18 Reporting Dates (Continued)

F Requesting Changes to Crop Acreage Reporting Dates (Continued)

The justification should address the following criteria:

- provide reasoning behind why approving the change would reduce the burden on producers
- if the proposed ARD conflicts with requirements already established for farm programs or crop insurance associated with the crop/commodity

Note: Proposed ARD's that conflict with FSA, RMA, or other USDA requirements will still be considered for approval depending on the nature of the conflict.

- if other similar or closely related crops/commodities are associated with the proposed final ARD
- the proposed ARD should not increase, and ideally would reduce the total number of crop ARD's established for the State

Note: If the proposed ARD does increase the total number of dates for the State, explain the reasoning why it would further reduce the burden on producers.

- if the proposed reporting date for the crop/commodity significantly differs from the established reporting date for the crop/commodity in any neighboring State, provide the reasoning behind why the discrepancy does not pose a burden on producers, including multi-State producers.

*--State Offices shall submit **both** of the following to Clay Lagasse by e-mail to clay.lagasse@wdc.usda.gov:--*

- completed Exhibit 6.8
- written justification based on State Office research and analysis.

Notes: Requests for changes will **not** be considered unless all required parts are included.

Requests are **not** guaranteed approval and will be reviewed and approved or disapproved by a USDA ARD's review board consisting of members of multiple USDA Agencies, including NASS, NRCS, and RMA.

21 Late-Filed Report of Acreage (Continued)

***--B Late-Filed FSA-578 for NAP APH, CRP Cropping History, FSFL History, or P&CP Acres and Subsequently Planted Crop Acreage for 2009 Through 2012 (Continued)**

- provides acceptable evidence, to COC's satisfaction, to prove existence and disposition of the crop, according to subparagraph F

Note: If evidence accepted and approved by RMA or another USDA Agency is provided, proof of crop disposition is **not** required.

- is reporting P&CP acres or subsequently planted crop acreage for 2009 through 2012 crop years in an attempt to correct acreage history for the farm for 2014 Farm Bill base acre reallocation purposes.

Note: If an acreage report and request for prevented planted credit was timely submitted and the prevented planting acreage credit was disapproved by FSA, a new request for prevented planting acreage credit will **only** be permitted if either of the following apply:

- the prevented planting credit request for the same crop was **not** processed and acted on by FSA
- a NAP appeal of FSA's denial of prevented planting acreage credit was timely filed by the producer upon which NAD dismissed the appeal for lack of jurisdiction.

C Late-Filed FSA-578 for Nursery and Aquaculture

FSA-578 filed after the reporting deadline for the ensuing nursery or aquacultural crop year may be accepted for processing if all of the following occur:--*

- producer was prevented by circumstances beyond the producer's control from timely filing the report
- late-filed FSA-578 is for the inventory for the remaining months of the crop year
- late-filed FSA-578 is filed before the date of disaster, which is the basis for an application for payment.

Note: ARD for:

- nursery is May 31
- aquaculture is September 30.

21 Late-Filed Report of Acreage (Continued)

C Late-Filed FSA-578 for Nursery and Aquaculture (Continued)

A late-filed FSA-578 will **not** be accepted after either of the following:

- end of the crop year for which FSA-578 is required
- natural disaster occurs, which is the basis for an application for payment.

Note: The crop year for:

- nursery begins June 1 and ends May 31
- aquaculture begins October 1 and ends September 30.

Follow 1-NAP, Part 4, Section 2 for NAP Unit reporting requirements applicable to each kind of value loss crop.

D Late-Filed Fees and Acreage Verification

A late-filed FSA-578 requires payment of a late-filed fee to verify and determine the crop, acreage, and use, except as provided below. The fee is equal to the measurement service fee according to paragraph 460. FSA-409 is required to be completed according to paragraph 461.

Exceptions: A late-filed fee will **not** be assessed, and completion of FSA-409 will **not** be required, for a late-filed acreage report if any of the following apply:

- FSA-578 is filed for revising or correcting P&CP acreage or subsequently planted crop acreage for 2009 through 2012 crop years for base reallocation purposes
- FSA-578 is filed for a 2013 crop with a final reporting date between July 1, 2012, and September 15, 2013, inclusive
- FSA-578 is filed for a 2014 crop with a final reporting date on or after October 1, 2013
- *--FSA-578 is filed for a 2015 fall acreage report, as long as it is **not** associated with any coverage under Federal crop insurance or NAP--*

Notes: Field visits are **not** required for crops with final reporting dates during this timeframe; however, RMA data and current year's NAIP imagery shall be used, when available, to verify and determine the crop, acreage, and use.

If CCC-576 is late-filed according to subparagraph 24 G in conjunction with the acreage report, a late-filed fee shall be assessed according to paragraph 460 for the late-filed CCC-576.

22 Partial and Revised Reports (Continued)**D Revising Shares**

Shares may be revised at anytime if the revised shares can be verified by providing documentation to COC's satisfaction. For example, a lease showing the shares.

E Accepting Revised Acreage Reports

Accepting a revised acreage report does not guarantee program eligibility.

Note: See specific program procedure for guidelines for eligibility.

F Spot Checks

Partial and revised FSA-578's shall be subject to the same compliance spot checks as other FSA-578's.

G Revising Irrigation Practice

Once certified, the irrigation practice may be changed **only** if **both** of the following are met:

- requested by the producer
- verified with acceptable RMA data, such as CIMS showing a timely filed report of acreage to RMA. If CIMS does not provide data to support the producer's irrigation practice, it is the producer's responsibility to provide proper evidence, if questioned.

H Revising Planting Date

Once certified, the planting date shall **not** be changed.

22.5 FSA-578 Corrections

A Correcting FSA-578 Information When Incorrect Information Was Entered by an FSA Representative

If the producer provided the correct information and an FSA representative entered incorrect information on FSA-578, even though it was signed by the producer, the information may be corrected at any time if the information can be verified to COC's satisfaction. Producer is **not** required to sign the corrected FSA-578.

***--Note:** This includes the intended use.--*

COC minutes must be documented to identify the following:

- specific data to be corrected on FSA-578
- crop year the error occurred
- documentation used to verify the information
- error was committed by an FSA representative
- date the error was discovered.

This information shall be available upon request by DAFP. Accepting a corrected FSA-578 does **not** guarantee program eligibility.

B Spot Checks

Corrected FSA-578's shall be subject to the same compliance spot checks as other FSA-578's.

The corrected FSA-578 will not nullify the results of a spot check, if the results of the spot check have been provided to the producer.

23.6 Cover Crop Guidelines

A Introduction

DAFP has been contacted by several Agencies, including NRCS and the National Working Group on Cover Crops and Soil Health, to collect cover crop acreage.

The administrators of NRCS, RMA, and FSA organized an interagency workgroup to develop consistent, simple, and flexible policy across the 3 Agencies to ensure that USDA policies are coordinated and up-to-date with evolving cover crop practices. The workgroup developed termination guidelines for cover crops to achieve their conservation benefits while minimizing risk of reduced yield to the subsequent crop because of soil and water usage.

B Cover Crop Definition

*-Cover crop means crops, including grasses, legumes, and forbs, for seasonal cover and other conservation purposes. Cover crops are primarily used for erosion control, soil health improvement, and water quality improvement. The cover crop may be terminated by natural causes, such as frost, or intentionally terminated through chemical application, crimping, rolling, tillage, or cutting.

Note: A cover crop managed and terminated according to NRCS Cover Crop Termination Guidelines is **not** considered a crop for crop insurance purposes.

Cover crops can be planted:

- before a subsequent crop
- after prevented planting acreage
- after a planted crop
- with no subsequent crop planted
- into a standing crop.

All of these examples meet the definition of cover crop and will be reported using the intended use of cover only (CO).--*

23.6 Cover Crop Guidelines (Continued)

C Termination Guidelines

The termination guidelines:

- provide the timeframe for terminating cover crops
- are based on zones
- apply to non-irrigated cropland
- can be accessed at
<http://www.nrcs.usda.gov/wps/portal/nrcs/detailfull/national/landuse/crops/?cid=stelprdb1077238>.

Note: A copy of the map showing the Cover Crop Termination Zones and a list of counties is provided in Exhibit 6.9.

*--Contact NRCS for any questions about these guidelines.

D Reporting Cover Crops

The intended use of cover only (CO) will be used to report cover crops. This includes crops that were terminated by tillage and reported with an intended use code of green manure (GM).

For 2015 and future years, County Offices shall follow subparagraph 41 B for requesting the intended use cover only (CO), if applicable.--*

23.7 Reporting Organic Crops

*--A Reporting Organic

Crops are not required to be reported as organic, however if a producer elects the Organic option on the NAP application and wants to use the NAP organic price, then the crop must be reported as organic.

The buffer zone acreage must be included in the organic acreage of the unit that it buffers, either transitional or certified organic acreage and reported on the same basis.

B Required Documentation

When an acreage report is filed according to paragraph 301 for an organic crop, the producer must provide a current organic plan, organic certificate (written certificate), or documentation from a certifying agent indicating an organic plan is in effect.

Note: The National Organic Program (NOP) standards allow an exemption for a grower whose annual gross agricultural income from organic sales totals \$5,000 or less to be exempted from certification. Although a grower is not required to provide a written certificate, the producer is still required to provide a map showing the specific location of each field or certified organic, transitional, and buffer zone acreage.

C Certified Organic

For a certified organic acreage report the producer **must** provide a current organic plan and a recent written certification in effect from a certifying agent. The documentation **must** provide all of the following:

- name of the persons certified
- address
- telephone number
- effective date of certification (or certificate)--*

23.7 Reporting Organic Crops (Continued)

*--C Certified Organic (Continued)

- certificate number
- list of commodities certified; and
- name and address of the certifying agent
- a map showing the specific location of each field of certified organic, including the buffer zone acreage.

Note: Because the organic certificate may not be issued every year, it is possible that the organic certificate may not list every crop the insured may plant and insure.

Scenario: An organic certificate was issued in 2013 and lists: corn, oats, dry beans, and wheat. The next crop year, the insured plants canola, flax, and dry peas which are not listed on the organic certificate. The organic plan has not been updated for the current crop year to show these crops. In this case:

Example 1: The type of organic operation is still “crops,” and as long as the canola, flax, and dry peas were grown on ground that had previously been identified in the organic plan to be certified organic, the crops would be insured under the organic practice, as “certified organic”.

Example 2: Using the same scenario above but “Certificate” lists livestock or the type of livestock, such as hogs, sheep, cattle, etc. In this case, the type of organic operation Using the same scenario above but “Certificate” lists livestock or the type of livestock, such as hogs, sheep, cattle, etc. In this case, the type of organic operation cannot be identified as “crops” because the written “Certificate” lists livestock or the type of livestock, such as hogs, sheep, cattle, etc. The commodity type would not be “crops”, but “livestock”. Therefore, the crops (e.g., canola, flax, and dry peas, etc.) cannot be considered certified organic under the written “Certificate”.--*

23.7 Reporting Organic Crops (Continued)

***--D Transitional Acreage**

For a transitional (converting conventional acreage to certified organic acreage) organic acreage report, the producer must provide an organic plan and written documentation from a certifying agent indicating an organic plan is in effect. The organic plan must:

- identify the acreage that is in transition for organic certification
- list crops grown on the acreage during the 36 month transitioning period
- include all other acreage, including conventional acreage in the farming operation
- provide a map showing the specific location of each field of transitional including the buffer zone acreage.--*

24 Prevented Planting Acreage (Continued)

G Late-Filed Prevented Planting Acreage Claim (Continued)

Exception: For CCC-576, Part B, submitted beyond the period specified in subparagraph F and at a time that would **not** allow verification of the specific acreage through farm inspection, RMA data may be used to accept a late-filed CCC-576 prevented planting request, if the prevented planted acreage was reported timely to RMA and supports the prevented planted information reported on FSA-578. All other prevented planted provisions shall be met.
--This exception does not apply to NAP. See subparagraph 21 A for-- accepting late-filed FSA-578's.

Example 1: Producer late-filed CCC-576 on July 10 claiming prevented planted soybeans because of flooding. County Office employee makes a farm visit on July 17 and verifies flooding as the condition that prevented the producer from planting the intended crop. In this case, COC may accept the late-filed CCC-576, Part B, because flood condition can be verified by the farm visit.

Example 2: Producer late-filed CCC-576 on June 25 claiming prevented planted corn because of drought. Rain fell on June 30, before inspection was performed. In this case, COC cannot accept the late-filed CCC-576, Part B, because drought condition cannot be verified by the farm visit.

Example 3: Producer late-filed CCC-576 on August 2 claiming prevented planted wheat because of excessive rain. When the field inspection was performed on August 10, the field was determined to be dry enough for planting. In this case, COC cannot accept the late-filed CCC-576, Part B, because wet condition was not verified by the farm visit.

Notes: Results of the farm visit shall be documented on each filed CCC-576, and recorded in COC minutes, to support the documentation.

--Late-filed fees shall apply according to paragraph 21.--

H Establishing Intent of Planting

Producers must establish to the satisfaction of COC that:

- all cropland feasible to plant but prevented from being planted was affected by a natural disaster rather than a management decision

Note: The unavailability of equipment, seed, or fertilizer, even if this unavailability is because of or related to the natural disaster, is **not** an eligible cause of prevented planting.

- preliminary efforts made by the producer to plant the crop are evident, such as disking the land, orders for purchase, delivery of seed and fertilizer, or financing documents.

24 Prevented Planting Acreage (Continued)

*--I Late-Filed Fees for Late-Filed CCC-576's

A late-filed CCC-576 requires assessing a late-filed fee to verify and determine the crop, acreage, and use. The late-filed fee is equal to the measurement service fee according to paragraph 460.--*

J Verifying Prevented Planted Acreage Claim

Verify prevented planted acreage by 1 of the following methods:

- crop insurance data if the data supports FSA-578
- field visit
- COC knowledge.

Example: If COC has knowledge that an area is affected by a natural disaster, COC can approve the acreage without performing a field visit as long as the claim was timely filed according to subparagraph F.

K Processing Prevented Planting Acreage Claim

CCC-576 shall be processed according to this paragraph, but marked as “Not for NAP” if it is only for acreage that is not covered by NAP.

CCC-576, Part B shall:

- be completed by the producer or farm operator
- provide sufficient information for COC to determine that the claimed prevented planting or damage to specific acreage or crop was the result of natural disaster and not a management decision
- be date-stamped when received by the County Office

Note: A photocopy of the date-stamped completed CCC-576 shall be given to the producer as evidence of filing.

- be reviewed and acted on by COC or a representative.

Notes: County Office shall publicize to all producers that prevented planting acreage claims will only be accepted on CCC-576.

For the purpose of prevented planting acreage claims, see Exhibit 7 for instructions on how producer shall complete CCC-576.

24 Prevented Planting Acreage (Continued)**L Review Prevented Planting Acreage Claim**

COC shall review each CCC-576, Part B and determine whether:

- notice of loss has been filed according to subparagraph F or G
- the claimed disaster condition or period, in CCC-576, item 9, appears reasonable and meets the definition of “natural disaster”
- a field visit is required to verify information on CCC-576 according to subparagraph I.

M Prevented Planted History

Beginning with the 2009 crop year, using prior years’ planting history will no longer be considered when making determinations for prevented planted acreage claims. COC shall determine that all other prevented planted requirements are met according to this paragraph.

N Approving Prevented Planted Acreage Claim

COC must make a determination of eligibility on each request for prevented planting acreage credit filed by a producer. COC may request the producer show there was intent to plant the acreage by providing documentation of field preparation, seed purchase, and other information that shows the acreage could have been planted and harvested under normal conditions. If COC is not satisfied with the supporting documentation provided, then the request shall be denied.

If the County Office is notified that a case involving prevented planting is under review by other USDA agencies, such as OIG or RMA, or crop insurance companies, COC shall not make a determination on the request for prevented planting until the claim has been resolved by the other agency or crop insurance companies.

COC shall, before approving prevented planting, be satisfied that:

- the prevented planting acreage was reported according to subparagraph F or G
- the producer intended to plant the crop acreage for harvest
- other producers in the area were similarly affected

Note: Failure to plant the crop when other producers in the area were planting the crop should result in the disapproval of the prevented planting claim.

24 Prevented Planting Acreage (Continued)

N Approving Prevented Planted Acreage Claim (Continued)

- the reason the crop acreage could not be planted was because of natural disaster and not a management decision
- for a crop type with a single planting in a crop year, the eligible cause of loss occurred:
 - after the final planting date for the same crop type in the previous crop year
 - before the final planting date for the same crop in the crop year the request for prevented planting credit is filed
- for a crop type with multiple plantings in a single crop year, the eligible cause of loss occurred:
 - after the final planting date of the final planting period for the same crop type in the previous crop year
 - before the final planting date of the same crop type for the planting period the request for prevented planting credit is filed
- generate a letter to the producer or producers filing CCC-576, Part B according to instruction in 1-NAP.

Notes: Approved prevented planted acreage shall be limited to the number of acres physically able for planting.

To ensure accuracy of the acreage being reported, land that is destroyed to the extent that the acreage cannot be restored or the acreage is no longer tillable may need to be reclassified.

O Disapproving Prevented Planted Acreage Claim

Notify, in writing, each producer with an interest in the specific acreage or crop when COC:

- disapproves entire acreage claimed on CCC-576, Part B
- approves less than the entire acreage claimed on CCC-576, Part B.

Notification letter shall include the determination along with a detailed explanation supporting the determination and a right of reconsideration to COC according to 1-APP.

24 Prevented Planting Acreage (Continued)

P Recording Prevented Planted Acreage

Producers with claimed prevented planting acreage shall report acreage on FSA-578. COC must make a determination of eligibility on each CCC-576, Part B request for prevented planting credit.

See paragraph 84.5 for recording prevented planted acreage claimed on CCC-576.

24.5 Failed Acreage

A Definition of Failed Acreage

Failed acreage is acreage that was timely planted with the intent to harvest, but because of disaster related conditions, the crop failed before it could be brought to harvest.

B Proof of Failed Acreage

Producers who are requesting failed acreage credit shall prove to COC's satisfaction that:

- the crop was planted with the intent to harvest using farming practices consistent for the crop and area
- the acreage failed because of disaster-related conditions.

Note: CCC-576 should be processed according to 1-NAP, paragraph 401, but marked as "Not for NAP" if it is only for a failed acreage determination that does not have a NAP policy.

C Requesting Failed Acreage Credit

To be approved as failed acreage, the acreage must have been reported as failed acreage before the disposition of the crop; and the acreage must have been planted under normal conditions but failed as the result of a natural disaster and not a management decision.

Exception: RMA data may be used to approve CCC-576 for failed acreage, when reported after the disposition of the crop, if the failed acreage was reported timely to RMA and supports the failed acreage information reported on FSA-578. **This exception does not apply to NAP.** See subparagraph 21 A for accepting late-filed FSA-578's.

25 Double-Cropping

A Approved Double-Cropping

* * * Approved double-cropping occurs when the following are met:

- the 2 specific crops have the capability to be planted and carried to maturity for the intended use, as reported by the producer, on the same acreage within a crop year under normal growing conditions
- specific combination of crops recommended by COC is approved by STC.

***--Note:** A crop following a cover crop terminated according to termination guidelines, as outlined in paragraph 23.6, is approved double-cropping. These combinations do not have to be approved by STC.--*

Example: A fall planted small grain intended for green manure (GM) followed by spring planted corn intended for grain (GR) can be considered an acceptable double-crop combination. The intended use grain (GR) for the corn crop would require the corn to be planted at such time in combination with the small grain intended for green manure to allow the corn to reach the hard dough stage.

One or both of the crops could have been prevented from planting and/or failed as long as both of the crops had reasonable expectations and realistic possibilities of being carried to maturity for the intended use within the same crop year under normal growing conditions.

***--Notes:** See 1-ARCPLC, paragraph 291 for definition of double-cropping FAV's or wild--* rice with covered commodities, peanuts, grain, or lint.

Approved STC double-cropping combination lists for previous crop years shall **not** be altered.

*--41 Establishing Crop Characteristics (Continued)

B Requesting Additional Crops, Types, and/or Intended Uses (Continued)

- indicate either or both of the following in the New Product Request:
 - the request is for the addition to Product Master, for purposes of acreage or inventory reporting
 - the request is for determination of NAP crop eligibility

Note: Ensure that the request is handled according to 1-NAP.

- provide sufficient information in the request, justifying the addition of the crop, type, or intended use

Note: The justification documentation should, at a minimum, answer the following questions.

- Is the crop or type currently listed in Product Master under another name or synonym?
- What specific differences are there in the product being requested and the products already available in Product Master?
- What are the differences in the characteristics of the product being requested, such as prices and yields?
- How many producers are attempting to report the new product and how many acres is each producer reporting?
- select “County Office Completed by” in the “Partner Functions” transaction block, and verify that the name of the County Office employee completing the request is loaded
- e-mail or call the State Office notifying them of the new request pending State Office review.

Note: The New Product Request is **not** a workflow transaction and will **not** automatically be sent to another FSA employee to take action. An e-mail or telephone call is required to notify the next level to review the request.--*

41 Establishing Crop Characteristics (Continued)**B Requesting Additional Crops, Types, and/or Intended Uses (Continued)**

State Offices shall:

- use the “Search Requested Products” query in CRM/Product Master to locate the pending New Product Request
- review the information provided by the County Office in the request
- enter the reason for the approval or rejection in the “Note” section, and attach additional supporting documentation as necessary
- edit the “Partner Functions” transaction block, select “State Action Completed by”, and load the name of the reviewing State Office employee
- edit the Interaction Log Details and change the status code to “State Approved” or “State Rejected”
- if the request is approved by the State Office, e-mail Mary Carey at ***--mary.carey@wdc.usda.gov** for National Office review--*
- if the request is rejected by the State Office, e-mail the requesting County Office to notify them of the decision.

Requests for additions will **not** be considered unless all required parts are included.

Once the National Office reviews the request, an e-mail will be sent to all parties involved in the New Product Request (State and County Offices), notifying them of National Office approval or rejection.

The status of the New Product Request can be viewed at any time within CRM. In addition to the requesting County Office, all FSA employees can view all pending and completed New Product Requests throughout the United States, and the current status of each request.

74 Variety and Type Selection

A Selecting Crop Variety and Type

Select the proper crop variety and type from Exhibit 10.5 based on producer input for crop year 2003 and subsequent years.

Warning: Selection of the correct variety and type code for crops is crucial to identify type *--for correct program benefit. If the specific type or variety is **not** listed, use the New Product Request in CRM to request additional crops and/or types--* according to paragraph 41.

B Selecting Soybean Variety and Types

Selection of the correct variety and type code for soybeans is crucial to protect loan eligibility and identify type for correct potential NAP benefit rates.

Refer to the following:

- 2-LP Grains and Oilseeds for loan eligibility
- 1-NAP (Rev. 1) for NAP eligibility.

75 Intended Use Codes

A Determining Proper Codes

Intended use codes can affect eligibility for NAP benefits, loans, CRP, SURE, ACRE, etc.

Follow subparagraph B for CRP.

*--**Note:** The intended use code “CO” (Cover Only) shall be used to report cover crops according to paragraph 23.6. Intended use code “GM” (green manure) and “LS” (left standing) should no longer be used to report cover crops.--*

Follow Exhibits 10.5 and 11 to determine proper status and intended use codes for a current year’s crop.

Note: The intended use codes “CO” (Cover Only), “GM” (Green Manure)”, and “LS” (Left Standing) have been added to all small grains. These codes are to be used to identify crops planted as a cover crop. If the crop was planted with the intent to harvest or graze, the “CO”, “GM”, and “LS” codes should not be used.

Warning: Selection of the correct variety and type code for crops is crucial to identify intended use for correct program benefits. If the specific intended use is **not** listed, use the New Product Request in CRM to request additional crops intended uses according to paragraph 41.

Actual use is not captured in the System 36. If an actual use is reported by the producer, the actual use shall be notated on the hardcopy FSA-578 and initialed by the producer.

75 **Intended Use Codes (Continued)****A Determining Proper Codes (Continued)**

*--In CRM/Product Master, each intended use for a product has a “valid from” and “valid to” date that defines the time period that product and intended use are applicable for FSA transactions, such as acreage or inventory reporting. These dates do **not** define program eligibility or ARD’s.

B CRP Intended Use Codes

CRP intended use codes are listed in this table. The numeric intended use codes are only used when reporting acreage for 2012 and prior years. For 2013 and subsequent years, there are no intended use codes for CRP. The CRP codes and description are included in the type code and type name. See Exhibit 10.5.--*

Definitions of Terms Used in This Handbook (Continued)

Attribute

Attribute means descriptive data attached to CLU.

Chain Tape

Chain tape means a metal measuring tape, graduated in chains and links. One chain is equal to 100 links or 66 feet. One link is equal to 7.92 inches.

Common Land Unit (CLU)

CLU (formerly known as a field) means the smallest unit of land that has a permanent, contiguous boundary, common land cover and land management, common owner, and common producer association.

Common Land Unit (CLU) Layer

CLU layer means a digital layer made up of a county's CLU's.

Contact Prints

Contact prints mean 12- by 12-inch prints of aerial photographs overlapping 50 percent from photo-to-photo, going from north to south and from east to west.

Cover Crop

*--Cover crop means crops, including grasses, legumes, and forbs, for seasonal cover and other conservation purposes. Cover crops are primarily used for erosion control, soil health improvement, and water quality improvement. The cover crop may be terminated by natural causes, such as frost, or intentionally terminated through chemical application, crimping, rolling, tillage, or cutting.

Note: A cover crop managed and terminated according to NRCS Cover Crop Termination Guidelines is **not** considered a crop for crop insurance purposes.--*

Coverage

Coverage is the total ground area covered by a slide. The coverage area is about 21 percent larger than target area. This eliminates the need to use the edges of the slide, which may be distorted.

Crop Reporting Date

The crop reporting date is the latest date the FSA Administrator will allow the farm operator, farm owner, or their agent to submit a crop acreage report for the report to be considered timely.
