1402 Warehouse Receipt Requirements

A Specific Wheat Requirements

--In addition to the general warehouse receipt requirements in 8-LP, paragraph 545, each-- wheat warehouse receipt shall show **all** of the following:

- gross weight in pounds and net bushels

Note: Show fractions of a bushel in decimal hundredths.

Example: 1000.67 bu.

- class and subclass

Example: HRS-DNS.

- grade, including special grades
- test weight expressed to the nearest tenth of a pound
- moisture
- dockage

Note: Dockage is expressed in whole and tenth percent to the nearest tenth percent.

1402 Warehouse Receipt Requirements (Continued)**A Specific Wheat Requirements (Continued)**

- protein content

Notes: This applies to Hard Red Winter and Hard Red Spring classes.

Example: 12.0 or 13.0.

See subparagraph 1400 H for the required GIPSA inspection certificate when protein premium is requested by the producer.

- a bulblet count, if indicated “garlicky”
- grading factors, including total cumulative sample grade factors, if these factors and **not** test weight determine the grade.

Notes: Total defects shall only include damaged kernels (total), foreign material, and shrunken and broken kernels. Heat damage is not added because it is included in damaged kernels (total).

Grading factors shall be entered as whole numbers and tenths, such as, 5.0, 5.1, or 5.2.

If receipts show “TD”, determine whether this represents total damage or total defects.

1402 Warehouse Receipt Requirements (Continued)

B Receipts Showing Infested or Moisture Over 13.5 Percent

Wheat warehouse receipts shall be accompanied by KC-350 (Grain) if the warehouse receipt tendered for loan shows either or both of the following conditions:

- infested
- moisture over 13.5 percent.

Note: County Offices shall verify that the attached KC-350 (Grain) shows an eligible quality.

--See 8-LP, paragraph 546 for examples of infested or excess moisture entries on KC-350-- (Grain).

C Wheat Shipped by Rail or Barge
