

UNITED STATES DEPARTMENT OF AGRICULTURE

Farm Service Agency
Washington, DC 20250

Acreage and Compliance Determinations
2-CP (Revision 16)

Amendment 29

Approved by: Acting Deputy Administrator, Farm Programs

Amendment Transmittal

A Reasons for Amendment

Subparagraph 37 C has been amended to correct the drought level needed to meet prevented planted eligibility.

Exhibit 10 has been amended to remove "F" land use codes for Garbanzo beans.

TC	Text	Exhibit
	2-45, 2-46	10, pages 1-4

37 Prevented Planted Acreage Credit (Continued)**C Prevented Planted Acreage Credit Because of Drought**

Prevented planted acreage credit will not be given where the prevented planted acreage was affected by drought, unless all of the following apply:

- on the final date for non-irrigated acreage, the area that is prevented from being planted has insufficient soil moisture for germination of seed
- *--prolonged precipitation deficiencies that meet D3 or D4 drought level as determined--* by the U.S. Drought Monitor
- verifiable information must be collected from sources whose business or purpose is recording weather conditions as determined by FSA and the sources will include, but are not limited to:
 - U.S. National Weather Service
 - Bureau of Reclamation
 - U.S. Army Corps of Engineers
 - NIFA
 - NRCS
 - local irrigation authorities responsible for water allocations
 - State Department of Water Resources
 - CES
 - other sources responsible for the collection of water data or regulation of water resources (water allocations).

Prevented planted acreage credit applies to irrigated crops where the acreage was prevented planted because of a lack of water of an irrigated supply resulting from drought conditions, or contamination from saltwater intrusion of an irrigation supply resulting from drought conditions, if there was not a reasonable probability of having adequate water to carry out an irrigation practice.

37 Prevented Planted Acreage Credit (Continued)

D Ineligible Prevented Planting

Acreage ineligible for prevented planted credit includes, but is not limited to, acreage:

- not planted because of a management decision

Note: Failure to plant when other producers in the area were planting will result in the denial of the prevented planting claim.

- required to be left unharvested under the terms of the lease or any other agreement
- where any other person receives a prevented planted payment for any crop for the same crop year, unless double-cropping requirements have been met
- where pasture or another forage crop is in place on the acreage during the time that planting of the crop generally occurs in the area
- used for conservation purposes or intended to be or considered to have been left unplanted under any program administered by USDA, including CRP planting history or conservation plans indicated would remain fallow for crop rotation purposes
- affected by the containment or release of water by any governmental, public, or private dam or reservoir project, if an easement exists on the acreage affected for the containment or release of the water
- where there is an inadequate supply of irrigation water beginning before the RMA sales closing date for the previous crop year or the NAP application closing date for the crop according to 1-NAP, paragraph 300 through the final planting date of the current year

Note: See subparagraphs D and E for exceptions for ineligible acreage when irrigation water is reduced, and Exhibit 2 for the definition of an adequate water supply or source.

2003 and Subsequent Year Crops Reported on FSA-578

The following lists the crop names, crop codes, abbreviations, intended uses, and land uses for crops and commodities reported on FSA-578.

Notes: Except for sorghum, crops historically reported with intended uses of “Silage” (SG), “Haying” (HY), “Green Chop” (GC), or “Haylage” (HG) shall now be reported with an intended use of “FG”.

Hybrid seed shall be reported as the intended use of “Seed” (SD) associated to the applicable crop.

* * *

In SAP/CRM, crop and type combinations will be represented as a single “product”.

Example: Apple, Common and Apple, Specialty are 2 different products found within Product Master. Also, the FSA crop and type codes will be included in Product Master as “CVS crop and type”, such as “0054-COM” and “0054-SPC”.

Note: For 2017 and subsequent years, the “cover only” (CO) intended use was replaced with “cover crop”.

Crop Name	Crop Code	Crop Abbr	Type Name	Type Code	Intended Use	Land Use
