

## Current Price List

The following listed crop and livestock commodity prices are provided for use as a guide in preparing year **2014** farm budgets. The prices listed do not include any government payments or subsidy. Disasters cannot be predicted therefore past history of LDP and other disaster programs should not be included in a projected plan or added to a price below. Actual contract price or price related to a particular area should be used if they more accurately reflect local markets. Case file needs to be documented regarding prices used.

| COMMODITY                               | 2014<br>Projected<br>Price | UNIT |
|-----------------------------------------|----------------------------|------|
| Dry Beans                               | 30.00                      | Cwt. |
| Corn (Silage)                           | 35.00                      | Ton  |
