C Report Descriptions and Options

The following table provides the report, action required, and data elements for the report and Report Screen options. Only 1 report can be created at a time. Reports will be displayed in PDF with an option to print.

Note: All reports, **except** CCC-861, CCC-862, and CCC-861 and CCC-862 Appendix reports are run against a reporting database; therefore, the reports will print data that was updated as of the previous workday.

Item	Report	Action	Result
1	CCC-861/862	Select report and enter farm number.	Prefilled CCC-861 or CCC-862 will be displayed.
2	CCC-861/862 Appendix	Select report.	ARCPLC terms and conditions will be displayed.
3	County Summary	Select report.	Report will be displayed providing a summary of ARCPLC enrollment information in the county.
4	Estimated Calculated Payment Report (ECPR)	Select ARC-County or PLC and enter the farm number.	The ECPR will be displayed for the farm and program selected.
5	Farms With Base Acres Greater Than Zero Without An Active CCC-861/862	Select report.	Report will be displayed identifying all farms that have base acres greater than zero in farm maintenance, but do not have an initiated CCC-861 or CCC-862.
6	Farms With Base Acres Greater Than Zero Without an Active CCC-861/862 With Operator Contact Information (CSV Format)	Select report.	Report will be displayed identifying all farms that have base acres greater than zero in farm maintenance, but do not have an initiated CCC-861 or CCC-862. The report will also include the operator's first name, last name, business name, suffix, street address, city, State, ZIP code, telephone number, and e-mail address.

--126 Bulk Multiyear Rollover*A Overview**

The Bulk Multiyear Rollover Screen provides users the ability to rollover thirty multiyear contracts at a time. All contract numbers from the prior year in an approved status and designated as a multiyear contract in the prior year will be displayed on this screen without regard to the current farm records situation. Once the “Rollover” option is selected the selected contract(s) will then be compared to the current year values in farm records. If the following values still match between years, the contract(s) will move to an approved status. If any value differs an error message will be displayed with the reason why the contract cannot be rolled over. If there are more than 30 contracts ready to rollover that screen will contain pagination and the user will have to move to the next group of contracts and repeat these steps.

Values checked at rollover between the CCC-862 or CCC-866 and the current year farm record:

- farm number is still active
- producers marked for election still present on the farm record
- crops are unchanged
- base acres are unchanged
- ARCPLC G/I/F flag unchanged
- PLC yield is unchanged (except 2020)
- program election(s) are unchanged.

To access the Bulk Rollover process, from the navigation menu under “Sign-Up”, CLICK “Bulk Multiyear Rollover”.--*

B Example of Bulk Multiyear Rollover Screen

The following is an example of the Bulk Multiyear Rollover Screen.

The screenshot displays the 'Bulk MultiYear Rollover' interface. At the top, it identifies the user as 'Admin Enter' and shows the current filters: Program Year: 2020, State: California(06), and County: Merced(047). A warning message states: 'All selections made on this page must be deselected or rolled over before proceeding to another page.' Below this, there are four buttons: 'New Search', 'Select All', 'Clear All', and 'Rollover'. A table lists two farms, both with an 'Originating Year' of 2019 and a 'Status' of 'Ready to Rollover'. The page is labeled 'Page 1 of 1' and includes a second set of the same four buttons at the bottom.

D Bulk Multiyear Rollover Screen Status Messages

The following status messages may be displayed after the “Rollover” option is selected on the Bulk Multiyear Rollover Screen.

Message	Description
Ready to Rollover	The contract was an approved multiyear contract in the prior year.
Approved	The contract has rolled over for the current year and is now approved.
Failed: change in crops	During the rollover process a change was detected between the crops with base acres on the prior year contract and the current values in farm records for the year selected.
Failed: change in acres	During the rollover process a change was detected between the base acres on the prior year contract and the current values in farm records for the year selected.
Failed: change in producers	During the rollover process a change was detected that a producer selected for enrollment/election on the prior year contract is not present on the farm record for the year selected.
Failed: change in grassland	During the rollover process a change was detected that the eligibility value for the G/I/F indicator does not match between the prior year contract and farm records for the year selected.
Failed: change in elections	During the rollover process a change was detected between the election on the prior year contract and the current values in farm records for the year selected.
Failed: Base acres exceed effective DCP cropland	During the rollover process a change was detected that the base acres exceed effective DCP cropland in farm records for the year selected.
Failed: No Elections Made On Farm	During the rollover process a change was detected that a crop was missing an election in farm records for the year selected.
Failed: Farm is in Pending Recon Status	During the rollover process the farm number was found to be in a status of Pending in farm records for the year selected.
Try Again Later	One or more of the variables that the ARCPLC software uses to validate contract values are not returning results and a determination cannot be made for the contract at that time. The user will need to try and roll the contract over later or roll the contract according to paragraph 124.

*--127 ARC-IC Yield Screen

A Overview

The ARC-IC Yield screen provides users the ability to record both historic benchmark and current year yields based on the crops reported in CARS for the selected program year. These entered yields will be used by the ARC-IC payment calculation. Users will enter the values certified to by the producer on the CCC-867. If the covered commodity was not planted for the particular year, leave blank. The payment software will also pick up the T-yield when applicable without user interaction.

This screen is designed to pull in the benchmark reported acre values if the farm number for the selected year is also active in the benchmark years. If zero is displayed that is an indication that the farm was active, but the covered commodity was not reported in that year. If N/A is displayed it is an indication that either the farm is not Fully Certified/Fully Reported in CARS or the farm was not active farm records in that benchmark year and manual review will need to be done to determine if the covered commodity was planted.

Yields will continue to carry forward to future years if the farm structure does not change between program years.

The following options are available on the ARC-IC Yield Screen.

Field/Button	Description	Action
Program Year	Program year as selected.	
State	State as selected and State code.	
County	County as selected and county code.	
Farm Number	Farm number as selected.	
Contract Status	The contract status of the selected farm. This will show either Enrolled or Approved.	
Operator	The operator listed in farm records for the selected farm.	
Yield Status	The status of the ARC-IC yields. This will show either Incomplete or Complete.	
20XX Covered Commodity	Will show the crop name for the covered commodities reported on the year selected in the CARS application.	
20XX Planted Acres	Will show the total acres planted for the covered commodities reported on the year selected in the CARS application.	
Producer	Will show all producers with a share greater than zero on a covered commodity reported on the year selected in the CARS application.	
Share	The calculated total share in the covered commodity as reported on the year selected in the CARS application.	
Years	Will display the current program year selected and the 6 prior years. For the 2018 Farm Bill ARC-IC will calculate the revenue guarantee based on the 5 years prior to the preceding crop year. Users do not need to enter a value for the lag crop year that immediately proceeds the payment year.

C ARC-IC Yield Screen Options (Continued)

Field/Button	Description	Action
Acres	An acre value will only display if the farm number was active for the year listed in that column. If a zero is displayed, then no acres for that crop were reported in CARS and the farm is Fully Certified/Fully Reported. If the acres show as N/A it is an indication that either the farm is not Fully Certified/Fully Reported in CARS or the farm was not active farm records for that benchmark year.	
Yield	<p>Users will load the yield certification from the CCC-867 for each corresponding year. The year immediately preceding the year selected does not need to be completed. This is an optional field.</p> <p>If the covered commodity was not planted for the particular year, leave blank.</p> <p>Important: There is no method for validation between acres and a value be loaded, zero values should not be entered if the covered commodity was not planted.</p>	Load the numeric value from the CCC-867 for each year the crop was planted.
Submit	Loaded data will be stored, users will remain on this screen.	CLICK "Submit" to save.
Cancel	All actions are canceled. If data was not submitted, it will not be saved.	CLICK "Cancel" to clear unsaved data. User will be returned to Search Screen.
Complete	<p>Loaded data will be stored, and the yield status will be updated to "Complete". Users will remain on this screen.</p> <p>This action should only be taken when all yield values have been loaded for all producers and crops on the farm.</p>	CLICK "Complete".

D ARC-IC Yield Screen Status Messages

The following status messages may be displayed at the top of the ARC-IC Yield Screen as blue warning messages when the user first enters the screen or as red hard stops when the user selects the option to “Complete”.

Message	Description
No covered commodities have been reported for this farm.	The farm is elected and enrolled/approved in ARC-IC but no covered commodities are reported for this farm in the selected year in the CARS system.
Farms acreage report is not Fully Reported/Fully Certified, please complete the acreage report for this farm prior to loading ARC-IC yield values.	The crop report in CARS is not in a status of “Fully Reported/Fully Certified”. The acreage report will need to be complete prior to loading yields.
Producer/Producers "(producerNames)" has an interest in the covered commodities on this farm but has not signed the CCC-862.	A producer was found with a reported interest in a covered commodity on the FSA-578 but was not selected to be part of the CCC-866. The contract will need to be corrected to represent all producers with shares in covered commodities.
Yields can only be complete if the current year value is loaded for all crops.	A current year yield value must be entered before the farm can be updated to a status of Complete.
