* The crop status for a state will meet one of three categories; 1) I/N (Irrigated/Non-irrigated), 2) I (irrigated), or 3) N (non-irrigated). I/N indicates the state did not meet the statutory requirement to separate an irrigated crop from a non-irrigated crop. I or N indicates the state did meet the statutory requirement to separate an irrigated crop from a non-irrigated crop.

TBD indicates the State's 2009 actual revenue is to be determined.
