row planting pattern has a comparable number of rows, plant population, and yield potential in a normal year as a 40-inch row solid planting pattern. See Exhibit 25, subparagraph G.
2 or more rows alternating with idle land	2 or more rows alternating with idle land	equal to or less than the distance between 2 or more rows	consider the entire area devoted to the crop.
		more than the distance between the 2 or more rows	<ul style="list-style-type: none"> • half a row width, but no less than 15 inches devoted to the crop consider • calculate the net crop acreage according to subparagraph I. See Exhibit 25, subparagraphs D, E, and F.

862 Solid Plant, Strip-Crop, Skip-Row, and Sled-Row Patterns (Continued)

F Strip-Crop and Sled-Row Patterns (Continued)

IF the strip of crops are...	AND the planting pattern of crops are...	AND the distance from plant to plant in the strip is...	THEN...
not uniform in width of strips	any pattern	40 inches or less	determine the acreage of each strip by doing either of the following: <ul style="list-style-type: none"> • chain each strip • digitize the area. Enter the acres on the acreage report.
		more than 40 inches	determine the acreage of each strip by doing either of the following: <ul style="list-style-type: none"> • chain each strip • digitize the area. Consider 40 inches devoted to the crop for rows more than 40 inches in width.

G Determining Crops With Row Width More Than 40 Inches

The maximum area for a row considered planted to a crop shall not exceed 40 inches wide. Consider land between rows exceeding 40 inches as idle land.

Example: For a 46-inch row, consider 40 inches to be the crop and the remaining 6 inches is considered a skip. See Exhibit 25, subparagraph 2 C.

Note: Cotton planted in an alternating 30/50-inch row planting pattern may be considered a solid planting pattern for both irrigated and nonirrigated rows, where the irrigated acreage has 80-inch irrigation centers with a drip-tape or drop-hose system. This provision assumes the 30/50-inch row planting pattern has a comparable number of rows, plant population, and yield potential in a normal year as a 40-inch row solid planting pattern.

862 Solid Plant, Strip-Crop, Skip-Row, and Sled-Row Patterns (Continued)**H Exceptions**

The following exceptions have been approved by DAFP.

STC's have the authority to deviate from this formula for crops that are normally grown in widths more than 60 inches; for example, vine crops, tobacco more than 48 inches, etc. STC's will provide DAFP a list of all crops and row widths, STC minutes, and supporting documentation for all exceptions granted under this provision. The following information will be used to identify crops and justifications for exceptions:

- row patterns for the crop with any skip or sled rows
- documentation that supports the yields have been traditionally calculated based on the planting pattern requested for crops with exceptions approved
- State Extension Service recommendation on row widths for these crops
- RMA data
- NASS data.

Note: Cotton planted in an alternating 30/50 inch row planting pattern may be considered a solid planting pattern for both irrigated and non-irrigated rows, where the irrigated acreage has 80 inch irrigation centers with a drip-tape or drip-hose system. This provision assumes the 30/50 inch row planting pattern has a complete number of rows, plant population, and yield potential in a normal year as a 40-inch row solid planting pattern.

862 Solid Plant, Strip-Crop, Skip-Row, and Sled-Row Patterns (Continued)

I Crop Percentage and Acreage

Use the following table to determine the percentage of the area devoted to the crop. The resulting percentages shall be used according to subparagraphs C, D, and E to determine the acreage of the crops. The net acreage shall be reported on FSA-578.

Step	Action
1	Determine the crop row width by measuring the width of each row from plant stem to plant stem. Multiply the number of crop rows in the pattern by the crop row width. This is the area considered planted to the crop. Record in inches. Note: For crop row widths exceeding 40 inches, the inches exceeding the 40 inches are a skip.
2	Determine the skip or sled width by measuring the distance from plant stem to plant stem in the skip or sled row. Subtract $\frac{1}{2}$ row width for each side the skip or sled rows touch a crop row from the width of the sled row. The $\frac{1}{2}$ row width is the area considered planted to the crop and not part of the skip. Total the skips in the pattern.
3	Determine the planting pattern by adding step 1 and step 2.
4	Determine the percentage of land devoted to the crop by dividing the total crop inches from step 1 by the total inches in the planted pattern from step 3.
5	Determine the net crop acreage by multiplying the land devoted to planted acres times the acreage crop percentage from step 4.

863 Evaluating and Using Acreages

A Reported Acreage

When a producer reports changes in field boundaries, or acreage with no official acreage established, determine the acreage by either of the following:

- field visit
- digital imagery.

B Official Acreage

If official acreage has been established and recorded according to 10-CM, establish that the crop is planted using CLU boundaries.

IF the crop is...	THEN...
planted using CLU boundaries	the reported acreage for the area is the official acreage minus any authorized deductions.
not planted using CLU boundaries	determine the acreage using ground or office measurement. Note: Follow 10-CM for updating field boundaries as applicable.

863 Evaluating and Using Acreages (Continued)

C Measurements by LA’s for FSA

Use this table to determine when acreage measured by LA for a policy serviced by FSA shall be used as determined acreage.

WHEN measured acreage...	THEN...
includes the entire crop acreage reported on FSA-578	enter LA’s measured acreage as the determined acreage on FSA-578.
includes only part of the crop acreage reported on FSA-578 and LA’s measured acreage is within 5 percent of the reported acreage	do not enter any of the LA’s measurements as determined acreage.
includes only part of the crop acreage and the difference between LA’s measured acreage and the reported acreage exceeds 5 percent	<ul style="list-style-type: none"> • enter LA’s measured acreage as determined acreage on FSA-578 • determine the remaining acreage of the crop.
differs from the acreage previously determined by a County Office employee’s spot check by more than 5 percent	reconcile the differences.

D Measurements by LA’s for Reinsurance Companies

Use this table when LA measures acreage for a policy serviced by a reinsurance company.

WHEN the acreage measured by LA differs from the FSA-578 reported acreage...	THEN...
by more than tolerance	determine the acreage.
is within tolerance	use the acreage reported on FSA-578.

Note: Acreage determined by FSA shall always be used for program purposes.

864 Erroneous Official Acreage

A Introduction

This paragraph explains:

- the rules for determining acreage for fields with erroneous official acreage determinations
- procedure for correcting acreage.

Note: See paragraph 864 when erroneous acreage results from measurement service.

B Acreage Use Because of Boundary Change

Use determined acreage, instead of official acreage, when both of the following apply:

- the producer reports official acreage
- a boundary change has occurred.

Note: Tolerance is not allowed under these circumstances, except when the boundary change was not readily apparent to the producer.

C When Error Is Not Because of Boundary Change

This table identifies how official and corrected acreages are used when a producer relies on an erroneous official acreage determination and the error is not because of a boundary change.

IF determining acreage for...	THEN use...
accuracy of FSA-578	erroneous official acreage.
<ul style="list-style-type: none"> • actual yield • NAP 	corrected acreage.

Note: This subparagraph may be applied to the subdivision of a field if the producer relied on a subtraction from an erroneous official acreage when reporting the acreage in the subdivision.

864 Erroneous Official Acreages (Continued)

D Correcting Acreage

Use these steps to correct an erroneous official acreage.

Note: Cropland changes made in the system before rollover will affect reported and determined acreages for program purposes.

Step	Action
1	Record the correct acreage on all applicable records.
2	Notify the farm operator, in writing, of the discovery, including: <ul style="list-style-type: none"> • the correct acreage • a statement that the old acreage determination shall no longer be used • an updated photocopy.

865 Redeterminations

A Introduction

A redetermination may be requested by a producer who questions an FSA:

- acreage determination
- production determination
- production appraisal
- CLU boundary.

B Authorizing Redetermination

Authorize redetermination requests according to the following table.

WHEN the redetermination request is for...	THEN the producer must pay the cost of the redetermination and file the request...
acreage	The earlier of the following: <ul style="list-style-type: none"> • within 15 calendar days of the date of FSA-468 or FSA-409 • before physical evidence is destroyed or while disaster conditions are still present.
production	before the commodity is removed from the facility.
appraisals	within 5 workdays of initial appraisal and crop acreage has not been disturbed. Note: Producer must understand that the acreage to be reappraised is not to be released, abandoned, or devoted to another use until the reappraisal is complete and the acreage is released.

Note: See subparagraph F when cost of redetermination is refunded.

C Conducting Redetermination

The County Office will conduct the first redetermination. Second and later redeterminations will be conducted by either of the following as specified by STC:

- employee from another County Office, designated by the State Office
- State Office employee.

865 Redeterminations (Continued)

D Instrument Survey

When an instrument survey is required, a licensed engineer may be hired if both of the following apply:

- the producer pays the total cost
- FSA employee accompanies the engineer to advise on FSA program requirements.

E Reviewing and Documenting Requests

Use this table for reviewing requests and documenting redeterminations.

Step	Action		
1	Review the initial determinations with the producer.		
2	Check the related forms for mechanical errors.		
3	Redetermine the acreage of the areas in question.		
4	If preliminary review indicates errors, inform producer that if redetermination does not confirm the apparent errors indicated, producer will be required to pay the redetermination.		
5	WHEN the redetermination is for...	THEN...	
	reappraisal	void initial appraisal documents and attach to reappraisal.	
	remeasurement	IF error is...	THEN...
		not found	note this fact on FSA-409 or FSA-578.
		found that affects the original determination	revise the acreage report to reflect the redetermination.

865 Redeterminations (Continued)

F Redetermination Cost

The costs of a redetermination will be paid by the producer before a redetermination is made. Use these tables to determine if the cost will be refunded to the producer.

WHEN the redetermination is for...	THEN refund the cost if remeasured acreage...
crop acreage	<ul style="list-style-type: none"> • meets the applicable acreage requirement • is changed by the larger of the following: <ul style="list-style-type: none"> • 3 percent • .5 acre.
production	production is different from the original measurement. See 7-LP.

WHEN the redetermination is for appraisals of...	THEN refund the cost if yield change is the larger of 5 percent or...
cotton	5 pounds.
barley, oats, rice, or wheat	1 bushel.
corn or grain sorghum	2 bushels.

Note: See Exhibit 11 for deviations on redetermination refunds.

866-911 (Reserved)

Section 2 Aerial Compliance

912 Transferring 35mm Slides

A Transferring Slides

Nontobacco-producing counties may transfer their 1984 and subsequent years 35mm slides to NRCS at the local level. If NRCS declines the slides transfer, FSA must keep them in the County Office. Counties that have a history of producing tobacco shall not transfer their 35mm slides to NRCS.

913-926 (Reserved)

Section 4 Measurement Services**927 Measurement Service Requests****A Definition of Measurement Service Request**

A measurement service request is a request for any farm visit or acreage determination that is not required by procedure. Included are farm visits to:

- determine exact area designated for specific crop land or land use by the owner, operator, or other tenant
- determine quantity of farm-stored commodities, according to price support procedure
- redetermine measurements of farm-stored production
- make determinations not required to administer a program, such as a crop appraisal.

B Acceptable Requests

Generally, the County Office will accept any measurement service request at any time before a crop's ARD for:

- staking and referencing
- measurement after planting.

C Completing Requests in Timely Manner

Measurement service will be completed in sufficient time to:

- provide the producer a timely notice of the measured acreage
- allow the producer:
 - 15 calendar days to request remeasurement if the producer believes the acreage is incorrect
 - to make an acreage adjustment, if necessary
 - to report the acreage in a timely manner.

927 Measurement Service Requests (Continued)

D COC Responsibility

COC will:

- ensure that measurement service requests are completed in a timely manner according to subparagraph C
- if necessary, do either or both of the following:
 - establish a cutoff date for accepting requests
 - with State Office concurrence, hire and train additional temporary compliance employees.

E Records of Requests and Fees

Use FSA-409A to maintain a record of measurement service requests. See paragraph 929 for instructions on completing FSA-409A.

To maintain a record of fees, enter the following items on FSA-603, according to 3-FI:

- combination of request numbers for all requests
- sum of fees collected.

928 Measurement Service Rates

A Mandatory Rates for Performing Measurement Service That Includes Farm Visit

Measurement service rates are charged to recover the County Office cost to perform the service. When an on-site visit is required to perform measurement service, rates set by DAFP apply to all State and County Offices.

Exception: Measurement service fees may be deducted from loan proceeds.

STC’s will select 1 of the following 2 options as a statewide rate.

The following table contains the mandatory rates.

Option	Basic Farm Fee <u>1/</u>	Plus Hourly Rate <u>2/</u>	Mileage
1	\$15	\$16 first hour/\$8 every 30 minutes after first hour. Minimum of 1 hour.	Add mileage times the rate published in the latest applicable FI notice.
2	\$30	\$16 first hour/\$8 every 30 minutes after first hour. Minimum of 1 hour.	Mileage charge is included in the basic farm rate. There is no charge for mileage.

1/ This rate:

- was established to recover overhead expenses incurred by the government for items such as office rent, printing supplies, measuring equipment and supplies, and training
- includes costs for processing request, calculating measurements, and notifying producer of results.

Note: Measurement service fees are charged for the farm where the stored commodity will be measured regardless of the number of farms on which the commodity was produced. The location where the measurement service will be performed is entered in FSA-409, item 1.

2/ This rate was established to recover County Office employee expense and is set at a CO-9 rate. Hourly rate charges begin when the employee leaves the County Office and ends when the employee returns to the County Office. Hourly rate is rounded to the nearest 30-minute increment after the first hour when computing costs.

928 Measurement Service Rates (Continued)

B Services Requiring Rates

Measurement service rates will apply to, but not limited to, the following services:

- measuring crops after planting
- staking and referencing acreages to be planted
- measuring acreage that has been adjusted
- verifying crops and disaster acreage
- appraisals
- remeasuring any acreage that had been measured previously
- measuring or sampling farm-stored commodities
- late-filed fees.

C Mandatory Rates for Performing Measurement Service With No Farm Visit

Measurement service rates, when using digital imagery and on-site visit is **not** required, are set by DAFP and apply to all State and County Offices.

The following contains the mandatory rates when using digital imagery to perform measurement services.

Basic Farm Fee	Plus Hourly Rate
\$15	\$16 first hour/\$8 every 30 minutes after first hour. Minimum of 1 hour.

Note: New fee rates will apply beginning with FY 2012.

928 Measurement Service Rates (Continued)

D Collection of Measurement Service Fees

Measurement service fees must be collected from the producer before performing the service, based on an estimate of the cost.

Exception: Measurement service fees may be deducted from loan proceeds.

At a minimum, the estimated cost shall include the basic farm rate plus the hourly rate for the first hour; plus estimated mileage cost if option 1 is selected.

Example 1: If Option “2” was selected by STC, according to subparagraph A, the estimated cost that a producer must pay before the service can be completed would be the basic farm rate of \$30, plus a minimum of \$16 for the first hour is selected.

Example 2: If Option “1” was selected by STC, according to subparagraph A, the estimated cost that a producer must pay before the service can be completed would be the basic farm rate of \$15, plus a minimum of \$16 for the first hour, plus estimated mileage charge.

The actual cost shall be recalculated based on actual travel time; time required to complete the service and actual travel mileage, if applicable. If the amount collected from the producer before performing the service is:

- **less** than the actual cost of performing the service, the County Office must notify the producer of the additional amount due based on the actual cost

Note: A copy of the results of the measurement service will not be provided to the producer until the additional amount is paid.

Exception: If the difference in the amount paid in advance by the producer and the actual cost is \$9.99 or less, no additional funds shall be collected.

- **greater** than the actual cost of performing the service, the producer is due a refund.

928 Measurement Service Rates (Continued)

E Examples of Rates Charged for Performing Measurement Service That Includes Farm Visit

The following are examples of rates charged to perform measurement services.

Example 1: Producer A requests bin measurement in County XYZ in State AB. State AB uses option 1 as a statewide rate. Time to travel from County Office to farm, document bin measurements, and return to County Office is 2 hours 40 minutes (rounded to 2 hours 30 minutes). Trip distance from County Office to farm and back was 45 miles. Total cost to producer for this measurement service is \$15 (basic farm fee) + \$40 (\$16 for first hour plus \$24 for three 30-minute increments) + \$20.61 (45 miles x \$.458) = \$75.61.

Example 2: Producer C requests after planting measurement service in County ZXY in State AE. State AE has selected option 2 as their statewide rate. Producer C has requested measurement service on 6 tobacco plots on 1 farm. Time to travel from County Office to farm, complete acreage boundary determinations, and return to County Office is 3 hours 25 minutes (rounded to 3 hours 30 minutes). Total cost to producer for this measurement service is \$30 (basic farm fee) + \$56 (\$16 for first hour plus \$40 for five 30-minute increments) = \$86.

F Example of Rates Charged for Performing Measurement Service in the Office

The following is an example of rates charged to perform measurement service in the office:

Example: Producer B requests digitizing field boundaries on digital imagery for an acreage measurement of 3 subfields. Time to process measurement service request, load the image service of most current year, find the location within the tract boundary, compute acreage using the CLU Tools, and provide results to producer is 65 minutes (rounded to 60 minutes). Total cost to producer for this service is \$15 (basic farm fee) + \$16 (first 60 minutes) = \$31.

929 Completing FSA-409, Measurement Service Record

A Completing FSA-409

Complete FSA-409 according to the following.

Item	Instructions
1	Enter FSN where the service will be performed. Note: Multiple FSN's may be entered.
2	Enter applicable program year.
3	Enter request number assigned by the County Office. Number the request serially by FY.
4	Enter the farm location by township, range, and section. Note: This is optional.
5A	Enter producer's name and address, including ZIP Code .
5B	Enter producer's telephone number, including Area Code .
6A	Enter alternate contact's name and address, including ZIP Code , if applicable.
6B	Enter alternate contact's telephone number, including Area Code .
7	Check applicable box or boxes. If "Measurement after Planting" or "Remeasurement" is selected, select either "Ground" or "NAIP". Note: Specify if other types of service are requested.
8	Enter commodity or land use.
9	Enter estimated total number of acres of the crop to be physically measured, minus internal deductions.
10	Enter number of applicable bins or plots.
11	Enter basic dollar rate for either of the following: <ul style="list-style-type: none"> • performing measurement service that includes farm visit according to subparagraph 928 A • performing measurement service with no farm visit according to subparagraph 928 C.
12A	Enter total number of hours required to perform the service, including travel time.
12B	Enter total hourly cost. Calculate by multiplying the number of hours in item 12A times the applicable rate according to paragraph 928.

929 Completing FSA-409, Measurement Service Record (Continued)

A Completing FSA-409 (Continued)

Item	Instructions
13A	Enter the total round-trip mileage.
13B	Enter the total mileage cost, if applicable. Calculate by multiplying the mileage in item 13A times the current mileage rate according to the latest applicable FI notice. Note: If not applicable, ENTER "N/A".
14	Enter the total sum of items 11, 12B, and 13B, if applicable.
15A	The person requesting measurement service shall sign.
15B	Enter the date (MM-DD-YYYY) the person making the request signed FSA-409.
16A	Enter the amount of payment received for services requested.
16B	The County Office employee recording/receiving payment for requested service shall sign.
17A	For refunds only, check the applicable "YES" or "NO" box, which is to be completed after the service is performed. If a refund is: <ul style="list-style-type: none"> • due, check "YES" and complete items 17B through 17F • not due, check "NO" and go to item 18A.
17B	Enter the crop or service for the refund.
17C	Enter the refund amount.
17D	Enter the check number.
17E	Enter the date (MM-DD-YYYY) of refund.
17F	The approving CED shall initial.
18A	Enter special instructions for the person who will perform the service, if applicable.
18B	Enter the name of the person who will perform the service.
18C	Enter the date (MM-DD-YYYY) work is issued to the person who will perform the service.
18D	Enter the date (MM-DD-YYYY) the person performing the service returns the measurement.
18E	Enter the date (MM-DD-YYYY) measurement is mailed to the producer. Note: Complete within 10 workdays after performing the service.

929 Completing FSA-409, Measurement Service Record (Continued)

A Completing FSA-409 (Continued)

Item	Instructions
19	Enter the bin or tract number.
20	Enter the CLU number.
21	Enter the commodity or land use, including planting patterns or practices.
22	Enter the total acres or area measured for each CLU or subdivision.
23	Enter the deduction for each CLU or subdivision.
24	Subtract the total deductions (item 23) from the gross acres (item 22) and enter the results in item 24.
25-29	Enter the name of the applicable crop in the space beneath items 25 through 29. Under each crop name, enter the applicable acreage.
30	Enter 1 letter for the method of measurement. Use either "M" or "O" as follows: <ul style="list-style-type: none"> • "M" for measured • "O" for official.
31	Enter the sum of measured acreage or production.
32	Enter the sum of official acreage.
33	Enter the sum of items 25 through 29.
34A	The employee performing the service shall sign.
34B	Enter the date (MM-DD-YYYY) the employee performing the service signed FSA-409.
35	Enter remarks, as applicable.

C Distributing FSA-409

Distribute copies of FSA-409 as follows.

Copy	Distribution
1	Operator’s request to person requesting measurement service.
2	Accounting copy, which serves as an official copy of fees collected.
3	Operator’s receipt and result of service performed. Distribute this copy and photocopy to the person making the request after the service is performed and fees have been paid.
4	COC copy showing service performed. File this copy in farm folder.
5	COC copy for use while work is assigned to reporter. Discard this copy after farm operator has been informed of completed service.

930 Completing FSA-409A, Measurement Service Request Register

A Using FSA-409A

Use FSA-409A to maintain a record of the number and types of measurement service requests. Use of FSA-409A is optional; however, it may be useful in County Offices with a large volume of requests.

FSA-409A is reproduced locally and maintained in the applicable compliance file.

B Completing FSA-409A

Use this table to complete FSA-409A.

Item	Instructions
3	FSN on FSA-409.
4	Name of person requesting service.
5	Date measurement service request was made.
6	Date measurement service was completed.
7	Date County Office sends completed FSA-409 to person requesting service.

930 **Completing FSA-409A, Measurement Service Request Register (Continued)**

C Example FSA-409A

Following is an example of FSA-409A.

FSA-409A 09-10-18		U. S. DEPARTMENT OF AGRICULTURE Farm Service Agency		1. COUNTY	
MEASUREMENT SERVICE REQUEST REGISTER				2. STATE	
NOTE: This form is used to aid in accounting for measurement service requests in counties where a large volume of requests are received.					
3. FARM NUMBER	4. FARM OPERATOR	5. DATE MEASUREMENT SERVICE REQUEST RECEIVED	6. DATE MEASUREMENT SERVICE PERFORMED	7. DATE OPERATOR IS NOTIFIED OF DETERMINATION	

931 Measurement Service After Planting**A Definition of Measurement Service After Planting**

Measurement service after planting means determining a crop or designated acreage after planting, but before the farm operator files a report of acreage for the crop.

Example: See subparagraph C for an example of FSA-409 for measurement service after planting.

B Timely Requests

Requests for measurement service after planting may be filed no later than the final reporting date for the crop or land use to be considered timely filed. Requests filed after the final reporting date may be accepted if the producer pays the cost of the measurement service in addition to the late-filed fee for reporting the acreage. This would result in the producer paying twice the cost of the measurement service.

Note: Producers requesting measurement service after the final reporting date shall not be allowed to adjust acreage to meet program requirements if previously spot-checked.

931 Measurement Service After Planting (Continued)

1/ Item 30. Method of Measurement. Enter "M" for measured or "O" for official.

932 Measurement Service Guarantee

A Guaranteed Service

Measurement service is guaranteed for the current crop year when all of the following apply:

- service was requested and fees were paid in a timely manner
- acreage was measured by COC representative
- producer took action based on the measurement service.

The guarantee also applies to staking and referencing when the producer places field markers and plants exactly as directed by the County Office.

Note: Guarantee does not apply to compliance with the conservation plan required by 6-CP.

B Incorrect Measurement Service

If a producer takes action on an incorrect measurement service, COC will consider the farm in compliance with acreage requirements for the current year, if that measurement service was performed for the entire crop or allotment on the farm. This includes errors made in:

- recording program or allotment requirements
- measurement
- field assistant’s judgment
- placement of field or subdivision lines
- planimetry or computation.

Note: Measurement service is not guaranteed if the producer did not take action based on the measurement service.

C Dataloading Measurement Service Errors

Use this table to enter acreage on FSA-578 when acreage is in error but is guaranteed according to this paragraph.

IF the guaranteed acreage is...	THEN enter guaranteed acreage as the reported acreage and the determined acreage, and...
less than the actual acreage	enter an additional field with the remaining acreage using the land use code “N”.
more than the actual acreage	on FSA-578, document the reason for reported acreage exceeding cropland acreage, if applicable.

933-947 (Reserved)

Part 8 Digital Photography

958 Working With Digital Photocopies

A Charging for Photocopies

County Offices will provide digital photocopies according to the following table.

WHEN a request for digital photocopies is made by...	THEN the digital photocopies are...
<ul style="list-style-type: none"> • farm operators, owners, or other producers on the farm • LA's for all crop insurance • NRCS for HEL and wetland determinations • farm credit appraisers for performing appraisals of FSA direct or guaranteed loans • other Federal or State agencies to perform their official duties in making FSA program determinations 	<p>provided free upon request.</p>
<ul style="list-style-type: none"> • Federal, State, or local agencies to perform official duties not related to making FSA program determinations <p>Example: NRCS for national resource inventories or county governments for assessments.</p> <ul style="list-style-type: none"> • all others 	<p>sold for \$1 per copy.</p>

959-982 (Reserved)

Part 9 Data Sharing**983 Providing Data to Multiple Peril Crop Insurance Companies, Agents, and LA's - General Information****A Introduction**

This part provides procedure for making FSA-578 producer prints and hard copy maps available to private crop insurance companies, agents, and LA's.

Note: See 4-RM for requests for information made in connection with the following:

- claims and other quality control audits
- discrepancy reviews
- suspected program abuse, misuse, or fraud reviews.

B County Office Responsibilities

County Offices will provide timely information to crop insurance companies, agents, and LA's according to the provisions of this part.

C Unlawful Disclosure

County Offices **must** ensure that crop insurance companies, agents, and LA's provide proof that the producer has a policy with the agent or company requesting producer information. When a third party submits a FOIA request for information that is subject to the Privacy Act, and the information is **not** required to be released under FOIA, the material may **not** be disclosed without prior written approval of the individual on whom the record is maintained.

See 2-INFO for guidance on responding to FOIA requests.

983 Providing Data to Multiple Peril Crop Insurance Companies, Agents, and LA's - General Information (Continued)**D Conflict of Interest**

County Offices will be aware of the "Conflict of Interest" policy in the 2005 SRA. According to SRA, Section F, 4, Conflict of Interest, paragraphs v and vi, the insurance company and its service providers must **not** permit their sales agents, agency employees, sales supervisors, or any relative of its sales agents, agency employees, or sales supervisors to be involved in loss adjustment activities in a county or adjoining county where the agent, agency employee, or sales supervisor performs sales functions (except receipt and transfer to the insurance company of a loss), including the following:

- advising or assisting the policyholder in any manner in preparing the claim and the determination of the indemnity, including but **not** limited to, whether the LA correctly applied loss adjustment procedures
- any other function reserved for LA's in the procedures.

Example: A policyholder filing a claim of crop loss notifies his/her sales agent. The sales agent provides notification of the policyholder's claim filing to the insurance company. The insurance company assigns a crop LA to provide loss adjustment procedures for the policyholder. The sales agent must no longer be involved with the policyholders crop loss claim except as provided in the SRA, like simplified claims.

984 LA Requests**A Providing Information to Multiple Peril Crop Insurance Company LA's**

Information provided to LA's must only be used for the express purpose of fulfilling loss adjustment and for loss adjustment associated compliance obligations performed by an LA. Requests for information shall **not** be honored unless a crop claim of loss has been filed.

LA's working loss claims and related compliance activities will use FSA-426 to request the following information:

- current year FSA-578 producer prints
- hard copy map.

In certain cases, LA's may have loss claim activities that require the use of data from previous years. In those cases, LA's may use FSA-426 to request data from previous years. LA's **must** note in FSA-426, item 10, the years for which the data is requested.

Information requested on FSA-426 for the purpose of crop loss activity is provided at **no charge**.

Notes: County Offices will only provide 1 copy of the FSA-578 producer print or hard copy map for the farm for each year for which data is requested.

984 LA Requests (Continued)

B Acceptable Proof of Insurance

When submitting a request for information on FSA-426, LA's must provide documentation that they are authorized access to the producer's records. Acceptable documentation of includes 1 or more of the following for the current crop year:

- a producer signed transfer policy
- a claim completed or partially completed indicating loss adjustment work will be performed for the producer
- Summary of Insurance Protection
- Notice of Acceptance
- Schedule of Insurance
- written certification on FSA-426.

985 Crop Insurance Company and Agent Requests**A Providing Information to Crop Insurance Companies and Agents**

Information provided to crop insurance companies and agents is intended only for the purpose of assisting in insuring a producer under a policy or plan of insurance.

Crop insurance companies and agents will use FSA-426 to request the following information:

- current year FSA-578 producer prints
- hard copy map.

When submitting requests for information on FSA-426, crop insurance companies and agents shall provide documentation that they are authorized to access the producer's records. Acceptable documentation includes 1 or more of the following for the current crop year:

- producer signed policy
- producer signed transfer/application policy
- Schedule of Insurance
- Notice of Acceptance/Policy Confirmation
- Summary of Insurance Protection
- a signed statement from the producer authorizing release of documents to the named crop insurance company and/or agent
- written certification on FSA-426.

Information requested by crop insurance companies and/or agents will be provided at **no charge**.

Note: County Offices will only provide 1 copy of the FSA-578 producer print or hard copy map at no charge.

County Offices will charge crop insurance companies and agents for subsequent copies of current year FSA-578 producer prints, maps, and for requests for prior year FSA-578 data.

985 Crop Insurance Company and Agent Requests (Continued)**B Charges for Copies**

Crop insurance companies and/or agents may be provided 1 current year FSA-578 producer print and map at **no cost**. FSA will charge for subsequent copies as follows:

- FSA-578 producer print - \$0.20 per page
- hard copy map; computer print or photocopy - \$1 per page.

Note: County Offices will use the program code for other reimbursement outlined in 3-FI to account for the money collected for information requests.

986 Other Third Party Data Requests**A Consent to Release FSA-578 Data to a Third Party Recipient**

Third party recipients of FSA-578 data other than multiple peril crop insurance companies, agents, and LA's must be authorized to obtain records by the producer to which the records pertain according to procedure in 3-INFO.

B Power of Attorney

Power of attorney for acreage reporting purposes is approved for signature authority **only**. Data release using power of attorney for FSA-578 data is **not** permitted.

Follow 1-CM, Part 5 for policy on power of attorney and rules of authority.

987 Requesting Information on FSA-426

A Data Requests on FSA-426

LA’s, crop insurance companies, and agents will use FSA-426 to request current year FSA-578 producer prints and maps.

Note: When signing FSA-426, the crop insurance representative is certifying that the requested information will be used only for performing loss adjustment and compliance activities and/or insuring a producer under a policy or plan of insurance.

B Processing FSA-426 Data Requests

County Offices may mail, e-mail, or FAX the information requested on FSA-426 to LA’s, crop insurance companies, and agents.

Note: When e-mailing information requested on FSA-426, County Offices shall ensure that privacy provisions are followed. The requested data **must** be sent in an encrypted file and the password to open the file **cannot** be sent in the same e-mail.

C Timeframe for Processing FSA-426 Requests

County Offices must process requests for information on FSA-426 as promptly as possible. A 3-workday turnaround for responding to requests is feasible in most cases.

The following table provides contact information in cases where County Offices receive requests for an unreasonable number of producers.

IF a request for an unreasonable number of producers is received in the...	THEN forward the request to...
County Office	State Office.
State Office	RA.FSA.DCWa2.ppb@wdc.usda.gov.

D Reporting FSA-426 Workload in the Activity Reporting System

County Offices shall record time spent on processing FSA-426’s in the WebTA Activity Reporting System under Program, “CROPIN” and Activity, “FOIA-PA”.

E Filing

File processed FSA-426’s by FY in folder “CI-1, Reports and Statistics”.

987 Requesting Information on FSA-426 (Continued)

F Example of FSA-426

The following is an example of a completed FSA-426.

Note: In item 6 only use the last 4 digits of a producer's ID number.

This form is available electronically.		FSA-426 (09-22-14)		U.S. DEPARTMENT OF AGRICULTURE Farm Service Agency		1. COUNTY OFFICE NAME, ADDRESS	
MPCI/FCIC INFORMATION REQUEST WORKSHEET				TELEPHONE NO. (Include area code):			
				2. PROGRAM YEAR		3. DATE	
ITEMS 4 THROUGH 11 TO BE COMPLETED BY REQUESTER							
4A. REQUESTER'S NAME			4B. TELEPHONE NUMBER (Include area code)		4C. ID NUMBER		4D. ID TYPE
5. PRODUCER'S NAME		6. ID NUMBER (Last 4 Digits Only)	7. ID TYPE	8. INFORMATION REQUESTED (√) Check appropriate box(es) that are applicable to producer.)			
				A. FSA-578 Producer Print		B. Map Photocopies	
9A. INFORMATION WILL BE:				9B. ADDRESS, IF MAILED/EMAIL ADDRESS			
<input type="checkbox"/> MAILED <input type="checkbox"/> EMAILED <input type="checkbox"/> PICKED UP							
10. REMARKS							
11. CERTIFICATION							
I certify that I am authorized access to the producer's records and that the information requested will be used by the insurance company I represent for the purpose of fulfilling loss adjustment and compliance obligations and/or insuring a producer under a policy or plan of insurance.							
A. REQUESTER'S SIGNATURE			B. TITLE			C. DATE	
12. TO BE COMPLETED BY FSA ONLY							
A. DATE RECEIVED		B. DATE FURNISHED		C. WORKLOAD DATA		D. INITIALS	
NOTE: The following statement is made in accordance with the Privacy Act of 1974 (5 USC 552a - as amended). The authority for requesting the information identified on this form is 7 CFR Part 400, the Agriculture Risk Protection Act of 2000 (Pub. L. 106-224), the Federal Crop Insurance Act (7 U.S.C. 1501 et seq.), and the Agricultural Act of 2014 (Pub. L. 113-79). The information will be used to determine insurance provider eligibility to request/receive producer documentation from FSA County Offices for loss adjustment and compliance obligations. The information collected on this form may be disclosed to other Federal, State, Local government agencies, Tribal agencies, and nongovernmental entities that have been authorized access to the information by statute or regulation and/or as described in applicable Routine Uses identified in the System of Records Notice for USDA/FSA-2, Farm Records File (Automated). Providing the requested information is voluntary. However, failure to furnish the requested information will result in a determination of ineligibility for the insurance provider to request/receive producer documentation from FSA County Offices for loss adjustment and compliance obligations.							
<small>The U.S. Department of Agriculture (USDA) prohibits discrimination against its customers, employees, and applicants for employment on the basis of race, color, national origin, age, disability, sex, gender identity, religion, reprisal, and where applicable, political beliefs, marital status, familial or parental status, sexual orientation, or all or part of an individual's income is derived from any public assistance program, or protected genetic information in employment or in any program or activity conducted or funded by the Department. (Not all prohibited bases will apply to all programs and/or employment activities.) Persons with disabilities, who wish to file a program complaint, write to the address below or if you require alternative means of communication for program information (e.g., Braille, large print, audiotape, etc.) please contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). Individuals who are deaf, hard of hearing, or have speech disabilities and wish to file either an EEO or program complaint, please contact USDA through the Federal Relay Service at (800) 877-8339 or (800) 845-6136 (in Spanish).</small>							
<small>If you wish to file a Civil Rights program complaint of discrimination, complete the USDA Program Discrimination Complaint Form, found online at http://www.ascr.usda.gov/complaint_filing_cust.html, or at any USDA office, or call (866) 632-9992 to request the form. You may also write a letter containing all of the information requested in the form. Send your completed complaint form or letter by mail to U.S. Department of Agriculture, Director, Office of Adjudication, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410, by fax (202) 690-7442 or email at program.intake@usda.gov. USDA is an equal opportunity provider and employer.</small>

Redelegations of Authority

This table lists the redelegation of authority in this handbook.

Redelegation	Reference
<p>In routine cases, COC may redelegate to CED, in writing, the authority to act on, or sign, as applicable, CCC-576, Part C.</p> <p>Note: The redelegation:</p> <ul style="list-style-type: none"> • must define what COC considers routine • shall be recorded in COC minutes. 	1-NAP (Rev. 2), paragraph 575

Definitions of Terms Used in This Handbook**Accurate Acreage Report**

An accurate report of acreage is a producer's acreage certification of the crop and land use for the farm or farms, critical to program benefits.

Note: An inaccurate report is used to determine a discrepancy, not the potential advantage to the producer.

Adequate Water Supply or Source

Adequate water supply or source means there will be a reasonable expectation of having enough water physically and legally available to carry out good irrigation practices on the entire acreage reported as irrigated for the entire growing season. If the producer knows or had reason to know that the water supply or source not absent or eligible loss condition, would not be adequate or their water rights would be limited or reduced to an extent that good irrigation practices would not be possible or practicable for the entire growing season, then no reasonable expectation of adequate water exists. It is the producer's responsibility to demonstrate that absent or eligible loss condition as specified in paragraph 31, a reasonable expectation of receiving adequate water to carry out good irrigation practices on the entire acreage reported as irrigated for the entire growing season. Producer will be expected to be prepared to provide documentation of the factors which were considered in reporting the acreage as irrigated.

Aerial Compliance

Aerial compliance is a method of determining acreage and updating aerial photography using 35mm slides, digital images, and other approved equipment.

Aerial Photographs

Aerial photographs are rectified enlargements made from negatives by APFO. Aerial photographs can be 24- by 24-inches or 17- by 17-inches. Because of the accuracy of the enlarging method, all images on the prints are usable for measurements.

Definitions of Terms Used in This Handbook

Alidade

An alidade is a telescopic surveying instrument, primarily used by professional engineers and technicians, mounted on a plane table that can be leveled and rotated clockwise from north to south to measure angles.

Alternate

Alternate is acreage on which multiple crop species are grown together, usually in 1 or more rows each, in the same crop year. The crop species can grow together with 1 or some completing its or their growth cycle before the other(s). The crops may be grown in a manner that permits, but does not require, separate agronomic maintenance or harvest. This practice does not meet the definitions for interplanted, double-cropping, repeat, or strip/skip cropping practices.

Example 1: A row of trees are alternated with a row of banana plants and a row of coffee plants.

Example 2: A row of lettuce may be alternated with a row of broccoli.

Example 3: Several rows of sweet corn are alternated with several rows of potatoes and 1 row of English peas.

Definitions of Terms Used in This Handbook (Continued)

Attribute

Attribute means descriptive data attached to CLU.

Chain Tape

Chain tape means a metal measuring tape, graduated in chains and links. One chain is equal to 100 links or 66 feet. One link is equal to 7.92 inches.

Common Land Unit (CLU)

CLU (formerly known as a field) means the smallest unit of land that has a permanent, contiguous boundary, common land cover and land management, common owner, and common producer association.

Common Land Unit (CLU) Layer

CLU layer means a digital layer made up of a county's CLU's.

Contact Prints

Contact prints mean 12- by 12-inch prints of aerial photographs overlapping 50 percent from photo-to-photo, going from north to south and from east to west.

Coverage

Coverage is the total ground area covered by a slide. The coverage area is about 21 percent larger than target area. This eliminates the need to use the edges of the slide, which may be distorted.

Cover Crop

Cover crop means crops, including grasses, legumes, and forbs, for seasonal cover and other conservation purposes. Cover crops are primarily used for erosion control, soil health improvement, and water quality improvement. The cover crop may be terminated by natural causes, such as frost, or intentionally terminated through chemical application, crimping, rolling, tillage, or cutting.

Note: A cover crop managed and terminated according to NRCS Cover Crop Termination Guidelines is **not** considered a crop for crop insurance purposes.

Crop Reporting Date

The crop reporting date is the latest date the FSA Administrator will allow the farm operator, farm owner, or their agent to submit a crop acreage report for the report to be considered timely.

Definitions of Terms Used in This Handbook (Continued)

Current Year

Current year is the year for which acreages and bases, or other program determinations are established for that program.

Determined Acreage

Determined acreage means acreage established by a representative of FSA by use of official acreage, digitizing or planimetry areas on the photograph or other photographic image, or computations from scaled dimensions or ground measurements.

3 D Differential Location

3 D differential location is when the receiver issuing differential data obtained through DGPS operated by the U.S. Coast Guard or WAAS, such as the system operated by FAA and the receiver is using data on at least 4 satellites.

Digital Orthophotography (DOQ)

DOQ is a digital representation (map) of an aerial photograph. Ground and land features are accurately located in their true map positions on DOQ. Distortions caused by differences in terrain relief and aerial camera tilt have been removed. Service Centers will use DOQ's as the base map in GIS.

Digital Photographs

Digital photographs are digital representations of an aerial photograph.

Digitizer

A digitizer is a measuring tool that computes areas and lengths by tracing an area and directly entering the results into a computer. Some digitizers have small internal computers.

Digitizing

Digitizing is encoding map features, such as points, lines, and polygons, as coordinates in a digital form, that is, using the computer to draw lines and points on a digital map. Field Service Agencies will be digitalizing tract/CLU boundaries on top of DOQ is drawing of CLU boundaries.

Definitions of Terms Used in This Handbook (Continued)**Divider**

--A divider is a compass that can be used with the scale ruler. See this Exhibit for a definition-- of a scale ruler.

Electronic Distance Measuring Instrument

An electronic distance measuring instrument is a surveying tool used to measure distance and height. The instrument is aimed at an object and measurements are recorded.

Failed Acreage

Failed acreage is acreage that was timely planted with the intent to harvest, but because of disaster related conditions, the crop failed before it could be brought to harvest.

Fallow

Fallow is unplanted cropland acres which are part of a crop/fallow rotation; where cultivated land that is normally planted is purposely kept out of production during a regular growing season. Resting the ground in this manner allows it to recover its fertility and conserve moisture for crop production in the next growing season

Farm Inspection

A farm inspection is an inspection by an authorized FSA representative using aerial or ground compliance to determine the extent of producer adherence to program requirements.

Field

A field is a part of a farm that is separated from the balance of the farm by permanent boundaries, such as:

- fences
- permanent waterways
- woodlands
- croplines in cases where farming practices make it probable that this cropline is not subject to change
- other similar features.

Final Planting Date

The final planting date is the last day in a planting period that a specific crop can be planted for which a normal yield can be reasonably expected to be produced.

Definitions of Terms Used in This Handbook (Continued)

Geographic Information System (GIS)

GIS is a system that:

- stores, analyzes, and manipulates spatial or geographically referenced data
- computes distances and acres using stored data and calculations.

Geographic Positioning System (GPS)

GPS is a positioning system using satellites that continuously transmit coded information. The information transmitted from the satellites is interpreted by GPS receivers to precisely identify locations on Earth by measuring distance from the satellites.

Good Irrigation Practice

Good Irrigation Practice means application of adequate water to adequately grow the crop in a reasonable and sufficient manner, at the proper times necessary to produce the irrigated yield expected for the area or individual's established approved yield if applicable.

Ground Compliance

Ground compliance is an onsite method for determining acreage and updating aerial photography.

Note: Ground compliance is done by actually going to the field and measuring the acreage using tapes, measuring wheels, and other equipment that can determine the acreage.

Ground Measurement

Ground measurement is the technique of finding the distance between 2 points on the ground using the chain and is expressed in chains and links.

Definitions of Terms Used in This Handbook (Continued)

GPS Unit

A GPS unit is a device that:

- uses satellite positioning to determine points on the earth
- is authorized for all compliance measurement purposes.

* * *

Initial Crop

An initial crop is the first crop FSA will recognize for program purposes on a field or subdivision during a crop year.

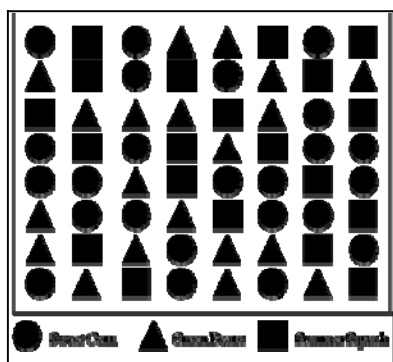

Idle

Cropland or the balance of cropland within an FSA CLU (field/subfield) which is not planted or considered not planted.

Interplant

Interplant is acreage on which multiple crop species are grown together, with no distinct row pattern, in the same crop year.

Example: Sweet corn, green beans, and summer squash are interplanted in no particular row pattern.

Interseed

Interseed is acreage on which 2 or more crop species are sown together or 1 or more crop species are sown into an established stand. This practice most often applies to grasses, grass-like plants, forbs, legumes, or other cover crops sown into a standing crop.

Definitions of Terms Used in This Handbook (Continued)

Irrigation

Irrigation means providing water in sufficient amounts to grow a crop during the growing season by appropriate systems and at the proper times. Only acreage for which the producer has both the following, to carry out good irrigation practice for the crop, may be considered irrigated acreage:

- adequate irrigation equipment and facilities
- physical and legal control and physical and legal access to an adequate amount of water needed to irrigate a crop in a reasonable and sufficient manner for the entire growing season.

Important: Surface water, such as irrigation water provided either by a private concern or irrigation district or similar authority (BIA or BLM) by a delivery system of pipes or canals, or water from a lake, pond, or natural flowing river, stream, brook or creek may be the source of water for irrigating crops. However, the acreage adjacent to the surface water source or delivery system will **not** be considered irrigated acreage based solely on its proximity to the water source or delivery system.

Irrigation Equipment and Facilities

Irrigation Equipment and Facilities means the physical resources, other than water, used to regulate the flow of water from a water source to the acreage. This includes, but is not limited to, pumps, valves, sprinkler heads, turn-outs, gates and other water utilization devices.

Note: A functioning center pivot irrigation system is considered irrigation equipment and facilities.

Late-Filed FSA-578

A late-filed FSA-578 is a report that has not been filed by the reporting date according to paragraph 18.

Multi-Use

A multi-use is 1 crop that is used for multiple purposes.

Example: Bananas harvested for both their leaves and fruit is a multi-use crop.

Definitions of Terms Used in This Handbook (Continued)**Official Acreage**

Official acreage is acreage established by FSA as an accurate measure for an area. This acreage is recorded and maintained on photography.

Note: Until CLU is certified, the acreage designated official on the hard copy map will be the official acreage. * * *

Perennial Forage

Perennial forage means any crop used for forage including plants (consumed by livestock to satisfy net energy requirements) which is not planted or seeded annually.

Permanent Boundary

A permanent boundary is a recognized established boundary that is not readily movable, such as:

- property line
- ditch
- road
- fence
- hedgerow.

Permanent Point or Object

A permanent point or object is a point that is easy to identify and not easily moved; such as, a boulder, tree, pole, or fence post.

Pin, Flag, or Stake

A pin, flag, or stake is an object placed in the ground to mark a point to be used to determine a measurement.

Photocopy

A photocopy is a copy of a portion of a rectified aerial photograph or DOQ showing a farm or a group of farms with tract and field boundaries.

Photograph

A photograph includes both hard copy aerial photograph and DOQ's. All uses cover both aerial and digital unless specified.

Definitions of Terms Used in This Handbook (Continued)**Polar Planimeter**

A polar planimeter is an instrument moved along boundaries on aerial photography. The instrument readings are used to convert photography measurements to acreages.

Population

Population is the total number of APH's for production reviews.

Prevented Planting

Prevented planting is the inability to plant the intended crop acreage with proper equipment by the final planting date for the crop type because of a natural disaster.

Repeat Crop

A repeat crop is subsequent planting of the same crop on the same acreage after the harvesting of a previous planting of the crop in the same crop year.

Reported Acreage

Reported acreage is acreage reported by the farm operator, farm owner, or a properly authorized agent.

Scale Ruler

A scale ruler is a calibrated ruler for use with tapes graduated in chains and feet. Scale rulers for chains are graduated in 660 feet (50 parts to inch) and 1,000 feet (75.7 parts to inch).

Skip

Skip is the distance from the center of planted row to the center of planted row.

Skip-Row or Strip-Crop Planting

Skip-row or strip-crop planting is a cultural practice in which rows of the crop area are alternated with strips of idle land or another crop in a regular pattern.

Skip-Row Pattern

A skip-row pattern is a cultural practice of alternating strips of row crops with idle land.

Definitions of Terms Used in This Handbook (Continued)**Sled-Row Pattern**

A sled-row pattern is a cultural practice of alternating strips of tobacco with idle land. Originally, this idle land was used as a transportation lane for the sled that carried the harvested tobacco.

Note: Sled-row pattern could also apply to other crops, such as vine crops.

Slide

A slide is a photographic transparency measuring 35mm (1.377.95 inches) long and 23.3mm (0.90945 inches) wide and mounted in a 2- by 2-inch frame.

Solid Plant Pattern

A solid plant pattern is a cultural practice of uniform rows where the distance between row widths does not exceed 40 inches.

Staking and Referencing

Staking and referencing is the determination of acreage before planting, designating, or adjusting by:

- planimetering or digitizing a delineated area on photography or computing the chains and links from ground measurement
- sketching the field or subdivision
- placing markers on the ground and noting the position
- guaranteeing the acreage which is later planted, designated, or adjusted within the staked area
- placing markers on the land to allow a producer to accurately plant, designate, or adjust acreage.

Standard Deduction

Standard deduction is an acreage allowance determined for the turn area by applying a percent of the area planted to the crop, instead of measuring the turn areas. COC deviations from the standard must be reasonable and justifiable for the crop and area affected.

Definitions of Terms Used in This Handbook (Continued)**Strip-Crop Pattern**

A strip-crop pattern is a cultural practice of alternating strips of crops and idle land or other crops.

Subdivision

A subdivision is a part of a field that is separated from the balance of the field by temporary boundary, such as a cropline that could be easily moved or will likely disappear.

Subsequent Crop

A subsequent crop is a crop planted after a different crop that is viewed as either an initial crop or a repeat crop on the same field or subdivision within a crop year or a second crop that does not meet double-cropping requirements.

Target

The target is the:

- area on the ground
- subject of the slide.

Temporary Boundary

A temporary boundary is an easily movable boundary generally recognizable, including croplines and turn areas between fields.

Temporary, Fixed Point

A temporary, fixed point is a point that is easy to identify and easily movable. A stake referenced to a permanent point or a permanent point on a permanent boundary is a fixed point.

Tolerance

Tolerance is a prescribed amount within which the reported acreage and/or production of a crop may differ from the determined acreage and/or production and still be considered in compliance.

Definitions of Terms Used in This Handbook (Continued)

Turn Area

Turn area is the area perpendicular to the crop row that is necessary for turning operating equipment. A turn area is also called turn row, headland, or end row.

Verifying

Verifying is any method used to determine the accuracy of the amount of and identification of reported acreage and land use and compliance with program requirements.

Volunteer Crop

A volunteer crop is a crop that was planted in a previous crop year on the applicable acreage or drifted from other acreage, successfully self-seeded, and is growing this crop year on the applicable acreage without being intentionally sown or managed.

Zero Acreage

Zero acreage is when no crop acreage was planted on the farm for the year.

Crop Reporting Dates Beginning July 1, 2012, for 2012 and Subsequent Crop Years

A Introduction

This exhibit lists FSA farm program crop reporting dates. The alignment of crop reporting dates is a cooperative effort among multiple USDA agencies.

*--See paragraph 24 for ARD policy and paragraph 27 for late-filed FSA-578 policy.

B List of Crop Reporting Dates Beginning July 1, 2012, for 2012 and Subsequent Crop Years

The following table lists crop reporting dates for farm programs, including NAP. See paragraphs 24 and 27 for exceptions to ARD's and/or late-filed FSA-578 provisions, as--* applicable.

The following table provides crop/commodity reporting dates applicable to all States for applicable program eligibility.

Note: This list of ARD's may not be fully inclusive of every crop/commodity ARD applicable to all States.

States	Crop/Commodity	Date
All	Value-loss and controlled environment crops *--(except nursery).--*	September 30
	CRP.	July 15

Note: The forage seeding referenced in this example means perennial forage seeding.

Crop Reporting Dates Beginning July 1, 2012, for 2012 and Subsequent Crop Years (Continued)

B List of Crop Reporting Dates Beginning July 1, 2012, for 2012 and Subsequent Crop Years (Continued)

The following tables provide crop/commodity reporting dates shown in sequential order (earliest to latest) for a crop year by State.

State	Crop	Date
Alabama	Apiculture, Perennial Forage, Onions.	November 15
	Blueberries, Canola, Rapeseed, Fall Oats, Peaches, Fall Wheat.	January 15
	Pecans, Potatoes (Planted 1/1-3/1).	March 15
	Sweet Corn, Potatoes (Planted 3/2-4/15), Tobacco, Tomatoes.	May 15
	All other crops.	July 15
Alaska	Perennial Forage, Fall-Seeded Small Grains.	December 15
	All other crops.	July 15
Arizona	Apiculture, Perennial Forage, Onions.	November 15
	Apples, Grapefruit, Lemons, Oranges, Tangelos, Tangerines.	January 15
	Pecans, Pistachios, Potatoes, Small Grains.	March 15
	All other crops.	July 15
	Grain Sorghum.	August 15
Arkansas	*--Perennial Forage.	November 15
	Fall-Seeded Small Grains.	December 15
	Apples, Grapes, Peaches.--*	January 15
	Tomatoes.	May 15
	All other crops.	July 15

Crop Reporting Dates Beginning July 1, 2012, for 2012 and Subsequent Crop Years (Continued)

B List of Crop Reporting Dates Beginning July 1, 2012, for 2012 and Subsequent Crop Years (Continued)

State	Crop	Date
California	Apiculture.	November 15
	Perennial Forage, Mint, Onions (Imperial County), Potatoes (see map), Fall Wheat.	December 15
	Avocados, Blueberries, Grapefruit, Lemons, Oranges, Potatoes (see map), Strawberries, Sugar Beets (Planted 9/1-12/31), Tangelos, Tangerines.	January 15
	Fall Alfalfa Seed, Almonds, Apples, Apricots, Fall Barley, Cherries, Figs, Nectarines, Spring Oats (Planted 10/1-2/15), Olives, Peaches, Pears, Pecans, Plums, Potatoes (see map), Prunes, Walnuts, Wheat (Planted 11/1-2/15).	March 15
	Grapes, Spring Oats (Planted 3/1-4/20), Onions (Fresno, Kern, Monterey, San Benito, and San Joaquin Counties), Potatoes (see map).	May 15
	Forage Seeding, Potatoes (see map).	June 15
	Spring Alfalfa Seed, Spring Oats (Planted 4/21-5/31), Onions (all other counties), Potatoes (see map), Sugar Beets (Planted 5/1-6/30), Wheat (Planted 3/6-5/31), all other crops.	July 15
	Raisins.	July 31
	Potatoes (see map), Strawberries (Ventura County) (Planted 6/15-8/15).	September 15
	See map in subparagraph D for Potatoes.	
Colorado	Apiculture, Perennial Forage, Fall-Seeded Small Grains.	November 15
	Apples, Grapes, Peaches.	January 15
	Onions.	June 15
	All other crops.	July 15

Crop Reporting Dates Beginning July 1, 2012, for 2012 and Subsequent Crop Years (Continued)

B List of Crop Reporting Dates Beginning July 1, 2012, for 2012 and Subsequent Crop Years (Continued)

State	Crop	Date
Connecticut	*--Apples, Peaches, Fall-Seeded Small Grains, Grapes.--*	January 15
	Perennial Forage.	November 15
	All other crops.	July 15
Delaware	Fall-Seeded Small Grains.	December 15
	Peas (Green only), Potatoes.	May 15
	Beans (Limas only), Cucumbers (Planted 4/20-6/25 in Kent, Sussex, and New Castle Counties), all other crops.	July 15
	Beans (all types except Limas – planted 4/20-8/10), Cucumbers (Planted 6/26-8/10 in Kent and Sussex	August 15
	Perennial Forage.	November 15
Florida	Sweet Corn (see map), Potatoes (see map).	October 15
	Apiculture, Cabbage (Planted 9/12-10/31), Perennial Forage, Tomatoes (see map).	November 15
	Cabbage (Planted 11/1-12/15), Peppers (see map), Tomatoes (see map).	December 15
	Atemoya, Avocados, Bananas, Blueberries, Caneberries, Caimito, Cherimoya, Sweet Corn (see map), Dasheen, Guava, Jack Fruit, Mango, Papaya, Passion Fruit, Potatoes (see map), Sapodilla, Sapote, Fall-Seeded Small Grains, Tomatoes (see map).	January 15
	Peppers (see map), Tomatoes (see map).	February 15
	Cabbage (Planted 12/16-2/15), Pecans, Peppers (see map), Potatoes (see map), Tomatoes (see map).	March 15
	Sweet Corn (see map), Grapefruit, Lemons, Limes, Oranges, Tangelos, Tangerines, Tangors, Tomatoes (see map).	April 15
	Sweet Corn (see map), Tobacco.	May 15
	All other crops.	July 15
	Sweet Corn (see map), Peppers (see map), Tomatoes (see map).	September 15
	Peppers (see map), Tomatoes (see map).	October 15
	See maps in subparagraphs E through H for reporting dates for Sweet Corn, Peppers, Potatoes, and Tomatoes.

Following is a map of the Texas beans for 2014 and subsequent crop years for farm programs.

2003 and Subsequent Year Crops Reported on FSA-578

The following lists the crop names, crop codes, abbreviations, intended uses, and land uses for crops and commodities reported on FSA-578.

Notes: Except for sorghum, crops historically reported with intended uses of “Silage” (SG), “Haying” (HY), “Green Chop” (GC), or “Haylage” (HG) shall now be reported with an intended use of “FG”.

Hybrid seed shall be reported as the intended use of “Seed” (SD) associated to the applicable crop.

When a small grain crop is planted and had 2 intended uses of grain and grazing, the intended use of Grain/Grazing (GS) shall be used.

In SAP/CRM, crop and type combinations will be represented as a single “product”.

Example: Apple, Common and Apple, Specialty are 2 different products found within Product Master. Also, the FSA crop and type codes will be included in Product Master as “CVS crop and type”, such as “0054-COM” and “0054-SPC”.

Note: For 2017 and subsequent years, the “cover only” (CO) intended use was replaced with “cover crop”.

Crop Name	Crop Code	Crop Abbr	Type Name	Type Code	Intended Use	Land Use
Acerola (Barbados Cherry)	0172	AZARL			FH	F
Alfalfa	0027	ALFAL			CO, FG, GZ, LS, SD

Crop Characteristic Codes

A Background

Crop characteristic codes are maintained and displayed in CRM/Product Master and in CVS. The codes are maintained in CVS as first, second, and third character field status codes. In CRM/Product Master, the codes are maintained as crop status codes, planting status codes (displayed as supplemental status codes in CARS), experimental status codes, volunteer status codes, and concurrent planting status codes.

B Crop Status Codes

Crop status codes can be viewed in CRM/Product Master.

Note: In SAP/CRM, the “Experimental” status code “X” is captured independently of the other crop status codes, but is still captured in the “crop status” data field in CARS.

Product: 1100931, SQUASH, ACORN SQUASH

Product ID: 1100931
Product: SQUASH, ACORN SQUASH

Current Status:
New Status:

Intended Use | Program Eligibility | Irrigation Practice | Organic Practice

Intended Use	Description	Valid From	Valid To	Land Use (FAV Status)	Description
FH	Fresh	01/01/2013	12/31/9999	F	FRUIT & VEGETABLE
PR	Processed	01/01/2013	12/31/9999	F	FRUIT & VEGETABLE
SD	Seed	01/01/2013	12/31/9999	F	FRUIT & VEGETABLE

Crop Status | Planting Status | Experimental Status | Volunteer Status | Concurrent Planting Status

Crop Status*	Description
E	Double Crop - CC followed by FAV/Wild Rice
F	Double Crop - FAV followed by different FAV
H	Double Crop - Non CC/Non FAV followed by FAV
I	Initial - first crop planted on acreage
K	Subsequent - CC followed by FAV/Wild Rice
L	Subsequent - FAV followed by FAV
N	Subsequent - Non CC followed by FAV
R	Repeat - planting of the same crop/acreage

Notes: See 1-ARCPLC for crops considered covered commodities.

See paragraph 25 for the definition of an approved double cropping combination.

Covered commodity, as described in the crop status code, is **not** synonymous with cover crop, as described in paragraph 32.

Crop Characteristic Codes (Continued)

B Crop Status Codes (Continued)

The following table defines the crop status codes for the crop status field. All crop status codes are defined as applicable for the product (crop, type) and are available for viewing in CRM/Product Master.

Code	Description
Status Code for Initial Crops	
I	Initial - the first crop planted on the acreage.
Status Codes for Crops Meeting Double Cropping Definition	
D	Covered commodity followed by a different covered commodity - meets double cropping definition.
E	Covered commodity followed by FAV or wild rice or vice versa - meets double cropping definition.
F	FAV followed by a different FAV - meets double cropping definition.
G	Noncovered commodity/non-FAV followed by covered commodity or vice versa - meets double cropping definition.
H	Noncovered commodity/non-FAV followed by FAV or vice versa - meets double cropping definition.
O	Noncovered commodity/non-FAV followed by noncovered commodity/non-FAV meets double cropping definition.
Status Codes for Crops Not Meeting Double Cropping Definition	
J	Covered commodity followed by a covered commodity - does not meet double cropping definition.
K	Covered commodity followed by FAV or wild rice or vice versa - does not meet double cropping definition.
L	FAV followed by a different FAV - does not meet double cropping definition.
M	Noncovered commodity/non-FAV followed by a covered commodity or vice versa - does not meet double cropping definition.
N	Noncovered commodity followed by FAV or vice versa- does not meet double cropping definition.
P	Noncovered commodity/non-FAV followed by noncovered commodity/non-FAV does not meet double cropping definition.

--*

Crop Characteristic Codes (Continued)

B Crop Status Codes (Continued)

Code	Description
Status Code for Repeat Crops	
R	Repeat – replanting of the same crop on the same acreage.
Status Code for Experimental Crops	
X	<p>Experimental - when the crop does not meet the definition of a crop and all of the following are met:</p> <ul style="list-style-type: none"> • crop is planted for experimental purposes conducted under the direct supervision of a State experiment station or commercial company • production is destroyed before harvest or used for testing or other experimental purposes • a representative of the State experiment station or the commercial company certifies that any production harvested from the experiment will not be marketed in any form • the farm operator certifies that no harvested production of the crop has or will be received • by the final reporting date, the farm operator reports the acreage to be excluded and identifies the acreage on a photocopy.

Crop Characteristic Codes (Continued)

C Planting Status, Volunteer, and Supplemental Status Codes

Planting status codes are defined and maintained in CRM/Product Master as applicable for the product (crop/type) as follows:

- failed
- prevented.

Notes: In CRM/Product Master, the “Volunteer” status is captured independently of the other planting status codes.

The “Planted” and “Not Applicable” statuses are not captured in CRM/Product Master.

See the following table for a description of how the codes are displayed and/or maintained in CRM/Product Master, the CVS, and in CARS.

CRM Product Master		CVS Second Character Field	CARS Supplemental Status
Planting Status	Failed	F	Failed
	Prevented Planted	P	Prevented
Volunteer Status	Volunteer	V	Volunteer
N/A		(blank)	Planted
N/A		N	Not Applicable

Crop Characteristic Codes (Continued)

D Concurrent Planting Status Codes

Concurrent planting status codes are applicable to the product (crop/type) and are available for viewing in CRM/Product Master. Only 1 of the following concurrent planting status codes will be used in CRM/Product Master:

- None (blank)
- Concurrent.

Product: 1100931, SQUASH, ACORN SQUASH

See paragraph 78 for available selections in CARS for products (crop/type) with an “M” concurrent planting status code in CRM/Product Master.

Crop Characteristic Codes (Continued)

E Intended Actual Use Codes

The following are the intended actual use codes and definitions.

Code	Intended/Actual Use	FSA-578 Printout	Definition
Co	Cover Only	Cover	Crops, including grasses, legumes, and forbs, for seasonal cover and other conservation purposes. Cover crops are primarily used for erosion control, soil health improvement, and water quality improvement. The cover crop may be terminated by natural causes, such as frost, or intentionally terminated through chemical application, crimping, rolling, tillage, or cutting. If green manure (GM) is the method of termination, the crop shall be reported as cover only (CO).
De	Dry Edible	Dry Ed	The dry, edible seed of the crop intended for human or livestock consumption, such as pulse crops.
Ed	Edible	Edible	Intended for human consumption, from a nontypical food source.
Fg	Foraging	Forage	Intended for harvesting as food for livestock. Does not include crops grown for the intended purpose of grazing by livestock or grown for the intended purpose of grain which may be fed to livestock.
Fh	Fresh	Fresh	Intended to have an end use unchanged or unimpaired and retaining its original properties; not altered or preserved by freezing, canning, pickling, salting, drying, etc.
Gm	Green Manure	Gr Mnre	Intended not to harvest, but to be plowed under to enrich the soil.
Gp	Green Peanuts	Green	Intended to harvest peanuts in a semi-mature state, having achieved full size, but not being fully dried, as would be needed for roasting, boiling, or peanut butter production.
Gr	Grain	Grain	Intended to be harvested as the small, hard seed of a food plant such as wheat, corn, rye, oats, rice, or millet.
Gs	Grain/Grazing	Grazing	Intended as pasture for livestock to roam and feed on initially, and then later harvest for grain.
Gz	Grazing	Graze	Intended solely for pasture for livestock to roam and feed on.
Hp	Hogged Peanuts	Hogged	Intended for swine to graze by digging up the root system and nut. The above ground portion may be mechanically harvested for hay production before allowing the swine to graze.

Crop Characteristic Codes (Continued)

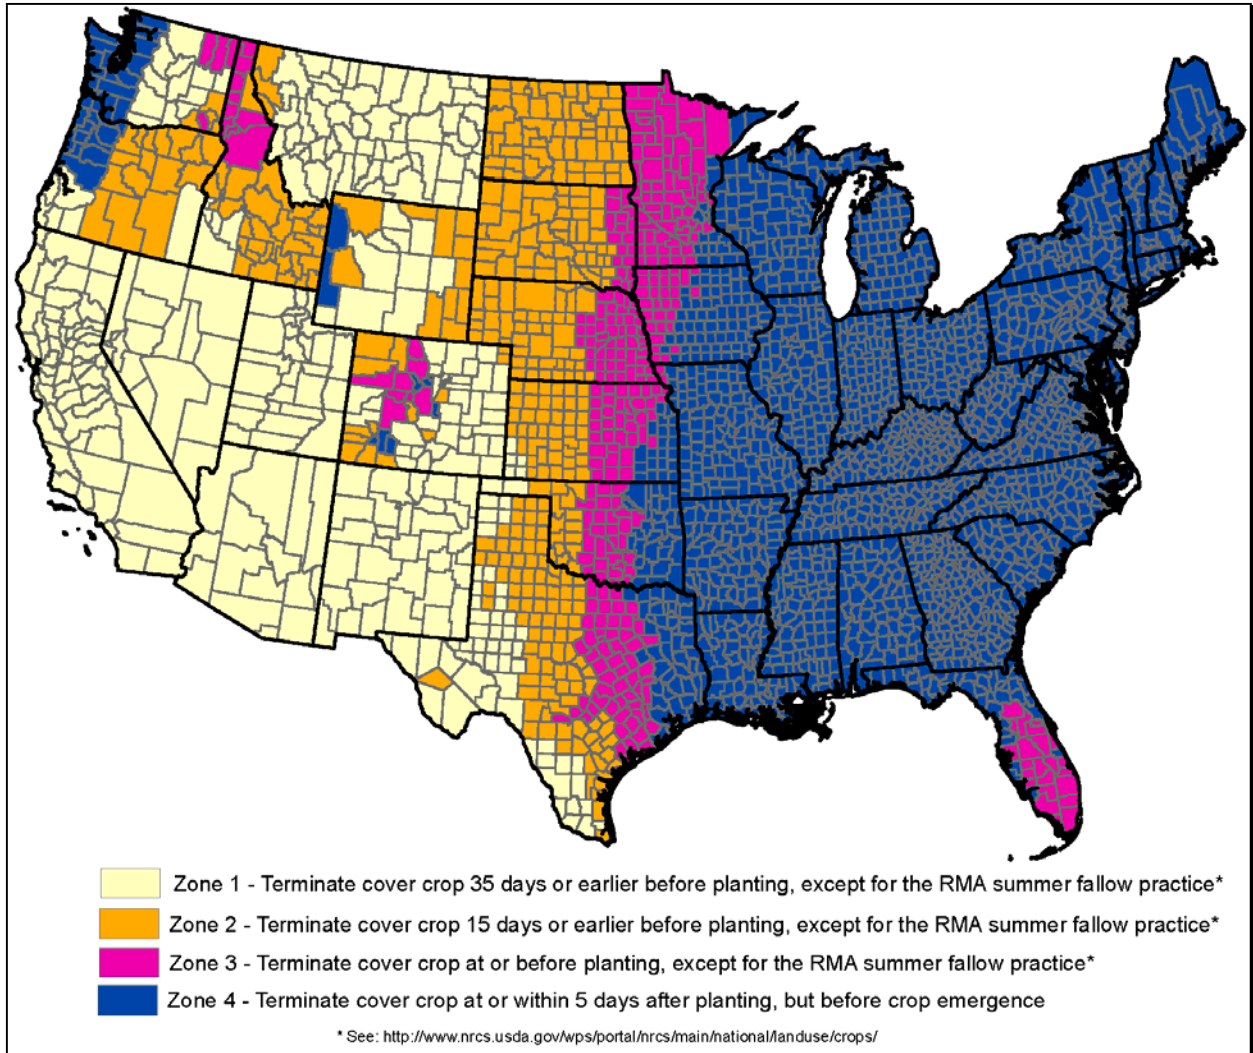

E Intended Actual Use Codes (Continued)

Code	Intended/Actual Use	FSA-578 Printout	Definition
Ju	Juice	Juice	Intended to harvest for the natural fluid, fluid content, or liquid, not including molasses. Note: Beginning with the 2017 crop year, the “Juice” intended use will no longer be available and shall be reported as the “Processed” intended use.
Ls	Left Standing	Lft Std	Intended to be left in the field unharvested. Not intended to be mechanically or manually harvested for any purpose, grazed by domesticated livestock, or otherwise harvested in any manner. Typically used for erosion control and nutrient retention.
Lt	Leaf Tips	Leaftip	Intended to harvest the tips of the young leaves and shoots only.
Lv	Leaves	Leaves	Intended to harvest the mature leaves of the plant only.
Ml	Molasses	Molass	Intended to produce thick syrup during the refining of sorghum or sugar.
Np	Nut Peanuts	Nut	Intended to harvest the fully mature nut of the peanut plant.
Nt	Nontable	Nontable	Honey not intended for human consumption.
Ol	Oil	Oil	Intended to produce oil from the plant of flax, olives, or flowers for fragrance, consumption, or lubrication. Note: All other crops grown with the intent to produce oil shall be reported with a “Processed” intended use.
Pr	Processed	Proces	Intended to have an end use after being treated or prepared by some particular process that changes the original properties, such as freezing, canning, pickling, salting, drying, pasteurizing, etc.
Rs	Root Stock	Rtstck	Intended to grow the plant solely for its root and its associated growth buds as a stock in plant propagation, and not for livestock or human consumption.
Rt	Root	Root	Intended to grow the plant solely for its root to be consumed.
Sd	Seed	Seed	Intended to harvest for the plant’s seed for growing a new crop, and not for livestock or human consumption.
Se	Sets	Sets	Intended to harvest the plant, midway through its growing cycle, to sell for replanting or propagation purposes.
Sg	Silage	Silage	Intended for use as food for livestock, preserved through fermentation.
So	Sod	Sod	Intended to be harvested as sections cut or torn from the surface containing the matted roots of grass.
Tb	Table	Table	Honey intended for human consumption.

Completing CCC-576 for Prevented Planting and Failed Acreage Claims

A Instructions for Completing CCC-576 by County Office

The following provides instructions on how County Offices shall complete CCC-576 for the purpose of prevented planting or yield loss because of natural disaster.

Item	Instructions
Part A- General Information (To be completed by the County Office)	
1	Enter County Office name, address, and phone number.
2	Enter crop year.
3	Enter State and administrative county code.
4	Enter date received.
5	Enter name and address of the producer who is providing the notice of loss for the unit.

B Instructions for Completing CCC-576 by Producer

The following provides instructions on how producers shall complete CCC-576 for the purpose of natural disaster.

A separate CCC-576, Part B shall be filed for each:

- crop and type within the pay crop and pay type grouping recorded for each natural disaster, **except** multiple disasters that occur concurrently
- each planting period for crops with multiple planting periods.

Item	Instructions
Part B (To be completed by Producer)	
6A	Enter disaster event that prevented planting, such as tornado, hurricane, drought, flood, disease, aflatoxin, virus, insect infestation, etc.
6B	Enter beginning date of the disaster event listed in item 6A.
6C	Enter ending date of the disaster event listed in item 6A.
6D	Enter date when damage or loss became apparent.

Completing CCC-576 for Prevented Planting and Failed Acreage Claims

B Instructions for Completing CCC-576 by Producer (Continued)

Item	Instructions
7A	Enter the 4 or 5 alpha-character crop abbreviation from Exhibit 10. Example: The alpha crop abbreviation for cabbage is, “CABAG”.
7B	Enter the 3 alpha-character crop type abbreviation from Exhibit 10. Example: A valid alpha crop type abbreviation for cabbage is, “NAP (Napa)”.
7C	Enter the 2 alpha-character intended use code from Exhibit 10. Example: A valid alpha intended use code for cabbage is “FH (Fresh)”.
7D	Enter the 2 alpha-character practice code. Example: A valid alpha practice code is “NI (Non-irrigated)”.
7E	If applicable, enter the numeric planting period.
7F	Check (✓) “Yes” or “No” to indicate whether there is an agreement or contract for payment.
	Note: If a subsequent disaster event occurs on the same acreage, crop, type, and variety, the producer must complete a separate CCC-576, Part B and attach it to the original filed CCC-576.
8A	Enter farm number of intended, but prevented from planting acreage.
8B	Enter NAP unit number. For NAP crops only.
8C	Enter total acreage of the crop that the producer intended to plant, but was prevented from planting.
8D, 8E and 8F	COC shall complete.
8G1 and 8G2	For intended but prevented acreage entered in 8C, provide evidence of purchase, deliver and/or arrangement for seed, chemicals, fertilizer, and land preparation measures for acreage affected. Note: COC may require attachment of expense receipts to verify preparation measures. Retain copies of expense receipts only; return originals to the producer. This information must be recorded in COC minutes.
8H	Check (✓) “Yes” or “No” to indicate if any of the prevented planted acreage will be replanted.

Completing CCC-576 for Prevented Planting and Failed Acreage Claims

B Instructions for Completing CCC-576 by Producer (Continued)

Item	Instructions
9A	Enter farm number of disaster affected planted acreage.
9B	Enter NAP unit number. For NAP crops only.
9C	Enter total acreage of the crop that the producer planted that was affected by disaster.
9D, 9E, and 9F	COC shall complete.
10	Explain cultivation practices for intended crop on affected planted crop acreage.
11	Describe what will be done with the affected planted crop acreage (include dates), that is, will it be replanted to another crop or not planted.
12	Describe what will be done with the affected crop acreage (include dates), that is, will it be planted to another crop or not planted.
13	Check (✓) “Yes” or “No” to indicate if an independent assessment will be completed for grazed acres.
14A, 14B, and 14C	Producer shall sign and date, certifying to accuracy of all information provided, and acknowledgement of receipt of photocopy of the notice of loss to be maintained by producer as evidence of filing. Note: If not signed and dated by the producer, Part B is considered not filed.

C Instructions for Completing CCC-576 by COC

The following table provides instructions for COC on completing CCC-576.

Item	Instructions
Part C - COC Approval or Disapproval of Loss	
Note: This part shall be completed by COC or delegate representative based on criteria in paragraph 23.	
15A and 15B	Enter applicable signature, and date. Note: If prevented planting acreage is approved, COC may record in the minutes, supporting documentation provided by the producer for which the determination was made according to subparagraph 24 M.

Completing CCC-576 for Prevented Planting and Failed Acreage Claims

D Example of CCC-576

The following is an example of CCC-576.

This form is available electronically. Form Approved - OMB No. 0560-0175

	C. Ending date of disaster (MM-DD-YYYY) 05-28-XXXX	

7. Crop

A. Crop Name Cabbage	B. Crop Type NAP	C. Intended Use FH	D. Practice NI	E. Planting Period I
-------------------------	---------------------	-----------------------	-------------------	-------------------------

F. For the crop type entered in item 7B, was there any agreement or contract for payment for growing the crop, as opposed to delivery of production?
 YES NO If "YES," provide a copy of such Agreement, contract, or a written narrative explanation of agreement.

8. Intended, but Prevented Planted Acres

A. Farm Number	B. NAP Unit Number	C. Intended, but Prevented Planted Acreage	D. Approved Acreage	E. Approved	F. Disapproved
2058	256	25.0			

G. For the intended, but prevented acreage in item 8C, complete the following entries:

(1) Purchased, Delivery, or Arranged for:	YES	NO	(2) If "YES", in item 8G(1), explain and attach copies
(a) Seed, Chemical, and Fertilizer	X		See attached copy for documentation.
(b) Land Preparation Measures	X		See 10 below.

H. Part or all of the intended, but prevented crop acreage has been or will be replanted to another crop? YES NO If "YES", provide details.

9. Disaster Affected Planted Acres

A. Farm Number	B. NAP Unit Number	C. Disaster Affected Planted Acreage	D. Total Planted Acreage	E. Approved Acreage	F. Approved	G. Disapproved
2058	256	40.0	40.0			

10. What cultivation practices have been and will be employed on damaged crop acreage (e.g., fertilizer, seeding, irrigation, pesticide and herbicide applications; before and after date of damage)? (See attached for details)
Acreage prepared for seed on April 30.

11. Has any of the disaster affected planted crop acreage been destroyed, or replanted, or put to another use? (If "YES", See attached) YES NO

12. Has, or will all of disaster affected planted crop acreage in item 9C above be harvested for the intended use in item 7C? YES NO

NOTE: "If "NO," you must request an appraisal of any planted acreage that will not be harvested for the intended use in item 7C. You must not destroy or put acreage to another use before written consent is given by an authorized CCC or FIC loss adjuster for such destruction or other use." Failure to do so will result in loss of program assistance.

13. Will independent assessment be used on all grazed acreage for the crop in item 7A? YES NO

14. Producer certifies that all information in Part B is correct and acknowledges receipt of copy of this form.

A. Producer's Signature (BY)	B. Title/Relationship (Individual Signing in the Representative Capacity)	C. Date (MM-DD-YYYY)
------------------------------	---	----------------------

15. COG must approve or disapprove for applicable intended, but prevented planted and or disaster affected planted acres as indicated above.

A. COG Signature	C. Date (MM-DD-YYYY)
------------------	----------------------

Crop Characteristic Codes

A Background

Crop characteristic codes are maintained and displayed in CRM/Product Master and in CVS. The codes are maintained in CVS as first, second, and third character field status codes. In CRM/Product Master, the codes are maintained as crop status codes, planting status codes (displayed as supplemental status codes in CARS), experimental status codes, volunteer status codes, and concurrent planting status codes.

B Crop Status Codes

Crop status codes can be viewed in CRM/Product Master.

Note: In SAP/CRM, the “Experimental” status code “X” is captured independently of the other crop status codes, but is still captured in the “crop status” data field in CARS.

Product: 1100931, SQUASH, ACORN SQUASH

Product ID: 1100931
Product: SQUASH, ACORN SQUASH

Current Status:
New Status:

Intended Use | Program Eligibility | Irrigation Practice | Organic Practice

Intended Use	Description	Valid From	Valid To	Land Use (FAV Status)	Description
FH	Fresh	01/01/2013	12/31/9999	F	FRUIT & VEGETABLE
PR	Processed	01/01/2013	12/31/9999	F	FRUIT & VEGETABLE
SD	Seed	01/01/2013	12/31/9999	F	FRUIT & VEGETABLE

Crop Status | Planting Status | Experimental Status | Volunteer Status | Concurrent Planting Status

Crop Status*	Description
E	Double Crop - CC followed by FAV/Wild Rice
F	Double Crop - FAV followed by different FAV
H	Double Crop - Non CC/Non FAV followed by FAV
I	Initial - first crop planted on acreage
K	Subsequent - CC followed by FAV/Wild Rice
L	Subsequent - FAV followed by FAV
N	Subsequent - Non CC followed by FAV
R	Repeat - planting of the same crop/acreage

Notes: See 1-ARCPLC for crops considered covered commodities.

See paragraph 25 for the definition of an approved double cropping combination.

Covered commodity, as described in the crop status code, is **not** synonymous with cover crop, as described in paragraph 23.6.

Crop Characteristic Codes (Continued)

B Crop Status Codes (Continued)

The following table defines the crop status codes for the crop status field. All crop status codes are defined as applicable for the product (crop, type) and are available for viewing in CRM/Product Master.

Code	Description
Status Code for Initial Crops	
I	Initial - the first crop planted on the acreage.
Status Codes for Crops Meeting Double Cropping Definition	
D	Covered commodity followed by a different covered commodity - meets double cropping definition.
E	Covered commodity followed by FAV or wild rice or vice versa - meets double cropping definition.
F	FAV followed by a different FAV - meets double cropping definition.
G	Noncovered commodity/non-FAV followed by covered commodity or vice versa - meets double cropping definition.
H	Noncovered commodity/non-FAV followed by FAV or vice versa - meets double cropping definition.
O	Noncovered commodity/non-FAV followed by noncovered commodity/non-FAV meets double cropping definition.
Status Codes for Crops Not Meeting Double Cropping Definition	
J	Covered commodity followed by a covered commodity - does not meet double cropping definition.
K	Covered commodity followed by FAV or wild rice or vice versa - does not meet double cropping definition.
L	FAV followed by a different FAV - does not meet double cropping definition.
M	Noncovered commodity/non-FAV followed by a covered commodity or vice versa - does not meet double cropping definition.
N	Noncovered commodity followed by FAV or vice versa- does not meet double cropping definition.
P	Noncovered commodity/non-FAV followed by noncovered commodity/non-FAV does not meet double cropping definition.

Crop Characteristic Codes (Continued)

B Crop Status Codes (Continued)

Code	Description
Status Code for Repeat Crops	
R	Repeat – replanting of the same crop on the same acreage.
Status Code for Experimental Crops	
X	<p>Experimental - when the crop does not meet the definition of a crop and all of the following are met:</p> <ul style="list-style-type: none"> • crop is planted for experimental purposes conducted under the direct supervision of a State experiment station or commercial company • production is destroyed before harvest or used for testing or other experimental purposes • a representative of the State experiment station or the commercial company certifies that any production harvested from the experiment will not be marketed in any form • the farm operator certifies that no harvested production of the crop has or will be received • by the final reporting date, the farm operator reports the acreage to be excluded and identifies the acreage on a photocopy.

Crop Characteristic Codes (Continued)

C Planting Status, Volunteer, and Supplement Status Codes

Planting status codes are defined and maintained in CRM/Product Master as applicable for the product (crop/type) as follows:

- failed
- prevented.

Notes: In CRM/Product Master, the “Volunteer” status is captured independently of the other planting status codes.

The “Planted” and “Not Applicable” statuses are not captured in CRM/Product Master.

See the following table for a description of how the codes are displayed and/or maintained in CRM/Product Master, the CVS, and in CARS.

CRM Product Master		CVS Second Character Field	CARS Supplemental Status
Planting Status	Failed	F	Failed
	Prevented Planted	P	Prevented
Volunteer Status	Volunteer	V	Volunteer
N/A		(blank)	Planted
N/A		N	Not Applicable

Crop Characteristic Codes (Continued)

D Concurrent Planting Status Codes

Concurrent planting status codes are applicable to the product (crop/type) and are available for viewing in CRM/Product Master. Only 1 of the following concurrent planting status codes will be used in CRM/Product Master.

- None (blank)
- Concurrent.

E Intended Actual Use Codes

The following are the intended actual use codes and definitions.

Code	Intended/Actual Use	FSA-578 Printout	Definition
Co	Cover Only	Cover	Crops, including grasses, legumes, and forbs, for seasonal cover and other conservation purposes. Cover crops are primarily used for erosion control, soil health improvement, and water quality improvement. The cover crop may be terminated by natural causes, such as frost, or intentionally terminated through chemical application, crimping, rolling, tillage, or cutting. If green manure (GM) is the method of termination, the crop shall be reported as cover only (CO).
De	Dry Edible	Dry Ed	The dry, edible seed of the crop intended for human or livestock consumption, such as pulse crops.
Ed	Edible	Edible	Intended for human consumption, from a nontypical food source.
Fg	Foraging	Forage	Intended for harvesting as food for livestock. Does not include crops grown for the intended purpose of grazing by livestock or grown for the intended purpose of grain which may be fed to livestock.
Fh	Fresh	Fresh	Intended to have an end use unchanged or unimpaired and retaining its original properties; not altered or preserved by freezing, canning, pickling, salting, drying, etc.
Gm	Green Manure	Gr Mnre	Intended not to harvest, but to be plowed under to enrich the soil.
Gp	Green Peanuts	Green	Intended to harvest peanuts in a semi-mature state, having achieved full size, but not being fully dried, as would be needed for roasting, boiling, or peanut butter production.
Gr	Grain	Grain	Intended to be harvested as the small, hard seed of a food plant such as wheat, corn, rye, oats, rice, or millet.
Gs	Grain/Grazing	Grazing	Intended as pasture for livestock to roam and feed on initially, and then later harvest for grain.
Gz	Grazing	Graze	Intended solely for pasture for livestock to roam and feed on.
Hp	Hogged Peanuts	Hogged	Intended for swine to graze by digging up the root system and nut. The above ground portion may be mechanically harvested for hay production before allowing the swine to graze.

Crop Characteristic Codes (Continued)

E Intended Actual Use Codes (Continued)

Code	Intended/Actual Use	FSA-578 Printout	Definition
Ju	Juice	Juice	Intended to harvest for the natural fluid, fluid content, or liquid, not including molasses. Note: Beginning with the 2017 crop year, the “Juice” intended use will no longer be available and shall be reported as the “Processed” intended
Ls	Left Standing	Lft Std	Intended to be left in the field unharvested. Not intended to be mechanically or manually harvested for any purpose, grazed by domesticated livestock, or otherwise harvested in any manner. Typically used for erosion control and nutrient retention.
Lt	Leaf Tips	Leaftip	Intended to harvest the tips of the young leaves and shoots only.
Lv	Leaves	Leaves	Intended to harvest the mature leaves of the plant
MI	Molasses	Molass	Intended to produce thick syrup during the refining of sorghum or sugar.
Np	Nut Peanuts	Nut	Intended to harvest the fully mature nut of the peanut plant.
Nt	Nontable	Nontable	Honey not intended for human consumption.
Ol	Oil	Oil	Intended to produce oil from the plant of flax, olives, or flowers for fragrance, consumption, or lubrication. Note: All other crops grown with the intent to produce oil shall be reported with a “Processed” intended use.
Pr	Processed	Proces	Intended to have an end use after being treated or prepared by some particular process that changes the original properties, such as freezing, canning, pickling, salting, drying, pasteurizing, etc.
Rs	Root Stock	Rtstck	Intended to grow the plant solely for its root and its associated growth buds as a stock in plant propagation, and not for livestock or human

Crop Characteristic Codes (Continued)

E Intended Actual Use Codes (Continued)

Code	Intended/Actual Use	FSA-578 Printout	Definition
Rt	Root	Root	Intended to grow the plant solely for its root to be consumed.
Sd	Seed	Seed	Intended to harvest for the plant's seed for growing a new crop, and not for livestock or
Se	Sets	Sets	Intended to harvest the plant, midway through its growing cycle, to sell for replanting or propagation purposes.
Sg	Silage	Silage	Intended for use as food for livestock, preserved through fermentation.
So	Sod	Sod	Intended to be harvested as sections cut or torn from the surface containing the matted roots of
Tb	Table	Table	Honey intended for human consumption.

Deviations From Prescribed Standards

A States With Authorized Deviations

This exhibit lists States with authorized deviations from prescribed standards. * * *

State	Deviation From Prescribed Standards
California	Deduction credit: <ul style="list-style-type: none"> • minimum area is 5/10ths of an acre for all crops • following is the minimum width: <ul style="list-style-type: none"> • perimeter of field is 10 links for all crops • within the planted area: <ul style="list-style-type: none"> • 4 normal rows, except when planted in a skip-row pattern • 20 links for close-sown crops within planted area.
Delaware	Deduction credit is a minimum width of 6 links.
Indiana	Deduction credit: <ul style="list-style-type: none"> • minimum width is 15 links for terraces, permanent irrigation, drainage ditches, and sod waterways • minimum width for all other areas is 5 links. Adjustment credit: <ul style="list-style-type: none"> • minimum area is 5/10ths acre for all crops except tobacco • minimum width is 5 links. Redetermination refund is 1/10th acre for tobacco.
Iowa	Deduction credit <ul style="list-style-type: none"> • minimum width is 7 links • minimum area is 5/10ths of an acre.

Deviations From Prescribed Standards (Continued)

A States With Authorized Deviations (Continued)

State	Deviation From Prescribed Standards
Louisiana	Unplanted contour levees within rice fields are not eligible for deduction.
Mississippi	<p>Deduction credit is minimum width of 10 links Adjustment credit:</p> <ul style="list-style-type: none"> • minimum area is the lesser of the following: <ul style="list-style-type: none"> • total excess • total deficiency • .3 acre <p>Exception: An exception is if the excess or deficiency is more than .3 acre, 1 plot may be less than .3 acre.</p> <ul style="list-style-type: none"> • minimum width is 20 links.
Missouri	Deduction credit is minimum width of 10 links.
Nebraska	<p>Deduction credit:</p> <ul style="list-style-type: none"> • minimum area for all crops is .2 acre • minimum row width for all crops is 20 links.
North Dakota	Deduction credit is .2 acre.
Ohio	<p>Deduction credit:</p> <ul style="list-style-type: none"> • minimum width is 20 links • minimum area is .3 acre, except .03 acre for tobacco. <p>Adjustment credit is a minimum width of 8 links for all crops, except tobacco.</p> <p>Redetermination refund is 1/10th of an acre for tobacco acreage.</p>

Deviations From Prescribed Standards (Continued)

A States With Authorized Deviations (Continued)

State	Deviation From Prescribed Standards
Oklahoma	Redetermination refund is 3/10ths of an acre for all acreage.
Oregon	Deduction credit is minimum width of 6 feet within the planted area for close-sown crops.
South Dakota	Deduction and adjustment credit is a minimum area of .5 acre.
Tennessee	Adjustment credit for minimum width: <ul style="list-style-type: none"> • for tobacco is: • 1 row along field boundary • 2 rows within planted area • 4 links for all other crops. Redetermination refund is 1/10th of an acre for tobacco acreage.
Texas	Deduction credit is a minimum width of 9 links.
Virginia	Redetermination refund for all acreage is the larger of the following: <ul style="list-style-type: none"> • .1 acre • 10 percent for areas of less than 5 acres.
Wisconsin	Deduction credit is a minimum width of 10 links for all crops, except tobacco. Redetermination refund is 1/10th of an acre for tobacco acreage.

Determining Acreage in Solid Plant, Skip-Row, and Sled-Row Patterns

1 Overview

A Introduction

This exhibit shows examples of a acreage determination of skip-row patterns for crops and sled-row patterns for tobacco.

B In This Exhibit

This exhibit contains the following.

Title	Page
Determining Skip-Row Crop Acreage	1
Determining Sled-Row Tobacco Acreage	9

2 Determining Skip-Row Crop Acreage Examples

A Introduction

Acreage determination is explained for the following 6 examples of solid plant exceeding 40 inches, and skip- or sled-row planting patterns for crops:

- single uniform rows of more than 40 inches, see subparagraph C
- 4 uniform width rows with even alternating skip, see subparagraph D
- 2 uniform width rows with uneven widths of alternating skip, see subparagraph E
- 4 uniform width rows with even alternating skip, with rows exceeding 40 inches, see subparagraph F
- single rows planed in a skip-row pattern with 2 or more rows having less than a 40-inch spacing, see subparagraph G.

B Definitions of Skip and Skip Credit

See definitions of skip and skip credit in Exhibit 2.

Determining Acreage in Solid Plant, Skip-Row, and Sled-Row Patterns (Continued)

2 Determining Skip-Row Crop Acreage Examples (Continued)

D 4 Uniform Width Rows With Even Alternating Skip

The following diagram shows a planting pattern with 4 uniform rows of crop alternating with a 40-inch skip of idle land on 50.0 acres. In this example, 36 inches of each row is considered planted to the crop.

crop row width	36" width
<u>x 4</u> rows	
	144" crop pattern
skip credit 40" skip width	
<u>-36"</u> Two, ½ row widths (18" each)	4" skip credit
planting pattern	144" crop
	<u>4" skip</u>
	148" planting pattern
crop percentage	50.00 acres of land devoted to planted acres and skip-row or sled-rows
	.9730 crop percentage
net acreage	48.65 acres considered planted to the crop

Determining Acreage in Solid Plant, Skip-Row, and Sled-Row Patterns (Continued)

2 Determining Skip-Row Crop Acreage Examples (Continued)

E 2 Uniform-Width Rows with Uneven Widths of Alternating Skip

The following diagram shows a planting pattern with 2 uniform rows of crop alternating with 72-inch and 58-inch skips of idle land on 50.0 acres. In the following example 36 inches of each row is considered planted to the crop.

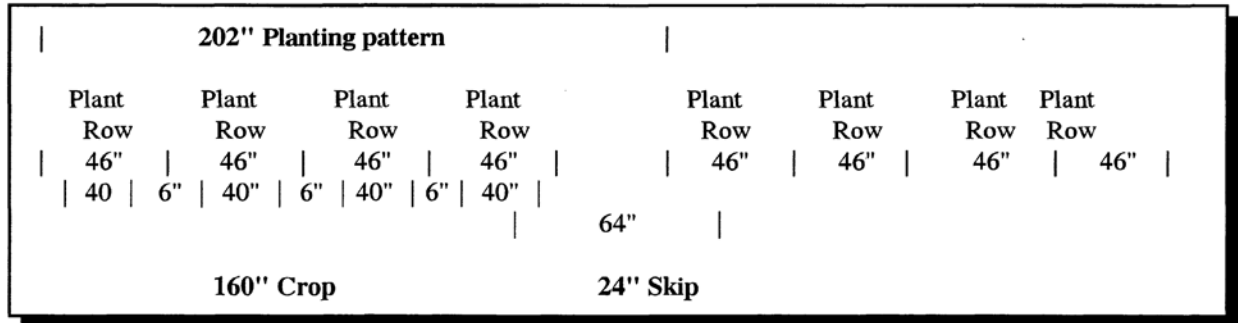

<p>crop width</p> <p>skip credit</p> <p>+72" skip width</p> <p>188" total skip credit</p> <p>-108" Six, 1/2 row widths (18" each)</p> <p>80" skip credit</p> <p>planting pattern</p> <p>296" planting pattern</p> <p>crop percentage</p> <p>net acreage or sled rows</p> <p><u>x .7297</u> crop percentage</p> <p>36.49 acres considered planted to the crop</p>	<p>36" width</p> <p><u>x 6</u> rows</p> <p>216" crop pattern</p> <p>58" skip width</p> <p>x 2 skips</p> <p><u>116"</u> skip width</p> <p>216" crop</p> <p>+<u>80"</u> skip</p> <p>216" ÷ 296" = .7297</p> <p>50.0 acres of land devoted to planted acres and skip</p>

Determining Acreage in Solid Plant, Skip-Row, and Sled-Row Patterns (Continued)

2 Determining Skip-Row Crop Acreage Examples (Continued)

G Single Rows Planted in a Skip-Row Pattern with 2 or More Rows Having Less Than a 40-inch Spacing

The following diagram shows a planting pattern of single rows alternating with 2 uniform rows of 36 inches and with 60-inch strips of idle land on 50.0 acres.

crop width	36" width
<u>x 4</u> crop rows	
144" crop pattern	
skip credit 60" skip width	
<u>x3</u>	
	180" total skip width
<u>-108</u> Six, 1/2 row widths (18" each)	
72" skip credit	
planting pattern	144" crop
<u>+72</u> " skip	
	216" planting pattern
crop percentage	144" ÷ 216 = .6667
net acreage	50.0 acres of land devoted to planted acres
and skip or sled rows	
<u>x .6667</u> crop percentage	
33.34 acres considered planted to the	crop

Determining Acreage in Solid Plant, Skip-Row, and Sled-Row Patterns (Continued)

3 Determining Sled-Row Tobacco Acreage

A Introduction

Acreage determination is explained for the following 2 examples of sled-row planting patterns for tobacco:

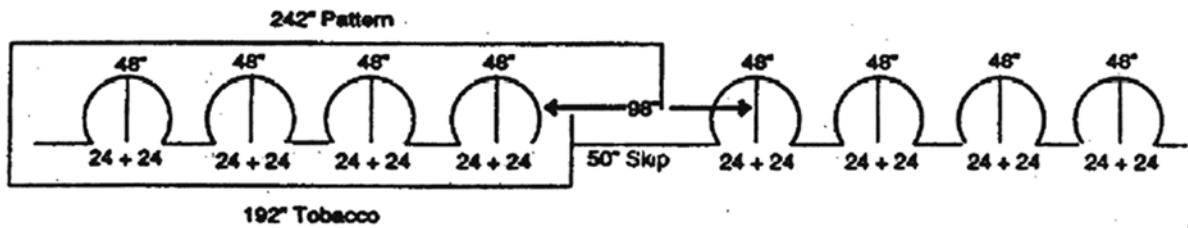

- 4 uniform width rows with the same width of alternating sled-row
- 6 uneven width rows with the same width of alternating sled-row.

Determining Acreage in Solid Plant, Skip-Row, and Sled-Row Patterns (Continued)

3 Determining Sled-Row Tobacco Acreage (Continued)

B 4 Uniform-Width Rows With Even Alternating Sled

The following diagram shows a planting pattern with 4 uniform rows of tobacco alternating with a minimum 98-inch sled of idle land.

crop width 48" width

$$\begin{array}{r} \times 4 \text{ rows} \\ 192" \text{ crop pattern} \end{array}$$

sled credit 98" sled width

$$\begin{array}{r} -48" \text{ 2 (1/2 row widths)} \\ 50" \text{ sled credit} \end{array}$$

planting pattern

$$\begin{array}{r} 192" \text{ tobacco} \\ + 50" \text{ skip} \\ 242" \text{ planting pattern} \end{array}$$

skip percentage

$$50 \div 242 = .2066\%$$

tobacco percentage

$$192 \div 242 = .7934\%$$

gross acreage factor

$$1 \div .7934 = 1.26039\% \text{ round to } 1.26$$

gross acreage

$$50.0 \text{ acre tobacco allotment}$$

x 1.26% acreage factor

63.0 gross acreage
