Amendment 97

Approved by: Acting Deputy Administrator, Farm Programs

Bradley Karmen

Amendment Transmittal

A Reasons for Amendment

Subparagraph 16 A has been amended to update the reference in the first paragraph to Exhibit 6.5.

Paragraph 20 has been amended to update the title and refer users to Par. 317.5 for map printing in the CARS Application.

Subparagraph 25 A has been amended to provide that both conditions must apply when approving double cropping.

Subparagraph 314 K has been withdrawn because the instructions are not needed.

Subparagraph 317 B has been amended to provide a reference map printing (paragraph 317.5).

Paragraph 317.5 has been added to provide information on map printing in the CARS Application.

Subparagraph 321:

- A has been amended to update program spot check programs/activities
- B has been amended to update the timeline for completing spot checks and loading results, and to update the hyperlink.

Subparagraph 322 E has been amended to update available resources.

Subparagraph 323 A has been amended to require documentation of person who made refusal, if known.

Subparagraph 349.5 B has been amended to provide additional ARCPLC compliance review questions.

Subparagraph 352 D has been amended to update the paragraph reference.

Amendment Transmittal

A Reasons for Amendment

Subparagraph 354.5 B has been amended to provide updated MPP compliance review questions.

The following paragraphs have been withdrawn because compliance reviews are no longer required for the program areas:

- paragraph 351
- paragraph 357
- paragraph 357.5
- paragraph 357.9
- paragraph 357.10
- paragraph 357.13

Subparagraph 360 A has been amended to clarify that County Offices must complete spot checks and record results by the Survey End Date.

Subparagraph 361 A has been amended to clarify that survey questions are automatically saved to the database upon clicking “Next”.

Exhibit 6.5 has been amended to correct or add ARD’s for Illinois, Indiana, Michigan, New Jersey, North Carolina, and Virginia.

Exhibit 10.5 has been amended to provide updates for crop data made in CVS/Product Master, clarify some policy around crop data, and provide more information on accessing work instructions for viewing and requesting crop data in CRM/Product Master.

Part 2 Acreage Report Procedures

Section 1 Responsibilities, Guidelines, and Reporting Dates

15 Using FSA-578

A Introduction

County Offices shall use FSA-578 to collect data relating to crops. The data collection is to:

- determine compliance with farm programs
- verify compliance with HELC and WC provisions
- collect data for FSA and other USDA agencies for program decisions
- determine producer eligibility for loans and LDP's
- *--determine crop and producer eligibility for ARC/PLC, ELAP, Livestock Forage--*
Disaster Program, NAP, SURE, and TAP.

B Accepting Acreage Reports

The following describes the steps to take when accepting an acreage report.

Step	Action
1	Enter crops and acreage data on FSA-578 provided by an individual or entity identified in subparagraph 16 D.
2	Review the data with the person reporting to ensure that: <ul style="list-style-type: none"> • all applicable crops, types, and intended uses are included • the farm is in compliance, if applicable.
3	Perform any measurement service that was requested.
4	Provide a copy of FSA-578 and aerial or digital photocopy.
5	Perform inspections and apply tolerance rules, when applicable.
6	Send operator FSA-468 or FSA-409, as applicable.
7	Process redetermination requests.
8	COC makes determinations according to Part 3, Section 4.
9	Process payment reduction reports and notification letters, if applicable.

Note: A manual FSA-578 may be accepted only when the automated FSA-578 is **not** available. All manual FSA-578's must be loaded in the automated FSA-578 once the system becomes available.

16 Required Acreage Reports

A Importance of Accurate and Timely Reporting

Filing an accurate and timely acreage report for all crops and land uses, including failed acreage and prevented planted acreage, can prevent loss of benefits for programs listed in the following table. FSA-578 certification must be filed for the farm by the applicable final reporting date in Exhibit 6.5. For producers reporting NAP crops, see 1-NAP, paragraphs 375 and 376 for additional acreage reporting requirements. Acreage reports and requests for disaster credit for:

- prevented planted acreage and credit must be submitted no later than 15 calendar days after the final planting date for the applicable crop

Notes: Beginning in 2007, the final planting date for each crop is based on final planting dates established by RMA for insurable crops and NCT planting dates for noninsurable crops.

If no date is established by RMA, COC may establish final planting dates for insurable and non-insurable crops in a county with approval from STC. When establishing final planting dates COC shall take into consideration the applicable dates established for surrounding counties.

- failed acreage and credit must be sought before:
 - the crop acreage is destroyed
 - disposition of the crop.

Benefit	Acreage Reporting Requirement	Reason for Requirement
MAL's and LDP's	All cropland on the farm on which the crop pledged as loan collateral or LDP was produced.	<ul style="list-style-type: none"> • Authorized by the Agricultural Act of 2014, Section 1118(c). MAL's and LDP's are in subtitle (b). • Needed to determine reasonableness of claimed production.
CRP annual rental payment	CRP acreage according to CRP-1 Appendix.	Needed to determine that the producer has maintained CRP acreage.
NAP	Crop acreage for which NAP benefits may be requested.	Needed to establish eligibility of the crop and producer for NAP benefits.

20 Crop Data on the Hard Copy Maps

A What to Include on Hard Copy Maps

--The hard copy maps will be used to record the following information before data is-- entered on FSA-578:

- farm number
- tract number
- field/subfield number
- crop
- intended use
- number of acres
- approximate boundaries of the crop
- skip-row pattern, when applicable.

*--**Note:** For additional information on maps printed using the CARS Application Map, see paragraph 317.5--*

B Review for HEL Noncompliance

Use the following table to review hard copy maps to identify potential HELC or WC noncompliance if FSA-578 was completed and an agricultural commodity is planted on either of the following:

- a field for which HEL determination is not made
- land designated as WC.

IF...	THEN...
any producer on the farm has filed AD-1026	prepare FSA-569 and refer to NRCS for a determination according to 6-CP.
no producer on the farm has filed AD-1026	<ul style="list-style-type: none"> • explain to the producer who certifies on FSA-578 that the report indicates a potential HELC or WC noncompliance, which will be verified if any producer on the farm requests USDA benefits • maintain a record of the potentially ineligible producer who is associated with land on which there is a potential noncompliance • prepare FSA-578 for the farm and refer to NRCS for a determination if any producer on the farm files AD-1026.

21 Late-Filed Report of Acreage

A Accepting Late-Filed FSA-578

*--COC may accept a late-filed FSA-578 for processing when all of the following apply:

- the producer filing the late-filed report pays the cost of a farm visit and the costs of--* verification and determination of crop acreage

Note: See subparagraph D to determine when to charge a late-filed fee.

- physical existence of the late-filed crop or crop residue for the crop year being reported exists, if applicable, according to subparagraph E

Exception: RMA data may be used as evidence to accept a late-filed FSA-578 when physical evidence of the crop or crop residue does **not** exist, if the crop information is reported timely to RMA and supports the crop information reported to FSA. * * *

- the crop's use can be verified
- *--the crop's acreage for the specific crop year can still be determined by FSA.

Example 1: A producer files FSA-578 for Field 1 on the farm by the reporting deadline. After the reporting date, the producer late-files FSA-578 for Field 2. This is considered a late-filed FSA-578.

Example 2: A producer reports corn as the initial crop on Field 1 of the farm by ARD. The producer then late-files FSA-578 reporting wheat in Field 1 as the initial crop. This is a late-filed FSA-578 resulting in a modification of an existing status code.

Example 3: A producer timely reports corn as the initial crop on Field 1 of a farm. The producer requests to revise the crop from corn to soybeans on Field 1 at a later date. This is considered a revision according to subparagraph 22 B.

B Late-Filed FSA-578 for NAP APH, CRP Cropping History, FSFL History, or P&CP Acres and Subsequently Planted Crop Acreage for 2009 Through 2012

A late-filed FSA-578 may be accepted for processing after physical existence of the crop or crop residue is gone if the producer:

- is reporting acreage for establishing APH data base for NAP eligibility purposes, cropping history for CRP purposes, or FSFL history--*

25 Double-Cropping

A Approved Double-Cropping

--Approved double-cropping occurs when both of the following are met:--

- the 2 specific crops have the capability to be planted and carried to maturity for the intended use, as reported by the producer, on the same acreage within a crop year under normal growing conditions
- specific combination of crops recommended by COC is approved by STC.

Note: Crops planted for cover are not considered a crop because cover crops are terminated, and therefore, are not approved for double-cropping. See paragraph 23.6 for terminating cover crops.

Example: A fall planted small grain intended for cover only (CO) followed by spring
--planted corn intended for grain (GR) is not considered an acceptable--
double-crop combination.

One or both of the crops could have been prevented from planting and/or failed as long as both of the crops had reasonable expectations and realistic possibilities of being carried to maturity for the intended use within the same crop year under normal growing conditions.

Notes: See 1-ARCPLC, paragraph 291 for definition of double-cropping FAV's or wild rice with covered commodities, peanuts, grain, or lint.

Approved STC double-cropping combination lists for previous crop years shall **not** be altered.

I Options Available on the Certify by Producer Screen

The following options are available on the Certify by Producer – Crop Selection Screen.

Button	Results
Certify	Click this button to certify crop acreage for the selected producer.
Uncertify	Click this button to uncertify crop acreage for the selected producer.
Certify and Print	Click this button to certify crop acreage for the selected producer and generate the producer print.
Back	Click this button to return to the Certify by Producer – Producer Selection Screen.

J Certifying Crops by Producer

Follow instructions in this table to certify crops for the selected producer.

Step	Action	Result
1	On the Acreage Report Search Screen, enter the applicable farm number or search for a producer in SCIMS. CLICK “Submit”.	The Crop Acreage Reports screen will be displayed.
2	CLICK “Certify by Producer”.	The Certify by Producer - Producer Selection Screen will be displayed.
3	Select the applicable producer to certify. CLICK “Submit”.	The Certify by Producer – Crop Selection Screen will be displayed with all fields for all farms associated with the selected producer by tract.
4	Select the applicable field(s) to be certified. CLICK “Submit”.	The message “The selected crops have been certified” will be displayed on the Certify by Producer Screen.

315 Farm Summary Review**A Overview**

Users have the capability to select a farm for viewing a complete summary of crop data attributes reported at the farm level. The summary will be displayed with a complete list of all crops or commodities associated with the farm and a farm level GIS map.

Users shall click the check box for cropland and/or non-cropland to view applicable cropland and/or non-cropland boundaries for tracts on the farm. Tract and field boundaries will be displayed as yellow.

Notes: Wetland points for the farm will be displayed when applicable.

Maps will be available beginning with the 2015 crop year. The message “Unable to retrieve GIS mapping data” will be displayed when a map is not available for the farm.

A Overview

Beginning in 2015, the CARS Application has the capability to print farm maps displayed at the tract level. These maps are available to be printed for ad hoc purposes particularly in incidences when CITRIX is unavailable, or no other up-to-date hard copy maps exist.

Note: Regardless of the program year selected, because of software limitations only the current year imagery and CLU for that specific year will be displayed within the application.

Part 3 Compliance Reviews and Spot Checks

Section 1 General Guidelines, Applicable Programs, and Selection Process

321 Introduction

A Purpose

County Offices are required to conduct farm inspections to ensure that producers comply with FSA program requirements.

Producers are selected for compliance reviews and spot check through a national selection process. Producers selected shall be spot checked and reviewed for the following programs/activities:

- ARCPLC
- BCAP
- CRP maintenance and practice checks
- CTAP
- ECP
- EFRP
- ELAP
- FSA-578's
- HELC/WC compliance
- LDP's/MAL's
- LFP
- LIP
- * * *
- MPP
- NAP
- RTCP
- * * *
- TAP.

* * *

B Time of Inspection

County Offices shall conduct inspections on producers selected through the national selection process at times applicable for the specific program/activity involved. County Offices shall *--follow applicable program procedure for timing of inspections. All spot checks must be completed and results must be recorded in the National Compliance Review database before the survey end date according to paragraph 360.--*

322 National Compliance Review and Spot Check Selections

A National Producer Selection Process

Rather than selecting individual farms, loans, contracts, etc., for compliance reviews, a nationwide selection of producers will be made annually by the National Office using a statistical sampling method. Producers will be selected based on their participation in various programs. FSA employees, committee members, and other required producers are included in the national selection.

Note: Because FSA employees, STC and COC members and other “required producers” are included in the national selection, County Offices shall no longer conduct separate spot checks on required producers.

Early each calendar year, the National Office will post the listing of producers selected for annual compliance reviews on the Intranet at

--<http://fsaintranet.sc.egov.usda.gov/ffas/farmbill/ccc/default.htm>--

The national producer selection list will be broken down by State and county. Under each county, the list will display the following:

- producer first and last name and/or business name
- tax ID type (“E”ntity or “S”ocial).

Notes: In some cases, there may be multiple producers in the county with the same name. If County Offices have concerns about which producer has been selected for spot check and review, the County Office shall contact the State Office. The State Office shall contact the National Office for TIN for the selected producer.

Producers may operate as an individual and an entity. The national producer selection list will identify the tax ID type associated with the selected producer. County Offices shall only review farms, loans, contracts, etc., associated with the tax ID type listed.

Example: Joe Farmer farms as an individual and also farms as a member of a partnership. Joe Farmer was selected for 2007 compliance reviews. The national producer selection list included his first and last name and the tax ID type S. In this example Joe Farmer was selected as an individual (based on his tax ID type). Therefore, County Offices shall only check/review farms, loans, and contacts he is associated with as an individual.

Producers will be listed for each State/county they are associated; thus, compliance reviews and spot checks may be performed for a producer in multiple States/counties depending on the scope of the operation.

County Offices shall print and maintain the list of producers selected in their county. The National Office will **not** make another selection of producers for the year.

Note: Not all States and counties may have producers selected for spot check and review.

322 National Compliance Review and Spot Check Selections (Continued)**B DD Concurrence for Nonparticipating Selected Producers**

Because the national selection process is based in part on prior years' payments and program participation, some producers selected may not be farming or participating in FSA programs for the current year.

If a County Office determines a producer is not farming for the current year, the County Office shall:

- notate "N/A" by the producer's name on the national producer selection list to indicate that the producer is not participating in FSA programs for the year
- forward the list to DD for review and concurrence.

DD's shall review, initial, and date the list indicating their agreement that the producer is not farming or participating in FSA programs for the year.

C Adding Additional Producers for Spot Check/Review

Only the producers identified on the national producer selection list are required to be spot checked and reviewed for the programs listed in subparagraph A. However, State and County Offices may spot check any producer not identified on the national producer selection list if there is reason to question the producer's compliance with any program provisions.

D County Office Responsibilities

County Offices shall:

- perform compliance reviews on all producers selected under the national selection process throughout the year for all programs and/or activities listed in subparagraph 321 A--*

Note: County Offices shall follow Section 2.5 when performing compliance reviews/spot checks.

322 National Compliance Review and Spot Check Selections (Continued)

D County Office Responsibilities (Continued)

- when conducting compliance reviews and spot checks, County Offices shall check:
 - for FSA-578 spot checks, the current year FSA-578, as well as any prior year FSA-578 that has been revised since the last spot check list

Note: When reviewing prior year FSA-578's, County Offices shall ensure that the correct documentation is on file according to 2-CP.

 - *--for all other programs, any application/contract that has been enrolled and/or--* approved for payment since the last spot check list
- document questions from each program area to record in the National Compliance Review Database according to paragraphs 360 and 361.

E Available Resources

County Offices may use the following resources as tools to assist them in identifying the specific programs selected producers are participating in:

- web-based FSA application reports
- Note:** Approved application reports are available for most web-based applications, *--including ARCPLC, LFP, LIP, and TAP, and identify producers with approved--* applications.
- farm records to identify active farms for selected producers
 - NPS to identify program payments selected producers received
 - Financial Web Application Data Mart to identify program payments received for a specific date range by selected producers
 - * * * CLPS for 2015 and subsequent years, and eLDP to identify MAL and LDP payments producers received in a specific county
- * * *
- CCMS that contains numerous reports identifying producers with active CRP contracts
 - COC meeting minutes to identify applications/contracts approved for various programs.

323 Refusals to Permit Farm Entry**A Producer Refuses Entry**

If a producer refuses to permit an FSA representative to enter the farm, the representative shall:

- immediately notify CED
- document the following on FSA-578, remarks section:
 - refusal date
 - *--person who made the refusal, if known--*
 - reason for refusal
 - acreage estimate, if obtainable
- sign and date FSA-578, remarks section.

B County Office Action

When advised of a refusal to permit entry, the County Office shall immediately notify the farm operator, in writing, of the following:

- refusal date
- person who made the refusal
- person who was refused entry
- consequences of refusal to permit entry. See subparagraph C.

After notifying the farm operator of the situation and the options available, the FSA representative shall make no further effort to enter the farm.

If the producer does not respond to the letter, or continues to refuse entry, consider all producers on the farm ineligible for program benefits.

323 Refusals to Permit Farm Entry (Continued)

C Consequences of Refusing to Permit Entry

The following provides consequences of refusing to permit entry.

B CRP Acreage/Practice Reviews

Perform spot-check inspections on CRP acres as follows.

- CRP acres are not subject to spot check until NRCS has completed the final status review.

Exception: Spot-check before the final status review if emergency use is authorized.

- After final NRCS status review has been received, perform spot-checks through on-site inspections for participating producers selected according to subparagraph 322 B to verify that CRP acreage and practices are being maintained according to 2-CRP.--*

351 (Withdrawn--Amend. 97)

352 FSA-578/Crop Acreage Compliance Reviews**A Introduction**

County Offices shall:

- perform acreage spot checks to ensure the accuracy of reported acreage
- conduct acreage spot checks on all:
 - producers selected in the county through the national compliance review/spot check selection process in subparagraph 322 A
 - late-filed acreage reports filed for crops according to subparagraph 21 A.

B Time of Inspection

County Offices shall inspect farms before evidence of the crop is destroyed.

C When to Use Ground Compliance

County Offices shall use ground compliance to determine acreage when digital imagery is not received or is not received timely.

D Performing Reviews

The entire acreage for the crop reported on FSA-578 must be spot checked.

If a selected producer is a field rent tenant on a farm that has several tenants and landowners, County Offices must check the entire crop acreage of the crop that the selected producer has an interest in, not all crops on the farm.

Example: Producer A is a tenant on the farm and only has control of 10 acres on which he has planted corn. Producer A is selected for spot check. In this case, the County Office must check all of the corn on the farm. The County Office does not have to check any other crops on the farm unless Producer A plants another crop.

E Recording Determined Acreage Results

County Offices shall:

- *--enter acreage determinations in the FSA-578 software according to paragraph 319--*
- use FSA-468 software to notify producers of spot check results.

352 FSA-578/Crop Acreage Compliance Reviews (Continued)**F Data Entered into the National Compliance Review Database**

For all producers selected for compliance review and spot check according to the national compliance selection process in subparagraph 322 A, the following data shall be recorded for entry into the National Compliance Review Database. See paragraphs 360 and 361 for instructions on accessing and entering data in the National Compliance Review Database.

- How many farms does the selected producer have an interest in? Enter the number of farms. For each farm and crop, enter “Yes” or “No” to the following.
 - Is producer out of tolerance on acreage?
 - If yes, did COC determine producer knowingly and willfully submitted an inaccurate FSA-578?

353 HELC and WC Compliance Reviews**A Introduction**

This paragraph describes the processes and responsibilities of FSA and NRCS in performing HELC and WC inspections and determinations.

County Offices shall conduct HELC and WC inspections at the same time as regular compliance inspections and be on the alert for potential violations of conservation compliance provisions.

NRCS is responsible for conducting spot checks to ensure that producers are actively applying their conservation plan.

B Who Makes HELC Inspections

FSA shall check for potential noncompliance with HELC provisions while conducting regular compliance spot checks.

NRCS will make HELC spot-check determinations for:

- potential noncompliance referred by FSA on FSA-569
- a random selection of conservation plans.

C Spot-Checking HELC

FSA shall review farms for producers selected for spot check to identify potential HELC noncompliance. A potential noncompliance on spot-checked farms may be identified by:

- current year imagery, if available, or field observations with the CLU layer
- reviewing past FSA records
- County Office knowledge of farming practices in the area.

Section 3 National Compliance Review Database**359 General Information****A Purpose**

The National Compliance Review Database is used to collect data and generate reports from compliance review and spot check findings. At the County Office level, access to the database is restricted to data entry only. Reports will be generated at the National Office level. State Offices will be notified of reporting results and any necessary corrective action.

In addition to sharing compliance results with State Offices, PECD will also share reports with other FSA divisions. The reports will consist of an analysis that identifies any discrepancies, noncompliance trends, and common problems, including errors resulting in improper payments, and steps taken to reduce them. This information will assist FSA in:

- identifying noncompliance trends
- directing limited resources to known problem areas
- improving the integrity of FSA programs.

B Time of Data Entry

Data shall be entered as soon as compliance reviews and spot checks have been completed. Data for all programs is **not** required to be entered at the same time.

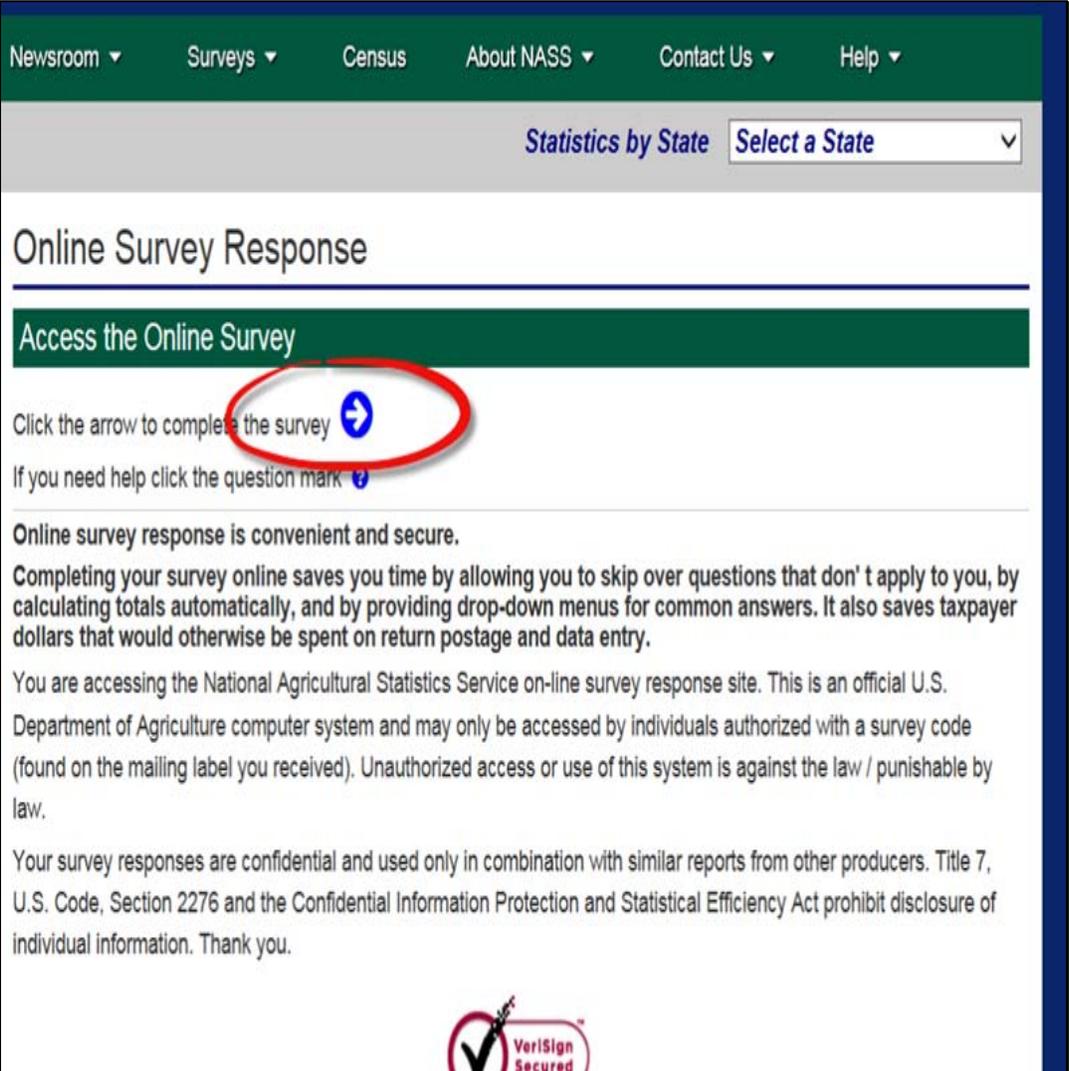

***--Note:** If software is **not** available, County Offices shall hold spot check results in a manual pending file until advised that software is available.--*

361 Data Entry and Navigation Instructions for the National Compliance Review Database

A Entering Data

County Offices may enter compliance review and spot check findings in the National Compliance Review Database throughout the year as reviews and spot checks are completed. All program surveys do not have to be completed at the same time.

If a user has to exit a survey before all data has been entered, CLICK **“Save and Return Later”** located at the top of each survey screen. This will save the data entered and provide County Office users the ability to re-access the survey at a later date and finish entering data.

The “N/A” button is available in the upper left hand corner of each program survey. County Offices shall use the “N/A” button to indicate that the selected producer did not participate in the program for the year.

Example: If a producer selected for spot check only filed FSA-578’s and participated in DCP, County Offices must document all questions for the FSA-578 survey and the DCP survey. Even though the producer did not participate in any other programs, County Offices shall still access each program survey and CLICK “N/A”. This will indicate in the system that the producer did not participate in the program for the year.

* * *

County Offices shall follow the steps in the following when using the “N/A” button.

Step	Action	Result
1	Access the applicable program survey.	Screen will be displayed with all survey questions.
2	CLICK “N/A” in the upper left hand corner of each survey screen.	Check (✓) will be displayed in the box.
3	Scroll down to the last question of the survey and select “No” to the final question.	
4	CLICK “Next”.	A screen will be displayed notifying the user the survey has been successfully completed.
5	CLICK “New Survey” to access a new survey for the producer. CLICK “New Producer” to enter compliance review and spot check results for a different producer.	Available Survey Screen will be displayed allowing user to select another program survey to enter compliance review results. NASS Welcome Screen will be displayed allowing user the option to enter a survey code for a different producer.

361 Data Entry and Navigation Instructions for the National Compliance Review Database (Continued)

B Navigating Through the Screens

Use the mouse or tab key to move from question to question on a page. Use the scroll bar on the right side of the screen as necessary. CLICK “Next” to move to the next screen.

C Exiting the Database

The survey can be exited at any time, however, CLICK “Save & Return Later” to save the data entered on the current page. To return to a saved survey, go to **<http://www.agcounts.usda.gov>** and enter the survey code for the applicable producer when prompted. When returning to an individual’s survey, the data previously entered will be displayed. Enter additional data or make changes to the existing data.

D Contact Information

County Offices shall contact their State Office if they are experiencing problems or have questions on entering data into the National Compliance Review Database. State Offices can *-e-mail questions or concerns to Gwen Uecker at **gwen.uecker@nd.usda.gov**.*

2003 and Subsequent Year Crops Reported on FSA-578

The following lists the crop names, crop codes, abbreviations, intended uses, and land uses for crops *--and commodities reported on FSA-578.

Notes: Except for sorghum, crops historically reported with intended uses of “Silage” (SG), “Haying” (HY), “Green Chop” (GC), or “Haylage” (HG) shall now be reported with an intended use of “FG”.

Hybrid seed shall be reported as the intended use of “Seed” (SD) associated to the applicable crop.

When a small grain crop is planted and had 2 intended uses of grain and grazing, the intended use of Grain/Grazing (GS) shall be used.

In SAP/CRM, crop and type combinations will be represented as a single “product”.

Example: Apple, Common and Apple, Specialty are 2 different products found within Product Master. Also, the FSA crop and type codes will be included in Product Master as “CVS crop and type”, such as “0054-COM” and “0054-SPC”.

Note: For 2017 and subsequent years, the “cover only” (CO) intended use was replaced with “cover crop”.--*
