400 Notification

A Contacting Producers

When loans and LDP’s have been selected for spot check according to 8-LP, Part 3, Section 1, County Offices shall:

- notify the contact producer by telephone or memorandum, as applicable
- inquire if the honey has:
 - been sold
 - is still on the farm.

B Initiating Loans and LDP’s Selected for Spot Check

Producers will be selected based on their participation in various programs. FSA employees, STC and COC members, and other required producers are included in the national selection.

FSA employees, STC and COC members, and other required producers **are** included in the selection; therefore, County Offices shall no longer conduct separate spot checks on required producers.

Early each calendar year, the National Office will post the list of producers selected for annual spot check reviews on the Intranet at

--<http://fsaintranet.sc.egov.usda.gov/ffas/farmbill/cc/default.htm>--

Determine how to proceed with the visual spot check as follows.

IF the honey...	THEN...
is still on the farm and a spot check has not been performed	complete a farm visit according to paragraph 401. The producer must provide production evidence by the earlier of the following: <ul style="list-style-type: none"> • 15 calendar days after the honey has been sold • loan maturity date • the last day of the ninth calendar month after the month in which LDP was disbursed. If production evidence has not been submitted by the due date, the producer may have to refund the market gain or LDP amount.

400 Notification (Continued)

B Initiating Loans and LDP's Selected for Spot Check (Continued)

IF the honey...	THEN...
has been previously spot checked and the producer requests to use the spot checked quantity for production evidence	* * * no farm visit is required except for outstanding loans, as applicable.
has been sold	request delivery, sales, or other types of production evidence to verify the quantity and delivery dates of: <ul style="list-style-type: none"> • certified LDP's • loan repayments when market gain was earned. Review the loan for a violation according to paragraph 404 if loan is not repaid.

Require the producer to submit evidence on commodities **sold** within 15 calendar days from date of request.

401 On-Farm Visits

A When to Complete On-Farm Visits

Complete on-farm visits if honey is still stored on the farm for:

- outstanding loans
- outstanding loans and a market gain has been earned
- certified LDP's.

B Spot-Check Process

At the storage site, the inspector shall complete the spot check by **visually** inspecting farm-stored quantities for producers selected in the compliance review/spot check selection process.

For selected loans and LDP's, the commodity inspector shall:

- visually inspect containers for signs of fermentation
- visually inspect only those that are located at the same storage site as each random selection
- determine that quantity and quality are being maintained
- when visual inspection indicates a significant quantity shortage or a quality problem, record results in the National Compliance Review Database at
--http://www.nass.usda.gov/Online_Response/Attention/index.php--

If the honey has been sold, request delivery, sales, or other types of production evidence to verify the quantity and delivery dates of:

- certified LDP's
- loan repayments when market gain was earned.

Review the loan for violation according to paragraph 404 if the loan is **not** repaid.

Require the producer to submit evidence on commodities **sold** within 15 calendar days from the date of request.

401 On-Farm Visits (Continued)

C Reducing On-Farm Visits for LDP's

For LDP's only, County Offices, **with State Office concurrence**, may elect to forgo the farm visit by sending the producer a notification letter that includes all of the following:

- identification of LDP selected for spot check, as applicable
- options to the producer for quantities still on the farm to provide production evidence by the earlier of the following:
 - 15 calendar days after the commodity is sold
 - the last day of the ninth month after the month in which LDP was disbursed
- the following statement, "Failure to provide acceptable production evidence may result in repayment of the entire LDP amount plus applicable interest."

County Offices shall:

- consider the spot check complete when the producer:
 - does **not** respond within 7 calendar days, thus agreeing to provide required production evidence by the deadlines
 - agrees to provide required production evidence by the deadline
- ***
- monitor all letters and determine when production evidence is due
- *--collect unearned LDP amounts, plus interest, according to 8-LP, paragraph 31.--*

401 On-Farm Visits (Continued)***--D Adding Producers for Spot Check**

Additional producers may be added to the list of producers selected during the annual spot check reviews, when it is reported or determined that the:

- quantity of the loan collateral or the applicable LDP quantity is questionable
- storability of the loan collateral is questionable.

MAL and LDP spot check results for the additional producers selected for spot check will **not** be required to be entered in the national database. County Offices shall record the following:

- reasons why the producer was selected for spot check in the COC minutes
- results on CCC-677-1.

If a shortage or violation is determined as a result of the spot check, County Offices shall record the shortage or violation in APSS, as applicable.

E STC-Established Guidelines for Conducting Additional Spot Checks

STC's shall:

- establish guidelines for conducting additional spot checks
- determine how and when County Offices should select additional producers for spot check
- record the established guidelines in the STC minutes for auditing purposes.--*

402 Spot-Checking Storage Facility, Storage Containers, and Honey**A General Information**

Arrange for the producer or a representative to be present at the storage facility during the spot check. The CCC representative may spot-check the honey at any reasonable time.

Note: If the producer refuses to permit entry, contact the State Office for guidance.

Record spot check results in the National Compliance Review Database at ***--http://www.nass.usda.gov/Online_Response/Attention/index.php, and if necessary,--*** provide additional information in the “Remarks” section on CCC-633 (Honey).

Advise the producer that acceptance of honey for loan does not alleviate the responsibility of delivering acceptable honey in eligible containers if the honey under loan is delivered to CCC.

Note: If the honey is **not** in eligible containers when a spot check is performed, see subparagraph C.

B Spot-Checking Storage Facility

Determine whether the facility is eligible. An acceptable storage facility:

- shall provide safe storage and will protect the honey from natural elements
- shall be under the producer’s control if stored on the farm
- may be in leased space
- may be on or off the farm.

402 Spot-Checking Storage Facility, Storage Containers, and Honey (Continued)

C Spot-Checking Outside of Containers

Make a visual spot check of containers.

To be eligible, the containers shall meet the following conditions for metal containers and IBC's:

- be at least a 5-gallon but **not** greater than 330-gallon capacity
- be suitable for use in contact with honey
- free from applicable dust or rust.

Reject the lot if at least 5 percent or more containers do not meet the requirements in this subparagraph.

Give producers an opportunity to transfer honey into eligible containers before continuing with the spot check.

Notify the producer that the lot of honey must be transferred into eligible containers within 15 calendar days from notification and follow this table.

IF...	THEN...
the producer does not transfer the lot of honey into eligible containers within 15 calendar days from notification	call the loan according to 8-LP, *--Part 4.--*
the producer transfers the lot of honey into eligible containers within 15 calendar days from notification	spot-check the containers to verify eligibility.

403 Completing Spot Checks**A Reviewing Documentation**

Once the site visit is complete or production evidence is submitted, County Offices shall:

- calculate the quantity provided on submitted documentation, as applicable
- ***--Example:** One gallon of honey equates to approximately 12 pounds of honey;--* therefore, the following calculations may be used:
 - 5-gallon metal container equals 60 pounds

Section 6 (Withdrawn--Amend. 11)

660 (Withdrawn--Amend. 11)

***--Section 6.5 Commodity Certificate Exchange for Loan Collateral**

661 General Information

A Availability

Beginning with the 2015 crop year, producers may purchase commodity certificates at their County Office and immediately exchange for outstanding nonrecourse loan collateral.

Commodity Certificate Exchanges (CCE) are only applicable when the loan rate exceeds the exchange rate.

B Process

The following table describes the high level process to exchange commodity certificates for outstanding loan collateral on an already disbursed MAL in a County Office.

Step	Action
1	Producer or producer’s agent requests to exchange outstanding loan collateral using commodity certificates.
2	The County Office identifies loan and loan quantity, and determines exchange value.
3	The producer purchases commodity certificate from the County Office for the exact dollar value needed to exchange the outstanding loan collateral.
4	The producer signs CCC-694-2 and uses it to exchange the outstanding loan collateral.
5	The County Office releases the loan collateral.

C Eligible Producer

Eligible producers must:

- have an outstanding nonrecourse commodity loan, not past maturity, to purchase commodity certificates
- submit a signed CCC-694-2 with the purchase price of the commodity certificate to the County Office on the day of redemption to immediately exchange commodity certificates for loan collateral
- for turn-around loans
 - meet MAL eligibility requirements and retain BI
 - request the loan by the final loan availability date.--*

--661 General Information (Continued)*C Eligible Producer (Continued)**

The following may purchase a commodity certificate and exchange it for commodities on an outstanding loan:

- any producer who signed CCC-677, as applicable
- a person with a valid FSA-211 for a producer who signed CCC-677, as applicable.

Note: Only the signature of the producer purchasing the commodity certificate is required for joint loans.

D General CCE Policy

CCE's:

- apply to processed honey that is farm stored
- must **not** be applied to any quantity for which an outstanding CCC-697 exists
- **cannot** occur unless the honey is first placed under a nonrecourse MAL.

Commodity certificates are **not** issued for any of the following:

- commingled commodities stored at unapproved and/or unlicensed warehouses
- re-pledged commodities
- CCC-owned inventory.

Commodity loan gains from loan collateral exchanged with commodity certificates for loan collateral are:

- not subject to:
 - payment limitation
 - actively engaged, member contribution and cash rent tenant provisions
 - AGI provisions
- tracked using the interim process
- reported to IRS on IRS-1099-G statement.--*

--661 General Information (Continued)*E Exchange Rate**

The CCE rate or the CCC-determined value is based on the date the certificate is purchased and for honey uses, the Monthly CCC Honey 30-day repayment rate for MAL's for that same date.

CCE's are only applicable when the loan rate exceeds the Monthly CCC 30-day repayment rate for MALs.

F CCC-697 – Request to Lock In a Market Loan Repayment Rate

CCE must **not** be applied to any quantity for which an outstanding CCC-697 exists.

G FAX Requests

FAX forms and signatures are not authorized for purchasing commodity certificates or exchanging the certificate for the commodity.

H CCE Option for Honey MAL's

There are 2 options available to request commodity certificates for exchange for honey loan collateral.

- Turn-around loan is requested by a producer at the loan servicing office to purchase a commodity certificate for immediate exchange of the entire loan quantity.
- Commodity certificate purchase by a producer at the loan servicing office for immediate exchange of all or part of the loan collateral provided the loan maturity date has not been reached and/or the loan is not in violation.

I CCE Definitions

The following definitions are unique to CCE transactions.

Commodity loan gain means the difference between the loan principal amount and the CCC-determined value of the commodity certificate used to exchange the loan collateral, and the gain is not subject to either AGI provisions or Payment Limitation.

Turn-around loan is a special designation for a loan that is requested, approved for disbursement, and exchanged with a commodity certificate purchased the same day.--*

C

Determining Quantity The FSA representative supervising honey delivery at local sale shall follow this table.

Step	Action
1	<p>Weigh all containers to ensure that accurate gross weight of the honey and containers is obtained for each lot of honey.</p> <p>Note: Individual container weights are not required. However, for 5-gallon cans, if it is not practical to weigh the entire lot, do the following:</p> <ul style="list-style-type: none"> • weigh at least 10 percent but not fewer than 25 cans • multiply the number of cans times the average per-can gross weight.
2	<p>Determine the appropriate tare weight as follows:</p> <ul style="list-style-type: none"> • 2.5 pounds for cans holding approximately 5 gallons of honey • 32 pounds for drums holding approximately 30 gallons of honey • 53 pounds for drums holding approximately 55 gallons of honey. <p>*--Tare weight will vary for IBC containers; however, quantity cannot exceed 3300 to 3960 pounds.--*</p> <p>Exception: A lower honey container tare weight may be used based on:</p> <ul style="list-style-type: none"> • actual empty weight of containers or representative containers weighed by County Office personnel at the producer’s request • written certification from the producer, provided by a person or firm who: <ul style="list-style-type: none"> • purchased honey from the producer • accepted the producer’s declared tare weight in making a settlement with the producer • has been contacted by the County Office to determine whether the transaction, using a lesser tare weight, was satisfactory. <p>Note: Evidence of a lesser tare weight must be established before honey is delivered.</p>
3	<p>Calculate net weight by subtracting the correct tare weight from the gross weight.</p>

Continued on the next page

823 **Completing Delivery (Continued)**

D Determining Quality

The FSA representative supervising honey delivery at settlement shall follow this table.

Step	Action
1	Draw honey samples from cans, drums, or IBC containers at the delivery point after producer has designated lots according to Section 3. Note: Do not sample cans, drums, or IBC containers until producer has designated lots. Single containers do not constitute a lot for settlement purposes unless necessitated by color or floral source.
2	Send samples to the applicable AMS laboratory according to Exhibit 45.
3	Verify and approve AMS bills for inspection services for payment.
4	Deduct additional AMS fees from the producer’s settlement transaction.
5	*--The settlement will be processed based on the actual quantity and quality of honey sold through a local sale, and will be based on AMS official grade and settlement values for the applicable crop year.--*

--State Offices shall contact PSD for instructions on processing the settlement until software is available in CLPS.--

824-844 **(Reserved)**

Section 3 Grading, Testing, and Drawing Samples**845 AMS Prepared Specifications for Unprocessed Honey****A Introduction**

- County Offices for information purposes only.

B Scope, Purpose, and Classification

The specifications listed in this section are for determining the following for unprocessed honey acquired by CCC:

- adulteration
- moisture content
- color designation.

Regulations governing CCC honey price support (7 CFR Part 1434) provide for determination of the quality of honey by the Processed Products Branch, Fruit and Vegetable Division, AMS.

847 Drawing Honey Samples

A

Drawing Samples Draw samples from each lot according to the sampling schedule in paragraph 846.

Ensure that the samples are representative of each container sampled and the lot as a whole from which they are drawn. To obtain a representative sample, do **both** of the following:

- insert the sample trier through the top portion of the container
- obtain a core from a diagonal probe to the bottom on the opposite side of the container.

Note: It may be necessary to make a second or third probe, withdrawing cores from other portions of the container to extract a sufficient sample.

Draw approximately 1 pint from each container sampled. Place the sample in a pint glass or plastic jar. If containers are not locally available:

- County Offices shall contact State Offices for suitable plastic containers
 - State Offices shall contact PSD for assistance.
-

B

Crystallized
Honey**

A satisfactory trier for liquid or partially crystallized honey is a 3/4 inch or 1 inch copper, aluminum, or stainless steel tube, stainless steel preferable, with a tight fitting plunger.

See subparagraph I for an example of a trier. The tube should be long enough to reach the bottom of the container to be sampled.

A satisfactory plunger is a piece of doweling 5/8 inch or 3/4 inch in diameter with a rubber stopper to fit snugly inside the tube attached to the end with a flat head wood screw. The plunger should be about 6 inches longer than the tube.

*--If triers, probes, or plungers are not available, State Offices shall:

- contract the making of this instrument according to specifications in subparagraph I or J in the normal manner
 - provide triers to applicable County Offices.--*

Crystallized
Honey**

Draw a sample of liquid or partially crystallized honey according to the following table.

Step	Action

**G
Sampler for
Crystallized
Honey**

A satisfactory sampler for crystallized honey is an instrument similar to a butter trier.

The sampler is a spoon constructed by cutting in half longitudinally an even-tapered cylindrical metal tube, stainless steel preferable, with approximately 1 1/4 inch diameter on 1 end and approximately 1 inch on the other end.

- The top portion has a 1/2 circle cross section of approximately 1 1/4 inch diameter with a cross bar “T” handle.
- The tip end has a 1/2 circle cross section of approximately 1 inch diameter and has a lightly beveled edge.
- The leading longitudinal edge and tip are sharpened.

For sampling containers larger than 5-gallon cans, use an instrument similar to the 1 described in this subparagraph.

Note: Make sure the instrument is long enough to reach the bottom of the containers to be sampled.

Beneficial Interest

Beneficial interest in the honey must:

- be in the producer tendering the honey as security for a loan
- always have been in the producer before this honey was extracted.

Class

Class is the rating of honey based on quality.

Eligible honey shall be segregated into 2 classes for FSA purposes:

- table
- nontable.

*--Commodity Loan Gain

Commodity Loan Gain is the difference between the loan principal amount and the CCC-determined value of the commodity certificate used to exchange the loan collateral. The gain is **not** subject to either AGI provisions or Payment Limitation.--*

Definitions of Terms Used in This Handbook (Continued)

Crop Year

The crop year is the calendar year in which honey is extracted.

The loan season starts April 1 and continues through March 31 of the following year.

Example: Honey extracted:

- *--in January, February, and March 2016 is **not** eligible for loan **until** April 1, 2016, and is considered 2016 crop honey
- by December 31, 2016, is eligible for loan through March 31, 2017, and is considered 2016 crop honey.

Exchange Rate

Exchange rate is the CCC-determined value on the date CCE is requested and CCC-694-2 is signed in the County Office, and will be based on the effective monthly CCC honey 30-day repayment rate.--*

Extracted Honey

Extracted honey is honey which has been physically removed from the honeycomb.

LDP

LDP's are payments made to producers who, although eligible to obtain a CCC loan, agree to forgo the loan in return for a payment on eligible honey.

Lot

A lot is defined as honey offered 1 time by the applicant, in 1 container size, of 1 declared color, of 1 declared floral source, and stored at 1 location.

Lot Number

The lot number is the number assigned by the County Office that:

- begins with "1" and continues serially for each loan or LDP
- designates specific lots within a loan or LDP.

*--Market Loan Gain

Market Loan gain is the difference between the loan principal amount and the CCC-determined value of the redeemed loan collateral. The gain is subject to both AGI provisions and payment limitation.--*

Definitions of Terms Used in This Handbook (Continued)

Nontable Honey

Nontable honey is honey that:

- has a predominant flavor of limited acceptability for table use
- may be considered suitable for table use in areas in which it is produced.

Producer-Packer

A producer-packer is a producer who packages a quantity of honey for retail sale. The same producer may also sell part of the honey production in eligible loan containers. This producer would still be considered a producer-packer.

Settlement Value

Settlement value is the value of the honey determined by AMS certifications for color, moisture, and adulteration.

Definitions of Terms Used in This Handbook (Continued)

Table Honey

Table honey is honey that:

- has a good flavor of a predominant floral source
- can be readily marketed for table use in all parts of the United States.

Third Party

A third party is a person or firm, other than CCC or the producer, that has control of a facility containing honey pledged as collateral for a price support loan.

*--Turn-Around Loan

Turn-around loan is a special designation for a loan that is requested, approved for disbursement, and exchanged with a commodity certificate purchased the same day.--*

Unauthorized Disposition

Unauthorized disposition is the disposing of collateral under loan without prior written authorization from CCC.

Unauthorized Removal

Unauthorized removal is the movement of honey loan collateral:

- from the storage structure in which the honey was stored when the loan was approved to any other storage structure, whether or not this structure is located on the producer's farm
- without prior written authorization from CCC.
