- even though your containers may have been previously inspected, the FSA representative will make the final container eligibility

- title to the container passes to the highest bidder at time of delivery
- you are responsible for inspection and testing fees.

- the color of honey will be determined according to AMS
- the FSA representative will not remove residue or defects on top of the honey before drawing samples
- you will be given 5 workdays after the date of notification to appeal the quality determination made by AMS, and you must pay for any expenses resulting from the appeal
- if the settlement value of the honey is less than the amount due on the loan, the amount of any deficiency and charges plus interest thereon shall be paid to CCC

B Waiver of Requirements

If the producer agrees to forgo a marketing assistance loan and request LDP, eligible container requirements are considered waived.

112 Storage Requirements

A General Requirements

Marketing assistance loans will **only** be available on honey in eligible storage. County Offices **must** conduct visual pre-loan inspections, according to paragraph 127, before loan approval to ensure that the collateral is:

- in existence
- being maintained.

Honey that is pledged as collateral for a loan or LDP must be segregated to preserve the identity of the honey securing each loan or LDP if the honey is located in a storage structure that:

- secures more than 1 loan or LDP
- stores honey **not** pledged as collateral for a loan or LDP.

B Honey Stored on the Farm

Eligible farm storage shall consist of a storage structure located on or off the farm that provides safe storage for the honey collateral through the maturity date for the loan.

Notes: The storage structure may be on or off the farm of the producer requesting the loan.

--Honey is an eligible commodity for FSFL.--

Honey stored outside in an open area or a temporary structure that does not protect the honey from natural elements will **not** be considered stored in eligible storage, even though the container requirements are met.

112 Storage Requirements (Continued)

B Honey Stored on the Farm (Continued)

The County Office representative must ensure that during the visual pre-loan inspection all containers have been properly identified and labeled by the producer with the following:

- producers name
- floral source (see Exhibit 4)

Example: Alfalfa.

number of containers

Example: Lot 1, Container 1 of 5.

• net weight of each container.

Reminder: Requests shall **not** be approved for the following if COC has reason to question producer control of honey:

- loans stored at the location of the processor
- farm-to-farm transfer to the storage location of the processor.

Exception: If the producer is the processor, the loan request or transfer may be approved if:

- honey is segregated from other honey stored at that location and each lot is identified by name of producer, State and county code, loan number, and lot number
- all other requirements are met.

113-119 (Reserved)

^{*--}During the visual pre-loan inspection, the County Office representative will prepare and affix CCC-683 according to paragraph 128.--*

126 Quantity Determination

A Loan Quantity Determinations

Require the producer to certify the quantity for honey stored on the farm on CCC-633 (Honey).

*--The initial maximum quantity eligible for honey stored on the farm shall be 100 percent of the quantity certified by the producer.

Notes: If a producer, at the time of MAL request, provides a signed certification for the total MAL quantity and indicates that the requested MAL quantity will be disposed of through bee feeding, quantities packaged for retail sales, gifts, or personal use, both of the following bullets apply. Producer:

- is eligible for MAL on 100 percent of the certified amount on CCC-633 (Honey), if the quantity and producer meet all eligibility and storage requirements
- must be reminded and understand that the MAL quantity fed, sold, gifted, or used, **must** be repaid **before** disposal and loss of beneficial interest.

For MAL, honey **must** be stored in approved containers according to paragraph 111 while under loan.

Producer may also request LDP, if applicable, instead of MAL, on 100 percent of the quantity.

See subparagraphs 425 C and D for production evidence requirements.--*

127 Pre-Loan Inspections

A Conducting Pre-Loan Inspections

- *--County Offices **must visually** conduct pre-loan inspections and prepare CCC-683 according to paragraph 128. Pre-loan inspections are performed to ensure that producers who--* applied for loans:
 - have honey packaged in acceptable containers
 - containers are properly labeled
 - loan collateral is segregated from nonloan collateral.

All pre-loan inspections **must** be conducted:

- before loan disbursements
- documented on CCC-633 (Honey), in the remarks section.

*--128 Commodity Seal Procedure

A General Information

CCC-683 will be:

- prepared by commodity inspector at the time of inspection
- completed using a black permanent marker
- affixed to each lot of honey being pledged for loan.

Part 4 Loan Deficiency Payments

200 Basic LDP Provisions

A Definition of LDP's

<u>LDP's</u> are payments made to producers who, although eligible to obtain a CCC loan, agree to forgo the loan in return for a payment on eligible honey.

--LDP's are applicable only when the 30-day honey repayment rate is less than the loan rate.--

B General Provisions

LDP's:

- will be processed through eLDP web-based software
- will be made in cash subject to assignment according to 63-FI
- will be issued by EFT or check, as applicable
- are subject to administrative offset according to 58-FI

* * *

- must be approved when all eligibility requirements are met
- cannot be canceled or repledged once a request has been made or disapproved
- cannot be repaid to secure a subsequent loan or LDP on the same quantity
- are not subject to State commodity assessments
- are subject to spot check according to Part 5
- will be paid when approved.

Lien searches and lien waivers are not required.

200 Basic LDP Provisions (Continued)

C Producer Eligibility Requirements

Producers applying for LDP must:

- meet eligibility requirements in Part 2, as applicable
- agree to forgo obtaining a loan for the quantity on which LDP is requested.

D No Storage Requirements

Approved storage requirements are waived for LDP's; however, all other MAL eligibility requirements **must** be met including beneficial interest, to receive LDP's instead of MAL's.

*--E LDP Number

eLDP will assign an LDP number for each crop year.--*

F Filing LDP's

LDP's shall be maintained in 1 of the following:

- separate LDP file for each request received
- 1 LDP file for each producer
- 1 LDP file for each producer by commodity.

200 Basic LDP Provisions (Continued)

G LDP Amount Reported to IRS

The amount of LDP is reported to IRS.

H Denied LDP Amounts

Part or all of a producer's calculated LDP amount shall be denied if any of the following apply:

- payment limitation is reached
- percent of cropland factor is less than 1.0000
- permitted entity share is less than 100 percent
- •*--not in compliance with AGI provisions
- other eligibility requirements are not met according to 8-LP, paragraph 200.--*

201 Requests for LDP's

A Request

LDP requests are complete when a County Office receives a completed and signed * * * CCC-633 EZ.

LDP's must be requested:

- before beneficial interest is lost according to Part 1, Section 2
- on or before March 31 of the applicable crop year
- at the County Office where the farm records are kept for the farm on which the commodity was produced in person, by FAX, or eLDP's.

If the producer farms in more than 1 county, the County Office **first** contacted shall:

- accept requests
- contact other County Offices when either of the following applies:
 - the request covers eligible production from more than 1 farm and the farm program records are kept in more than 1 County Office
 - LDP's were received from more than 1 County Office
- FAX LDP requests to the applicable administrative County Office for completion.

201 Requests for LDP's (Continued)

A Request (Continued)

LDP requests must be:

- approved when all eligibility requirements are met
- date-stamped when CCC-633 EZ, pages 1 and 2 are received in the County Office to indicate the request date.

Issue payments when the completed CCC-633 EZ is approved.

B Prompt Payment

--See 8-LP, paragraph 35 for the prompt payment due date.--

202 FAXed LDP Applications

A Acceptable FAXed LDP Applications

Properly signed and dated FAXed LDP application requests are considered completely filed when * * * CCC-633 EZ is:

- correctly completed by the producer, including all producer signatures
- received in the County Office, as applicable.

* * *

B Unacceptable FAXed LDP Applications

FAXed LDP requests submitted on any form other than * * * CCC-633 EZ are not acceptable.

202 FAXed LDP Applications (Continued)

C Incorrect FAXed LDP Requests

If CCC-633 EZ is not correctly completed by the producer according to paragraph 205, return the incomplete or invalid LDP request to the producer and explain the circumstances *--of the request denial. If a request is dissapproved for not providing information that--* is absolutely necessary to determine LDP, the County Office must provide the producer with written notification that:

- the request did not contain adequate information to process the request
- a new LDP rate will be established based on the date a new acceptable CCC-633 EZ, *--page 2, is received in the County Office.

Note: Some quantities included on LDP requests that are disapproved **cannot** be requested for LDP or pledged as loan collateral, depending on the reason for the disapproval.--*

202 FAXed LDP Applications (Continued)

D Signatures

Original copies are not required if * * * CCC-633 EZ is FAXed.

E Applications Requested But Not Received

If a producer inquires about a FAXed LDP application that was transmitted, and the application was not received in the County Office, County Offices shall:

- require producer to submit documentation to verify the date and time of the FAXed transmission of * * * CCC-633 EZ
- accept producer's completed LDP application
- document the date the LDP application was FAXed and the reason the FAX was not received
- use the LDP rate in effect on the date printed by the FAX machine on the original LDP request transmittal
- **not** accept or approve producer's LDP application unless the producer can provide verification of the actual FAXed date.

203 LDP Rates

A Effective LDP Rate

The LDP rate is the rate in effect on the day of the request.

The request date is the date CCC-633 EZ is received in the County Office. County Offices shall date-stamp CCC-633 EZ to verify the date the request is received.

If the FAXed CCC-633 EZ includes date and time printed by the FAX machine, a date-stamp is not required.

B LDP Rate

The LDP rate is determined by the amount the applicable commodity loan rate exceeds the CCC-determined value for where the commodity is stored for CCC-633 EZ.

The LDP rate will be announced on a monthly basis. Use the rate in effect until the next rate change.

For eligible commodities stored or marketed out of the United States, determine the LDP rate based on the County Office where LDP is requested.

* * *

203 LDP Rates (Continued)

C Determining LDP

LDP is calculated by multiplying the LDP rate times the LDP quantity requested.

D LDP Rate for FAXed * * * CCC-633 EZ's

For * * * CCC-633 EZ FAXed applications, the LDP rate is the rate in effect when * * * CCC-633 EZ is received in the County Office, if the LDP request is completed.

A Commodity Eligibility Requirements

To be eligible for LDP, the quantity of commodity must:

- meet eligibility requirements in Part 2
- have been produced by an eligible producer
- not have been previously pledged as collateral for a loan and repaid with cash at a rate less than the principal, plus interest
- not have been previously requested or paid for LDP.

A quantity of a commodity eligible to be repledged for a nonrecourse loan is eligible for LDP.

B Quantity Requested

Eligible producers may request LDP quantities by:

- certifying the quantity
- certifying date of delivery sale for quantities packaged for retail, gifts, or personal use
- providing delivery evidence.

Continued on the next page

 \mathbf{C}

Certified Quantity

Producers may request LDP by certifying the quantity. All certified LDP's are subject to spot check according to Part 5.

Exception:

If a producer-packer, at the time of the LDP request, provides a signed certification for the total LDP quantity requested to be disposed of through bee feeding, personal sales for quantities packaged for retail, gifts, or personal use, process the LDP request according to subparagraph E.

D Quantity Supported by Production Evidence

If producers do not wish to certify to the quantity or date delivered, requests can be completed by providing production evidence according to Part 5, Section 2.

If production evidence is provided at time of payment request, LDP will not be subject to spot check.

Continued on the next page

204 Eligible Quantity (Continued)

E Producer-Packer Quantity

A producer-packer may receive LDP for 100 percent of the quantity certified to and indicated on CCC-633 EZ, if **all** of the following conditions are met:

- a spot check is performed at the producer's expense **before** disbursement of LDP
- signed certification is provided as disposition evidence by the producer-packer who:
 - certifies to the quantity on CCC-633 EZ
 - packages and **will** dispose of the certified quantity of honey through bee feeding, personal sales for quantities packaged for retail, gifts, or personal use.

F Production Evidence for Fed Quantities

For fed honey, LDP's should be requested as direct LDP's according to paragraph 201.

The maximum quantity allowed is based on 4 pounds of honey fed to each colony on a monthly basis during the months of February, March, and April.

Example: Producer has 150 colonies, which were fed during February, March, and April. Producer will be eligible for 1800 pounds of fed honey.

--Note: If the feeding dates are within reason, use the LDP rate in effect for the date the producer certifies that the commodity was fed.--

Part 5 Compliance Provisions

Section 1 Spot Checking

400 Notification

A Contacting Producers

When loans and LDP's have been selected for spot check according to 8-LP, Part 3, Section 1, County Offices shall:

- notify the contact producer by telephone or memorandum, as applicable
- inquire if the honey has:
 - been sold
 - is still on the farm.

B Initiating Loans and LDP's Selected for Spot Check

Producers will be selected based on their participation in various programs. FSA employees, STC and COC members, and other required producers are included in the national selection.

FSA employees, STC and COC members, and other required producers **are** included in the selection; therefore, County Offices shall no longer conduct separate spot checks on required producers.

Early each calendar year, the National Office will post the list of producers selected for annual spot check reviews on the Intranet at

--http://fsaintranet.sc.egov.usda.gov/ffas/farmbill/ccc/default.htm.--

Determine how to proceed with the visual spot check as follows.

IF the honey	THEN
is still on the farm and a spot check has not been performed	complete a farm visit according to paragraph 401. The producer must provide production evidence by the earlier of the following:
	• 15 calendar days after the honey has been sold
	loan maturity date
	the last day of the ninth calendar month after the month in which LDP was disbursed.
	If production evidence has not been submitted by the due date, the producer may have to refund the market gain or LDP amount.

	certified LDP's
	loan repayments when market gain was earned.
	Review the loan for a violation according to
	paragraph 404 if loan is not repaid.

Require the producer to submit evidence on commodities **sold** within 15 calendar days from date of request.

401 On-Farm Visits

A When to Complete On-Farm Visits

Complete on-farm visits if honey is still stored on the farm for:

- outstanding loans
- outstanding loans and a market gain has been earned
- certified LDP's.

B Spot-Check Process

At the storage site, the inspector shall complete the spot check by **visually** inspecting farm-stored quantities for producers selected in the compliance review/spot check selection process.

For selected loans and LDP's, the commodity inspector shall:

- visually inspect containers for signs of fermentation
- visually inspect only those that are located at the same storage site as each random selection
- determine that quantity and quality are being maintained
- when visual inspection indicates a significant quantity shortage or a quality problem, record results in the National Compliance Review Database at
- *--http://www.nass.usda.gov/Online_Response/Attention/index.php.--*

If the honey has been sold, request delivery, sales, or other types of production evidence to verify the quantity and delivery dates of:

- certified LDP's
- loan repayments when market gain was earned.

Review the loan for violation according to paragraph 404 if the loan is **not** repaid.

Require the producer to submit evidence on commodities **sold** within 15 calendar days from the date of request.

401 On-Farm Visits (Continued)

C Reducing On-Farm Visits for LDP's

For LDP's only, County Offices, with State Office concurrence, may elect to forgo the farm visit by sending the producer a notification letter that includes all of the following:

- identification of LDP selected for spot check, as applicable
- options to the producer for quantities still on the farm to provide production evidence by the earlier of the following:
 - 15 calendar days after the commodity is sold
 - the last day of the ninth month after the month in which LDP was disbursed
- the following statement, "Failure to provide acceptable production evidence may result in repayment of the entire LDP amount plus applicable interest."

County Offices shall:

- consider the spot check complete when the producer:
 - does **not** respond within 7 calendar days, thus agreeing to provide required production evidence by the deadlines
 - agrees to provide required production evidence by the deadline

* * *

- monitor all letters and determine when production evidence is due
- •*--collect unearned LDP amounts, plus interest, according to 8-LP, paragraph 31.--*

401 On-Farm Visits (Continued)

D Adding Producers for Spot Check

Additional producers may be added to the list of producers selected during the annual spot check reviews, when it is reported or determined that the:

- quantity of the loan collateral or the applicable LDP quantity is questionable
- storability of the loan collateral is questionable.

MAL and LDP spot check results for the additional producers selected for spot check will **not** be required to be entered in the national database. County Offices shall record the following:

- reasons why the producer was selected for spot check in the COC minutes
- results on CCC-677-1.

If a shortage or violation is determined as a result of the spot check, County Offices shall *--record the shortage or violation as instructed by PSD.--*

E STC-Established Guidelines for Conducting Additional Spot Checks

STC's shall:

- establish guidelines for conducting additional spot checks
- determine how and when County Offices should select additional producers for spot check
- record the established guidelines in the STC minutes for auditing purposes.

402 Spot-Checking Storage Facility, Storage Containers, and Honey

A General Information

Arrange for the producer or a representative to be present at the storage facility during the spot check. The CCC representative may spot-check the honey at any reasonable time.

Note: If the producer refuses to permit entry, contact the State Office for guidance.

Record spot check results in the National Compliance Review Database at *--http://www.nass.usda.gov/Online_Response/Attention/index.php, and if necessary,--* provide additional information in the "Remarks" section on CCC-633 (Honey).

Advise the producer that acceptance of honey for loan does not alleviate the responsibility of delivering acceptable honey in eligible containers if the honey under loan is delivered to CCC.

Note: If the honey is **not** in eligible containers when a spot check is performed, see subparagraph C.

B Spot-Checking Storage Facility

Determine whether the facility is eligible. An acceptable storage facility:

- shall provide safe storage and will protect the honey from natural elements
- shall be under the producer's control if stored on the farm
- may be in leased space
- may be on or off the farm.

402 Spot-Checking Storage Facility, Storage Containers, and Honey (Continued)

C Spot-Checking Outside of Containers

Make a visual spot check of containers.

To be eligible, the containers shall meet the following conditions for metal containers and IBC's:

- be at least a 5-gallon but **not** greater than 330-gallon capacity
- be suitable for use in contact with honey
- free from applicable dust or rust.

Reject the lot if at least 5 percent or more containers do not meet the requirements in this subparagraph.

Give producers an opportunity to transfer honey into eligible containers before continuing with the spot check.

Notify the producer that the lot of honey must be transferred into eligible containers within 15 calendar days from notification and follow this table.

IF	THEN
the producer does not transfer the lot of honey	call the loan according to 8-LP,

 - 55-gallon steel drum equals 660 pounds.
- review the documentation submitted to ensure that all production evidence requirements are met.

B Verifying Loan and LDP Quantity

County Offices shall:

- verify the quantity determined in subparagraph A
- compare the determined quantity to the:
 - outstanding loan quantity

*--Section 6.5 Commodity Certificate Exchange for Loan Collateral

661 General Information

A Availability

Beginning with the 2015 crop year, producers may purchase commodity certificates at their County Office and immediately exchange for outstanding nonrecourse loan collateral.

Commodity Certificate Exchanges (CCE) are only applicable when the loan rate exceeds the exchange rate.

B Process

The following table describes the high level process to exchange commodity certificates for outstanding loan collateral on an already disbursed MAL in a County Office.

Step	Action
1	Producer or producer's agent requests to exchange outstanding loan collateral
	using commodity certificates.
2	The County Office identifies loan and loan quantity, and determines exchange
	value.
3	The producer purchases commodity certificate from the County Office for the
	exact dollar value needed to exchange the outstanding loan collateral.
4	The producer signs CCC-694-2 and uses it to exchange the outstanding loan
	collateral.
5	The County Office releases the loan collateral.

C Eligible Producer

Eligible producers must:

- have an outstanding nonrecourse commodity loan, not past maturity, to purchase commodity certificates
- submit a signed CCC-694-2 with the purchase price of the commodity certificate to the County Office on the day of redemption to immediately exchange commodity certificates for loan collateral
- for turn-around loans
 - meet MAL eligibility requirements and retain BI
 - request the loan by the final loan availability date.--*

*--661 General Information (Continued)

C Eligible Producer (Continued)

The following may purchase a commodity certificate and exchange it for commodities on an outstanding loan:

- any producer who signed CCC-677, as applicable
- a person with a valid FSA-211 for a producer who signed CCC-677, as applicable.

Note: Only the signature of the producer purchasing the commodity certificate is required for joint loans.

D General CCE Policy

CCE's:

- apply to processed honey that is farm stored
- must **not** be applied to any quantity for which an outstanding CCC-697 exists
- cannot occur unless the honey is first placed under a nonrecourse MAL.

Commodity certificates are **not** issued for any of the following:

- commingled commodities stored at unapproved and/or unlicensed warehouses
- re-pledged commodities
- CCC-owned inventory.

Commodity loan gains from loan collateral exchanged with commodity certificates for loan collateral are:

- not subject to:
 - payment limitation
 - actively engaged, member contribution and cash rent tenant provisions
 - AGI provisions
- tracked using the interim process
- reported to IRS on IRS-1099-G statement.--*

*--661 General Information (Continued)

E Exchange Rate

The CCE rate or the CCC-determined value is based on the date the certificate is purchased and for honey uses, the Monthly CCC Honey 30-day repayment rate for MAL's for that same date.

CCE's are only applicable when the loan rate exceeds the Monthly CCC 30-day repayment rate for MALs.

F CCC-697 – Request to Lock In a Market Loan Repayment Rate

CCE must **not** be applied to any quantity for which an outstanding CCC-697 exists.

G FAX Requests

FAX forms and signatures are not authorized for purchasing commodity certificates or exchanging the certificate for the commodity.

H CCE Option for Honey MAL's

There are 2 options available to request commodity certificates for exchange for honey loan collateral.

- Turn-around loan is requested by a producer at the loan servicing office to purchase a commodity certificate for immediate exchange of the entire loan quantity.
- Commodity certificate purchase by a producer at the loan servicing office for immediate exchange of all or part of the loan collateral provided the loan maturity date has not been reached and/or the loan is not in violation.

I CCE Definitions

The following definitions are unique to CCE transactions.

<u>Commodity loan gain</u> means the difference between the loan principal amount and the CCC-determined value of the commodity certificate used to exchange the loan collateral, and the gain is not subject to either AGI provisions or Payment Limitation.

<u>Turn-around loan</u> is a special designation for a loan that is requested, approved for disbursement, and exchanged with a commodity certificate purchased the same day.--*

822 Handling Bids (Continued)

F Posting Bills

When a sale is made:

- prepare a list showing the names of the bidders, bid, and successful bidder
- post the list in the County Office on the date that CCC-638 is mailed and leave posted for at least 5 calendar days.

The County Office shall retain CCC-638, CCC-639, and all bids successful and unsuccessful bids on file in the County Office for 5 years.

G Making Payment for Sales

Payments for the sale of the honey must be:

- made by the successful bidder before or at the time of delivery
- in cash or other acceptable remittance
- received in the County Office within 5 calendar days after notification of the successful bid.

H Applicable Charges

The producer is responsible for applicable charges incurred as necessary to complete the sale of loan collateral.

Examples: Weighing, sampling, or grading.

Document all charges on CCC-691, Part C, as applicable. These charges shall be recorded as *--other charges when processing the local sale settlement as instructed by PSD.--*

822 Handling Bids (Continued)

I Applying Sale Proceeds

The proceeds from the sale of the honey shall be applied to the CCC account.

Settlement with producers shall be based on the discounts applicable to the honey samples submitted to AMS and the adulteration lab.

*--The sales proceeds shall not be applied to the honey loan as a principal plus interest repayment.

The sale proceeds shall be deposited directly into NRRS according to 64-FI, using code "XXHONYLOSA".--*

A Scheduling Delivery to Purchaser

After the sale has been completed, the County Office shall:

- schedule delivery of the honey to the purchaser
- issue CCC-691 to the producer, directing delivery to the purchaser F.O.B. purchaser conveyance at the storage location.

B Supervising Delivery

The County Office representative shall:

- supervise the delivery, including weight and sampling, when applicable
- draw a representative sample for :
 - color determination
 - adulteration
 - moisture
- issue payment, as applicable.

C Determining Quantity

The FSA representative supervising honey delivery at local sale shall follow this table.

Step	Action
1	Weigh all containers to ensure that accurate gross weight of the honey and containers is obtained for each lot of honey.
	Note: Individual container weights are not required. However, for 5-gallon cans, if it is not practical to weigh the entire lot, do the following:
	 weigh at least 10 percent but not fewer than 25 cans multiply the number of cans times the average per-can gross weight.
2	Determine the appropriate tare weight as follows:
	 2.5 pounds for cans holding approximately 5 gallons of honey 32 pounds for drums holding approximately 30 gallons of honey 53 pounds for drums holding approximately 55 gallons of honey.
	Tare weight will vary for IBC containers; however, quantity cannot exceed 3300 to 3960 pounds
	Exception: A lower honey container tare weight may be used based on:
	actual empty weight of containers or representative containers weighed by County Office personnel at the producer's request
	• written certification from the producer, provided by a person or firm who:
	purchased honey from the producer
	accepted the producer's declared tare weight in making a settlement with the producer
	 has been contacted by the County Office to determine whether the transaction, using a lesser tare weight, was satisfactory.
	Note: Evidence of a lesser tare weight must be established before honey is delivered.
3	Calculate net weight by subtracting the correct tare weight from the gross weight.

823 Completing Delivery (Continued)

D Determining Quality

The FSA representative supervising honey delivery at settlement shall follow this table.

Step	Action
1	Draw honey samples from cans, drums, or IBC containers at the delivery point after
	producer has designated lots according to Section 3.
	Note: Do not sample cans, drums, or IBC containers until producer has designated lots.
	Single containers do not constitute a lot for settlement purposes unless necessitated by color or floral source.
2	Send samples to the applicable AMS laboratory according to Exhibit 45.
3	Verify and approve AMS bills for inspection services for payment.
4	Deduct additional AMS fees from the producer's settlement transaction.
5	*The settlement will be processed based on the actual quantity and quality of honey
	sold through a local sale, and will be based on AMS official grade and settlement
	values for the applicable crop year*

^{*--}State Offices shall contact PSD for instructions on processing the settlement until software is available in CLPS.--*

Section 3 Grading, Testing, and Drawing Samples

845 AMS Prepared Specifications for Unprocessed Honey

A Introduction

AMS prepared CCC specifications for unprocessed honey at FSA's request. These specifications have been prepared using AMS grammatical constructions.

These specifications will be used by:

- AMS laboratories for grading unprocessed honey delivered to CCC
- County Offices for information purposes only.

B Scope, Purpose, and Classification

The specifications listed in this section are for determining the following for unprocessed honey acquired by CCC:

- adulteration
- moisture content
- color designation.

Regulations governing CCC honey price support (7 CFR Part 1434) provide for determination of the quality of honey by the Processed Products Branch, Fruit and Vegetable Division, AMS.

C Shipping or Delivering Samples

Ship or deliver all samples using the best available service to the AMS grading laboratory serving the State. See Exhibit 45 for the appropriate AMS address.

846 Sampling Schedule and Inspection Requirements

A Sampling Schedule and Inspection Charges

The following table provides the schedule for the number of samples to be taken for adulteration test and grading, and the applicable inspection charge.

Number of Containers				Required Number	Required

4,254-7,341	710-1,224	387-667	402-559	3	29

Note: The maximum number of grading samples shall be 29 per lot. Divide lots when the number of containers exceed the maximum number required for 29 samples.

B Moisture Testing Fees

Approve charges for moisture tests based on the time required to determine the moisture content.

AMS charges \$62 per hour for moisture tests.

Example: If the time required to conduct the moisture test is 1/2 hour, the applicable charge will be \$31.

*--County Offices shall issue payments for the testing fees in OLP, according to 1-FI, using the program code "LAB" **after** receiving an allocation.

Payments coded "LAB" need to be allocated to the specific County **before** entering in OLP. Funding must be requested through the State Office. To request the allocation, State Office shall send an e-mail to DeAnn Allen, PSD, at **deann.allen@wdc.usda.gov**, identifying the county and amount of funding needed.

The moisture testing fee is the producer's responsibility, and this cost must be added as a charge to the settlement.

Note: For additional information on applicable charges, see 8-LP subparagraph 861 B.--*

\mathbf{A}

Drawing Samples

Draw samples from each lot according to the sampling schedule in paragraph 846.

Ensure that the samples are representative of each container sampled and the lot as a whole from which they are drawn. To obtain a representative sample, do **both** of the following:

- insert the sample trier through the top portion of the container
- obtain a core from a diagonal probe to the bottom on the opposite side of the container.

Note: It may be necessary to make a second or third probe, withdrawing cores from other portions of the container to extract a sufficient sample.

Draw approximately 1 pint from each container sampled. Place the sample in a pint glass or plastic jar. If containers are not locally available:

- County Offices shall contact State Offices for suitable plastic containers
- State Offices shall contact PSD for assistance.

B Identifying Samples

Identify each sample with:

- State and county codes
- loan and lot number.

*--C

Spot-Check Schedule The following table provides the schedule for the number of containers to be checked when a spot check is performed.

D Shipping or Delivering Samples

Ship or deliver all samples using the best available service to the AMS grading laboratory serving the State. See Exhibit 45 for the appropriate AMS address.

E Trier for Liquid or Partially Crystallized Honey

A satisfactory trier for liquid or partially crystallized honey is a 3/4 inch or 1 inch copper, aluminum, or stainless steel tube, stainless steel preferable, with a tight fitting plunger.

See subparagraph I for an example of a trier. The tube should be long enough to reach the bottom of the container to be sampled.

A satisfactory plunger is a piece of doweling 5/8 inch or 3/4 inch in diameter with a rubber stopper to fit snugly inside the tube attached to the end with a flat head wood screw. The plunger should be about 6 inches longer than the tube.

- *--If triers, probes, or plungers are not available, State Offices shall:
- contract the making of this instrument according to specifications in subparagraph I or J in the normal manner
- provide triers to applicable County Offices.--*

F Drawing Sample of Liquid or Partially Crystallized Honey

Draw a sample of liquid or partially crystallized honey according to the following table.

Step	Action
1	Insert the trier into the container with the plunger in a position flush with the end.
	Note: Do not touch sides or bottom of container with trier.
2	As the tube is drawn out of the container, draw the plunger up the tube in the container.
3	Wipe off excess honey that accumulates on the outside of probe.
4	Pump sample into the sample bottle.

G Sampler for Crystallized Honey

A satisfactory sampler for crystallized honey is an instrument similar to a butter trier.

The sampler is a spoon constructed by cutting in half longitudinally an even-tapered cylindrical metal tube, stainless steel preferable, with approximately 1 1/4 inch diameter on 1 end and approximately 1 inch on the other end.

- The top portion has a 1/2 circle cross section of approximately 1 1/4 inch diameter with a cross bar "T" handle.
- The tip end has a 1/2 circle cross section of approximately 1 inch diameter and has a lightly beveled edge.
- The leading longitudinal edge and tip are sharpened.

For sampling containers larger than 5-gallon cans, use an instrument similar to the 1 described in this subparagraph.

Note: Make sure the instrument is long enough to reach the bottom of the containers to be sampled.

H Drawing Sample of Crystallized Honey

Draw a sample of crystallized honey according to the following table.

Step	Action
1	Push trier directly to the bottom of container without rotating.
2	When reaching the bottom, rotate with trier at least once.
3	Remove the trier from the container with the tapered core.

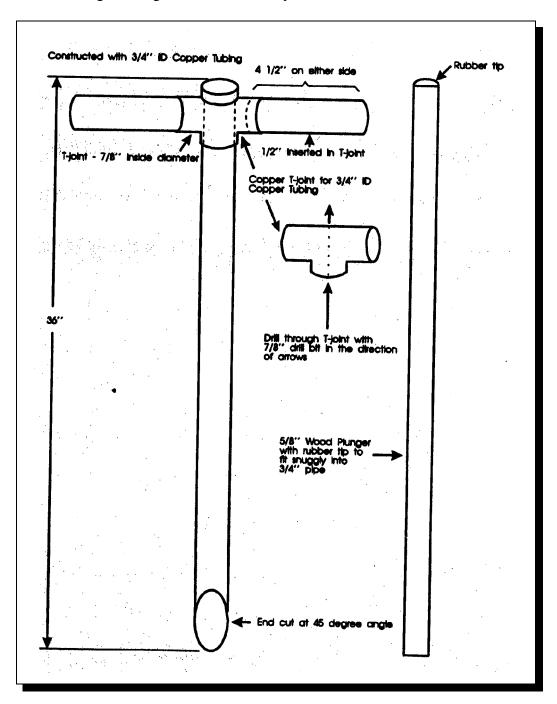

To sample hard crystallized honey:

- use an instrument similar to the drill bit described in subparagraph J
- use a 1/2 inch heavy-duty electric drill to power the probe into the honey.

J Satisfactory Sampler

The following is a diagram of a satisfactory sampler.

848 Adulteration Test

A Samples for Adulteration Test

The FSA representative supervising the delivery shall follow this table for preparing adulteration test samples.

Step	Action
1	Draw at least 1 honey test sample from each lot. See paragraph 846 for the number
	of samples to draw for adulteration testing.
	Adulteration test samples shall be:
	approximately 1/2 pint of honey
	placed in glass or plastic containers, suitable for honey storage
	• drawn from any part of the container
	• requested for the protein test.
2	Mark test sample container with:
	 State and county codes loan and lot number a letter code, if more than 1 test sample is required per lot. Example: 49 085 36 A.
3	Pack test samples for mailing.
4	*Coastal Science Laboratory will test for adulteration. Test samples shall be
	mailed:
	as soon as possible
	• following current procedure to the lab address the State Office obtains from PSD*

848 Adulteration Test (Continued)

A Samples for Adulteration Test (Continued)

Step	Action
5	Adulteration test laboratory will return test results to the loanmaking County Office.
6	After receiving bill for collection from adulteration testing laboratory, loanmaking
	County Offices shall:
	• confirm and pay bill for adulteration charges
	• request Treasury check, according to 1-FI, using program code "LAB".
	*Note: Payments coded "LAB" need to be allocated to the specific county before
	entering into OLP. Funding must be requested through the State Office.
	To request the allocation, State Offices shall send an e-mail to DeAnn
	Allen, PSD, at deann.allen@wdc.usda.gov, identifying the county and
	amount of funding needed*
7	If the honey fails the adulteration, then immediately notify the producer that the
	settlement rate is "zero".

В

PART E - PROCEDURE WHEN THERE IS A DISAGREEMENT AS TO GRADE AND QUALITY

(a) Grade Determination by Federally Licensed Inspector.

For all commodities, in case of disagreement on grade and quality determined by a Federally licensed inspector on lot(s) delivered, the determination may be appealed through the regular Federal Grain Inspection Service procedures. The producer will be responsible for all appeal expenses. The grade and quality determination resulting from the appeal shall serve as the basis for settlement.

(b) Grade Determination by Other Than Federally Licensed Inspector. The county office will forward the sample to a Federally licensed grain inspector for a determination which shall serve as the basis for settlement. If delivery was to other than an approved warehouse, the county office will send a portion of the representative sample of the lot(s) in disagreement to a Federally licensed inspector for a determination which shall serve as the basis for settlement.

Definitions of Terms Used in This Handbook

Alternative Repayment Rate

The <u>alternative repayment rate</u> is the rate for honey loans that is determined and announced by CCC.

The repayment amount could be greater than the loan rate but less than principal plus interest.

Beneficial Interest

Beneficial interest in the honey must:

- be in the producer tendering the honey as security for a loan
- always have been in the producer before this honey was extracted.

Class

<u>Class</u> is the rating of honey based on quality.

Eligible honey shall be segregated into 2 classes for FSA purposes:

- table
- nontable.

*--Commodity Loan Gain

Commodity Loan Gain is the difference between the loan principal amount and the CCC-determined value of the commodity certificate used to exchange the loan collateral. The gain is **not** subject to either AGI provisions or Payment Limitation.--*

Definitions of Terms Used in This Handbook (Continued)

Crop Year

The <u>crop year</u> is the calendar year in which honey is extracted.

The loan season starts April 1 and continues through March 31 of the following year.

Example: Honey extracted:

- •*--in January, February, and March 2016 is **not** eligible for loan **until** April 1, 2016, and is considered 2016 crop honey
- by December 31, 2016, is eligible for loan through March 31, 2017, and is considered 2016 crop honey.

Exchange Rate

Exchange rate is the CCC-determined value on the date CCE is requested and CCC-694-2 is signed in the County Office, and will be based on the effective monthly CCC honey 30-day repayment rate.--*

Extracted Honey

Extracted honey is honey which has been physically removed from the honeycomb.

LDP

<u>LDP's</u> are payments made to producers who, although eligible to obtain a CCC loan, agree to forgo the loan in return for a payment on eligible honey.

Lot

A <u>lot</u> is defined as honey offered 1 time by the applicant, in 1 container size, of 1 declared color, of 1 declared floral source, and stored at 1 location.

Lot Number

The lot number is the number assigned by the County Office that:

- begins with "1" and continues serially for each loan or LDP
- designates specific lots within a loan or LDP.

*--Market Loan Gain

<u>Market Loan gain</u> is the difference between the loan principal amount and the CCC-determined value of the redeemed loan collateral. The gain is subject to both AGI provisions and payment limitation.--*

Definitions of Terms Used in This Handbook (Continued)

Nontable Honey

Nontable honey is honey that:

- has a predominant flavor of limited acceptability for table use
- may be considered suitable for table use in areas in which it is produced.

Producer-Packer

A <u>producer-packer</u> is a producer who packages a quantity of honey for retail sale. The same producer may also sell part of the honey production in eligible loan containers. This producer would still be considered a producer-packer.

Settlement Value

<u>Settlement value</u> is the value of the honey determined by AMS certifications for color, moisture, and adulteration.

Definitions of Terms Used in This Handbook (Continued)

Table Honey

<u>Table honey</u> is honey that:

- has a good flavor of a predominant floral source
- can be readily marketed for table use in all parts of the United States.

Third Party

A <u>third party</u> is a person or firm, other than CCC or the producer, that has control of a facility containing honey pledged as collateral for a price support loan.

*--Turn-Around Loan

<u>Turn-around loan</u> is a special designation for a loan that is requested, approved for disbursement, and exchanged with a commodity certificate purchased the same day.--*

Unauthorized Disposition

<u>Unauthorized disposition</u> is the disposing of collateral under loan without prior written authorization from CCC.

Unauthorized Removal

<u>Unauthorized removal</u> is the movement of honey loan collateral:

- from the storage structure in which the honey was stored when the loan was approved to any other storage structure, whether or not this structure is located on the producer's farm
- without prior written authorization from CCC.
