

Milk Price Support Program

NOTE: This is the first updated Dairy Price Support Program Fact Sheet since August 1997. The program's name has changed to the Milk Price Support Program and the program was not phased out in January 2000 as once expected.

Introduction

The Milk Price Support Program (MPSP) is legislatively mandated. The Secretary of Agriculture is authorized to carry out this program under the Commodity Credit Corporation (CCC) borrowing authority. MPSP was established on October 1, 1949, by the Agricultural Act of 1949 to provide farmers a parity level of income. The program has been modified over the years but continues to support prices for dairy farmers. Provisions for inventory control and other programs have been added.

The MPSP has never paid farmers directly, but purchases dairy products from processors and vendors to allow farmers to be paid the mandated support price for their milk.

Background

Basic Legislative Authority: The basic provisions of the Agricultural Act of 1949, as amended, required that the price of milk to producers be supported at a level between 75 and 90 percent parity to assure an adequate supply of milk, reflect changes in the cost of production, and assure a level of farm income to maintain produc-

tive capacity sufficient to meet future needs. However, since October 21, 1981, the support price has been established by Congress either at specific price levels, or by formula related to expected surplus, rather than parity levels.

The 1996 Federal Agriculture Improvement and Reform Act authorized the MPSP through December 31, 1999. Due to low prices and concerns from the dairy industry, Congress extended the MPSP until May 31, 2002, through the Agriculture, Rural Development, Food and Drug Administration, and Related Agencies Appropriations Acts of 2000 and 2001. The Farm Security and Rural Investment Act of 2002 authorized the program from June 1, 2002, through December 31, 2007.

Current Legislative Authority

The Farm Security and Rural Investment Act of 2002 (Act) authorized the Secretary of Agriculture to support the price of milk produced in the 48 contiguous States through the purchase of cheese, butter, and nonfat dry milk (NDM) produced from the milk. The milk price support rate is \$9.90 per hundredweight (cwt) for 3.67% butterfat (milkfat) milk.

Purchase prices are set through formulas that equate the cheese, butter and NDM purchase prices to at least the \$9.90 support price. See page 3 for the formulas and Table 2 for purchase prices over time. These purchase prices are consistent for all sellers and at a level that enables plants of average efficiency to pay dairy farmers an annual average milk price that is not less than \$9.90 per cwt for 3.67% butterfat (milkfat) milk.

The 2002 Act indicates that the Secretary may allocate the rate of price support between the purchase prices for nonfat dry milk and butter in a manner that will result in the lowest level of expenditures by the CCC or achieve such other objectives as the Secretary considers appropriate. The Secretary may only adjust the price of NDM and butter twice within the calendar year.

CCC Purchases and Dispositions

MPSP purchases are just one part of overall CCC purchases for Farm Service Agency's (FSA) Commodity Operations. Under CCC's umbrella, FSA Commodity Operations purchases and delivers processed commodities under various domestic food distribution

programs, such as the National School Lunch Program or the Commodity Supplemental Food Program. Purchases and deliveries of commodities are also made to foreign countries. Foreign programs are authorized under Titles II and III of Public Law 480; the Food for Progress Program; and Section 416(b) of the Agricultural Act of 1949, utilizing private voluntary agencies, the World Food Program, and government-to-government transfers.

Purchases in Special Forms or Consumer-Size Packages

In addition to purchases of bulk products at announced prices, CCC has historically purchased butter, cheese, and NDM in further processed forms or in consumer-size packages to support the price of milk. The prices for these products include "Make Allowances" for additional processing and packaging costs. Purchasing products in consumer-size packages enables CCC to utilize dairy products under donation programs more efficiently.

Processing and Repackaging

Under MPSP, in order to facilitate use in food assistance programs, products purchased in bulk are repackaged in forms suitable for sales and donation. These services, which are contracted through competitive bids, include: repackaging bulk butter into 1 pound prints; processing butter into butteroil; processing block or barrel cheese into 5 pound and

2 pound loaves; and instantizing and/or fortifying NDM with vitamins A & D into 25.6 ounce, or 4 pound bags.

Other Dairy Programs

Besides MPSP, USDA administers the Milk Income Loss Contract Program (MILC), the Dairy Promotion and Research Program, and the Dairy Export Incentive Program (DEIP). The recourse loan program for milk, as provided for in the 1996 Farm Bill, was never established and was repealed in the 2002 Act.

DEIP

USDA's Foreign Agricultural Service administers the DEIP. U.S. dairy commercial exporters can apply for cash subsidies through DEIP to offset the difference between world and U.S. prices. This can lower the amount MPSP purchases or increase U.S. Government market removals. CCC funds DEIP subsidies, but does not actually purchase the exported commodities. DEIP is a separate program from MPSP, but is still considered a CCC market removal.

The United States Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, sex, religion, age, disability, political beliefs, sexual orientation, or marital or family status. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at 202-720-2600 (voice and TDD).

To file a complaint of discrimination, write USDA, Director, Office of Civil Rights, Room 326-W, Whitten Building, 1400 Independence Avenue, SW, Washington, DC 20250-9410 or call (202) 720-5964 (voice and TDD). USDA is an equal opportunity provider and employer.

CCC Purchase Price Formulas: Calculating NDM, Butter, and Cheese Purchase Prices

CCC purchases dairy products in the form of nonfat dry milk, butter, and cheese, from processors at prices that enable plants of average efficiency to pay dairy farmers an annual average 3.67% butterfat (milkfat) milk price of \$9.90/cwt. Law mandates the \$9.90/cwt support price, and purchase prices are calculated using the following two formulas: **1) Butter and NDM**; **2) Cheese**

1) Butter and NDM

$$\text{Support Price} = \left[\text{Butter to Fluid Milk Conversion Factor} \times \text{Butter Purchase Price} \right] + \left[\text{NDM to Fluid Milk Conversion Factor} \times \text{NDM Purchase Price} \right] - \text{Manufacturing (Make) Allowance}$$

There are many combinations of the butter and NDM purchase prices that can equate to \$9.90. The current purchase prices, as of November 15, 2002, are as follows:

$$\begin{aligned} \$9.90/\text{cwt} &= \left[\frac{4.4756 \text{ lbs}}{\text{butter}} \times \frac{\$1.0500}{\text{lb}} \right] + \left[\frac{8.6697 \text{ lbs NDM}}{\text{cwt fluid milk}} \times \frac{\$0.800}{\text{lb}} \right] - \left[\frac{\$1.7285}{\text{cwt}} \right] \\ \$9.90/\text{cwt} &= (\$4.6994/\text{cwt}) + (\$6.9336/\text{cwt}) - (\$1.7285/\text{cwt}) \\ &= \$9.9045/\text{cwt} \end{aligned}$$

The equation can be rearranged to solve for the butter or NDM purchase price individually. Purchase price for either butter or NDM may be inserted into the equation, and then the corresponding butter or NDM purchase price can be calculated.

$$\begin{aligned} \text{Butter Purchase Price} &= \frac{\text{Support Price} - \left[\text{NDM to Fluid Milk Conversion Factor} \times \text{NDM Purchase Price} \right] + \text{Manufacturing (Make) Allowance}}{\text{Butter to Fluid Milk Conversion Factor}} \\ \text{NDM Purchase Price} &= \frac{\text{Support Price} - \left[\text{Butter to Fluid Milk Conversion Factor} \times \text{Butter Purchase Price} \right] + \text{Manufacturing (Make) Allowance}}{\text{NDM to Fluid Milk Conversion Factor}} \end{aligned}$$

To help manage CCC stocks or other objectives the Secretary deems appropriate, the purchase prices for butter and NDM may be changed, or reallocated. This change can only be done twice within a calendar year, and the most recent butter/powder tilt occurred on November 15, 2002. For historical CCC purchase prices, please reference Table 3 of this fact sheet.

2) Cheese

$$\text{Support Price} = \left[\text{Cheese to Fluid Milk Conversion Factor} \times \text{Cheese Purchase Price} \right] - \text{Cheese Manufacturing Allowance} + \left[\text{Whey to Fluid Milk Conversion Factor} \times \text{Whey Price} \right] - \text{Whey Manufacturing Allowance}$$

$$\begin{aligned} \$9.90/\text{cwt} &= \left[\frac{10.0015 \text{ lbs}}{\text{Cheese}} \times \frac{\$1.1314}{\text{lb}} \right] - \frac{\$1.6503}{\text{cwt}} + \left[\frac{5.8714 \text{ Lbs Whey}}{\text{cwt fluid milk}} \times \frac{\$0.18}{\text{lb}} \right] - \left[\frac{\$.822}{\text{cwt}} \right] \\ &= \$11.3157 - \$1.6503/\text{cwt} + \$1.0568/\text{cwt} - \$.822/\text{cwt} = \$9.9002 \end{aligned}$$

(1,1) All purchases plus DEIP minus Unrestricted Sales

(1,2) Net expenditures to CCC plus domestic and foreign donation expenditures. For 1964-65, includes costs of military milk program, and through 1965-66, the payment for the support program. Includes costs of dairy products bought at market prices under Section 709 of the Food and Agriculture Act of 1965 in 1966-67, 1968-70, 1970-71, 1972-73, 1975-76, 1980-81, 1982-83, 1985-86, 1988-89, 1990-91, 1992-93, 1994-95, 1996-97, 1998-99, 2000-01, 2001-02, 2002-03. Also includes cost of dairy products bought at market prices under Section 4 (b) of the Agriculture and Consumer Protection Act of 1973 in 1973-74 and 1974-75.

(2-1) Prices for products in bulk containers at which CCC stood ready to buy all that was offered. Purchases on a bid basis were also made of limited quantities for specific program uses.

(2-2) Grade A or higher. Announced prices at New York City and nearby areas. Prices at other locations were either specifically announced, or based on freight rates from specified locations. Beginning April 1, 1985, the price applies to all locations.

(2-3) U.S. Grade A or higher, standard moisture basis.

(2-4) U.S. Extra Grade.

(2-5) Not purchased in this form after the last date listed.

(2-6) Effective July 14, 1976.

(2-7) Discontinued for NDM manufactured after December 31, 1979.

(2-8) Discontinued for NDM manufactured after December 31, 1980.

(2-9) Discontinued for NDM manufactured after December 31, 1981.

(2-10) Beginning June 1981, price for 40- and 60-pound blocks.

(2-11) Discontinued for NDM manufactured after December 31, 1980, and resumed on April 1, 1980.

(2-12) Discontinued for NDM manufactured after December 1981 and resumed July 6, 1982.

(2-13) Discontinued for NDM manufactured after June 2, 1986, and resumed after January 1, 1987 for NDM produced only during the first half each month through September 2, 1987. Thereafter on a continuing basis.

(2-14) Effective March 1, 1988, purchased NDM produced only during the first half of each month. Discontinued for NDM manufactured after July 5, 1988.

(3.1) Contracts made during the marketing year regardless of delivery. Includes price support purchases and competitive bid purchases.
(3.2) Includes 5.6 million pounds unsalted in 1992-93.
(3.3) Includes 1.5 million pounds dry whole milk in 1990-91, 27.5 million pounds in 1991-92, 64.8 million pounds in 1992-93, 49.4 million pounds in 1993-94, 23.1 million pounds in 1994-95, 10.3 million pounds in 1995-96, and 7.3 million pounds in 1996-97.

Table 4: Milk Price Support Program Butter, Cheese and Nonfat Dry Milk Purchases by marketing year (contract basis) (4.1)

(4.1) Only includes purchases made under the Milk Price Support Program. Reflects contracts made during the marketing year regardless of delivery.
